## **Parents and Community Members Invited to Learn More About the Impact of the Digital Age on Children and Find Balance**

**Green Bay, WI - March 25, 2025** - The Green Bay Area Public School District, the Brown County Library and the Boys & Girls Club are partnering together to host community-wide film screenings and discussions regarding the impacts of the digital age on children and how to minimize harmful effects and find balance around screen time.

Families are invited to join special screenings of "Screenagers: Growing Up In The Digital Age" and "Screenagers: Elementary School Age Edition."

Five showings of 'Screenagers' will take place during the month of April, three of those focusing on elementary aged children. The events are free and open to the entire community. Captions will be available in Spanish for all screenings. Students are encouraged to attend.

Research shows that children spend an average six and a half hours a day on screens and that doesn't include classroom or homework screen time. For boys, research shows they spend on average the equivalent of one and a half days on video games every week. Some recent studies show that screen time increases dopamine production and causes behavior that mimics addiction. (Source: Screenagers)
