Bid Package #1.9.4	2520-25	Painting & Wallcovering (SA)
Bid Package #1.10.1	2521-25	Specialties & Equipment
Bid Package #1.14.1	2522-25	Elevator
Bid Package #1.21.1	2523-25	Fire Suppression System
Bid Package #1.22.1	2524-25	Plumbing System
Bid Package #1.23.1	2525-25	HVAC System
Bid Package #1.26.1	2526-25	Electrical Systems
Bid Package #1.31.1	2527-25	Sitework
Bid Package #1.32.2	2528-25	Landscaping (SA)

(SA) – Set-Aside – These Bid Packages are set-aside for pre-approved Minority and Women Owned Business Enterprises. A Bid Bond and 100% Performance & Labor and Material Payment Bond is required as part of these Bid Packages.

2. ALL bidders will be required to furnish a 10% Bid Bond along with their bid. Performance and Payment Bonds (100%) will be required. SET-SIDE subcontractors will not be required to provide Bid Bonds or Performance and Payment Bonds.
3. A PRE-BID CONFERENCE will be held at the Old Greenwich School at 285 Sound Beach Avenue, Old Greenwich, CT 06870.; on **Tuesday, April 8, 2025 at 11:00AM**. Prospective Bidders are to meet at the Old Greenwich School front entrance and sign-in. On Site Parking may not be available. Bidder attendance is STRONGLY encouraged but not mandatory.
4. BIDDING REQUESTS FOR INFORMATION (RFI) REGARDING THE ABOVE TRADE PACKAGES - All questions regarding bidding procedures, bidding documents and construction procedures are to be directed in RFI form to the Construction Manager Downes Construction Company at OGSbid@downesco.com. All answers will be published by written Addendum. Extension of the RFI deadline may only be revised by written addendum. Questions received verbally will not be answered. The RFI submission deadline is five (5) business days prior to the bid due date at 12 noon EST. RFI submission deadline may be extended by addenda at the CM's discretion.
5. ALL BIDS will be received at the Board of Education of The Town of Greenwich **until 11:00 AM** as noted above and opened publicly and read aloud on **April 21, 2025** at the Board of Education of The Town of Greenwich, 290 Greenwich Ave, Greenwich, CT 06830 after which time no further bids will be accepted. All bidders must include the State Project No. **057-**

0115 EA/RR/CV as well as the Greenwich Public Schools Number, Project Name and Bid Package Number & Description (Example – GPS #2511-25 – Old Greenwich School – BP# 1.4.1 – Masonry).

6. This project is being performed under the Construction Management form of construction. With respect to this project, the Construction Manager is a representation of the Owner. Each Trade Contractor's contract shall be with the Construction Manager.
7. All bidders whose bids exceed $1,000,000.00 shall hold a current DAS Contractor Prequalification Certificate (not a predetermination letter) from the Department of Administrative Services of the State of Connecticut according to Connecticut General Statutes Section 4a-100, 4b-101 and 4b-91. Bidders shall submit with their bids a current Update (bid) Statement. Failure to submit this item with the bid subjects your bid to disqualification**.** If you have any questions regarding these requirements contact the State of CT.DAS, at telephone number 860-713-5280 or visit their web site at www.das.state.ct.us
8. All bidders who are selected to perform this State project must comply with CONN. GEN. STAT. §§ 4a-60, 4a-60a, 4a-60g, and 46a-68b through 46a-68f, inclusive, as amended by June 2015 Special Session Public Act 15-5. An Affirmative Action Plan must be filed with and approved by the Commission on Human Rights and Opportunities prior to the commencement of construction. State law requires a minimum of twenty-five (25%) percent of the state-funded portion of the contract for award to subcontractors holding current certification from the Connecticut Department of Administrative Services ("DAS") under the provisions of CONN. GEN. STAT. § 4a-60g, as amended. (25% of the work with DAS certified Small and Minority owned businesses and 25% of that work with DAS certified Minority, Women and/or Disabled owned businesses.) The contractor must demonstrate good faith effort to meet the 25% set-aside goals. For municipal public works contracts and quasi-public agency projects, the contractor must file a written or electronic non-discrimination certification with the Commission on Human Rights and Opportunities. Forms can be found at http://www.ct.gov/opm/cwp/view.asp?a=2982&q=390928&opmNav_GID=1806
9. Plans, Specifications and Instructions to Bidders may be obtained by contacting Downes Construction at OGSbid@downesco.com only. Documents are expected to be available on or before Date, March 31, 2025. A SmartBid electronic mail link will be provided to the documents. Those bidders receiving the documents in this manner will receive Addenda as they are issued.
10. The State of Connecticut Department of Labor and all associated statutes and regulations shall govern labor wages on this project. The successful bidder shall comply with applicable state and local laws and the State of Connecticut requirements.
11. Bidders are reminded that the Owner is exempt from Federal Excise Taxes as well as State of Connecticut Sales Tax to the extent allowed by law.
12. The "Supplemental Instructions" and "General Items – All Trade Packages" and all other special instructions shall be strictly followed by bidders.
13. The Trade Packages will be awarded to the lowest responsible bidder. However, the Construction Manager and Owner reserve the right to reject any and all bids or to waive any informalities, irregularities, omissions, or technical defects in the bids if deemed in the best interest of the project.
14. No bid shall be accepted from any person/company who is in arrears to the Construction Manager (or its subsidiaries and partners) and/or Owner upon debt, or contract, or who is a defaulter as surety or otherwise upon obligations to the Construction Manager and/or Owner.
15. All bids shall be held open by bidders for a period of ninety (90) days. No bidder may withdraw their bid during that period.
16. Downes Construction Company, LLC is an Affirmative Action Equal Opportunity Employer. Minority/Women's Business Enterprises are encouraged to participate.

      F. Sample Warranty / Guarantee
      G. Change Order Proposal Form
      H. Background Check Compliance Agreement and State of CT Contractor Verification Form
      I. CHRO DOCUMENTS
      J. Sample EEO/MWBE Regulations, Goals and MWBE Procurement Letters
      K. EEO Workforce Projection Schedule
      L. Daily Employment Utilization Log

M. Subcontractor Orientation

W. AIA Document A133 – 2019 Standard Form of Agreement Between Owner and Construction Manager as Constructor;
X. AIA Document A201 - 2017 - General Conditions of the Contract for Construction
Y. Site Logistics Plan SL-1 (Located in combined plans)
Z. Addenda and/or supplementary information as may be issued within the bid period.

3. **THE PLANS, SPECIFICATIONS AND THE PROJECT MANUAL** – Plans are available solely through Email via Smart Bid link by contacting Downes. Addenda will be issued to all Bidders having secured Drawings and Specifications via Smart Bid link directly from Downes Construction. Contact *OGSbid@downesco.com* with any questions regarding this bid.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of at least (3) similar size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm is capable of completing this scope of work. Failure to do so could result in possible rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **A PRE-BID CONFERENCE** will be held at the Old Greenwich School at 285 Sound Beach Avenue, Old Greenwich, CT 06870.; on **Tuesday, April 8 ,2025 at 11:00AM.** The Pre-Bid Conference is NOT mandatory but is strongly encouraged. Bidders are encouraged to visit the site location at their convenience. Do not interfere with existing businesses or vehicular traffic while visiting the future site.

6. **ALL BIDS FOR ALL BID PACKAGES ARE TO BE SUBMITTED VIA HAND DELIVERY IN SEALED ENVELOPES IN DUPLICATE** by the date and time indicated, after which time no further bids will be accepted. All bidders must include the Project Name and Bid Package Number & Description on the envelopes (Example – 057-0115 EA/RR/CV – Old Greenwich School – BP# 1.4.1 - Masonry). Bids received will subsequently be publicly opened and read aloud at the Board of Education of The Town of Greenwich, Havemeyer Building located at 290 Greenwich Ave, Greenwich, CT 06830 until **11:00 AM EST** on **Monday, April 21, 2025**

7. **BIDDING REQUESTS FOR INFORMATION (RFI)** -
All questions regarding bidding procedures, bidding documents and construction procedures are to be directed in RFI form to the Construction Manager Downes Construction Company at *OGSbid@downesco.com*. All answers will be published by written Addendum. Extension of the RFI deadline may only be revised by written addendum. Questions received verbally will not be answered. The RFI submission deadline is five (5) business days prior to the bid due date at 12 noon EST. RFI submission deadline may be extended by addenda at the CM's discretion.

8. **PROJECT LABOR AGREEMENT** – **NOT APPLICABLE**

9. **LIQUIDATED DAMAGES** – Liquidated Damages per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

10. **ESCALATION -** All Subcontractors shall include the cost of future escalation in their lump sum bids based on the construction schedule. This includes but may not be limited to labor and material increases along with equipment operating expenses. Escalation in costs during the construction period will not be grounds for change order requests.

11. Downes Construction is the Construction Manager for this project therefore there is no "GC" or General Contractor. The work assigned to "by GC", "contractor" or "subcontractor" in the various contract documents is assigned to Trade Packages by Downes Construction.

12. Scope Exclusions to the bid are not acceptable. No partial bids will be accepted. Scope of Work items which have inadvertently been duplicated in more than one bid package must be included in the bid amount for each package containing the duplication. Do not assume Scope of Work items will be provided by the other bid package(s). Notify the Construction Manager immediately upon discovery of a duplicated item. Should the Construction Manager request a credit for the duplicated item after the bid, claims of omission of pricing in the bid due to the duplicate item in another bid package will not be acceptable.

13. **BID FORM –** All bids for all bid packages are to be submitted via hand delivery, with all spaces filled in. Faxed bids will be rejected. Those bidders who are bidding more than one Bid Package Scope of Work should submit their bids on separate Bid Forms in separate, sealed envelopes unless they are submitting combined bids for which a space has been provided. The Bid Form must be accompanied by the following:
    A. Bid Security in the amount of Ten Percent (10%) of the Base Bid Sum (Bid Bond or Certified Check) for any bid for work.
    B. Substitution Listing (As Applicable);
    C. Workman's Compensation Experience Modification Factor (EMR) form from insurer;
    D. Non-Collusion Affidavit;
    E. Acknowledgement of Surety;
    F. Contractor's Qualification Statement (AIA Document A305, 1986 Edition), provide past experience with projects of a similar nature and scope within the past 5 years;
    G. Proof of Insurance in accordance with Contract Requirements on Sample Accord Form;
    H. For bids over $1,000,000 a DAS Prequalified Certificate and Bid Update Statement are required.

14. **COMBINED BIDS** - Combination bids for any combination of bid packages will be accepted, provided the Bidder submits a bid for the individual packages to be combined. Combination bids are allowed only for bids due at the same time. Bid Combination offers should be submitted on a separate bid form indicating "Combination Bid for Bid Packages (BP No. & Description)" in bid form. A separate bid bond is not required for the combination bid. Bid Bonds for the individual bids are required.

15. **All Bids shall remain in effect for ninety (90) calendar days from bid due date**. No Bidder may withdraw their bid during that period.

16. **BID BONDS** – Bid Security in the amount of Ten Percent (10%) of the Base Bid Sum (Bid Bond or Certified Check) for any bid for work.

17. **PERFORMANCE AND PAYMENT BONDS** – The successful bidders will be required to provide 100% Performance and Labor and Material Payment Bonds. Bidders are requested to indicate the added cost to the base bid of 100% Performance and Labor and Material Payment Bonds in the appropriate space on the bid form. The owner must be included as a "dual obligee" on all bonds. Surety companies providing performance and payment bond(s) must be licensed to do business in Connecticut and be approved as sureties on Government contract

pursuant to U.S. Treasury Circular No. 570, published annually in the Federal Register. 100% Performance and Labor and Material Payment Bonds is required for (SA).

18. **PREVAILING WAGE RATES** - The State of Connecticut Department of Labor and all associated statutes and regulations shall govern labor wages on this project. To be deemed responsible and eligible for a contract award, bidders must be in full compliance with Connecticut labor and wage laws, including prevailing wage laws. Any open claims, complaints or investigations, including disputes with and/or allegations by the State of Connecticut Department of Labor, shall be good cause for a bidder to be deemed not responsible.

19. **DAS PREQUALIFICATION** – State law requires a minimum of twenty-five (25%) percent of the state-funded portion of the contract for award to subcontractors holding current certification from the Connecticut Department of Administrative Services ("DAS") under the provisions of CONN. GEN. STAT. § 4a-60g. (25% of the work with DAS certified Small and Minority owned businesses and 25% of that work with DAS certified Minority, Women and/or Disabled owned businesses). The contractor must demonstrate good faith effort to meet the 25% set- aside goals.

    I. **COMMISSION ON HUMAN RIGHTS AND OPPORUNITIES (CHRO) –** The Subcontractors who are selected to perform this State project must comply with CONN. GEN. STAT. §§ 4a-60, 4a-60a, 4a-60g, and 46a-68b through 46a-68f, inclusive, as amended by June 2015 Special Session Public Act 15-5. An Affirmative Action Plan must be filed with and approved by the Commission on Human Rights and Opportunities prior to the commencement of construction. State law requires a minimum of twenty-five (25%) percent of the state-funded portion of the contract for award to subcontractors holding current certification from the Connecticut Department of Administrative Services ("DAS") under the provisions of CONN. GEN. STAT. § 4a-60g, as amended. (25% of the work with DAS certified Small and Minority owned businesses and 25% of that work with DAS certified Minority, Women and/or Disabled owned businesses.) The contractor must demonstrate good faith effort to meet the 25% set-aside goals. For municipal public works contracts and quasi-public agency projects, the contractor must file a written or electronic non-discrimination certification with the Commission on Human Rights and Opportunities. Forms can be found at http://www.ct.gov/opm/cwp/view.asp?a=2982&q=390928&opmNav_GID=1806

20. **CONNECTICUT HIGH PERFORMANCE STANDARDS** – All Subcontractors are responsible for complying with the Specifications Section on Sustainable Design Requirements as it relates to completing their scopes of work in support of complying with Connecticut High Performance Standards (HPBS). Review and coordinate with all related Specifications Sections, provide all submittals associated with compliance and complete work in a manner to achieve compliance. Also refer to the Downes Construction CT HPBS Management Plan contained within the Downes Project Manual.

21. **TAX EXEMPT** - This project is tax-exempt. Reference Supplemental Instructions Paragraph C.

22. **CERTIFIED PAYROLL PROCESS –**All Subcontractors shall note the following in regards to WEEKLY certified payrolls:
    - As this is a Prevailing Wage project, each Contractor must follow all the rules, guidelines and regulations set forth by the CT Department of Labor. Please read and adhere to all of the contents pertaining to Prevailing Wage as set forth in this document.
    - A reminder that Prevailing wages are updated (changed) every July 1st by the State Department of Labor. Each Contractor is responsible to find out the new rates and to make the appropriate changes on its first payroll after July 1st. Each Subcontractor is responsible for assuming and including wage increases in their lump sum bids accordingly. No change orders will be entertained as they relate to periodic prevailing wage rate increases.

- Each contractor must send Certified Payroll submissions to *Certified Paychecks via email.* No hard copy originals will be required to be submitted to the consultant or Downes. The current email is payroll@certifiedpaycheck.com. (Contact is Kathy Wimmer at kwimmer@certifiedpaycheck.com).
- Certified payrolls must be completely filled out Weekly basis and must be received by Thursday of the following week, otherwise no payment will be allowed without correct receipt of certified payrolls (obviously all appropriate standard State of CT forms must be used). Employee's Social Security numbers should not appear on the payrolls.
- Each Contractor must send its completed Monthly Employment Utilization Report Form for the Commission on Human Rights and Opportunities. to *Certified Paychecks via email.* No hard copy originals will be required to be submitted to the consultant or Downes. The current email is payroll@certifiedpaycheck.com. (Contact is Kathy Wimmer at kwimmer@certifiedpaycheck.com). THESE REPORTS MUST BE SUBMITTED ALONG WITH THE CERTIFIED PAYROLLS.
- It is a state law that all private employees and apprentices who perform manual labor for a Contractor on a public building project must have completed the 10-hour Outreach Course in accordance with federal OSHA Training Institute standards, and for telecommunications workers, a 10-hour training course in accordance with federal OSHA standards, 29 CFR 1910.268. A Certification card is not compliant if it is more than 5 years old.
- Each Contractor must affix a copy of the construction safety course completion card to the first certified payroll submitted to the *Certified Paychecks* in accordance with Connecticut General Statue 31-53(f) on which such employee's name first appears.

23. **EXPERIENCE MODIFICATION RATE** - All bidders shall indicate their company's worker's compensation Experience Modification Rate (EMR) in the appropriate space on the bid form. Downes Construction and the owner reserve the right to reject a bid if the bidders EMR rate is greater than 1.0**.**

24. **INSURANCE** – The successful bidder will be required to provide insurance in accordance with the limits set forth in Section 4 of Downes Supplemental Instructions or those indicated elsewhere in the Contract Documents. Whichever coverage may be higher. The successful bidder shall procure at their own expense Workmen's Compensation, Comprehensive General Liability, Automobile Liability and other insurance with coverage and limits as defined in the Contract Documents. Certificates of Insurance with the above coverage must be submitted before starting work on the project. Thirty (30) days notice is required before cancellation.

25. **CHANGE ORDERS –** All change orders will be held to strict scrutiny by the CM. This Subcontractor is required to perform time and material work (T&M), as directed by the Construction Manager and adhere to the T&M procedures set forth in Downes Supplemental Instructions booklet section G. All change orders will be required to be substantiated with labor rate breakdowns (i.e.: rate, fringes, taxes, insurance and OH&P), equipment substantiation and material substantiation. For all change orders no more than 10% OH&P will be allowed on labor, equipment and materials and 5% OH&P for subs subcontract work. The above mentioned OH&P shall include all home office expense, supervision (PE's & PM's, Acct, etc.). Bond cost will be adjusted accordingly once the final contract amount is determined and agreed upon with a receipted invoice from the bonding company. The rate should be the same as the "break out" compared to the value of the lump sum bid.

26. **UNIT PRICES** – All unit prices are to be inclusive of all insurance, travel, safety, home office expense, overhead & profit, labor and equipment rates, fringes, taxes, reimbursables, consumables etc. In the spaces provided on the Bid Form, indicate the Unit Pricing with extensions, as requested. (Unit prices will be used to add or deduct from contract price based on project requirements).

