## SHAW SPORTS TURF HEAVY METALS RESULTS – PowerBlade Turf Field Products

Dear Valued Customer:

Shaw has a longstanding commitment to sustainability and the responsible manufacture of our products. This includes a strong focus on the material chemistry of our products. This commitment applies to our brands and is inclusive of Shaw Sports Turf.

Based on information provided to date by suppliers, Shaw Sports Turf does not intentionally add Heavy Metals such as Mercury, Cadmium, Antimony, or Hexavalent Chromium to our Turf products. We have conducted independent third-party laboratory testing of the individual components of our PowerBlade turf field product. All test results were found to be below the criteria established in California Code of Regulations, Title 22, Section 66261.24 for Metals (commonly referred to as “CAM 17 Metals”). A summary of the most recent laboratory test results for the PowerBlade turf field product is provided for your convenience and reference.

We are committed to continuously improving the performance and material health profile of our sports turf field products. If you have any questions, please email us at [sustainability@shawinc.com](mailto:sustainability@shawinc.com)
