

MVE Group

1d · 🌐

MVE Group would like to find a good home for our 2008 Ford F350 bucket truck.

This would be ideal for a person who is not using it for electrical work, as it will not pass the ANSI and OSHA dielectric tests because of a small hole in the bucket.

Everything works as it should, and the truck passed inspection in 2024.

We are asking \$13,500.