27. **BACKGROUND INVESTIGATIONS** - The successful bidder will be required and agrees that before deploying any employee, agent or subcontractor ("Deployed Person") to perform any portion of the Project, the successful

bidder will Verify the Deployed Person's applicable and appropriate professional degrees, licenses and/or certifications as claimed by the Deployed Person. To the extent permitted by applicable law, the successful bidder shall perform a commercially reasonable criminal background check. The successful bidder agrees not to knowingly deploy such a person without first notifying the Owner and OPM of any criminal background. Notwithstanding the above provisions, the successful bidder agrees that it will not knowingly deploy any person to provide work or services to the Owner or OPM who has been convicted of any criminal felony involving dishonesty or a breach of trust or that such person has been convicted of any offense under 18 U.S.C Section 1033 of the Violent Crime Control and Law Enforcement Act of 1994, which section is captioned "Crimes by or Affecting Persons Engaged in the Business of Insurance Whose Activities Affect Interstate Commerce." Such offenses include, by way of illustration and not of limitation, activities by persons in the insurance industry who willfully and materially overvalue any land, property or securities; embezzlement or misappropriation of insurance premiums and other funds; the making of false entries or statements in reports with the intent to deceive another person engaged in the insurance industry; or the use of threat or force in an attempt to corrupt or obstruct administrative proceedings related to the insurance industry. The successful bidder represents that at all times it will comply with all state and federal laws and regulations with respect to maintaining a drug-free workforce and that it will disclose its drug testing procedures to the Owner and OPM upon request. Please refer to the "Instructions to Subcontractors" Section 2. RR and Section 10 for the Background Check Compliance Agreement. This agreement is a Contractual requirement and must be returned to the OPM prior to the execution of this Subcontractors contract.

28. **PROJECT MANAGEMENT SYSTEMS** – Refer to General Items – All Trade Packages for mandatory systems to be utilized on this project and associated fees to be included base bid.

29. A Construction Schedule and Site Logistics Plan are included with the Bid Packages, for bidding purposes. It is intended to give the bidders an idea as to when their scope of work will take place. Changes to this schedule as the project progresses will not constitute grounds for a change order.

30. The successful bidder will enter into a contract with Downes Construction that will be based on the Contract Documents for their Bid Package Scope of Work utilizing the AIA A401 2017 Standard Form of Agreement Contractor (Downes) and Subcontractor (Trade Packages) as amended to be job specific with the provided A201 WITHOUT ALTERATION OR QUALIFICATION. All contracts will be issued for signature via DocuSign.

31. The successful bidder will comply with all applicable local, State and Federal licensing, zoning, building, health, fire and safety regulations or ordinances, as well as standards and criteria of pertinent and State and Federal authorities and all owner requirements.

32. All Bidders are reminded that, in accordance with Connecticut Statutes Section §12-430(7)c, it is required to report names of nonresident (out of state) Contractors to the State of Connecticut, Department of Revenue Services (DRS) to ensure that all applicable business taxes are being paid by Contractors. Upon award of contract in excess of $250,000, all nonresident contractors must furnish proof to the CM, within two weeks of award, that they have obtained current status as a "verified contractor" with DRS. Reference Supplemental Instructions Paragraph C.

33. By submitting a bid, you are agreeing to adhere to the "Supplemental Instructions" and "General Items – All Trade Packages" issued by Downes Construction that accompanies this Invitation to Bid.

34. The project will be awarded to the lowest responsive and responsible bidder, provided the bid price is reasonable and in the best interest of Downes Construction Company, LLC and the Town of Greenwich to accept it. However, the Construction Manager (CMR) and the Owner reserve the right to reject any and all bids or to

waive any informalities, irregularities, omissions, or technical defects in the bids. Downes Construction in conjunction with the Owner also reserve the right:

A. To award the project based on the lowest responsible bid including combination bids along with the acceptance of any alternates in any order.
B. To reject a bid from any company who has not completed projects of a similar size and scope as this project.
C. To reject a bid from any person/company who is in arrears to the Construction Manager or Owner upon debt, or contract, or who is a defaulter as surety or otherwise upon obligations to the Owner.
D. To reject any or all bids and to waive any informality in bids received whenever such rejection or waiver is deemed in the Owner's or Construction Manager's best interest.
E. To reject any or all nonconforming, non-responsive, or unbalanced bids.
F. To reject the bid of a bidder who has previously failed to perform properly or complete on time contracts.
G. To consider the qualifications of bidder, whether or not the bids comply with the prescribed requirements, and such alternates, unit prices, and other data, as may be requested in the Form of Bid or prior to Notice of Award when evaluating the bids.
H. To reject any bid received from a contractor who is in any litigation when the Owner and CM determine it is in the best interest of the project.

35. Bidders are to identify if they or any proposed subcontractors have been debarred in the past or are currently debarred from participating in any public works project, for the local, state or federal governments. If so, provide details of such debarment. Contractors who are currently debarred are unacceptable.
36. The bidder making the proposed bid affirms that the bid is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the bid is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham bid; and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham bid, or that anyone shall refrain from bidding; that the bidder has not in any manner directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the bid or any other bid, or to fix any overhead, profit, or cost element of the bid price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the bid are true; and, further, that the bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, bid depository, or to any member or agent thereof to effectuate a collusive or sham bid.
37. This Invitation to Bid or any of its contents does not commit Downes nor the owner to pay any costs incurred in the preparation of a bid or to procure or contract for services or supplies**.**
38. Downes Construction and the owner are Affirmative Action / Equal Opportunity Employer. Small/Minority/Women's Business Enterprises are highly encouraged to submit bids.

ARTICLE 1 DEFINITIONS

§ 1.1 Bidding Documents include the Bidding Requirements and the Proposed Contract Documents. The Bidding Requirements consist of the advertisement or invitation to bid, Instructions to Bidders, supplementary instructions to bidders, the bid form, and any other bidding forms. The Proposed Contract Documents consist of the unexecuted form of Agreement between the Owner and Contractor and that Agreement's Exhibits, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, all Addenda, and all other documents enumerated in Article 8 of these Instructions.

§ 1.2 Definitions set forth in the General Conditions of the Contract for Construction, or in other Proposed Contract Documents apply to the Bidding Documents.

§ 1.3 Addenda are written or graphic instruments issued by the Architect, which, by additions, deletions, clarifications, or corrections, modify or interpret the Bidding Documents.

§ 1.4 A Bid is a complete and properly executed proposal to do the Work for the sums stipulated therein, submitted in accordance with the Bidding Documents.

§ 1.5 The Base Bid is the sum stated in the Bid for which the Bidder offers to perform the Work described in the Bidding Documents, to which Work may be added or deleted by sums stated in Alternate Bids.

§ 1.6 An Alternate Bid (or Alternate) is an amount stated in the Bid to be added to or deducted from, or that does not change, the Base Bid if the corresponding change in the Work, as described in the Bidding Documents, is accepted.

§ 1.7 A Unit Price is an amount stated in the Bid as a price per unit of measurement for materials, equipment, or services, or a portion of the Work, as described in the Bidding Documents.

§ 1.8 A Bidder is a person or entity who submits a Bid and who meets the requirements set forth in the Bidding Documents.

§ 1.9 A Sub-bidder is a person or entity who submits a bid to a Bidder for materials, equipment, or labor for a portion of the Work.

ARTICLE 2 BIDDER'S REPRESENTATIONS

§ 2.1 By submitting a Bid, the Bidder represents that:

- **.1** the Bidder has read and understands the Bidding Documents;
- **.2** the Bidder understands how the Bidding Documents relate to other portions of the Project, if any, being bid concurrently or presently under construction;
- **.3** the Bid complies with the Bidding Documents;
- **.4** the Bidder has visited the site, become familiar with local conditions under which the Work is to be performed, and has correlated the Bidder's observations with the requirements of the Proposed Contract Documents;
- **.5** the Bid is based upon the materials, equipment, and systems required by the Bidding Documents without exception; and
- **.6** the Bidder has read and understands the provisions for liquidated damages, if any, set forth in the form of Agreement between the Owner and Contractor.

ARTICLE 3 BIDDING DOCUMENTS

§ 3.1 Distribution

§ 3.1.1 Bidders shall obtain complete Bidding Documents, as indicated below, from the issuing office designated in the advertisement or invitation to bid, for the deposit sum, if any, stated therein.
(Indicate how, such as by email, website, host site/platform, paper copy, or other method Bidders shall obtain Bidding Documents.)

AIA Document A701 – 2018. Copyright © 1970, 1974, 1978, 1987, 1997 and 2018. All rights reserved. To report copyright violations, e-mail docinfo@aiacontracts.com.
User Notes: (1096901480)

§ 3.1.2 Any required deposit shall be refunded to Bidders who submit a bona fide Bid and return the paper Bidding Documents in good condition within ten days after receipt of Bids. The cost to replace missing or damaged paper documents will be deducted from the deposit. A Bidder receiving a Contract award may retain the paper Bidding Documents, and the Bidder's deposit will be refunded.

§ 3.1.3 Bidding Documents will not be issued directly to Sub-bidders unless specifically offered in the advertisement or invitation to bid, or in supplementary instructions to bidders.

§ 3.1.4 Bidders shall use complete Bidding Documents in preparing Bids. Neither the Owner nor Architect assumes responsibility for errors or misinterpretations resulting from the use of incomplete Bidding Documents.

§ 3.1.5 The Bidding Documents will be available for the sole purpose of obtaining Bids on the Work. No license or grant of use is conferred by distribution of the Bidding Documents.

§ 3.2 Modification or Interpretation of Bidding Documents

§ 3.2.1 The Bidder shall carefully study the Bidding Documents, shall examine the site and local conditions, and shall notify the Architect of errors, inconsistencies, or ambiguities discovered and request clarification or interpretation pursuant to Section 3.2.2.

§ 3.2.2 Requests for clarification or interpretation of the Bidding Documents shall be submitted by the Bidder in writing and shall be received by the Architect at least seven days prior to the date for receipt of Bids.
(Indicate how, such as by email, website, host site/platform, paper copy, or other method Bidders shall submit requests for clarification and interpretation.)

§ 3.2.3 Modifications and interpretations of the Bidding Documents shall be made by Addendum. Modifications and interpretations of the Bidding Documents made in any other manner shall not be binding, and Bidders shall not rely upon them.

§ 3.3 Substitutions

§ 3.3.1 The materials, products, and equipment described in the Bidding Documents establish a standard of required function, dimension, appearance, and quality to be met by any proposed substitution.

§ 3.3.2 Substitution Process

§ 3.3.2.1 Written requests for substitutions shall be received by the Architect at least ten days prior to the date for receipt of Bids. Requests shall be submitted in the same manner as that established for submitting clarifications and interpretations in Section 3.2.2.

§ 3.3.2.2 Bidders shall submit substitution requests on a Substitution Request Form if one is provided in the Bidding Documents.

§ 3.3.2.3 If a Substitution Request Form is not provided, requests shall include (1) the name of the material or equipment specified in the Bidding Documents; (2) the reason for the requested substitution; (3) a complete description of the proposed substitution including the name of the material or equipment proposed as the substitute, performance and test data, and relevant drawings; and (4) any other information necessary for an evaluation. The request shall include a statement setting forth changes in other materials, equipment, or other portions of the Work, including changes in the work of other contracts or the impact on any Project Certifications (such as LEED), that will result from incorporation of the proposed substitution.

§ 3.3.3 The burden of proof of the merit of the proposed substitution is upon the proposer. The Architect's decision of approval or disapproval of a proposed substitution shall be final.

§ 3.3.4 If the Architect approves a proposed substitution prior to receipt of Bids, such approval shall be set forth in an Addendum. Approvals made in any other manner shall not be binding, and Bidders shall not rely upon them.

To report copyright violations, e-mail docinfo@aiacontracts.com.
User Notes: (1096901480)

§ 3.3.5 No substitutions will be considered after the Contract award unless specifically provided for in the Contract Documents.

§ 3.4 Addenda

§ 3.4.1 Addenda will be transmitted to Bidders known by the issuing office to have received complete Bidding Documents.

(Indicate how, such as by email, website, host site/platform, paper copy, or other method Addenda will be transmitted.)

§ 3.4.2 Addenda will be available where Bidding Documents are on file.

§ 3.4.3 Addenda will be issued no later than two days prior to the date for receipt of Bids, except an Addendum withdrawing the request for Bids or one which includes postponement of the date for receipt of Bids.

§ 3.4.4 Prior to submitting a Bid, each Bidder shall ascertain that the Bidder has received all Addenda issued, and the Bidder shall acknowledge their receipt in the Bid.

ARTICLE 4 BIDDING PROCEDURES

§ 4.1 Preparation of Bids

§ 4.1.1 Bids shall be submitted on the forms included with or identified in the Bidding Documents.

§ 4.1.2 All blanks on the bid form shall be legibly executed. Paper bid forms shall be executed in a non-erasable medium.

§ 4.1.3 Sums shall be expressed in both words and numbers, unless noted otherwise on the bid form. In case of discrepancy, the amount entered in words shall govern.

§ 4.1.4 Edits to entries made on paper bid forms must be initialed by the signer of the Bid.

§ 4.1.5 All requested Alternates shall be bid. If no change in the Base Bid is required, enter "No Change" or as required by the bid form.

§ 4.1.6 Where two or more Bids for designated portions of the Work have been requested, the Bidder may, without forfeiture of the bid security, state the Bidder's refusal to accept award of less than the combination of Bids stipulated by the Bidder. The Bidder shall neither make additional stipulations on the bid form nor qualify the Bid in any other manner.

§ 4.1.7 Each copy of the Bid shall state the legal name and legal status of the Bidder. As part of the documentation submitted with the Bid, the Bidder shall provide evidence of its legal authority to perform the Work in the jurisdiction where the Project is located. Each copy of the Bid shall be signed by the person or persons legally authorized to bind the Bidder to a contract. A Bid by a corporation shall further name the state of incorporation and have the corporate seal affixed. A Bid submitted by an agent shall have a current power of attorney attached, certifying the agent's authority to bind the Bidder.

§ 4.1.8 A Bidder shall incur all costs associated with the preparation of its Bid.

§ 4.2 Bid Security

§ 4.2.1 Each Bid shall be accompanied by the following bid security:

(Insert the form and amount of bid security.)

§ 4.2.2 The Bidder pledges to enter into a Contract with the Owner on the terms stated in the Bid and shall, if required, furnish bonds covering the faithful performance of the Contract and payment of all obligations arising thereunder. Should the Bidder refuse to enter into such Contract or fail to furnish such bonds if required, the amount of the bid security shall be forfeited to the Owner as liquidated damages, not as a penalty. In the event the Owner fails to comply with Section 6.2, the amount of the bid security shall not be forfeited to the Owner.

This document was produced at 16:03:49 ET on 08/30/2023 under Order No.4104244902 which expires on 08/29/2024, is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
User Notes: (1096901480)

§ 4.2.3 If a surety bond is required as bid security, it shall be written on AIA Document A310™, Bid Bond, unless otherwise provided in the Bidding Documents. The attorney-in-fact who executes the bond on behalf of the surety shall affix to the bond a certified and current copy of an acceptable power of attorney. The Bidder shall provide surety bonds from a company or companies lawfully authorized to issue surety bonds in the jurisdiction where the Project is located.

§ 4.2.4 The Owner will have the right to retain the bid security of Bidders to whom an award is being considered until (a) the Contract has been executed and bonds, if required, have been furnished; (b) the specified time has elapsed so that Bids may be withdrawn; or (c) all Bids have been rejected. However, if no Contract has been awarded or a Bidder has not been notified of the acceptance of its Bid, a Bidder may, beginning days after the opening of Bids, withdraw its Bid and request the return of its bid security.

§ 4.3 Submission of Bids

§ 4.3.1 A Bidder shall submit its Bid as indicated below:
(Indicate how, such as by website, host site/platform, paper copy, or other method Bidders shall submit their Bid.)

§ 4.3.2 Paper copies of the Bid, the bid security, and any other documents required to be submitted with the Bid shall be enclosed in a sealed opaque envelope. The envelope shall be addressed to the party receiving the Bids and shall be identified with the Project name, the Bidder's name and address, and, if applicable, the designated portion of the Work for which the Bid is submitted. If the Bid is sent by mail, the sealed envelope shall be enclosed in a separate mailing envelope with the notation "SEALED BID ENCLOSED" on the face thereof.

§ 4.3.3 Bids shall be submitted by the date and time and at the place indicated in the invitation to bid. Bids submitted after the date and time for receipt of Bids, or at an incorrect place, will not be accepted.

§ 4.3.4 The Bidder shall assume full responsibility for timely delivery at the location designated for receipt of Bids.

§ 4.3.5 A Bid submitted by any method other than as provided in this Section 4.3 will not be accepted.

§ 4.4 Modification or Withdrawal of Bid

§ 4.4.1 Prior to the date and time designated for receipt of Bids, a Bidder may submit a new Bid to replace a Bid previously submitted, or withdraw its Bid entirely, by notice to the party designated to receive the Bids. Such notice shall be received and duly recorded by the receiving party on or before the date and time set for receipt of Bids. The receiving party shall verify that replaced or withdrawn Bids are removed from the other submitted Bids and not considered. Notice of submission of a replacement Bid or withdrawal of a Bid shall be worded so as not to reveal the amount of the original Bid.

§ 4.4.2 Withdrawn Bids may be resubmitted up to the date and time designated for the receipt of Bids in the same format as that established in Section 4.3, provided they fully conform with these Instructions to Bidders. Bid security shall be in an amount sufficient for the Bid as resubmitted.

§ 4.4.3 After the date and time designated for receipt of Bids, a Bidder who discovers that it made a clerical error in its Bid shall notify the Architect of such error within two days, or pursuant to a timeframe specified by the law of the jurisdiction where the Project is located, requesting withdrawal of its Bid. Upon providing evidence of such error to the reasonable satisfaction of the Architect, the Bid shall be withdrawn and not resubmitted. If a Bid is withdrawn pursuant to this Section 4.4.3, the bid security will be attended to as follows:
(State the terms and conditions, such as Bid rank, for returning or retaining the bid security.)

ARTICLE 5 CONSIDERATION OF BIDS

§ 5.1 Opening of Bids

If stipulated in an advertisement or invitation to bid, or when otherwise required by law, Bids properly identified and received within the specified time limits will be publicly opened and read aloud. A summary of the Bids may be made available to Bidders.

AIA Document A701 – 2018. Copyright © 1970, 1974, 1978, 1987, 1997 and 2018. All rights reserved. User Notes: (1096901480)

§ 5.2 Rejection of Bids
Unless otherwise prohibited by law, the Owner shall have the right to reject any or all Bids.

