A Disaster Declaration for South Texas flooding means that state emergency response resources remain engaged in support of local flooding and severe weather.

Texans impacted by this week's storms are encouraged to report damages to homes and businesses through the Individual State of Texas Assessment Tool (iSTAT) at [damage.tdem.texas.gov](https://damage.tdem.texas.gov). Submitting a damage report helps state and local officials assess the full scope of the disaster and determine what additional resources may be needed for affected communities. The information provided is crucial in identifying whether the state meets federal requirements for various forms of disaster assistance.
