River Bluff Campus

At the River Bluff Campus, installation of the gym floor is underway in the River Bluff addition! When install of the wood flooring system wraps up early next week, the sanding process will begin, followed by paint and sealant. Demo of the existing maintenance building is scheduled to begin the week of April 7th, making way for spring site work to begin.

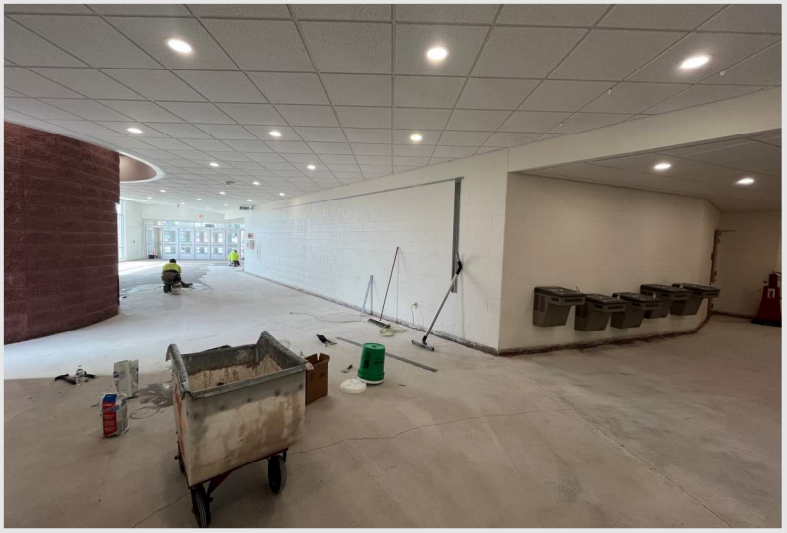

At the District Office, the final brick was set on the elevator lobby addition, marking the completion of all masonry work on the River Bluff Campus. Interior framing and drywall are underway in the addition, and the concrete stairs have been poured. The newly renovated second-floor restrooms and common spaces were turned over to the district staff this week. Renovations to the third-floor break room are underway following demo this past week.

High School

The team continues to make great strides on the High School renovations. Demo of the existing LVT flooring in the weight room and orchestra room is complete and installation of the new flooring is underway. Installation of the new light fixtures is also complete in both spaces along with the emergency lighting in the field house. The new doors and hardware have been installed at the band room mechanical mezzanine. Replacement of the existing cabinet unit heaters continues throughout the building in the vestibule spaces. Lastly, the team continues to clean and organize recently renovated spaces to ensure the area is ready when students and staff return.

DID YOU KNOW?

After the District's Building & Grounds staff completes their move from their existing facility on the River Bluff Campus to the recently turned-over new Maintenance Building, the existing building will be demolished. This will make way for the new parking lot and student drop-off/pick-up lane for the River Bluff Middle School, as well as additional green space for student outdoor activities.
