

GUIDANCE PROGRAM

The Board views guidance as helping students understand themselves relative to their abilities, aptitudes, interests, attitudes, strengths and limitations. This process is meant to assist students in the development of their potential and their decisions relating to personal, educational and career matters.

Guidance is based upon these broad fundamental principles.

1. Individuals are different from one another in their capabilities, aptitudes, interests, needs, goals, desires and values.
2. Conditions are improvable. Equality of educational opportunity benefits the individual and society.
3. Guidance is a continual and developmental process.
4. Guidance does not propose to program an individual's course of action but rather tries to assist the individual in arriving at his/her own satisfactory solutions.
5. Guidance should assist the individual to understand his/her circumstances and opportunities and to plan his/her life in a satisfactory manner to serve himself/herself as well as society.

Guidance services include a wide variety of testing programs and interpretation of results to students, parents and staff. These programs assist students in developing good study habits and personal guidance, which is in keeping with the principles of human dignity and equality.

A written guidance plan is developed to provide systematic aid to students in kindergarten through 12th grade regarding educational, career, civic, personal and social concerns, including the harmful effects of drugs, alcohol and tobacco. This plan provides for appraisal of students' academic abilities, a variety of counseling opportunities and approaches, educational and career planning and, when necessary, appropriate referral. The plan is evaluated and submitted to the Board for adoption every three years.

The guidance department is responsible for assisting with implementation of the testing dimension of the educational program. The guidance staff further assists the instructional staff and administration in developing and implementing intervention programs to assist students to realize academic improvement.

Counseling services are provided by certificated/licensed school counselors. The District promptly notifies a student's parent of any substantial change in the student's services, including counseling services, or monitoring related to their mental, emotional or physical health or well-being or the school's ability to provide them a safe and supportive learning environment.
