	Marietta City Schools		
	2024–2025 District Unit Planner		
	AP Calculus BC		
Unit title	MHS Unit 8 - AP Unit 7: Differential Equations & AP Exam review	**Unit duration (hours)**	**15 hours**

Mastering Content and Skills through INQUIRY (Establishing the purpose of the Unit): *What will students learn?*

GA DoE Standards
Standards 7.1 Modeling situations with differential equations 7.2 Verifying solutions for differential equations 7.3 Sketching slope fields 7.4 Reasoning using slope fields 7.5 Approximating solutions using Euler's method 7.6 Finding general solutions using separation of variables 7.7 FInding particular solutions using initial conditions and separation of variables 7.8 Exponential models with differential equations 7.9 Logistic models with differential equations **Concepts/Skills to support mastery of standards** ● Modeling situations with differential equations ● Verifying solutions for differential equations ● Sketching slope fields ● Reasoning using slope fields ● Approximating solutions using Euler's method ● Finding general solutions using separation of variables ● Finding particular solutions using initial conditions and separation of variables ● Exponential models with differential equations ● Logistic models with differential equations

<u>Vocabulary</u>

Separable differential equations

Slope fields

General solutions

Exponential growth

Logistic growth

Euler's method

Tangent line approximations

Carrying capacity

<u>Notation</u>

$$F(x) = y_0 + \int_a^x f(t)\, dt$$

$$\frac{dy}{dt} = ky, \quad y = y_0 e^{kt}$$

$$\frac{dy}{dt} = ky(a - y)$$

Essential Questions

How can you set up and solve separable differential equations?
How are slope fields used to represent solution curves to differential equations?
How are differential equations related to exponential growth, exponential decay and logistic growth curves?

Assessment Tasks

List of common formative and summative assessments.

Formative Assessment(s):

Notebook, HW quizzes, AP Classroom Progress Checks

Summative Assessment(s):

Unit Test - Differential equations (APCalc BC topic 7)

Learning Experiences Add additional rows below as needed.		
Objective or Content	**Learning Experiences**	**Personalized Learning and Differentiation**
7.1 Modeling situations with differential equations 7.2 Verifying solutions for differential equations	Mixed Six activity for Modeling with Differential Equations (7.1-7.2) 1. Factual recall 2. Carry out a procedure 3. Classify a mathematical object 4. Prove, show, justify 5. Extend a concept 6. Critique a fallacy	Collaborative groups Technology: desmos, graphing calculators, if desired.
7.6 Finding general solutions using separation of variables 7.7 Finding particular solutions using initial conditions and separation of variables	Mixed Six activity for Modeling with Differential Equations (7.6-7.7) 1. Factual recall 2. Carry out a procedure 3. Classify a mathematical object 4. Prove, show, justify 5. Extend a concept 6. Critique a fallacy	Collaborative groups Technology: desmos, graphing calculators, if desired.
Content Resources		

- AP Classroom (within AP Central, collegeboard.org), AP daily videos, progress checks
- Calculus textbook: Calculus, 11e, Larson & Edwards
- Tony Record (Avon HS) created resources
- Khan Academy
- Delta Math

- Flippedmath.com
- Master Math Mentor (pdf files and videos)
