

School Chromebooks at Home- Connecting to Wifi

Gwinnett County Public Schools

Call your school for additional support

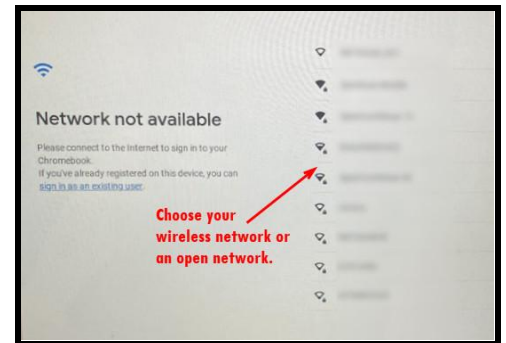

1. Power on the Chromebook

- Open the chromebook.
- If the chromebook does not power on, hold down the power button. This may be on the side of the chromebook or on the top right of the keyboard.

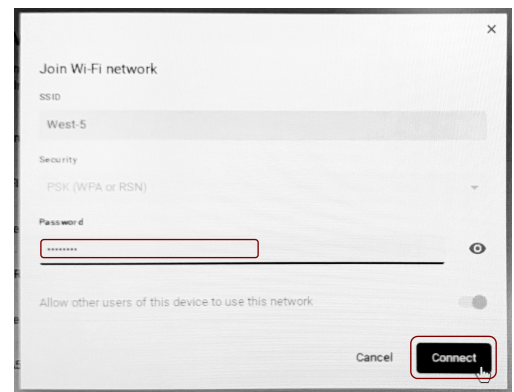

2. Connect to wifi

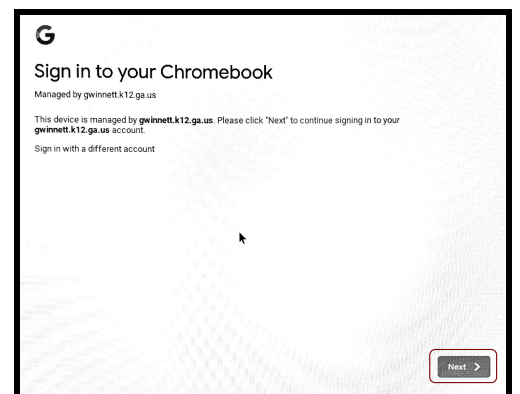

- Because the chromebook is no longer at a school location, the wifi settings will have to be updated.
- When you power on your chromebook, you will be asked to select the wifi network. Click on the appropriate network for your location.

- If your network is password-protected, enter the password for your wireless network.
- Click **Connect**.
 - If your Chromebook says no connection, you will restart and put your credentials in a second time before it connects.

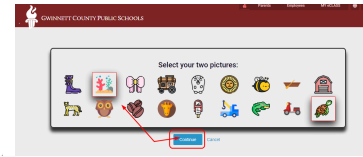

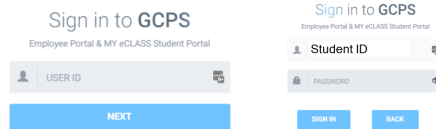

- You may receive a message that the chromebook is managed by Gwinnett County Public Schools and will be asked to log on to the chromebook. If you receive this message, click **Next (blue button)**.

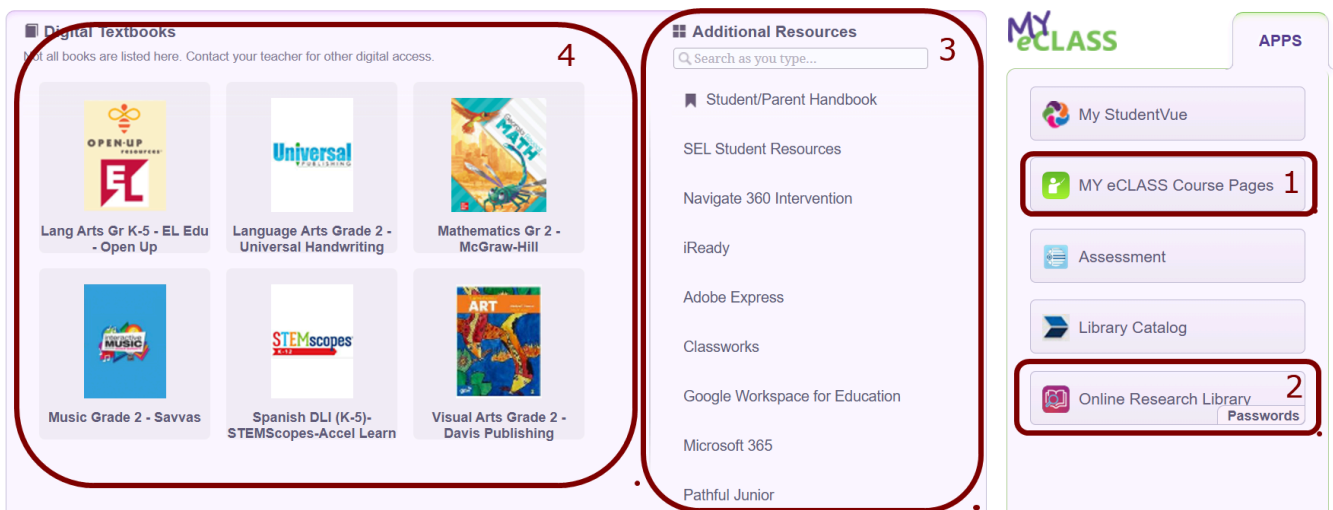

3. Log onto the Chromebook

- You will be redirected to the portal login screen.
 - Enter your student number and password or password images.
 - Click **SIGN IN**.

4. Utilize your Student Portal

- You are now logged onto the GCPS chromebook and into the student portal.
- From your student portal, you can access the following:
 1. Your eCLASS Course Pages (where your required Digital Learning assignments are located)
 2. The Online Research Library
 3. Additional resources such as Google Workspace for Education (Google Docs, Google Meet, and Google Classroom)
 4. Your digital textbooks

5. Sign Out

- To sign out, click on the Shutdown icon at the bottom right of your screen or close your chromebook. You should not need to re-enter wifi credentials the next time you sign in.
