### Statement of Purpose

It is the goal of the Oxnard School District to implement this Integrated Pest Management (IPM) Plan by focusing on long-term prevention or suppression of pest through accurate pest identification, by frequently monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation, mechanical, and physical controls. This includes the use of environmentally sensitive pest management strategies and least-toxic control methods. Pesticides that are effective will be used in a manner that minimizes risk to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to:

- 1) Protect the health and safety of the students and staff
- 2) Maintain a productive learning environment
- 3) Maintain the integrity of the school buildings and grounds.

### IPM Team

District Title	Role in IPM program
Sarah Verduzco	Child Nutrition Services Assistant Director
Child Nutrition Worker(s)	Monitor and Reporting
Grounds Specialist(s)	Applications, Inspections, and Monitoring
Equipment Operator(s)	Applications, Inspections, and Monitoring
Grounds Maintenance Worker(s)	Applications, Inspections, and Monitoring

### Pest Management Contracting

- Pest management services are contracted to a licensed pest control business.  
**Ventura Pest Control**      [www.venturapest.com](http://www.venturapest.com)
- Prior to entering into a contract, the school district has confirmed that Ventura Pest Control understands the training requirement and other requirements of the Healthy Schools Act.

## Pest Identification, Monitoring and Inspection

- Pest Identification is done by a combination of District staff and the vendor(s) the District contracts with.
- Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by Grounds, Custodial, and Maintenance staff, and the results are communicated to the IPM Coordinator.

## Pests and Non-chemical Management Practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
Ants	X	X	X			X		Clean area, Soapy water
Bees			X		X			Removal, Soapy water
Wasp		X	X		X			Removal
Birds	X		X	X				Screens, Removal of food (if applicable)
Mice/Rats	X		X	X		X		Clean area, remove any food
Roaches	X	X	X	X		X		Clean area, remove any food
Spiders			X					Remove webs and botanicals
Fleas								Vacuum carpets
Weeds		x			x		x	Manual Removal

## Chemical Pest Management Practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

This school district expects the following pesticides (pesticide products and active ingredients) to be applied during the year. This list includes pesticides that will be used by school district staff or licensed pest control businesses.