§ 5.3 Acceptance of Bid (Award)
§ 5.3.1 It is the intent of the Owner to award a Contract to the lowest responsive and responsible Bidder, provided the Bid has been submitted in accordance with the requirements of the Bidding Documents. Unless otherwise prohibited by law, the Owner shall have the right to waive informalities and irregularities in a Bid received and to accept the Bid which, in the Owner's judgment, is in the Owner's best interests.

§ 5.3.2 Unless otherwise prohibited by law, the Owner shall have the right to accept Alternates in any order or combination, unless otherwise specifically provided in the Bidding Documents, and to determine the lowest responsive and responsible Bidder on the basis of the sum of the Base Bid and Alternates accepted.

ARTICLE 6 POST-BID INFORMATION

§ 6.1 Contractor's Qualification Statement
Bidders to whom award of a Contract is under consideration shall submit to the Architect, upon request and within the timeframe specified by the Architect, a properly executed AIA Document A305™, Contractor's Qualification Statement, unless such a Statement has been previously required and submitted for this Bid.

§ 6.2 Owner's Financial Capability
A Bidder to whom award of a Contract is under consideration may request in writing, fourteen days prior to the expiration of the time for withdrawal of Bids, that the Owner furnish to the Bidder reasonable evidence that financial arrangements have been made to fulfill the Owner's obligations under the Contract. The Owner shall then furnish such reasonable evidence to the Bidder no later than seven days prior to the expiration of the time for withdrawal of Bids. Unless such reasonable evidence is furnished within the allotted time, the Bidder will not be required to execute the Agreement between the Owner and Contractor.

§ 6.3 Submittals
§ 6.3.1 After notification of selection for the award of the Contract, the Bidder shall, as soon as practicable or as stipulated in the Bidding Documents, submit in writing to the Owner through the Architect:

.1 a designation of the Work to be performed with the Bidder's own forces;
.2 names of the principal products and systems proposed for the Work and the manufacturers and suppliers of each; and
.3 names of persons or entities (including those who are to furnish materials or equipment fabricated to a special design) proposed for the principal portions of the Work.

§ 6.3.2 The Bidder will be required to establish to the satisfaction of the Architect and Owner the reliability and responsibility of the persons or entities proposed to furnish and perform the Work described in the Bidding Documents.

§ 6.3.3 Prior to the execution of the Contract, the Architect will notify the Bidder if either the Owner or Architect, after due investigation, has reasonable objection to a person or entity proposed by the Bidder. If the Owner or Architect has reasonable objection to a proposed person or entity, the Bidder may, at the Bidder's option, withdraw the Bid or submit an acceptable substitute person or entity. The Bidder may also submit any required adjustment in the Base Bid or Alternate Bid to account for the difference in cost occasioned by such substitution. The Owner may accept the adjusted bid price or disqualify the Bidder. In the event of either withdrawal or disqualification, bid security will not be forfeited.

§ 6.3.4 Persons and entities proposed by the Bidder and to whom the Owner and Architect have made no reasonable objection must be used on the Work for which they were proposed and shall not be changed except with the written consent of the Owner and Architect.

ARTICLE 7 PERFORMANCE BOND AND PAYMENT BOND

§ 7.1 Bond Requirements
§ 7.1.1 If stipulated in the Bidding Documents, the Bidder shall furnish bonds covering the faithful performance of the Contract and payment of all obligations arising thereunder.

AIA Document A701 – 2018. Copyright © 1970, 1974, 1978, 1987, 1997 and 2018. All rights reserved. User Notes: (1096901480)

§ 7.1.2 If the furnishing of such bonds is stipulated in the Bidding Documents, the cost shall be included in the Bid. If the furnishing of such bonds is required after receipt of bids and before execution of the Contract, the cost of such bonds shall be added to the Bid in determining the Contract Sum.

§ 7.1.3 The Bidder shall provide surety bonds from a company or companies lawfully authorized to issue surety bonds in the jurisdiction where the Project is located.

§ 7.1.4 Unless otherwise indicated below, the Penal Sum of the Payment and Performance Bonds shall be the amount of the Contract Sum.
(If Payment or Performance Bonds are to be in an amount other than 100% of the Contract Sum, indicate the dollar amount or percentage of the Contract Sum.)

§ 7.2 Time of Delivery and Form of Bonds
§ 7.2.1 The Bidder shall deliver the required bonds to the Owner not later than three days following the date of execution of the Contract. If the Work is to commence sooner in response to a letter of intent, the Bidder shall, prior to commencement of the Work, submit evidence satisfactory to the Owner that such bonds will be furnished and delivered in accordance with this Section 7.2.1.

§ 7.2.2 Unless otherwise provided, the bonds shall be written on AIA Document A312, Performance Bond and Payment Bond.

§ 7.2.3 The bonds shall be dated on or after the date of the Contract.

§ 7.2.4 The Bidder shall require the attorney-in-fact who executes the required bonds on behalf of the surety to affix to the bond a certified and current copy of the power of attorney.

ARTICLE 8 ENUMERATION OF THE PROPOSED CONTRACT DOCUMENTS
§ 8.1 Copies of the proposed Contract Documents have been made available to the Bidder and consist of the following documents:

.1 AIA Document A101™–2017, Standard Form of Agreement Between Owner and Contractor, unless otherwise stated below.
(Insert the complete AIA Document number, including year, and Document title.)

.2 AIA Document A101™–2017, Exhibit A, Insurance and Bonds, unless otherwise stated below.
(Insert the complete AIA Document number, including year, and Document title.)

.3 AIA Document A201™–2017, General Conditions of the Contract for Construction, unless otherwise stated below.
(Insert the complete AIA Document number, including year, and Document title.)

.4 AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, dated as indicated below:
(Insert the date of the E203-2013.)

.5 Drawings

ADDITIONS & ALTERATIONS TO: OLD GREENWICH SCHOOL

06 – Supplemental Instructions

SUPPLEMENTAL INSTRUCTIONS

Intent

These Supplemental Instructions are intended to provide the bidder/subcontractor a list of additional terms, conditions and expectations related to working on or providing goods and/or services for a Downes Construction Company (DCC) construction project. By submitting a bid and/or proposal, the Contractor is agreeing to abide by the terms and conditions of these Supplemental Instructions along with all other Contract Documents.

Where elsewhere in the Contract Documents require compliance with more than one requirement with respect to any aspect of the project, the better quality or more stringent requirement is intended.

Section 1 - Definitions

Where in the Contract Documents the title "Construction Manager", "Design Builder", "Contractor", "Trade Contractor", "Subcontractor" or "Respective Contractor" is used it means the entity normally responsible for the work referenced. That entity will be assigned the scope of work term "Subcontractor" when entering into a contract with Downes Construction Company (DCC).

Section 2 - General Requirements

A. Contract

The Subcontractor (Trade Contractor, Contractor, Respective Contractor, Vendor) will enter into an agreement with DCC in complete accordance with the terms described in the AIA Document A401 – 2007 Standard Form of Agreement Between Contractor and Subcontractor or such other form or with such other entity specifically described elsewhere in the Contract Documents. The Subcontractor is solely responsible for the scope of work assigned.

B. Performance and Payment Bonds

Unless indicated elsewhere in the Contract Documents, the Subcontractor shall furnish DCC with 100% Performance and Labor and Material Payment bonds, in the amount of 100% of the Contract amount with a "dual oblige". Surety companies providing performance and payment bond(s) must be licensed to do business in Connecticut and be approved as sureties on Government contract pursuant to U.S. Treasury Circular No. 570, published annually in the Federal Register. All Performance Bonds, and Labor and Material Payment Bonds submitted to DCC must use a Subcontractor Performance Bond Form A, or some facsimile thereof. Bonds should **not** be submitted on an AIA

Document A311 or A312. Subcontractors are to include the cost of said bonds in their lump sum base bid and indicate the "break out" cost of the bonds in the appropriate space on the bid form.
A generic form for the Dual Obligee is acceptable.

C. Tax Exempt

This project is tax exempt. Resident Subcontractors must request a tax-exempt certificate from DCC in advance of material procurement or ordering of materials. Requests must be submitted to DCC within two (2) weeks of notice to proceed.

D. State Sales Tax Bond

Non-resident Subcontractors will furnish the Commissioner of Revenue Services in Connecticut a guarantee bond equal to 5% of their contract amount to secure payment of the Connecticut State Sales Tax payable with respect to tangible personal property used or consumed to carry out such contract. The Subcontractor will forward the bond to DCC within two (2) weeks of notice to proceed.

E. DAS Prequalification

Bid Packages that the Construction Manager estimates have a value in excess of $1,000,000 are designated as such on the Invitation to Bid. Prospective bidding Subcontractors on these packages and all lower tier subcontractors whose subcontracts exceed $1,000,000 must be prequalified by the State of Connecticut Department of Administrative Services (DAS) for the appropriate classification of work. The Subcontractor shall hold a current "DAS Prequalification Certificate" from the Department of Administrative Services of the State of Connecticut according to Connecticut General Statue 4a-100, 4b-100 and 4b-91 and shall submit a current update (bid) statement with their bid. Failure to submit these items with the bid will result in disqualification of the bidder per the public act. DAS is required of all sub-bidders regardless of their tier with contract values in excess of $1,000,000. Sub-bidders prequalification certificates are not required to be submitted with the bid but must be submitted prior to award. All Subcontractors requiring DAS certification must maintain the certification for the duration of the project.

Refer to the Project Labor Agreement and the Downes Implementation Plan provided for additional information and requirements.

All subcontractors are required to submit their CHRO affirmative action plan and or **set-aside plan** and are encouraged to utilize a consultant firm to assist in compiling company specific information for their respective Affirmative Action Plans before submission to CHRO for approval. See Set Aside Plan format dated: 8/15/2010 and a list

of recommended consultants attached with this Addendum. An additional 2% retainage will be held on this subcontractor until their plan is approved by CHRO.

F. Insurance Requirements (Referenced as Attachment "A" in all agreements)

The Subcontractor along with its entire lower tier Subcontractors will provide insurance in complete accordance with the following:

The following is applicable to all required insurance policies (See attached sample ACCORD form for additional clarification and specific requirements):

Insurer – All insurers must have an A.M. Best rating of A- VII or better and admitted to conduct business in the state.

Additional Insured –DCC, Owner, Program Manager/Owner's Representative (if required) the Project Architect and other such entity(s) required by DCC, shall be named Additional insured's under your policies, as well as, other parties which are required by the contract. Coverage's must be written on a primary and non-contributory basis and a Waiver of Subrogation provision must be included, with respect to all parties concerned.

Waiver of Subrogation – All policies must include a Waiver of Subrogation whereby the insured waives the right to subrogate against all the Additional insured's as well as their subsidiaries, employees, volunteers, directors and officers.

Other Insurance Clause – This clause must state that the contractor's/subcontractor's policy is Primary and (Non-contributory) the insurer will not seek contribution from other insurance available to all the Additional insured's.

Notice of Cancellation – **Non-Renewal or Material Change** – All policies shall be endorsed to require at least a 30 day written notice by the insurer of cancellation, non-renewal, or material change, except for a ten day notice for non-payment of premium. This notice shall be sent to the Project Manager at DCC.

Deductibles/Self-Insured Retention – It is agreed that all deductibles and/or self-insured retentions are the responsibility of the contractor's/subcontractor's, including all claim handling and legal expenses.

Exclusions/Restrictions – All exclusion or restrictions of coverage not found in standard policies must be clearly identified.

Certificates of Insurance – Must be forwarded to the Project Manager at DCC at least five days prior to commencing work or delivery of goods. Renewal Certificates of Insurance must be provided ten days prior to the expiration of required coverage. A copy of all your policy's Additional insured's Endorsements must be attached to the certificate.

Terms of Coverage – All insurance must adhere to requirements stipulated herein and be effective on or before work commences and remain in effect until final completion and acceptance of the work.

Also Subcontractors must maintain Commercial General Liability (CGL) including Completed Operations (Products – Comp/Op AGG) coverage of $1,000,000 per occurrence and $2,000,000 aggregate for itself and each Additional insured's for a minimum of three (3) years after final acceptance and closeout of said project.

Pollution Liability – Any company who performs environmental (abatement) work must maintain Pollution Liability coverage as stipulated on item #6 below, including mold coverage as necessitated by its scope of work.

EIFS Work – Commercial General Liability coverage cannot contain an EIFS exclusion for those companies doing this type of work. In addition, Pollution Liability, including mold coverage, must be carried. Minimum limits of $5,000,000 per occurrence (see Item #6 below).

Subcontractors – It is a requirement of the project and is the responsibility of the subcontractor to be sure that their entire subcontractor's procure and maintain the same insurance required of the contractor.

1) Commercial General Liability (CGL) with Limits of Insurance of Not Less Than $1,000,000 Each Occurrence/$2,000,000 Annual Aggregate

a) If the CGL coverage contains a General Aggregate limit, such General Aggregate shall apply separately to each project.

b) CGL coverage shall be written on ISO Occurrence Form CG 00 01 1093 or a substitute form providing equivalent coverage and shall cover liability arising from premises, operations, independent contractors, products/completed operations, and personal and advertising injury.

c) DCC, the Owner and All Other parties required of DCC shall be included as insured's on the CGL using ISO Additional Insured Endorsement Form CG 20 10 11 85 or CG 20 10 10 93 and CG 20 37 10 01 or CG 20 33 10 01 and CG 20 37 10 01 or an endorsement providing equivalent coverage to the Additional Insured's. This insurance for the Additional Insured's shall be as broad as the coverage provided for the named insured subcontractor. It shall apply as Primary Insurance before any other insurance or self-insurance, including any deductible maintained by or provided to the Additional Insured. (A copy of the appropriate forms listed above must be completely filled out appropriately and attached to your Certificate of Insurance).

d) Subcontractors shall maintain CGL coverage for itself and all Additional Insured's for the duration of the project according to contract documents and specification requirements; also Subcontractors must maintain Commercial General Liability (CGL) including Completed Operations (Products – Comp/Op AGG) coverage of $1,000,000 per occurrence and $2,000,000 aggregate for itself and each Additional insured's for a minimum of three (3) years after final acceptance and closeout of said project.

e) Coverage must be on an occurrence basis.

f) If project involves residential construction, the CGL policy cannot contain a residential exclusion.

2) <u>Automobile Liability</u>

a) Business Auto Liability with limits of at least $1,000,000 each accident.
b) Business Auto coverage must include coverage for liability arising out of all owned, leased, hired, and non-owned automobiles.
c) DCC the Owner, and all other parties required of the DCC shall be included as insured's on the auto policy.

3) <u>Commercial Umbrella</u>

a) Umbrella limits must be at least $10,000,000.
b) Umbrella coverage must include as insured's all entities that are Additional insured's on the CGL.
c) Umbrella coverage for such Additional Insured's shall apply as primary before any other insurance or self-insurance, including any deductible, maintained by or provided to the Additional Insured's other than the CGL, Auto Liability and Employer's Liability coverage's maintained by the Subcontractor.
d) Coverage must be on an occurrence basis.

4) <u>Workers' Compensation and Employer's Liability at least $500,000 each accident</u>

a) Employers' Liability insurance limits of at least $500,000 each accident for bodily injury by accident and $500,000 each employee for injury by disease.
b) Where applicable, U.S. Longshore and Harborworkers Compensation Act Endorsement (USL&H) shall be attached to the policy.
c) The Employer's Liability limit may be met via an Umbrella policy; however, the combined limit must be a minimum of $5,000,000.

5) <u>Professional Liability</u> *(if required by scope of work) at Least $5,000,000 each occurrence limit*

a) DCC, et al. shall be included as an Additional Insureds on a primary and noncontributory basis.
b) Subcontractor is responsible for any self-insured retention/deductibles, including all claim handling and legal expenses.
c) DCC, et al. shall be indemnified for loss and defense.

6) <u>Pollution Liability</u> *(if required by scope of work) at least $5,000,000 each occurrence*

a) Pollution Liability for transit to be included.
b) Any subcontract which includes EIFS work must carry Pollution Liability, including mold coverage.
c) Subcontractor is responsible for any self-insured retention/deductibles, including all claim handling and legal expenses.
d) DCC, et al. shall be indemnified for loss and defense.
e) DCC, et al. shall be included as additional insured on a primary and noncontributory basis.

Hold Harmless Agreement –

Subject only to the limitations set forth below and to the fullest extent permitted by law, the subcontractor shall indemnify, and hold harmless, and defend the Owner, Construction Manager, Architect, Consultants, State of Connecticut and the agents and employees of any of them from and against any and all injuries, claims, damages, losses, expenses, fines penalties and liabilities including but not limited to personnel related cost, attorneys' and experts' fees, court costs, and all other claim-related expenses, directly or indirectly arising out of or resulting from performance, or negligent acts of the Subcontractor's Work under this Subcontract, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury or destruction of tangible property (other than the Work itself), but only if the claim, damage, loss or expense is caused by, connected with, arising out of or resulting from an act or omission of the Subcontractor, the Subcontractor's sub-subcontractors, anyone directly or indirectly employed by any of them or anyone for whose acts they may be liable.

The Subcontractor shall not be required by this agreement to indemnify a party for that portion of any loss that is directly attributable to the negligence of the party to whom indemnification is owed, except to the extent such indemnification is permitted by law. Such obligation shall not be construed to negate, abridge, or otherwise reduce any other right or obligation of indemnity which would otherwise exist as to any party or person described in this clause.

To the fullest extent permitted by law, the Subcontractor agrees to assume the defense of the Owner, DCC, Architect, Consultants, and the agents and employees of any of them, in any claim, proceeding, lawsuit, and/or litigation arising out of any accident, incident, or occurrence that is caused by, connected with, arising out of, or resulting from the performance of the Subcontractor's work under this contract.

The Subcontractor agrees that the obligation to defend commences when a claim is made against the Owner, DCC, Architect, Consultants, State of Connecticut and/or the agents and employees of any of them, even if the Subcontractor disputes its obligation to indemnify and hold harmless. The party being defended shall have the right to choose its own counsel. The Subcontractor agrees to pay for defense of the Owner, DCC, Architects, Consultants, and the agents and employees of any of them with counsel chosen by the party to be defended, upon demand.

The Subcontractor agrees to be bound to DCC by the terms and conditions of DCC agreement with the Owner, a copy of said agreement being available for inspection at DCC's office. The Subcontractor further agrees that all conditions and requirements imposed, or to be imposed, upon DCC by its contract with the owner shall be performed by the Subcontractor insofar as applicable to the work under the subcontract, and the Subcontractor hereby assumes toward DCC all obligations and responsibilities that DCC, by contract, has assumed or will assume toward the owner with respect to said work.

