

Wireless Network Information

Bath County schools wireless network is divided into 3 segments. Each segment is configured to deliver filtered internet access based on the level of access needed for each user and device.

Below is a summary of each network's intended usage.

Bath Co Schools

This wifi network is for Guest access for student BOYD, all other BOYD users not employed at Bath County Schools and other devices not supported by the district. This also includes all vendors and outside agencies working onsite at BCS. This network is filtered to be age appropriate for students so some internet resources and services are unavailable.

BCS-Staff

Staff members are to use the BCS-Staff wifi network for "Bring your own device" (BOYD) only. Only a staff member's logon has permission to logon to the BCS-Staff wifi network. Staff members must be connected to BCS-Staff for Papercut mobility and other services to function on their BYOD device.

Do **NOT** connect district owned devices to this network. This includes all district owned chromebooks, chromeboxes, smart panels, windows laptops, All in Ones (AIO), traditional desktops and laptops to this network.

BCS

This wifi network is only for use with district owned devices. District owned devices must remain connected to BCS when onsite. All district only chrome devices and district owned Windows devices are configured to automatically connect to this network. Do **NOT** attempt to connect any personal devices to this network.

Connecting a device to the incorrect network will cause some services and websites not to work correctly. All networks at Bath County schools are scanned, filtered and logged for activity to be age appropriate and meet the requirements of state and federal law. By connecting to the network, you are agreeing to follow the Acceptable Use policy of Bath County Schools. Activity on all BCS networks are tracked to the individual sign-on and device. Do not allow another person to use your login credentials.
