RE: Three-Year AHERA Asbestos Re-Inspection and Management Plan Update
Re-Inspection Date: October - 2024
Fairfield Public Schools – McKinley Elementary School
60 Thompson Street, Fairfield, CT.
Fuss & O'Neill Project No. 20190061.A70

Dear Mr. Papageorge:

This letter summarize the Three-year Asbestos Hazard Emergency Response Act (AHERA) Asbestos Re-Inspection and Asbestos Management Plan (AMP) Update report prepared by Fuss & O'Neill, Inc. at the McKinley Elementary School located at the 60 Thompson Street, Fairfield, Connecticut (the "Site"). The inspection was performed for Fairfield Public Schools (the "Client"). This report is an important document that must be kept on file at the school as well as at a central location where the AMPs are maintained.

The McKinley Elementary School was constructed in 2003 and according to a written statement from the architect, no asbestos-containing building materials (ACBM) were specified for use in the building construction. A copy of the architect's letter is on file at the Site and the central location where the management plans are maintained. A copy of the letter from the Architect certifying that no ACBM was used in the renovation is attached.

Additionally, Fuss & O'Neill understands that no building additions or renovation activities have been conducted since the original building construction. It is important to note that if any additions or renovation activities are to be performed at the school, a similar letter should be obtained and, if possible, Safety Data Sheets for the new or replacement materials used in construction should be retained and filed with the Asbestos Management Plan.

If you should have any questions regarding this report, please do not hesitate to contact me. Thank you for this opportunity to have served your environmental needs.

Sincerely,

Kathleen C. Pane
Associate | Regional Lead

Re: Project Name: McKinley Elementary School

Dear Mr. Vuozzo:

No ACBM was specified as a building material in any construction document issued through This office for McKinley Elementary School and, to the best of our knowledge, no ACBM was used as a building material in the building.

Please feel free to contact me if you have any further questions.

Thank you,

Sincerely,

Randall Luther, AIA