To the fullest extent permitted by law, the Subcontractor shall reimburse the Owner and DCC and the agents and employees of either of them, and any other party DCC is contractually required to indemnify, for any costs or expenses, including but not limited to attorney's fees, expended in seeking the Subcontractor's compliance with the above stated duties to defend, indemnify and hold harmless.

The Subcontractor's indemnity, hold harmless, and defense obligations set forth in this agreement shall cover the claim while this contract is in force, shall extend to such claims occurring after this agreement expires or is otherwise terminated, and shall continue until such claim is adjudicated and any and all actions against the Owner and DCC and the agents and employees of either of them are settled, terminated, dismissed or concluded.

G. Billing & Payment Procedures

A schedule of values on form AIA G703 will be submitted to the DCC Project Manager for approval within two (2) weeks of notice to proceed and/or notice of intent to award. The Subcontractor's schedule of values (SOV) shall be broken down by labor and material for each work line item, phases (if applicable), areas of the project, specific scope of work items, and other requirements as requested by DCC. The SOV shall also include a line for permit (if applicable), submittals, clean-up, coordination drawings (if applicable), safety, bonds, warranties, O&M manuals, as-builts, mobilization, demobilization, attic stock (if applicable), commissioning (if applicable) and other close-out documents. Closeout, as-builts, warranties, operations and maintenance manuals should not be less than 1% of the total amount of the Subcontractors contract value. If the SOV contains a General Conditions/General Requirements line item it shall be further broken down as directed by DCC. This breakdown must be approved by the DCC Project Manager prior to submittal of the first application for payment.

All invoices and requisitions for payment shall be submitted on AIA Document G-702 and G-703 or such other forms as may be required by the Owner. A "draft" copy of the requisition for payment must be submitted to the DCC Project Manager **by the 20th** of the month for approval. After the "draft" copy of the requisition has been approved and returned by the DCC Project Manager, the monthly billing will be submitted with five (5) originals to DCC by the 31st (or last business day) of the month for work expected to be complete through the end of the month. Should the Subcontractor fail to submit their approved Application for Payment by the 31st (or last business day) of the month, they will miss the billing cycle and have to wait until the following month.

Retainage for the project is set at five (5) percent unless specifically stated otherwise in the contract documents. Release (partial or otherwise) will not be entertained by DCC until after substantial completion of the entire project.

The Subcontractor along with its entire lower tier Subcontractors, vendors and suppliers will be required to sign a Partial Waiver of Lien prior to receiving payment each month provided by DCC.

All Subcontractors will be required to use GCPay. GCPay is a cloud collaboration platform managing the entire construction project application, assessment and payment process. GCPay automates construction payment management processes, specifically invoicing, lien waivers, compliance and electronic payments, for both general contractors and subcontractors. Instruction will be provided. There will be a flat fee of $15 fee per approved application for GCPay. This fee will be paid for by the subcontractor. Instructions will be provided.

If authorized by DCC, it is agreed that progress payments may be made for materials stored in a secure off-site location (**90% of the material value**) based upon the DCC receipt of the following documentation:

1. Bill of Sale Form (Downes form will be provided);
2. Invoice(s) from supplier(s) with the full value of the item(s) being requested;
3. Photographs documenting the materials labeled with the job name and description clearly visible;
4. Owner's Right of Entry Form (DCC form will be provided);
5. Security Agreement (DCC form will be provided);
6. Certificate of Insurance with Purchaser's Loss Payable Clause specifically listing the full value of the store material items plus 10%, stating specifically what the material is and where it is stored, as listed on the application for payment;
7. UCC-1 Financing Statement and addendum must be filled out and mailed with fee to the Secretary of State. UCC-1 can also be filled out online at www.ct.gov/SOTS. Copy of the acceptance letter must be sent to the Owner and/or DCC with the stored material paperwork. For articles in storage outside of the State of Connecticut, this form must be filed with the Secretary of State of the state in question;
8. If the Subcontractor has provided a 100% Performance and Payment Bond, a Consent of Surety to authorize payments for materials stored off-site must be obtained; this Consent of Surety form will be sent to DCC immediately upon receipt of the above noted documentation.

A physical inspection of the stored materials should be arranged with DCC, prior to the approval of this request.

H. Certified Payrolls & Monthly Employment Utilization Reports

The Subcontractor along with its entire lower tier Subcontractors shall submit certified payrolls on a WEEKLY basis and Utilization reports by the 10th of every month, if required by the project. Failure to do so will jeopardize the payment of monthly requisitions. Payments will be held until all certified payrolls and monthly utilization reports are up to date. All Subcontractors shall note the following in regards to WEEKLY certified payrolls and monthly utilization reports:

a) This is a Prevailing Wage project and each Subcontractor must follow all the rules, guidelines and regulations set forth by the CT Department of Labor. Please read and adhere to all of the contents pertaining to Prevailing Wage as set forth in this document.
b) As a reminder, Prevailing wages are updated (changed) every July 1st by the State Department of Labor. Each Subcontractor is responsible to find out the new rates and to make the appropriate changes on its first payroll after July 1st. Each Subcontractor is responsible for assuming and including wage increases in their lump sum bids accordingly. No change orders will be entertained as they relate to periodic prevailing wage rate increases.
c) Each contractor must send Certified Payroll submissions to *Certified Paychecks via email.* No hard copy originals will be required to be submitted to the consultant or Downes. The current email is payroll@certifiedpaycheck.com. (Contact is Kathy Wimmer at kwimmer@certifiedpaycheck.com).
d) Certified payrolls must be completely filled out Weekly basis and must be received by Thursday of the following week. Otherwise no payment will be allowed without correct receipt of certified payrolls (obviously all appropriate standard State of CT forms must be used). Employee's Social Security numbers should not appear on the payrolls.
e) Each Contractor must send its completed Monthly Employment Utilization Report Form for the Commission on Human Rights and Opportunities to *Certified Paychecks via email.* No hard copy originals will be required to be submitted to the consultant or Downes. The current email is payroll@certifiedpaycheck.com. (Contact is Kathy Wimmer at kwimmer@certifiedpaycheck.com). THESE REPORTS MUST BE SUBMITTED ALONG WITH THE CERTIFIED PAYROLLS.
f) It is a state law that all private employees and apprentices who perform manual labor for a Subcontractor on a public building project must have completed the 10-hour Outreach Course in accordance with federal OSHA Training Institute standards, and for telecommunications workers, a 10-hour training course in accordance with federal OSHA standards, 29 CFR 1910.268. A Certification card is not compliant if it is more than 5 years old.
g) Each Subcontractor must affix a copy of the construction safety course completion card to the first certified payroll submitted to DCC in accordance with Connecticut General Statue 31-53(f) on which such employee's name first appears.

I. Connecticut High performance Standards (CT HPBS)

All Subcontractors are responsible for complying with the Specifications Section on Sustainable Design Requirements as it relates to completing their scopes of work in support of complying with CT HPBS Review and coordinate with all related Specifications Sections, provide all submittals associated with compliance and complete work in a

manner to achieve compliance. Also refer to the Downes CT HPBS Management Plan contained within the Downes Project Manual.

J. Liquidated Damages

Liquidated damages are provided for in the Prime Contract and shall be assessed against the Subcontractor to the extent caused by the Subcontractor or any person or entity for whose acts the Subcontractor may be liable. Refer to the prime contract for additional information.

K. Escalation

All Subcontractors shall include the cost of future escalation in their lump sum bids based on the construction schedule. This includes but may not be limited to labor and material increases along with equipment operating expenses. Escalation in costs during the construction period will not be grounds for change order requests.

L. Submittal Procedures

The Subcontractor within five (5) working days of receipt of a Notice to Proceed shall provide a schedule of submittals to the DCC Project Manager for review and approval. This schedule shall include a complete listing of all shop drawings, samples, manufacturer's data, lead times, warranties/guarantees, O&M Manuals, etc. required by the specifications to be submitted for review. The Subcontractor shall also include a target submission date for each item listed which will be consistent with the project milestone schedule requirements. Failure to provide a satisfactory schedule shall result in all payment applications being held in abeyance until such time as the satisfactory schedule is submitted and accepted by DCC.

- Critical submittals are due to DCC within ten (10) working days of receipt of the Limited Notice to Proceed and/or Letter of Intent. All other submittals are due in the office of DCC within thirty (30) working days of receipt of the Notice to Proceed/ Letter of Intent. **Failure to complete the submittal process within this time frame will result in a $1000 fine each week until all submittals are completed.**

Project Management System (Subscription fee to be included in bid) - All Subcontractors will be required to use PROCORE. PROCORE is a cloud-based construction management software application that will increase project efficiency and accountability by providing streamlined project communication and documentation.

Through PROCORE, trade contractors will:

- Submit and receive all project communications
- Submit RFIs and review responses
- Submit trade contractor daily reports

- Submit all shop drawings, product data, close-out documentation and other required submittals
- Respond to Observations, Safety Concerns
- Other as directed by CM

A. Each Subcontractor (Trade Bid Package) is responsible for a lump sum subscription fee to be paid directly to DCC. The Subscription fee is calculated as 0.56% of the trade contract value (i.e. Trade Contract Value X .0056). This fee will be deducted from the Subcontractor's initial Application for Payment. Other than the Subscription fee, there are no other licensing or monthly service fees for using PROCORE for the life of the project.
B. Each Subcontractor will be responsible to have a full-time on-site representative who is equipped with a tablet device with internet access along with the PROCORE APP downloaded to it. Each trade contractor shall be responsible for updating/upgrading their tablet device to ensure that all functions of PROCORE can be utilized. Subcontractors are able to manage their projects from any web-connected mobile device, tablet, laptop, or desktop.
C. All Subcontractors must have a valid e-mail address to access PROCORE in the field and they will receive an e-mail notification when an observation, RFI, submittal etc. has been assigned or is pertinent to their company via PROCORE. Trade contractors are required to respond to all items within PROCORE by the due date specified for each particular issue. Issues that are not resolved by the specified due date will be assessed as they relate to progress billings for the assigned trade contractor.

The use of PROCORE will ensure high-quality work with minimized corrections which, in turn, will shorten the project close-out and expedite the release of retainage payments to trade contractors. Failure to actively participate with PROCORE will lead to delayed payment and a longer closeout period.

- If required by the Architect/Engineer, this Subcontractor shall sign any required release and pay for any CAD/Revit files to be utilized for coordination, submittal or any other purpose.
- Subcontractors shall utilize the Submittal Cover Sheet provided by DCC. Each Subcontractor shall request a copy or electronic version prior to making their first submission.
- The Subcontractor is responsible for all engineering, performance requirements, detailing, samples and coordinated shop drawings necessary for this scope of work, in accordance with the Contract Documents or as determined by Downes and the Design Team.
- The Subcontractor is responsible for detailed coordination and review of shop drawings and submittals from other Subcontractors that affect the fabrication and installation of work covered under their Scope. This includes, but is not limited to, electrical requirements, verification and comparison of rough

openings in walls, ceilings and/or floors for the passage or installation of construction items furnished and installed by this scope of work or other trade Subcontractors. DCC will endeavor to provide copies of all approved shop drawings/submittals to the individual trades affected by their contents. However, this shall not relieve the Subcontractor from this coordination process. If this Subcontractor feels they have not received shop drawings/submittals to properly coordinate their work, they are responsible for requesting them in writing from the Construction Manager. The Subcontractor is responsible to review and coordinate with other trades submittals/shop drawings for the coordination of their work and to advise DCC within 5 working days from receipt of submittal/shop drawing if there is a cost associated or negatively affects the Subcontractors scope of work.

- The Subcontractor is responsible to provide the required High-Performance Building and/or LEED submittals with all appropriate substantiation in order to meet the Projects requirements and credits.
- In addition to the above-mentioned items, the Subcontractor is responsible for the submittal requirements and/or procedures as outlined in the Division 1 Specifications.

It is the Subcontractors responsibility to make submittals in a timely fashion in order to ensure procurement, installation and coordination with other Trades, in accordance with the Project Schedule. Subcontractors are responsible to provide the Manufacturers Release Letter to the CM when procuring equipment/material in order to prove releases have gone through as scheduled. Subcontractors will be responsible for any delays to other Subcontractors and DCC as a result of delayed or incorrect materials being delivered or installed.

M. Hourly Rates

Labor Rates – All Subcontractors are required to submit their proposed labor rates with proper substantiation and breakdown with their bid. Overhead & profit, bond, consumables, reimbursables, equipment costs, sustenance, travel, safety and/or parking etc. are NOT to be included in the hourly rate, but shall be a separate line item offered (subject to DCC approval) on your Change Order Request breakdown at that time. All rates are subject to thorough analysis and adjustment if deemed necessary by DCC. All approved rates will be valid for the life of the project.

Equipment Rates - Will be mutually agreed upon between the Subcontractor and DCC as may be applicable to their work. Equipment rates shall be submitted within one (1) week of verbal award. All approved rates will be valid for the life of the project.

N. Change Order Proposals

If the Subcontractor receives any drawings, RFIs, submittal review, specifications, and/or instructions that it believes to be inconsistent with the Contract Documents for their

scope of work, The Subcontractor will submit a Change Order Proposal (COP) complying with the following:

1. The Subcontractor will submit to the DCC Project Manager a detailed labor and material breakdown for all Change Order Proposals within seven (7) calendar days of receipt, three (3) calendar days for receipt of an RFI answer. DCC reserves the right to dictate the format and to what extent Change Order Requests should be broken down. Only approved labor and equipment rates shall be used in the development of the Change Order Request.
   Change Order Proposals shall be submitted with a minimum of the following breakdown:
   a) Direct labor rates as approved
   b) Direct material costs
   c) Direct equipment costs
   d) Subtotal (a+b+c)
   e) Subcontractor allowable mark-up
   f) Lower-Tier Subcontractor costs (including back-up)
   g) Subtotal (e+f)
   h) Total (d+g)

2. The Subcontractor will include all substantiating documentation, including but not limited, to quotes from vendors/suppliers, quantity breakdowns, etc. There will be no exception for any trade in providing physical quotes from vendors/suppliers along with their Change Order Proposal.
3. The Subcontractor is allowed ten percent (10%) markup on work performed by his/her own forces and five percent (5%) markup on his/her subcontractors unless otherwise specifically stated in the Contract Documents will be allowed. Mark-up will not exceed 15% by all subcontractors involved, regardless of specifications. This OH&P shall include all home office expenses and supervision, including but not limited to, principals, project managers, project engineers, general superintendents, accounting personnel, small tools, safety, parking, travel, reimbursables, consumables, etc.
4. Foreman hours, if applicable, shall not exceed 10% of total estimated hours for entire Change Order Proposal.
5. All Subcontractors shall note that when preparing change orders, all costs for small tools are included in the overhead and profit percentages allowed by contract. Small tool allowance is not to be added as a separate percentage. Any specific equipment rented for the time and material work can be billed based on invoices for the rental of the equipment. A small tool shall be defined as a tool with a replacement value of $1,000.00 or less and shall consist of tools used on a daily basis in the normal performance of their work and shall include items such as extension cords, ladders, hoses, etc.

6. The added Bond cost should be included as a line item in the individual change order proposals but will be adjusted accordingly once the final contract amount is determined and agreed upon with a receipted invoice from the bonding company. The percentage rate for the bond increase should be the same as the "break out" compared to the value of the lump sum bid. Additional overhead and profit will not be allowed.
7. If unit prices are applicable to changes in the scope of work, compensation for the changes shall be based on the Unit Prices received at bid time for adding and deducting to the contract sum. DCC reserves the right to execute unit prices.
8. DCC will assume that the Subcontractors failure to provide a Change Order Proposal within seven (7) calendar days, three (3) calendar days for receipt of an RFI answer, will mean that there is no cost impact and no change to the contract time. Change Order Proposals submitted after the completion of the work item will be rejected in full.
9. Change Order Proposals submitted by Mechanical and Fire Protection Trades shall also note the following additional parameters:
   - Commodity materials, equipment and fixtures shall be listed and quantities indicated.
   - Pricing of materials (commodities) shall not exceed 50% of Harrison Publishing manufacturer list price (i.e.: pipe, fittings, valves, hangers, etc.). Furnish current book to DCC.
   - Consumables, tools and equipment shall be listed separately and industry standards shall be adhered to. Equipment rentals rates based on Mechanical Contractors Association America (MCAA)
   - Quotations from vendors for such equipment as PLMG/HVAC equipment, PLMG/ HVAC specialties, PLMG/HVAC accessories, etc., will be required.

   Labor:
   - All Labor Units shall adhere to the most recent Mechanical Contractors Association America (MCAA) Manual of Labor Units. Furnish current book to DCC.
   - Net labor units shall not exceed 65% of MCAA will only be considered for abnormal situations as listed in the "Introduction" and the "Labor Units Defined" Sections of the MCAA Manual.
   - Foreman hours shall not exceed 10% of total estimated hours for entire Change Order Proposal.
   - General Foreman hours shall not be considered until crew size exceeds 10 workers in field.
   - Drafting and As-Builts shall not exceed 4% of estimated hours, if applicable.
   - Safety shall not exceed 2.5% of estimated hours for entire Change Order Proposal.
   - Project Management is included in Overhead and Profit.

- Additional manhours for daily clean-up will not be accepted.

Note:

- The Subcontractor will be allowed 10% markup on work performed by his/her own forces and 5% markup on his/her subcontractors unless otherwise specifically stated in the Contract Documents. Markup will not exceed 15% by all Subcontractors involved, regardless of Specifications.
- Any and all credits listed in Change Order Proposals shall adhere to the same format, material pricing and Labor Units as applicable to additions to the scope of work.
- Quotation for low tier subcontractors i.e. insulation, controls and sheetmetal shall follow same format. NECA, SMACNA and Ottaviano Estimator labor units considered.

10. Change Order Proposals submitted by Electrical Trades shall also note the following additional parameters:

Material:

- Commodity materials, equipment and fixtures shall be listed and quantities indicated.
- Pricing of materials (commodities) shall not exceed 80% of Low Column Trade Service (i.e.: pipe, wire, devices, etc.). Furnish current book to DCC.
- Consumables, tools and equipment shall be listed separately and industry standards shall be adhered to.
- Quotations from vendors for such equipment as light fixtures, switchgear/overcurrent protection, fire alarm, security systems, sound systems, etc., will be required.

