

What we've done during 17/18 school year!

Holtville Unified School District strives to provide our students, staff and community with a safe and healthy environment in and outside of our schools. Our mission is to create future healthier generations through good nutrition. HUSD believes that exposing young children to healthy whole and nutrient dense foods, with a fruit and vegetable emphasis, will encourage them to adopt healthy eating habits early in life. This foundation will make it more likely that they carry these good habits into adulthood.
