## Why Come?

- It will definitely be a BLAST!
- Your anxiety about middle school will melt away!
- You will learn your way around the school, so you can feel comfortable on the first day.
- You will get to meet some pretty awesome 6th grade teachers and connections teachers who may end up being your teacher!
- You will get to practice learning the middle school basics of Google Classroom.
- You can meet kids from different elementary schools who just may be your new best friend!

# *A taste of some classes that may be offered...*

## **Daily Schedule**

**9:00-9:55 Ice Breakers**

**9:55-10:55 1st Period**

**10:55-11:55 2nd Period**

**11:55-12:55 3rd Period**

### **\*example schedule & classes\***

#### Delicious Decimals

Did you know that skittles help your student better understand math? Let's reinforce the place value of decimals and preview a 6th grade math unit – decimal operations! Check out how math can help you see the rainbow and taste the rainbow!

#### Media Madness

Get in gear to know what tools your middle school media center offers! You will get to explore and learn all about the various mysteries your new middle school library houses. Just think, you will totally be in the know before school even starts!

#### You Be the Judge!

Explore one of our favorite connection classes–mock trial! Students will have the opportunity to either be the judge, the prosecutor, or part of the jury among various other roles as the theatre room comes to life with a case that is sure to have students learning and laughing in a tantalizing case. Will the defendant be found guilty or innocent?

#### Ice-Breakers!

The first 30–45 minutes of each day will definitely get the energy flowing through your body! This will be a spectacular time when you will get to know other students and meet the teachers through some really hilarious ice-breakers!

#### Special Agents' Scavenger Hunt

The upcoming OMS Hawks Hunters will prowl the school on a scavenger hunt. On this hunt, the campers will become familiar with the layout of the school including the clinic, main hallways, cafeteria, gym, offices, media center, and connections halls. Campers will have to find various landmarks throughout the school. They will work together on a team to find these landmarks and hopefully be the first to finish the hunt. After this class, campers will have a better insight of their new home, Osborne Middle School.

#### Eating your way through Europe!

Eat your way through Europe as you learn all about its geography! In this delicious class, you will create an edible map to become familiar with the physical features of Europe. You will use cookie dough as a base and add items such as semi-sweet chocolate pieces, icing, twizzlers, Swedish fish, and more to create mountains, rivers, and plains. YUM, YUM!

## OTHER CLASSES TO GET EXCITED ABOUT

#### Twisted Kickball

In middle school, saying goodbye to recess is not easy for many students. Don't be alarmed! PE is a class that many of our students get for connections! Team games are taught and played in PE, so we thought introducing kids to a team game with rules that may be slightly twisted to the traditional kickball game would be a great way to start off the week! This is always a fan favorite during camp!

#### Camp S'more Writing

In this fun Language Arts focused class, students will travel through camp themed centers in groups. While completing mini-activities, groups will try to earn the most points by successfully completing each station. In this class, students will enjoy writing mini-lessons in a fun group setting that will help them think about the expectations for middle school writing.

#### Full STEAM ahead!

In this fun-filled science class, students will get to think, create, and build! As a group, students will come up with an idea to design, build using a wide variety of materials, and market to their peers. From automatic pet food feeders to balloon cars, to colorful catapults, students' imaginations can run wild while exploring so many fun STEAM elements!