Labor:

For Electrical changes in the work the contractor or subcontractor shall use the lowest unit prices for productivity for “Daily Output” and “Labor Hours” utilized in the National Electrical Contractors Association (NECA) Manual of Labor Units, most current edition, for pricing indicated in Column 1 with no add-ons or additional burdens allowed. For labor unit pricing utilize a sliding scale, a multiplier rate of .85 and .90 based on the total cost of the change excluding subcontractor costs. A change in the Electrical Work with a direct value between $1 and $10,000 shall use a multiplier rate of .90 and for a direct value greater than $10,000 the multiplier rate shall be .85.

Note:

All Changes- Overhead and profit (O&P) shall include all costs for home office support, as built drawings, project management, estimating, safety, small tools, pick up trucks, travel, on site (includes foreman’s time unless the foreman is performing the task) and off site supervision. Foreman’s hourly rates shall be set by the actual rate verified by certified payroll. Foreman’s time cannot be added on to any change proposal or time and material ticket (including allowance work) and is chargeable

only if the foreman is directly working on the change or time and material work (including allowance work). For projected changes, the foreman's hours shall not exceed ten percent (10%) of the total labor hours directly attributable to the change and shall be part of the hours attributable to the change. Allowable combined overhead and profit on self performed trade contractor or self performed subcontractor is 10%.
Overhead and profit shall not be applied to lower tier mark ups. When both additions and credits covering related Work are involved in a change, the allowance for overhead and profit shall be figured on the basis of net increase, if any. For work performed by a subcontractor the trade contractor mark up for combined overhead and profit shall be five percent (5%) of the net cost of the work. The total mark up to the Owner, excluding the Construction Manager's mark up, shall not exceed fifteen percent (15%) of the net cost of the work. Change proposals shall indicate the number of additional calendar days, if any, which are required to complete the change. If no additional time is indicated it will be assumed that no additional time is required. The Trade Con-tractor shall, when requested, promptly furnish in a form satisfactory to the Construction Manager, itemized statements of the cost of the Work so ordered, including, but not limited to certified payrolls and copies of accounts and subcontracts, bills and vouchers to substantiate the above estimates. Estimated bond costs may be shown on each change proposal request, but not included in the total. Additional bond fees actually incurred will be reconciled at the end of the Project upon presentation of an invoice from the Trade Contractor's bonding company. Contractor O&P is not allowed on bond costs. Change orders issued to Trade Contractors shall be executed and returned to the Construction Manager within seven (7) days. Failure to return change orders in the prescribed time will result in withheld payments to the Trade Contractors.

11. DCC may direct a Subcontractor to proceed on a "Not to exceed" Time & Material basis if agreement cannot be made as to the total cost of a Change Order Proposal or if it is deemed in the best interest of the project and/or owner.

DCC reserves the right to reject any change order proposal not submitted within all the criteria noted above.

O. Time and Material Work (T&M)

Subcontractors are required and obligated to perform time and material work (T&M) if directed to do so by DCC. The Subcontractor is required to complete Time & Material work following all terms and conditions of the original agreement (contract). Time & Material worksheets shall be submitted to the DCC Field Superintendent for verification on a daily basis. Foreman shall provide appropriate descriptions of work performed and locations of work performed via screen shots of plan sheets etc., as well as, photo

documentation before and after. Time verification shall be supported by daily labor reports. Failure to do so may affect acceptance and reimbursement of the work. T&M work shall be submitted in the form of a Change Order Proposal in accordance with the Change Order Proposal section of these supplemental instructions no more than 10 business days after the completion of the work. Failure to comply with the aforementioned requirements may affect payment and is grounds for complete rejection if it is determined by DCC there is no way to verify the work was completed.

P. Requests for Information (RFI)

The Subcontractor will submit questions regarding construction issues in an industry standard RFI format as agreed to with DCC. Due to the assumption of a Subcontractors expertise in their scope of work, a proposed solution will accompany the RFI.

Q. Daily Reports

Daily construction reports will be submitted by Foremen by 9:30 AM of each workday for all work completed on the previous day to the DCC Field Superintendent, providing the following information:
1 - The names and number of employees at the site, broken down by trade and lower tier subcontractors (if applicable).
2 - Description of the type of work being performed and the location.
3 - Equipment on site and any material deliveries, waste management paperwork, any and all LEED/High Performance Building required documentation.
If there are EEO hiring goals associated with the project, additional forms may require to be submitted on a daily basis to document workforce participation.

R. Construction Progress Meetings

DCC conducts progress meeting weekly to discuss project safety, review project progress, outline, discuss and coordinate upcoming scheduled work activities, and address quality and other matters affecting the project. Subcontractor representation by a person familiar with and responsible for project activities, and authorized to speak for and make binding commitments on the behalf of their firm, is mandatory for these meetings. All subcontractors currently onsite, on the 4 week look ahead schedule, have open RFIs, incomplete submittals, coordination required with others trades, etc…. are required to attend these meetings. **Failure to attend a Construction Progress Meeting without prior consent from DCC will result in a $500 fine per missed meeting.**

S. Preconstruction / Pre-installation Meetings

DCC will schedule mandatory Pre-construction/Pre-installation Meetings prior to commencement of work. Subcontractors will be prepared to address work schedule, manpower, safety, site logistics, submittals and delivery of materials. Subcontractors will also provide a list of key personnel with addresses and telephone numbers for

emergency situations. **Failure to attend Preconstruction / Pre-installation Meetings without prior consent from DCC will result in a $500 fine per missed meeting.**

T. Foreman Meetings

The DCC Field Superintendent will hold weekly foreman meetings to be attended by the Foreman from each respective trade on the jobsite. The Foreman should be prepared to address work schedule, manpower, safety, site logistics, submittals and delivery of materials. **Failure to attend Foreman's Meetings without prior consent from DCC will result in a $500 fine per missed meeting.**

U. MEP Coordination Process

Representatives from all MEP trades must attend MEP Coordination Meetings which will be identified at the MEP Coordination Kick-off**. Failure to attend MEP Coordination Meetings without prior consent from DCC will result in a $500 fine per missed meeting.**

DCC will oversee the coordination process between the MEP Subcontractors. If the contract design documents were created/drawn in a three-dimensional REVIT Model, then the MEP coordination process will be constructed in a 3D "BIM" environment using the same software version of REVIT in which the contract model was provided and the latest version of Auto-Cad or Auto-Cad compatible 3D software. The BIM Coordinator will take the lead and will be the "Gate Keeper" for the entire process. The BIM Coordinator shall initiate the coordination drawing process by providing all models and trade file drawings that have been setup for the coordination process in CAD/Revit/Navisworks to all trades, (Please refer to the specific scope of work for BIM Coordinator/Gate Keeper responsibilities/assignment). Each trade shall incorporate their systems electronically using a BIM specific drawing that is Navisworks model compatible. DCC will hold an initial "kick-off" meeting to review the process with all MEP Subcontractors and to establish a regular meeting schedule and file logistics. All subcontractors are responsible to have and coordinate online meeting capabilities; if not, it is the subcontractor's responsibility to pay for this service. At these meetings, the MEP Subcontractors are expected to resolve all conflicts, assure accessibility and serviceability, coordinate sequences and make adjustment to the layout to achieve the Architectural/Engineering intent of spaces, ceiling heights, accessibility, and to maximize headroom clearances. DCC will request Architect/Engineers assistance relative to acceptability of installations and for input on un-resolved conflicts. DCC will issue meeting minutes with action items following each meeting. Coordination drawings are not to be considered as piping or duct shop drawings and will not be reviewed as such. The Subcontractors are required to submit piping and ductwork shop drawings for review by the Engineer as part of the standard submittal process. Piping and ductwork shop drawings shall follow the design intent of the contract documents.

Process:

1. As soon as practical and in no case starting later than 10 business days unless noted otherwise after the award of contract or notice to proceed the sheet metal

subcontractor shall prepare layout drawings of all his equipment and ducted systems. The DCC BIM Coordinator is responsible to create the base coordination drawings, including but not limited to, as-built (field measure/draw) all existing conditions (structural/architectural elements to remain, verify and draw all new structural and architectural components (ie: soffit framing, ceilings, walls, Owner supplied FF&E, misc. steel, etc…)

2. If required or applicable to the specific project requirements the MEP Subcontractors should as soon as practical, (in no case starting later than 10 business days after award of contract or notice to proceed) as-built (field measure/draw) their own existing systems currently in place in order to properly coordinate new work around existing systems depicted in the Contract Documents (Ie: Occupied Construction Phasing)
3. Electronic drawing format: The same software version of REVIT as the contract drawings w/NAVISWORKS Clash/Collision detection along with the latest and most current AUTO-CAD version or the latest BIM compatible three-dimensional model space software. Background files may be obtained from the Architect and Engineer as a REVIT Model and/or CAD file backgrounds. The MEP subcontractors will be required to sign waivers to obtain the CAD files from the Architect / Engineer and to pay any fees associated with obtaining the files. Converting, stripping the information for coordination will be initiated by the DCC BIM Coordinator. It is expected that the MEP subcontractor will use the REVIT/CAD file backgrounds and other files provided by the DCC BIM Coordinator to ensure all trades are working on the most current file for coordination. It is acceptable if MEP Subcontractors extract or convert REVIT information for their own use as necessary if the needed information was not provided by the DCC BIM Coordinator. MEP Subcontractor will notify the DCC BIM Coordinator if this action takes place.
4. All MEP Subcontractors will be responsible to provide necessary in house or provide outsourced consultant services - CAD MEP Coordination capable with a minimum experience of (3) past projects with similar size and scope in a 3D BIM environment using REVIT/NAVISWORKS/AutoCAD and with the Auto-CAD BIM compatible software.
5. All MEP Subcontractors will be responsible to upload their own drawings to the latest uploaded Navisworks Model updated and posted to do their own collision detection to mitigate clash issue before coordination meetings. The DCC BIM Coordinator is responsible for generating the clash/collision detection reports for the coordination meetings.
6. The HVAC Subcontractor is required to provide and install the most current/ or current version of the contract drawings in REVIT w/NAVISWORKS and BIM software, wall mounted 55” LED smart HDTV with a 1920x1080 full HD resolution and USB port, complete with all cables mounting, splitters and hardware, etc. for complete connectivity with laptop computers. All items to be turned over to DCC at the end of the project.

7. Prepare coordination drawings and sections clearly showing how the work is to be installed in relation to the work of other trades. The subcontractor shall prepare coordination drawings at a scale no less than 3/8" = 1'-0", showing the work of all trades, including but not limited to, the following: proposed ductwork installation in detail, including ceiling heights, duct heights, access doors, light fixtures, cable tray, J-hooks, special systems conduit, tele/data conduits and equipment, registers and diffusers, sprinkler piping, electrical distribution conduits and equipment, wires, mechanical equipment, fixtures, panels and any other electrical work which may conflict with the sheet metal ducts or piping, waste and vent piping, water piping, and rain leaders, etc….
8. All MEFP Trade drawings will be created and coordinated with architectural and structural drawings. Once created they will be submitted to the Engineer for review. Drawings must be returned from Engineer either "Approved", "Reviewed" or "Furnish as corrected" prior to being used as basis for coordination drawings. At the same time, all trades will coordinate structural framed opening and support framing dimension information for structural subcontractors. Separate drawings will be created and sent to structural trades, including but not limited to, RTU/fan curbs, MEP dunnage frames, roof drains, duct and pipe hanger supports, flue stacks, foundation and wall sleeves, cored or square hole opening and etc.
9. After the MEFP Coordination kick-off and coordination files from the DCC BIM coordinator have been provided the trades are to coordinate in the following sequence for the inclusion of their work:
    1. Plumbing subcontractor
    2. Mechanical subcontractor (sheet metal/hydronic piping)
    3. Mechanical piping
    4. Sprinkler piping
    5. Electrical work, along with Fire Alarm, Technology
    6. Special Systems
    7. Other

    Drawings will then be sent to the engineer for review.
10. Prior to inclusion of sprinkler piping and equipment, subcontractor shall have submitted sprinkler plans and calculations to engineer for review and to rating Bureau for review. After all trades have included their work on the coordination drawing and noted conflicts, all trades shall meet to resolve conflicts and agree to acceptable solutions. Each subcontractor shall sign coordination drawings. Items not shown on coordination drawing are responsibility of omitting subcontractor and subcontractor is subject to back charge of additional costs incurred by other trades due to omission.
11. Submit final signed coordination drawing to Engineer for review. Engineer will review accordingly.
12. All work fabricated or installed work prior to sign off by all trades is the sole responsibility of MEP Subcontractor performing work and is at risk of

removal/re-working at their expense. Each MEP Subcontractor (mentioned above) is responsible for the coordination of his or her lower tier subcontractors.

13. The record copies of final composite MEP Coordination drawings shall be retained by DCC and each MEP Subcontractor as working reference. Each MEP Subcontractor is required to provide electronic 3D model & 2D Auto-Cad as-builts as well as PDF copies and the DCC BIM Coordinator is required to electronically turn over the as-built model and PDF Composite drawings. All shop drawings, prior to their submittal to the Architect/Engineer, shall be compared with the composite drawings and developed accordingly by the trade responsible. Any revisions to the composite drawings which may become necessary during the progress of the work shall be noted by all trades and shall be neatly and accurately recorded on the record copies. Each trade shall be responsible for the up to date maintenance of his record copies of the composite drawings and to keep one copy available at the site. The composite drawings and any subsequent changes thereto, shall be utilized by the MEP Subcontractors in the development of their "as-built" drawings.

V. Project Schedule and Progress

This Subcontractor is responsible to meet the requirements of the Preliminary/Milestone Construction Schedule included in the Contract Documents. This includes providing the appropriate manpower, equipment and materials. The Subcontractor will be responsible for all overtime and costs associated with meeting this schedule. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time frames included in the preliminary baseline schedule. "Time is of the essence" in approaching work.**

The intent of the Preliminary/Milestone Construction Schedule is to define the construction performance period(s). Changes to this schedule during construction will not be grounds for any change orders or claims. The Preliminary/Milestone Construction Schedule included in the Contract Documents shall represent the major activities of work and the duration of time allocated to those activities, also referred to hereinafter as the assigned construction performance period(s). It is the responsibility of the Subcontractor to develop a detailed construction schedule of activities and plan their work within the assigned construction performance period(s) provided by the Preliminary/Milestone Construction Schedule. The Subcontractor by providing a Bid acknowledges and accepts the defined assigned construction performance period(s) to complete their work and further agrees to provide detailed information to DCC for the development of a detailed Construction Schedule.

A more detailed Construction Schedule will be prepared and issued during the project by DCC. Within twenty (20) working days of receipt of a Notice to Proceed, each Subcontractor shall provide detailed scheduling information for the creation of the detailed Construction Schedule. This information is to include, at a minimum, a man

loaded construction schedule with detailed itemizations, durations, procurement and sequences of all work activities including predecessor/successor relationships and designation of manpower required to achieve the schedule in accordance with the assigned construction performance period(s) as outlined in the Preliminary/Milestone Construction Schedule. Failure to submit required schedule information to the DCC as outlined in this section forfeits the Subcontractor's opportunity for any adjustment to durations, sequence, or logic of specific tasks. Further to this, as this scheduling information is critical to the successful execution of the project, any delay in providing such information will cause all payments due the Subcontractor to be held until such time as the information is submitted and approved by DCC.

All Subcontractors are obligated to comply with the Construction Schedule. The Construction Schedule will be updated throughout the project to incorporate changes in work, changes in sequence and changes in logic, all of which are recognized and anticipated as common in the construction industry and with this project. As such, all Subcontractors shall comply with the appropriate adjustments to their manpower and material and equipment deliveries to accommodate the schedule changes without additional compensation from DCC or Owner.

Trade Subcontractor is responsible to make up for lost time due to weather or manpower delays at the Trade Subcontractor's expense.

In the event the Owner or DCC determines the Subcontractor is behind schedule and/or will not be able to meet milestone dates at the current rate of progress, the Owner or DCC may direct the Subcontractor to increase its workforce and should the Subcontractor at any time refuse or neglect to supply a sufficiency of properly skilled workmen, or materials of the proper quality and quantity, or become insolvent or unable to pay its obligations as they mature, or in the opinion of the Owner or DCC, fail in any respect to prosecute the work with sufficient promptness and diligence to ensure its completion within the time herein provided, or fail in the performance of any of the agreements on its part herein contained, the Owner or DCC shall be at liberty, after two (2) business days of written notice to the Subcontractor, delivered personally, emailed or mailed to or left at its place of business to default the Subcontractor. In the event the Owner or DCC declares Subcontractor in default, Owner or DCC may (1) terminate this Contract in whole or in part or (2) supplement the Subcontractors forces and may use any materials implements, equipment, or tools furnished by or belonging to Subcontractor. In the event the Owner or DCC itself, or by another subcontractor, or both, furnishes labor and material to complete Subcontractor's work, Owner or DCC may offset the cost thereof and any expenses therefore including overhead and profit against any money due or to become due under this Contract. Subcontractor shall be liable for any excess costs and expenses over the Contract amount for completion of Subcontractor work. In the event the costs and expenses of completing Subcontractors work are less than the amount remaining on this Contract, the Subcontractor shall be entitled to the differential. In addition to the costs and expenses of completing

Subcontractor's work as set forth herein, Owner or DCC shall be entitled to reasonable legal fees to enforce the terms of this Contract. Notwithstanding DCC's use of its own forces and/or utilizing forces of another subcontractor in performing in whole or in part the work of the Subcontractor, the Subcontractor shall remain fully responsible for the timely completion of the work which is the subject of this Contract.

If the Subcontractor fails to staff the job adequately to meet the milestone or completion dates, the Owner/DCC reserves the right to assume possession of the material and complete the installation with the Owner's forces or other Subcontractors under the direction of DCC or to require the Subcontractor to work second shift and/or weekends. The Subcontractor shall be responsible for any additional costs incurred by other contractors and/or DCC resulting from the Subcontractor working overtime, Saturday and/or Sunday to remedy the delay.

If, in the opinion of the Construction Manager, any construction activity completion date, milestone and/or substantial completion dates are in jeopardy of being met as a result of a Trade Contractors performance, then upon two (2) business days of written notice to the Subcontractor; the Trade Contractor agrees to work overtime, add manpower, and do whatever is necessary to meet said construction activity, milestone and substantial completion dates at no additional cost to the Owner. The Trade Contractor shall be responsible for any additional costs incurred by others, (including supervision by the Construction Manager) for this overtime work. If, in the opinion of the Construction Manager, the Trade Contractor has failed to take sufficient action to meet the referenced dates, after receiving the three-day notice, the Construction Manager may take whatever action it deems necessary to attempt to meet the construction activity, milestone and/or substantial completion dates. The cost of such action shall be the responsibility of the Trade Contractor and deducted from the contract if sufficient monies remain. If insufficient funds remain to be paid, the Trade Contractor shall pay the Construction Manager or the Owner. The Construction Manager, by taking action under this paragraph shall not assume responsibility for meeting the referenced dates, or responsibility for the work. Such responsibilities shall remain with the Trade Contractor and the Trade Contractor's Bonding Company. The costs referenced in this paragraph are not in substitution of or in lieu of liquidated damages, which may be assessed pursuant to other provisions of this contract.

