
DIGITAL CITIZENSHIP AND MEDIA LITERACY: 2023

Purpose

In recognition of the fact that students use technology to play, learn, and communicate while at home and at school, it is important that they learn how to use that technology responsibly. The District is committed to educating every student on how to use technology in ways that augment their learning experience, leading to analysis, evaluation, reflection, and enhanced skills of expression. As the district's educators guide exploration of the digital landscape, they will encourage students to be critical and creative thinkers. Students, in turn, are expected to actively engage with and express their voices in the digital landscape.

Definitions

The District is dedicated to promoting and instilling principles of digital citizenship and media literacy in each of its students.

Digital Citizenship

Digital citizenship includes the norms of appropriate, responsible, and healthy behavior related to current technology use, including artificial intelligence, digital and media literacy, ethics, etiquette, and security. Digital citizenship includes the ability to access, analyze, evaluate, develop, produce, and interpret media, as well as internet safety and cyberbullying prevention and response.

Digital citizens recognize and value the rights, responsibilities, and opportunities of living, learning, and working in an interconnected digital world, and they engage in safe, legal, and ethical behaviors. Digital citizens cultivate and manage their digital identity and reputation and are aware of the permanence of their actions in the digital world. They advocate for themselves and others in their behaviors, actions, and choices.

Media Literacy

Media literacy is the ability to access, analyze, evaluate, create, and act using a variety of forms of communication, including communications developed with artificial intelligence. Media literacy includes the ability to understand how and why media messages and images are constructed and for what purposes they are used.

Media-literate citizens examine how individuals interpret messages differently based on their skills, beliefs, backgrounds, and experiences. They also consider how values and points of view are included or excluded in various media. Media-literate citizens remain continually aware of the ways in which media can influence beliefs and behaviors. In addition, media-literate citizens are effective communicators and demonstrate critical and creative thinking as they utilize appropriate media creation tools. Further, they understand the conventions and characteristics of the tools they have selected.

Media-literate citizens are able to adapt to changing technologies and develop the new skills required as they continue to engage in life-long learning. Media literacy empowers individuals to participate as informed and active citizens in a democracy.

DIGITAL CITIZENSHIP AND MEDIA LITERACY: 2023

Elements of Successful Implementation

The District aspires to implement the following practices to promote digital citizenship and media literacy for all students.

Student Instruction

All students will be educated regarding appropriate digital citizenship, including appropriate use of artificial intelligence and interacting with other individuals online. Students will receive digital citizenship training throughout the school year.

In recognition of the fact that students are consumers and creators of information and ideas, the District promotes cross-curricular integration of digital citizenship and media literacy and leadership instruction at all levels. The District recognizes the importance of students as active participants, role models, and peer mentors in addressing the following topics:

Online Safety, Responsibility, and Security: Students will learn how to be safe and responsible digital citizens, and they will be encouraged to teach others about issues such as cyberbullying, social networking, online predators, and risky communications. Lessons on online safety issues, including cyberbullying awareness and response, will be provided according to Administrative Policy and Procedure 2022/2022P – Electronic Resources and Internet Safety.

Media Literacy: Students will learn how to produce their own media, examine the ways in which people experience or interact with media differently, identify embedded values and stereotypes, analyze words and images critically, and evaluate the various sources of information with which they are presented.

Law, Fair Use, Copyright, and Intellectual Property: Students will learn about the importance of navigating the digital landscape in ways that are legal, including access to and use of copyrighted materials. Students will also learn how to access and create intellectual property legally.

Online Identity and Personal Brand: Students will learn about their “digital footprint” and the presence of their digital information, including on social media. Students will also learn about the creation and maintenance of their self-image, reputation, and online identity.

Ethics, Digital Communications, and Collaboration: Students will learn about fairness and civil discourse in the digital environment, including the appropriate uses of artificial intelligence and the importance of collaborating and ethically interacting with others online.

Professional Development

The District endeavors to support teachers and instructional leaders in developing leadership skills and proficiency in the principles of digital citizenship and media literacy, both as an instructional imperative and as dynamic district policy and practice.

DIGITAL CITIZENSHIP AND MEDIA LITERACY: 2023

Policy and Practices

The District acknowledges the need for digital and online policies that are dynamic and responsive to diverse community standards and student learning outcomes. The District annually reviews its policies and procedures on electronic resources, internet safety, digital citizenship, and media literacy. The District authorizes the Superintendent to develop further procedures and guidelines if appropriate.

Communications and Engagement

The District acknowledges that parents and community stakeholders are partners in developing students as digital citizens and life-long learners. The District encourages parents' active engagement in the process of educating students to become media-literate digital citizens.
