**RE: Three-Year AHERA Asbestos Re-Inspection and Management Plan Update**  
**Re-Inspection Date: October - 2024**  
**Fairfield Public Schools – Burr Elementary School**  
**1960 Burr Street, Fairfield, CT.**  
Fuss & O'Neill Project No. 20190061.A70

Dear Mr. Papageorge:

This letter summarizes the Three-year Asbestos Hazard Emergency Response Act (AHERA) Asbestos Re-Inspection and Asbestos Management Plan (AMP) Update report prepared by Fuss & O'Neill, Inc. at the Burr Elementary School located at the 1960 Burr Street, Fairfield, Connecticut (the "Site"). The inspection was performed for Fairfield Public Schools (the "Client"). This report is an important document that must be kept on file at the school as well as at a central location where the AMPs are maintained.

The Burr Elementary School was constructed in 2003 and according to a written statement from the architect, no asbestos-containing building materials (ACBM) were specified for use in the building construction. A copy of the architect's letter is on file at the Site and the central location where the management plans are maintained. A copy of the letter from the Architect certifying that no ACBM was used in the renovation is attached.

Additionally, Fuss & O'Neill understands that no building additions or renovation activities have been conducted since the original building construction. It is important to note that if any additions or renovation activities are to be performed at the school, a similar letter should be obtained and, if possible, Safety Data Sheets for the new or replacement materials used in construction should be retained and filed with the Asbestos Management Plan.

If you should have any questions regarding this report, please do not hesitate to contact me. Thank you for this opportunity to have served your environmental needs.

Sincerely,

Kathleen C. Pane  
Associate | Regional Lead

Re: **Burr Elementary School No Asbestos Statement**

Dear Anthony:

Further to your letter of March 31, 2005, we offer the following:

No ACBM was specified as a building material in any construction document for the building and, to the best of our knowledge, no ACBM was used as a building material in the building.

Please contact us with any questions.

Thank you.

Sincerely,

**Skidmore, Owings & Merrill, LLP**