The Owner and each Subcontractor agree that time is of the essence to the Contract Documents and all obligations thereunder. The Subcontractor acknowledges and agrees that the Owner will sustain damage and loss as a result of the Subcontractor's failure to meet the contract time schedules. All Subcontractors are responsible for scheduling its labor and material procurement within the time periods set forth in Contract Documents. The Subcontractor is also required to perform its work in such a manner so as to not interfere with or prohibit other Subcontractors from completing their work within the time periods set forth in the Contract Documents. In the event the Subcontractor does not meet the time requirements set forth in the Construction

Schedule and time periods outlines, the Subcontractor will be responsible for monetary sustained damage and loss to the Owner.

W. Construction Impact on Adjacent Streets and Property

All Subcontractors must pay special attention to pedestrian and vehicular activity that will occur adjacent to construction activities and the jobsite. Vehicles and equipment shall not be left unattended at any time and shall not interfere with pedestrian and vehicular traffic. Deliveries must be closely coordination with the Construction Manager. Due to the close proximity of adjacent buildings and structures construction means and methods may have to be adjusted to prevent damage and disruption of business activities.

X. Construction Indoor Air Quality Management Plan

All Subcontractors are responsible for submitting a complete Construction Indoor Air Quality Management Plan during construction in support of CT HPBS. This Subcontractor is required to review all credits and provide submittals for approval prior to the commencement of work and shall follow through with all associated documentation and paperwork in order to achieve the required CT HPBS for Schools points. **Note that All cavity wall penetrations shall be sealed on both side of partitions in accordance with IEQ pathway interruption and other associated credits weather or not specifically shown in detail. All documentation required to be submitted by this Subcontractor will be reviewed in accordance with the monthly requisition billing cycle, failure to maintain the required CT HPBS for Schools submittals and documentation will be justification for non-payment. Refer to Specifications Section on Construction IAQ.

Y. Stormwater Pollution Control

All Subcontractors must sign the Stormwater Pollution Control Plan Statement included in the Bid Documents.

Z. Safety and HAZCOM

Safety is the first priority on the job site. Subcontractors shall conduct their operation in accordance with all applicable regulations and requirements of Local, State and Federal Laws, which include regulations of the Occupational Safety and Health Administration (OSHA).

- DCC will hold a jobsite safety orientation meeting for all subcontractors. Each and every one of the Subcontractors employees must understand, acknowledge and fully execute the orientation form and/or be accompanied by a competent person. “Safety Trained Hard Hat Label Identification” stickers will be distributed and logged at that time. These stickers shall be placed on the individual’s hard hat in a prominent location.

- Satisfactory evidence of OSHA 10 and/or OSHA 30 training certification for all employees on the jobsite must be provided to DCC no later than five (5) business days PRIOR to work start.
- DCC will hold a safety meeting on a periodic basis with on-site personnel from each trade currently performing work at the site. At least one representative (foreman or above) shall attend safety meetings and be continually alert for safety hazards and report them to the DCC immediately.
- Each Subcontractor must furnish the DCC Field Superintendent with two (2) copies of his/her own project specific Safety and Hazardous Communication Program including all SDS sheets (Safety Data Sheets) no later than five (5) business days PRIOR to work start. Each Subcontractor is required by OSHA regulations to institute a hazard communication program. Under said program, Subcontractor must inform both the Construction Manager and all other Subcontractors on the site of any hazardous chemicals being used by Subcontractor's employees on this project. Each Subcontractor shall provide DCC and all other Subcontractors, copies of the SDS sheets. They also must warn other Subcontractors in Subcontractor's work area of the existence of hazardous chemicals, must insure that any containers containing hazardous chemicals are properly labeled and stored, and must maintain an inventory of any such chemicals.
- A Job Hazard Analysis (JHA) must be submitted to the DCC Field Superintendent no later than five (5) business days PRIOR to work start. Sample forms are available from DCC.
- Any and all accidents must be reported to DCC immediately and accident reports submitted within five (5) business days of the incident.
- All workers are required to follow all applicable OSHA regulations regarding daily construction activities (approved footwear, shirts, pants, etc.). In addition, all workers must be provided by their employer and where at all times all proper Personal Protective Equipment (PPE). This includes but may not be limited to Hard Hats, Safety Glasses, Ear Protection, High Visibility clothing etc. **Failure to wear Hard Hats and all other PPE as determined by the JHA will result in a $100 fine. The third violation will result in immediate and permanent dismissal of the individual from the site.**
- Each Subcontractor will provide any fire watch necessary in the performance of "hot work" activities. In addition, a certified fire extinguisher needs to be placed in the general vicinity of the "hot work". A "hot work" permit will be issued by DCC. **Failure to obtain the proper "hot work" permit will result in a $100 fine.**
- The Subcontractor will provide all lifts, staging, scaffolding and hoisting required to complete this scope of work in accordance OSHA and DCC's "Scaffold Use Program". (Copy available upon request).

- Use of scaffolding shall be in accordance DCC's "Scaffold Use Program" (a copy is available upon request). This requires a scaffold release, insurance indemnification closure, designated competent person, scaffold user qualification and daily inspection log as well as compliance with all applicable OSHA regulations. If man and/or material lifts are required for this project similar requirements will exist.
- Each Subcontractor shall check and maintain protection of all slab openings and perimeter fall protection when executing their work. Each Subcontractor shall provide all temporary protection and/or barricades per OSHA requirements in all areas as required in completing this scope of work. Each subcontractor is also responsible for maintaining and/or removing this same protection until completion of this scope and/or safety is assumed by another subcontractor. Safety measures CANNOT be removed by any Subcontractor because it interferes with a part of their scope of work without providing an acceptable revised system. If the work is completed and these safety measures are no longer required per OSHA or to establish safe working conditions for all trades, then the Subcontractor who installed them shall remove them in their entirety.
- The Subcontractor is responsible for any and all lead in Construction work necessary to execute this scope of work. All applicable OSHA rules, regulations and guidelines are applicable.

AA. Pedestrian/Vehicular Traffic Control

The Subcontractor is responsible for all pedestrian and vehicular traffic control management as required for the execution of their scope of work. The Subcontractor will provide local police officers, traffic control devices, flagmen, signage, barricades, temporary road plates, permits, fees, etc. as may require by the same authorities and/or DCC. All work affecting public roadways will be performed in a manner to maintain safe traffic patterns and to minimize disruption to traffic and pedestrian flow. The Subcontractor will avoid obstructing vehicular and pedestrian traffic into and out of adjacent facilities. The Subcontractor shall provide a complete logistics plan at least two (2) weeks prior to work start for approval by DCC and local authorities.

BB. Document Distribution

During the course of construction, most information including the issuance of Bulletins, ASIs, SKs, new and/or revised drawings will be transmitted via Email by DCC. It shall be assumed that hardcopies will NOT be provided. The Subcontractor will be responsible for providing and paying for any and all hardcopies they desire.

CC. Permits

DCC will be responsible for obtaining the General Building Permit. All other permits shall be obtained by and paid for by the respective Subcontractor, i.e. Fire Protection,

Plumbing, HVAC, Electrical, Fence, Curb Cuts, Elevator, Food Service, Water/Fire/Sanitary Services, Storm Water Pollution/Discharge, Signage, and any other permit other than the General Building Permit. Copies of permits must be submitted to the DCC immediately upon receipt.

DD. Noisy Operations

Heavy machinery start-up/warm-up cannot occur prior to 7:00 AM. Any loud operations cannot occur prior to 7:00 AM. All operations that involve excessive noise and may disturb the owner's activities or the neighborhood will be scheduled weekly at the DCC's Field Coordinating Meeting. These items include but are not limited to; jack hammering, hammer drilling, vibratory compaction, etc. These operations will also be monitored on a daily basis. If the operations cause any disruption of the owner's activities, they will be stopped and rescheduled at a time convenient to both the owner and subcontractor. If a time cannot be scheduled during regular working hours then the subcontractor will work off hours at no added cost to the owner. There will be no charges to the Owner or DCC for any work stoppages.

EE. Working Hours

Unless stated otherwise elsewhere in the Contract Documents, working hours for the project are 7:00 AM to 3:30 PM. Late starting or early stopping of work will not be tolerated. All trades will work common eight hour days Monday through Friday. There will be a coffee break in the morning only at the assigned time of 9:00 AM. All trades will celebrate the agreed upon Holidays specified. Any subcontractor working beyond the normal hours of 7:00 AM to 3:30 PM shall notify the DCC by 1:30 PM of his intention to work overtime to allow sufficient time for arrangement of any support services and/or personnel which will be at the Subcontractor's expense. Saturday work shall not be considered a means of maintaining the schedule in lieu of providing sufficient manpower during the regular workweek. If necessary and approved by DCC, all trades may work until 5:30 PM each weekday at their own expense if required to maintain the schedule.

There will be no work on Saturdays or Sundays without direction and approval by DCC.

FF. Parking

DCC will designate construction employee parking as available. If parking is not clearly designated by DCC, the Subcontractor should assume they are responsible for their own parking and any associated costs. There shall be NO contractor employee parking allowed on school grounds unless there is a designated parking location identified by DCC.

GG. Delivery and Storage of Materials

The storage of materials and equipment anywhere around or within the job site shall be permitted only as approved in advance by DCC. Each Subcontractor is responsible to

review for approval the on-site storage of all flammable materials with the Fire Marshal and/or Local Authorities having Jurisdiction (AHJ). If material and/or equipment are stored in a manner which obstructs the progress of any portion of the work without DCC's approval, the Subcontractor shall remove or relocate as directed by DCC immediately upon notification and without reimbursement of cost. All deliveries will be made to the main construction gate as indicated on the site logistics plan for this project.

Due to lack of space inherent on most jobsites, every effort shall be made to deliver material only as progress demands and avoid unnecessary and/or long term stockpiling. Subcontractors are required to schedule all deliveries of material and equipment with DCC at least 48 hours in advance. DCC reserves the right to turn away any truck not scheduled without reimbursement cost.

The Subcontractor shall be responsible for maintenance, care and insurance, for any loss or damage to all equipment or materials, regardless of location and cause.

The Subcontractor is responsible for the storage, handling and distributing materials (onsite and offsite) throughout the project, as required, along with protection of material from damage during delivery, handling, storage and installation. Specifically, the movement of onsite stored material required to changing job conditions. All storage accommodations will be on an as needed basis and approved by DCC.

All Subcontractors should note that payment of stored materials will be acceptable in accordance with Supplemental Instructions. There will be no long-term storage of equipment or materials available on the jobsite.

HH. Trailers

DCC will designate the location of jobsite field office trailers <u>if available</u>. All trailer quantities, sizes, locations, and duration's will be subject to the approval of the Project Superintendent for DCC. No offices, locker rooms or tool rooms are to be built within the building without the approval of DCC.
All temporary facilities are to be constructed utilizing fire-resistant materials. Each of these must be equipped with an ABC type fire extinguisher furnished certified and maintained by the Subcontractor and shall conform to applicable codes. Subcontractors may be required to relocate their trailers during the progress of the job at the Subcontractor's expense. Any electrical power, data and phone requirements shall be the responsibility of each Subcontractor.

II. Use of Equipment

No gasoline or diesel driven equipment will be allowed inside buildings. Material handling equipment shall either be hand operated (moved by human beings) or propane propelled. However, the use of propane propelled equipment is strictly forbidden when the building is being occupied for its intended purpose. When propane propelled is used, the subcontractor shall provide ventilation to remove exhaust fumes. The Subcontractor shall also be responsible for any repairs, replacement, or deleterious effects to all flooring and other construction that this equipment comes in contact with.

JJ. Temporary Construction Fence

Subcontractors must seek permission from DCC prior to dismantling or relocating the perimeter fence in any way. Any Subcontractor that creates breeches, gaps or dismantles the perimeter construction fence for his work access, deliveries or operations will be responsible for resetting it immediately after use.

KK. Security

Refer to project Specifications for specific security requirements as they may vary based on the given project. The Subcontractor is responsible for any and all costs associated with obtaining the proper security clearance.

LL. Temporary Utilities and Services

Unless otherwise specifically stated elsewhere in the Contract Documents, the Owner will pay for the cost of water and electrical energy usage necessary for construction activities. Those activities will NOT include the use of hoists, cranes, welders, jobsite trailers and unusual trade specific power (including "hook up").

- **Toilets** – Will be provided by the DCC and maintained for the use of all workers. The owner's facilities are NOT to be used by any Subcontractor. **Anyone observed using these facilities will be removed from the job permanently.**
- **Fire Protection** – Will be the responsibility of everyone on site. Adequate numbers of portable ABC extinguishers will be located within the work areas by DCC or the Fire Protection Subcontractor. Any Subcontractor performing cutting, grinding, burning, welding, or other heat, spark or flame generating type of work will also provide adequate number of portable ABC extinguishers in the vicinity of the work. A fire watch must be performed during the activity and for a minimum of one hour after completion.
  Any work that may affect the fire protection and fire alarm systems shall be planned, coordinated, and approved in advance by the Owner and DCC. This includes dust generating work affecting smoke detectors, ceiling tile removals where smoke/heat detectors or sprinkler heads are mounted at the ceiling, and the shutdown of sprinkler or fire alarm systems.

- **Drinking Water** – Each Subcontractor will be responsible for providing drinking water for their employees and forces, including containers, ice and cups, regardless of Specifications, also reference OSHA CFR 1926.51 (a)(2) Sanitation……..Employer shall supply potable drinking water, etc… The owner's facilities are NOT to be used by any subcontractor. **Anyone observed using these facilities will be removed from the job permanently.**

MM. Protection of Existing Utilities and Services

The Subcontractor shall locate and mark the exact locations of the utilities and services utilizing a utility locating company and adequately protect them from damage during the work. In the event that any are accidentally disturbed, the Subcontractor shall repair or replace such damage immediately and restore service as promptly as possible at the Subcontractor's expense.

NN. Existing Conditions

The Subcontractor is required to familiarize themselves with the existing conditions and items to remain prior to commencing with this scope of work. Every effort is expected to be made not to damage the existing conditions. The Subcontractor is responsible to protect, repair and/or replace and damage attributable to the execution of their scope of work.

OO. Hoisting

Each Subcontractor will be responsible for the hoisting of their own material, equipment and personnel. Some projects may contain provisions for material and manlifts.

PP. Survey & Layout

The Subcontractor is responsible for providing a qualified person or licensed surveyor to perform all field engineering, field layout, surveying, verification of field dimensions layout and field measuring required to properly locate and execute their scope or work. This Subcontractor is responsible for all layout, lines and grades required to perform their scope of work. The Subcontractor will establish all line and grade for the performance of their scope of work and shall coordinate with other Subcontractors on site. DCC will provide control line and grade or coordinates only for layout/engineering purposes. The Subcontractor is responsible for all layout, lines, grades required to perform their scope of work and coordinate with other Trades.

Regardless of Specifications, the Structural Steel Subcontractor will be responsible for providing a location survey of the anchor bolts installed by the Concrete Scope of Work Subcontractor ten (10) business days prior to start of the erection to allow sufficient time for review and corrections if necessary.

QQ. Cleanup

The job site shall be kept clean at all times. A clean jobsite promotes a safe work environment for all. It is the responsibility of each Subcontractor to conduct his operations in the cleanest manner possible. Project cleanup and cleanliness for each Subcontractor is to include but not limited to the following requirements:

1.) Each day the Subcontractor, at his own cost, will collect and place debris related to his operation into containers provided by others unless specifically stated elsewhere in the Contract Documents.
2.) Subcontractor shall include at a minimum three (3) labor hours each week they are on site to provide project cleanup, as directed by Downes
3.) Disposal of trash and debris will be in the assigned dumpster provided by DCC unless otherwise stated in the Contract Documents.
4.) The Sitework Subcontractor is responsible to maintain and keep all paved and hardscape areas swept clean at a minimum weekly, or as directed by DCC, throughout the duration of the Project.
5.) Reference specific Bid Package for general building cleanup and broom sweeping, this Bid Package does not relieve the all other Subcontractors from their daily cleanup responsibilities.
6.) Each Subcontractor is responsible to sort their trash and debris in trash barrels and/or dumpsters provided by Others (unless otherwise noted in the Contract Documents), in accordance with Sustainable Design Requirements and Construction Waste Management Plan. All proper disposal documentation for any of the above items shall be provided to DCC monthly and/or with the monthly requisition billing cycle. Sorting of all construction waste/debris will be in accordance with LEED on-site requirements. Failure to comply with this item will result in the Subcontractor being responsible for all costs to rectify the issue.
7.) Cleanup by each Subcontractor will be monitored accordingly by DCC. If this Subcontractor is non-compliant the DCC reserves the right to supplement cleanup for this subcontractor 24 hours after written notice of non-compliance. All associated costs for supplemented labor is the responsibility of this Subcontractor and will be at no additional cost to the Owner or DCC.
8.) If any general debris is left behind, such as soda cans, juice bottles, paper products, banding material, snippets of wire, cardboard boxes, tools, equipment, etc., DCC will clean the debris and proportionately back charge every Subcontractor on the site. If the work is complete but the area is not cleaned and debris or equipment is not removed, DCC/Owner shall have the right to prepare the area for occupancy with his own forces. All associated fees will be the responsibility of this Contractor and will be at no additional cost to the Owner or DCC.

9.) The Subcontractor who fails to comply with any of the above mentioned "cleanup" items, in addition to being responsible for the direct corrective costs will be fined $250/per incident.

RR. Material Furnished by Others

Where material is specified to be furnished by others or furnish and delivered only, it shall be understood that such materials are to be furnished and delivered F.O.B. Jobsite. The receiving, unloading, inventory, handling and storage of materials furnished by others, including security for such stored materials, is the responsibility and obligation of the Subcontractor to whom the materials are delivered.

SS. Cutting and Patching

Each Subcontractor shall be responsible for all cutting and patching which may be required for this scope of work or in connection with the installation of his/her work properly unless noted otherwise in the Contract Documents.

TT. Firestopping

The Subcontractor is responsible for fire caulking/firestopping/smoke stopping of penetrations through rated assemblies, at all new or existing partitions, at the perimeter of all work covered under this scope of work, all joints in or between fire resistance rated constructions cleaning and protection, horizontal and vertical assemblies as it relates to their scope of work. All Subcontractor's shall note that any opening that must be drilled / cored into any existing wall, floor, ceiling or roof deck for the passage of mechanical or electrical ducts, pipes or conduits shall be drilled / cored, fire stopped and smoke stopped as required by the subcontractor requiring the opening. Furthermore, this Subcontractor agrees that they will comply with utilizing a standard firestopping and smoke stopping manufacturer agreed to by all pertinent trades, as it relates to the execution of this scope of work.

UU. Responsibility for Notification

Considering the Subcontractor's skills and knowledge of their specialty, it shall be his/her responsibility upon discovery of errors, omissions, discrepancies and non-compliance, or any work that does not fit or properly function if installed as indicated in the Contract Documents to notify DCC immediately, in writing.

VV. Subcontractor's experience and coordination with other trades.

Each Subcontractor is required to have qualified supervision capable of making decisions on-site full time with proper communication skills and the ability to work with others. DCC reserves the right to request a subcontractor provide a non-working supervisor. Each Subcontractor is expected to be experienced and familiar with the requirements and conditions during the construction of similar buildings. Sequencing of work shall include

phasing of the construction cycle to accommodate the installation of the work of all Subcontractors in a logical and orderly fashion, including all necessary temporary blackouts, connections, coordination, framing, and supports, etc….. as required for the work of others.
All work shall be coordinated with DCC and other trades prior to commencement.

WW. Quality

Each Subcontractor understands that Quality Control and Quality Assurance is a specific commitment and attitude required during the implementation of the work. The focus required to establish a quality level, by developing in place mock-ups, by providing skilled supervision and by monitoring daily production quality are all expected to be carried out during the execution of this Contract. This Subcontractor is required to provide mockups, in accordance with the Specifications or as requested by DCC.

The Subcontractor shall include the cost of providing tests and reports for the material they intend to use and as required by local governing agencies and authorities having jurisdiction such as pressure testing of pipe lines. Subsequent to approval of materials, the Owner will provide and pay for all testing services as described in the Contract Documents.

XX. Project Closeout

"Project Close-out begins with Project Startup," the following close-out procedures shall be implemented:

a. The Subcontractor shall forward all Warranties and Guarantees as applicable to the DCC within two (2) weeks following substantial completion. (Reference Sample Warranty included in the Contract Documents) All manufacturer's equipment and product warranties must reference the Project name, location and commencement of warranty.
b. The Subcontractor shall furnish a minimum of four (4) copies and one (1) electronic copy of all Operating & Maintenance Manuals prior to Substantial Completion unless noted otherwise in the project Specifications. The Subcontractor may be asked to furnish one (1) Operating & Maintenance Manual prior to their final submission for review and approval by the Architect/Engineer.
c. The Subcontractor shall complete all Demonstration and Training to properly explain and train the Owner and Owner's representative as called for in the project Specifications or otherwise requested. The Subcontractor is responsible to employ a professional videographer to video all Owners training, demonstrations and closeout procedures. Furthermore, this Subcontractor agrees to coordinate with all pertinent trade to utilize the same videographer. Detailed agenda's shall be developed and given to DCC at least forty-eight (48) hours prior to the scheduled training day. The

agendas should clearly outline the intent of the demonstration and training and what the owner can expect to have learned during the session.

d. The Subcontractor shall forward all As-Built Drawings as applicable to DCC within ten (10) business days following Substantial Completion. Four (4) sets of As-Builts (hard copy) and four (4) sets of As-Built (electronic CAD/3D Model file) are to be forwarded accordingly. DCC will periodically review the preparation of As-Builts throughout the course of the Project. Payments will be delayed if it is found that As-Builts are not being kept up to date.
e. The Subcontractor shall complete all punch list work within two (2) weeks (or sooner as directed by DCC) of formal issuance of the punch list. Failure to complete the punch list within this time frame may result in DCC completing the work by alternate means. The Subcontractor will be back charged accordingly for the completion of the punch list.
f. All Subcontractors are required to acknowledge non-emergency warranty items within twenty-four (24) hours of notice and provide corrective action/repair within forty-eight (48) hours. For all emergency related warranty items, the Subcontractor is required to acknowledge within the hour of notice and provide corrective action/repair immediately.
g. Each Subcontractor will be responsible for the reimbursement of all direct costs associated to complete any of the above mentioned items, if the requirements are not met.

Final payment will not be made until all of the above items (a, b, c, d, e & f) and any other project close-out requirements are completed.

YY. Personnel Conduct

There shall be no fraternization or interference with the owner's staff, by any construction workers on or near the site. No foul language, smoking, drinking or radios. Any complaints by the owner with regard to this matter will result in the immediate and permanent dismissal of the said employee from the project site.
No foul or abusive language will be tolerated or allowed. Also, there is no smoking or drinking, and radios or amplified music playing devices are not allowed on the site. Any infraction will result in immediate and permanent dismissal.

CCC. Background Investigations and Badging

The Subcontractor will be required and agrees that before deploying any employee, agent or subcontractor ("Deployed Person") to perform any portion of the Project, the Subcontractor will:

Verify the Deployed Person's applicable and appropriate professional degrees, licenses and/or certifications as claimed by the Deployed Person.

To the extent permitted by applicable law, the Subcontractor shall perform a commercially reasonable criminal background check. The Subcontractor agrees not to knowingly deploy such a person without first notifying the Owner and DCC of any criminal background.

Notwithstanding the above provisions, the Subcontractor agrees that it will not knowingly deploy any person to provide work or services to the Owner or DCC who has been convicted of any criminal felony involving dishonesty or a breach of trust or that such person has been convicted of any offense under 18 U.S.C Section 1033 of the Violent Crime Control and Law Enforcement Act of 1994, which section is captioned "Crimes by or Affecting Persons Engaged in the Business of Insurance Whose Activities Affect Interstate Commerce." Such offenses include, by way of illustration and not of limitation, activities by persons in the insurance industry who willfully and materially overvalue any land, property or securities; embezzlement or misappropriation of insurance premiums and other funds; the making of false entries or statements in reports with the intent to deceive another person engaged in the insurance industry; or the use of threat or force in an attempt to corrupt or obstruct administrative proceedings related to the insurance industry.

The Subcontractor represents that at all times it will comply with all state and federal laws and regulations with respect to maintaining a drug free workforce and that it will disclose its drug testing procedures to the Owner and DCC upon request. Please refer to the agreement provided with the bid documents. This agreement is a Contractual requirement and must be returned to the Construction Manager prior to the execution of this Subcontractors contract.

The Construction manager shall have one point of entry/egress for construction workers to access the school for each phase. On a daily basis all workers are required to sign in at a designated location in order to confirm the workers entering the school are on the approved list of workers and have the proper clearance/badging.

During the course of the day workers are instructed to remain in the designated renovation areas when the classroom bells ring so there will be no interaction with students/administration walking to and from classes with construction workers in the corridors/common areas. Once the students/administration are back in class and the bells rings construction workers can communicate about the school as required to perform their work.

All workers that are proposed to perform work on this project are required to go through a photo badge **pre-approval background check process/program to be determined. All costs for the background checks and badging requirements will be paid for by the Subcontractor**. The background check shall consist of the

following: criminal felony & misdemeanor, social security number trace, social security validation, national sex offender registry, widescreen plus national & federal criminal search. Current (no more than one year old) background checks must be submitted to the Construction Manager and approved by the Owner prior to the individual arriving to the site. Only pre-approved workers shall work on the project. All workers shall attend Downes worker orientation training specific to this project.

DDD. Temporary Workers

The Subcontractor shall not employ third party temporary workers to complete the work without approval by the Construction Manager.

EEE. Project Management Software

All Subcontractors will be directed and required to use certain construction software systems to facilitate Project Management and Billing.

a. All Subcontractors will be required to use DCC's current project management software platform. PROCORE will be utilized for this project which is a cloud-based construction management virtual data room (VDR) application that will increase project efficiency and accountability by providing streamlined project communication and documentation.
b. Through PROCORE, trade contractors will:
    - Submit and receive all project communications
    - Submit RFIs and review responses
    - Receive contract drawings including but not limited to Bulletins, ASIs and Addendums
    - Submit trade contractor daily reports
    - Submit all shop drawings, product data, close-out documentation and other required submittals
    - Respond to Observations, Safety Concerns
    - Other as directed by CM
c. Each Subcontractor (Trade Bid Package) is responsible for a lump sum subscription fee to be paid directly to Downes in the first billing cycle. The Subscription fee is calculated as 0.56% of the trade contract value (i.e. Trade Contract Value *X* .0056). This fee will be deducted from the Subcontractor's initial Application for Payment and includes other software that will be used in the completion of this project. Other than the Subscription fee, there are no other licensing or monthly service fees for using PROCORE for the life of the project.
d. Each Subcontractor will be responsible to have a full-time on-site representative who is equipped with a tablet device with internet access

along with the PROCORE APP downloaded to it. Each trade contractor shall be responsible for updating/upgrading their tablet device to ensure that all functions of PROCORE can be utilized. Subcontractors are able to manage their projects from any web-connected mobile device, tablet, laptop, or desktop.

e. All Subcontractors must have a valid e-mail address to access PROCORE in the field and they will receive an e-mail notification when an observation, RFI, submittal etc. has been assigned or is pertinent to their company via PROCORE. Trade contractors are required to respond to all items within PROCORE by the due date specified for each particular issue. Issues that are not resolved by the specified due date will be assessed as they relate to progress billings for the assigned trade contractor.
f. The use of PROCORE will ensure high-quality work with minimized corrections which, in turn, will shorten the project close-out and expedite the release of retainage payments to trade contractors. Failure to actively participate with PROCORE will lead to delayed payment and a longer closeout period.

FFF. Subcontractor Responsibilities

a. Subcontractors are responsible but not limited to the following: All Contract Drawing notes, Key Notes and General Notes, as they relate to their scope of work.
b. All related specifications as they relate to this scope of work, regardless of whether or not the Specification is noted above.
c. The General Building Permit will be obtained by others. All MEFP Subcontractors shall file, pay for (unless fee is waived by owner) and obtain all required permits/licenses for this scope of work beyond the general building permit. All Subcontractors must provide copies of all permits/licenses before commencing with work. In addition, all inspections, filings, fees and certificates required by the City and state authorities having jurisdiction for approval of this work is the responsibility of this Subcontractor.
d. All Owner requirements and to follow all local and state building codes.
e. If required by the Architect/Engineer, this Subcontractor shall sign any required release and pay for any CAD/Revit files to be utilized for coordination or any other purpose.
f. Make multiple mobilizations in order to meet the project schedule. No additional compensation will be issued for multiple mobilizations.
g. Familiarize themselves with existing conditions and items to remain prior to commencing with this scope of work. Every effort is expected to be made NOT to damage the existing conditions. This Subcontractor will be

responsible for repair and/or replacement of any damage attributable to this scope of work.

h. Provide 3rd party monitoring and testing as a means to verify ground accelerations during construction activities that may lead to adverse effects on adjacent properties, structures and or utilities. Work methods shall be revised to bring accelerations within acceptable tolerances.
i. Refer to the Site Logistics plan for access, temporary fence and notes. Downes reserves the right to change any aspect of phasing and/or site logistics in the best interests of the Owner. This Subcontractor is responsible to provide and maintain access to the new and existing buildings for all trades, throughout the course of construction.
j. Unless assigned in the bid package scope of work; furnishing, installing and maintaining the construction temporary chain link fence is by others, except where removal, relocation, installation of additional temporary fence is needed to facilitate this Subcontractors Scope of Work.
k. Provide their workforce with the proper PPE, Personal Protective Equipment, when working with polluted/contaminated soils in accordance with the Soil Management Plan and Remedial Action plan prepared by Civil/ Hazmat Consultant.
l. Verification of field dimensions and existing conditions required to execute this scope of work.
m. This Subcontractor is responsible for any and all winter conditions and snow/ice removal required to execute this scope of work.

GGG. Covid 19/ Coronovirus Pandemic Procedures

1. All Subcontractors are responsible for providing and maintaining a COVID19 safety and protection plan for their own employees that is up to date with current guidelines from the local and federal government. This Safety & Protection plan shall be provided to Downes prior to site mobilization. Furthermore, all Subcontractors are responsible for providing their employees with the proper PPE to be in compliance with local and federal recommendations and mandates in addition to PPE required due to standard construction work. Social distancing shall be maintained and appropriate face coverings shall be used during the course of work activities on this site.

   The following is the Downes Policy:
   If you have traveled outside the continental United States or a State that the Governor of the State of CT has applied a mandatory quarantine to, please do the following:
   1. Stay home for 14 days or provide a negative test.
   2. Return to work after 14 days if you have not had any COVID-19 symptoms or sickness during the entire preceding 14-day period.
   3. If you experience COVID-19 symptoms or otherwise become ill, promptly seek medical attention in accordance with CDC recommendations.

   If you have had known contact with someone who tested positive for COVID-19:

1. Notify your employer and DCC immediately.
2. Stay home for 14 days and follow CDC and your physician's recommendations.
3. Identify any individuals you may have had contact with at the job site and inform DCC of same
   If you have had contact with someone awaiting test results for COVID-19 or they believe they have it based on their illness/symptoms.
4. Stay home for 14 days or until negative test results are confirmed and or you have no symptoms in accordance with CDC recommendations.

Separate sick employees:

Employees who appear to have symptoms of COVID-19 (i.e., fever, cough, or shortness of breath) upon arrival at work or who become sick during the day should immediately be separated from other employees, customers, and visitors and sent home and DCC should be immediately informed of same if an employee is confirmed to have the COVID-19 virus, employers should inform fellow employees of their possible exposure to COVID-19 in the workplace but maintain confidentiality a required by federal and state laws. The fellow employees should then self-monitor for symptoms of the virus (i.e., fever cough, or shortness of breath).

If anyone on your jobsite or office tests positive after leaving work, including leaving due to feeling ill identify and notify all workers who may have had contact with the affected worker

The identified workers should stay home for 14 days and adhere to CDC Protocol.

The work area associated with the infected worker and tools/equipment shall be thoroughly sanitized and cleaned.

If you are sick or have any symptoms, follow the instructions of your physician or health care provider and observe the following rules:

1. If you do not qualify for testing to determine if you have the COVID-19 virus, it is suggested you can leave home after these three things happen:
   a. You have had no fever for at least 72 hours (that is three full days of no fever without the use of medicine that reduces fever)
   b. Other symptoms have improved (for example, when your cough or shortness of breath have ceased) and
   c. At least 7 days have passed since your symptoms first appeared
2. If you will be tested to determine if you have the COVID-19 virus, it is suggested you can leave home when:
3. You no longer have a fever (without the use of medicine that reduces fevers).
4. Other symptoms have ceased.

PLEASE NOTE THAT THE FOREGOING POLICY IS NOT INTENDED TO BE AND IS NOT MEDICAL ADVICE, AND SHALL NOT REPLACE OR SUPERCEDE THE DIRECTIONS, INSTRUCTIONS OR ORDERS OF YOUR PHYSICIAN OR HEALTH CARE PROVIDER OR OF AUTHORITIES HAVING JURISDICTION (SUCH AS THE GOVERNOR, THE DEPARTMENT OF PUBLIC HEALTH OR THE PRESIDENT OF THE UNITED STATES). IN THE EVENT OF A CONFLICT BETWEEN THIS POLICY AND THE INSTRUCTIONS OF YOUR HEALTH CARE

PROVIDER, YOU ARE REQUIRED TO NOTIFY DCC OF SUCH CONFLICT BEFORE RETURNING TO WORK.

END SUPPLEMENTAL INSTRUCTIONS

BID FORM

PROJECT: **ADDITIONS & ALTERATIONS TO:**
OLD GREENWICH SCHOOL
285 SOUND BEACH AVENUE
GREENWICH, CT

DATE: _____

TO: **Downes Construction Company, LLC – Construction Manager**
200 Stanley Street
New Britain, Connecticut 06050

Pursuant to and in compliance with the "**Invitation to Bid #01"** dated **March 31,2025** the undersigned,

_____

_____

(Name of Firm)

having visited the site, familiarized him/ herself with the conditions present and carefully examined all Contract Documents (Invitation To Bid, Bid Package Scope of Work, Downes Supplemental Instructions, complete Specifications and Drawings together with all Addenda) issued and received prior to closing time for receipt of bids as prepared by Downes Construction Company, LLC (Construction Manager), Silver Petrucelli & Associates (Architect) and their consultants hereby offers and agrees as follows:
To provide all labor, materials, equipment, tools, transportation, supervision, appurtenances and services required to diligently perform all work in connection with the above referenced project to the satisfaction of the Architect, Engineer Consultants, Construction Manager and Owner, specifically including the following Bid Package for the lump sum price as follows:

BID PACKAGE # AND DESCRIPTION:	
The undersigned hereby states that all work will be completed for the lump sum of:	
Lump Sum Bid in Words (Including bonds):	**(Bid in words)**
Lump Sum Bid Numerically (Including bonds):	**$** **(Bid in numbers)**
Breakout cost for 100% Performance and Labor and Material Payment Bonds Numerically:	**$** **(Bond breakout in numbers)**

BID FORM

Use the following section for **COMBINED BIDS ONLY**. Indicate N/A or leave blank if submitting a bid on only one package above or are electing not to submit a combined bid. Combination bids for any combination of bid packages will be accepted, provided the Bidder submits a bid for the individual packages to be combined. Combination bids are allowed only for bids due at the same time. Bid Combination offers should be submitted by letter in separate envelope marked "Combination Bid for Bid Packages (BP No. & Description)". The letter must be on a business letterhead and bear the signature of the individual signing the bid. A separate bid bond is not required for the combination bid. Bid Bonds for the individual bids are required.

COMBINED BIDS FOR BID PACKAGE #(s) AND DESCRIPTION(s): **(Fill in to right)**	
The undersigned hereby states that all work for the above COMBINED bid packages will be completed for the lump sum of:	
Lump Sum Bid in words (Including bonds):	
Lump Sum Bid Numerically (Including bonds):	**$** **(Bid in numbers)**
Breakout cost for 100% Performance and Labor and Material Payment Bonds Numerically:	**$** **(Bond breakout in numbers)**

We further agree that this price is all-inclusive and that all contract documents have been reviewed and that every question, conflict or issue has been addressed to our satisfaction. Therefore, no change orders will be issued unless unforeseen conditions are encountered or the owner or owner's representatives revise the scope of the work.

All bidders are required to provide line-item values for the items identified below. Values can be provided with the bid submission or optionally at the scope review meeting. Bidders may add line items.

The following is a breakdown of our lump sum bid as requested in the bid package scope of work:

Description	Unit	Qty	Value

Lump Sum Bid			
Total Estimated <u>On-Site</u> Manhours:			

BID FORM

A. The bid includes the Addenda listed below:

Addendum #	Dated

Addendum #	Dated

B. Alternate pricing is proposed as follows: Indicate N/A in any blank spaces. Accepted alternates in addition to the base bid may affect the lowest responsible bidder. Refer to Specifications Section 012300 – Alternates.

Alt. #	Description	Alternate Bid (Including Bonds)
1	**ADD ALTERNATE #1: Raised Garden Planter**: Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	
2	**ADD ALTERNATE #2: Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 “Exterior Finish Carpentry” for additional information.	
3	**ADD ALTERNATE #3: Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore VCT-2 to be SF-1 and VCT-3 to be SF-2. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 “Resilient Sheet Flooring” for additional information. VCT-1 to remain where indicated.	
4	**ADD ALTERNATE #4: Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	
5	**ADD ALTERNATE #5: Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 “Metal Storage Shelving” for additional information	
6	**DEDUCT ALTERNATE #6: Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by	

BID FORM

	Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	
7	**DEDUCT ALTERNATE #7: Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	

C. Allowances are included in the base bid as follows as requested in the Bid Package Scope of Work. The undersigned bidder acknowledges that OH&P for these allowances are NOT included in the allowance but rather in the base bid separately. Unit Prices that may be used to arrive at allowances shall be valid for the life of the project. Un-used portions of allowances will be credited by deduct change order a project conclusion. Indicate N/A for those allowances that are not applicable to the bidders bid package or if none are requested in the bid package. Bidder to complete all calculations for allowances for their bid packages. Exclusion of allowances is NOT permissible. (**Refer to individual Bid Package Scopes of Work for allowances to be included in the lump sum bid)**

	A. 40 Yard Dumpster	$	40Y Dumpster
	B. 100 Yard Dumpster	$	100Y Dumpster
	C. Drum or Box	$	Drum/Box

E. Labor rates are proposed as follows: Indicate N/A in any blank spaces. (Rates shall be valid for the life of the project and be inclusive of insurance, fringes, taxes & OH&P etc.) (Attach Separate Breakdown Sheet)

Labor Classification / Trade	Straight Time	Time & one half	Double Time
****PROVIDE SEPARATE ATTACHMENT****			

F. Equipment rates are proposed as follows: Indicate N/A in any blank spaces. (Rates shall be valid for the life of the project and be inclusive of insurance, fringes, taxes & OH&P etc.)

Equipment Rates	Straight Time	Time & one half	Double Time
PROVIDE SEPARATE ATTACHMENT**			

G. TIME OF COMPLETION: We agree that the Work of the Contract shall begin within ten (10) calendar days after receipt of Notice of Intent to Award. Scheduling and allocation of manpower to accomplish the work shall be in conformance with the Phasing Diagrams, Site Logistics and the Contract Documents.

H. BID ACCEPTANCE: We agree that this proposal shall not be withdrawn for a period of 90 calendar days after the date of submittal. We understand that the owner reserves the right to accept or reject any or all bids and to waive any informality on the bidding process.

I. CONTRACT EXECUTION: Upon notification of acceptance of this proposal, we shall execute a formal contract (AIA) within ten (10) calendar days of the receipt of the agreement at a contract signing meeting at Downes Construction's main office.

We shall furnish a Performance Bond and Labor and Material Payment Bond in the full amount of the Contract with ten (10) days of receiving a notice to proceed/letter of intent if requested.

BID FORM

J. OTHER REQUIREMENTS:

It is understood that the Owner reserves the right to accept or reject any and all bids that the Owner deems to be in his best interest.

By submission of this proposal, the undersigned acknowledges that they have read their bid package scope of work, all drawings, all specifications, understand the schedule requirements and agrees to provide sufficient staff and organization and to select subcontractors and suppliers to comply with the requirements for submittals, delivery dates, work periods and completion dates as specified.

In accordance with Public Act 03-215 (an act concerning State construction contracts) and Public Act 04-141, for any contracts estimated in value to be greater than $1,000,000, bidders must be pre-qualified for the classification of work that they are bidding on. Each bidder shall provide a pre-qualification certificate issued by the State of Connecticut, Department of Administrative Services, which clearly shows their pre-qualification status. Each bidder shall also complete the Department of Administrative Services Contractor Pre-qualification Update Statement. Provide the names of the Project Manager and Field Superintendent/Foreman the Contractor will use on this Project. On a separate sheet briefly summarize their experience.

Project Manager:_____

Field Superintendent/Foreman:_____

1. State the name of your insurance carrier and the A.M. Best & Company rating of your insurance carrier.

   Insurance Carrier:_____

   Rating: _____

2. State the general liability rate of your firm in the interstate and intrastate workers' compensation experience modification rate for your firm for the three (3) years.

   General liability rate: _____

   Workers' Compensation Experience Modification Rate: _____

3. List below the construction projects the undersigned company currently has under contract as of this date:

Contract Sum	**Class of Work**	**% Complete**	**Name & Address of Owner**

BID FORM

4. List below a minimum of three (3) projects the undersigned company has performed in the past five (5) years which are representative of this project and would qualify you for this work:

Contract Sum	Class of Work	% Complete	Name & Address of Owner

K. Prevailing Wage Statement:

Wages reflected in this Agreement shall be used for this project. By submission of this proposal, the undersigned acknowledges that it is in full compliance with Connecticut labor and wage laws, does not (and has not for a period of at least 12 months prior to submission of its bid) have any unresolved wage rate and/or benefit contribution claims or disputes with the CT Department of Labor, and is not the subject or target of any pending investigation due to failure (or the alleged failure) to comply with Connecticut wage laws.

L. ENCLOSURES:

Included with this proposal are the following:

1. Non-Collusion Affidavit;
2. Proof of Insurance in accordance with Contract Requirements;
3. Acknowledgement of Surety
4. Workman's Compensation Experience Modification Factor (EMR) form from insurer;
5. Contractor's Qualification Statement (AIA Document A305, 1986 Edition or similar);
6. For bids over $1,000,000 a DAS Prequalified Certificate and Bid Update Statement are required;

BID FORM

The undersigned hereby certifies that he/she is able to furnish all labor, material and equipment necessary to complete the work as directed and/or described in the Contract Documents and to work in harmony with all other elements of labor employed or to be employed on the work.

_____ _____
Bidders Company Name Individual

_____ _____
Business Address Title

General Notes:

1 - All Workers shall In designated lot only.
2 - Confirm location of all gates and fence, with CM prior to installation.
3 - Provide anti-tracking mats at all vehicle gates.
4 - All Deliveries are to be coordinated with the Construction Manager.
5 - All material storage must be coordinated and approved by the Construction Manager.
6 - The Site work Subcontractor is responsible to coordinate and provide stable/level base for all rigging and/or pump locations.
7 - The Site work Subcontractor is responsible to maintain access points for forklifts and/or deliveries to structure.
8 - Site work Subcontractor shall provide measures to ensure cleanliness of existing parking lots and driveways. Provide street sweeping and dust control throughout construction.
9 - Protect all existing items and utilities scheduled to remain.
10 - Provide and maintain all temp. construction fence, enclosures, barricades etc. required to ensure security and separation of construction activities.
11 - Site work Subcontractor is responsible to make sure all egress pathways from the existing building are clear of obstructions at all times all times
12 -Site work Subcontractor is responsible to restore all areas disturbed by construction activity at project conclusion without exclusion.
13 - This site logistics plan should not be considered all inclusive and does not relieve the Subcontractors from complying with the Contract Documents. Refer to Division 01 General Requirements, Scopes of Work and other Specifications for additional related work required.
14 - The Site work Subcontractor is responsible to provide and maintain clean compacted gravel base access throughout the site for scaffold or lift access, free of debris and accessible at all times. Site Subcontractor to maintain through out the duration of construction activities. Use of recycle or reclaim products are prohibited for use as temporary base materials
15 - Construction fence shall have a continuous top rail, wire bottom, and diagonal bracing at all change of directions. Height 6'-0" U.O.N. Screening shall be New material. Color to be selected by Owner. Gates to have full frames and commercial hardware.
16 - Site Contractor to coordinate temp power and water to trailer compounds, mixing station etc. etc. with MEP trades.

PHASING NARRATIVE
March 31, 2025

OVERALL OBJECTIVE: Complete the Old Greenwich School - Additions and Renovations over six (6) separate phases and sub-phases in order to maintain school operations of occupied school areas.

The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner in support of maintaining school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Each Subcontractor is responsible to relocate, maintain, support, remove, re-install, maintain functionality, maintain 1 hour separation, maintain uninterrupted services, and maintain the current systems for the systems covered under their Scope of Work as required by phasing. All costs associated shall be included base bid be each and every Subcontractor.

All Subcontractors must pay special attention to the school bus operations, student and staff activity that will occur adjacent to construction activities during the school season. Vehicles and equipment shall not be left unattended at any time in bus, student or staff travel routes. Deliveries and vehicle exiting are not allowed during school student arrival and departure hours. All Subcontractors shall assume that any work that is necessary to be performed outside the phasing boundaries in occupied interior or exterior school space will be performed during hours that minimize or eliminate any impact to school function. Special temporary protection measures/enclosures will be provided to separate the work area from the occupied area. Each subcontractor will restore the area to acceptable school standards at the end of each work period. There will be a strict policy of absolutely **NO CONTACT OR FRATERNIZATION WITH SCHOOL STUDENTS OR STAFF** and NO use of foul or offensive language on the jobsite or school property. In addition, there is NO SMOKING allowed on the jobsite or school property.

Immediate and permanent dismissal will result for failure to abide by these policies.

The following is a brief description of the phases and the construction that occurs during them. This narrative is **not** intended to be all inclusive of the work required and does not relieve the Subcontractor from complying with their Scope of Work and all Contract Documents. Each Subcontractor is expected to coordinate their work and procure all material and equipment in order to complete the phase. It shall be understood that there will be work outside the limits noted to facilitate the Phasing Plan. Multiple mobilizations will be required throughout construction to accomplish each phase. It should be expected at times there will be less than standard productivity rates in order to accomplish the work. The Construction Manager reserves the right to change any aspect of phasing in the best interests of Old Greenwich School, at No Additional Cost to the Owner or Construction Manager. Refer to Site Phasing Drawings and contract drawings for graphical representation and phasing boundaries.

PHASES 1

Overview: Interior / Exterior Enabling, Major Site Utility Infrastructure Work, Storm Drainage and Selective Demolition, New Building Addition.

Existing school building occupied during school sessions.

Subcontractors shall maintain a full time first shift crew, including a foreman and sufficient manpower to maintain the project schedule, (6) days a week, throughout all phases.
Subcontractors shall maintain a second shift crew, including but not limited to a competent person, foreman, and sufficient manpower to accomplish any/all work required outside of established construction areas per the project schedule. I.E. all mechanical installations required to support new construction. Any work that could affect the operation of the school including but not limited to demolition / hazmat, cutting, trenching, excavation, tasks of excessive noise or odor, conveyance to or from isolated work areas, shut down of critical systems Alarm, Security, Sprinkler tele-data, Paging, etc. etc.
No work shall be scheduled or performed without the direct knowledge and approval of Downes Construction. All subcontractors shall provide two-week look ahead schedules and identify critical coordination tasks.
Subcontractors shall actively participate in project schedule updates monthly. Project Managers shall attend and participate in Weekly progress meetings. Foreman shall attend weekly coordination meetings with all field staff. Foreman shall participate in daily (ea. Shift) Pull meetings with field staff.

Schedule: Start April 2025. Complete for occupancy August 2026.

Major Procurement Items Include but are not limited to:

Phase 1 – New Addition and Renovation

1. Boiler (Mech. Room)
2. Pumps (Mech. Room)
3. Hot Water Heaters (Mech. Room)
4. DOAS (Roof)
5. RTU's (Roof)
6. VRF Units (Various)
7. Fire Alarm system
8. Security System
9. Clocks/paging system
10. Access control system
11. Video Monitoring Surveillance System
12. MDP/Switchboard and Panels (Elec Room)
13. Steel
14. Masonry Materials
15. Roofing Materials
16. Fans
17. Generator
18. Lockers
19. Elevators

20. Hollow Metal Doors and Frames
21. Storefronts / Curtainwall
22. Various Finishes

Phase 2 – Renovations
1. LEF-1 Fume Hood (Roof)
2. VRF (Various)

Phase 3 - Renovations
1. VRF Units (Various)

Phase 4 -Renovations
1. DOAS-2(Roof)
2. VRF's (Various)

Phase 5 -Renovations
1. DOAS (Roof)
2. AC's (Roof)
3. VRF's (Various)

Phase 6 -Renovations
4. DOAS (Roof)
5. AC's (Roof)
6. VRF's (Various)

Typical of all phases:
**HVAC, all Electric trades, Fire and low voltage subcontractors shall coordinate and be responsible for requirements of the CxA specifications and procedures. Note matrix included in the specification for the start-up of new equipment.
** Ducts shall be installed clean and be cleaned prior to occupancy as specified by phase. HVAC contactor shall ensure that operational systems are not contaminated by construction work. Re-cleaning shall be required for contamination related to construction or improperly implemented controls.

Summary of tasks:

General
- Prioritize initial phases and expedite MEP coordination for all Trades.
- Prioritize expedited Fire Sprinkler and Alarm Delegated design and permitting.
- Expedite submittal and procurement process for all critical materials.
- Source and obtain critical components to meet or exceed dates in the bid schedule

Sitework
- Site mobilization including construction of the CM Office Trailer/Storage Trailer compound, erosion and sedimentation control, Temporary bituminous access roads and pathways, installation of temporary construction fencing/gates/signage to isolate construction areas from school activity.
- Complete site improvements as detailed on site logistics drawings

- Preparation / installation of compacted gravel surfacing in all designated construction staging areas. Ref. Logistics drawings typ.
- Install temporary stair towers / trash chutes 1
- Removal of underground storage tanks complete
- Complete site selective demolition to accomplish phase.
- Prepare building pads for new additions
- Excavate / Facilitate all major utility work throughout the site servicing multiple phases
- Excavate / Install new concrete flatwork and curbing complimenting phase work areas.
- Maintain existing school parking for school use. NO CONSTRUCTION PARKING IS ALLOWED ON CAMPUS OR ADJACENT RESIDENTIAL ROADS. Parking arrangements shall be the responsibility of the employer (subcontractor).
- Maintain existing traffic flow for entry /exit drives, parking lot access, and bus drop-off / Pick-up times. All deliveries shall be scheduled around peak traffic times noted on the logistics drawings.

Building

- Remove / Abate floor tile in corridors to the greatest extent possible.
- Remove / Abate ceilings in corridors to facilitate new Temp wall and MEP installations.
- Cut, cap, and make safe, All MEP's & existing HWS&R loop. Install valves / by-pass piping as necessary to maintain system function outside of the construction areas.
- Install Temporary partitions, walls, doors, life safety / security devices to separate construction phase form occupied school.
- Commence enabling activities in existing main Electrical & Boiler Rooms and provide temporary connections as required for MEP, FP and controls.
- Relocate existing MEP in conflict with partitions.
- Closely coordinate and complete all Hazmat/Demolition work to facilitate new installations.
- Install/maintain, public entry & egress pathways are depicted on logistics and egress plans, include emergency lighting, wayfinding /exit signage.
- Install underpinning, foundations, and slabs for new additions.
- Complete foundation work within Phase 1A.
- Install Structural Steel for additions and BOE elevated floor
- Prep and pour elevated slabs
- Complete exterior envelope of all elevations / additions
- Install all Steel Pan Stairs, and Rail
- Install structural modifications for new infills and MEP equipment.
- Investigate, identify, and maintain aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phased work.
- Coordinate installation of new Electric service to facilitate back feed and removal of existing power transformer.
- Remove, relocate, cut, cap and/or make safe all aboveground and underground utilities adjacent to and through addition to complete addition Phase 1.
- Complete all new underground utility work within phase 1 ensuring maintenance of existing flows and services.
- Install new Water/Sprinkler service to be made immediately available to zones servicing completed space to be occupied. I.E.
- Complete all fit out and finishes for phase 1 work areas.

- Install all MEP services required up to the existing building for later connection and routing. Provide necessary measures for isolation and testing of systems by phase.
- Install structural modifications to support new and existing details by phase
- Complete construction of areas providing cleaning, balancing, testing, certifications, training, mobilizations, etc. for complete operational systems necessary for Certificate of Occupancy.
- Perform overtime and "off-hours" work as required to accomplish phase. Existing school building operations shall not be disrupted.

PHASES 2

Overview: Demolition and renovation of interior spaces. Exterior, Install new windows, roof, etc. Existing school building occupied during school sessions.
Subcontractors shall maintain a full time first shift crew throughout all phases.
Subcontractors shall maintain a second shift crew to accomplish any/all work required outside of established construction areas. I.E. all mechanical installations required to support new construction. Any work that could affect the operation of the school including but not limited to demolition / hazmat, cutting trenching excavation, tasks of excessive noise or odor, conveyance to or from isolated work areas, shut down of critical systems Alarm, Security, Sprinkler tele-data, Paging, etc. etc.
No work shall be scheduled or performed without the direct knowledge and approval of Downes Construction. All subcontractors shall provide two week look ahead schedules and identify critical coordination tasks.
Subcontractors shall actively participate in project schedule updates monthly. Project Managers shall attend and participate in Weekly progress meetings. Foreman shall attend weekly coordination meetings with all field staff. Foreman shall participate in daily (ea. Shift) Pull meetings with field staff.

Schedule: July 2026. Complete for occupancy October 2026.

Renovation of Cafeteria, Kitchen and Gymnasium

Summary of tasks:

General

- Continue MEP coordination for all Trades.
- Complete expedited submission and procurement process
- Source and obtain all components to meet or exceed dates in the bid schedule

Sitework

- Reconfigure temporary construction fencing/gates/signage to isolate construction areas from school activity.
- Complete site selective demolition to accomplish phase.
- Relocate site fencing and gates as necessary to accomplish phase. Install new and maintain existing sedimentation and erosion control.
- Complete site improvements as detailed on site logistics drawings
- Preparation / installation of compacted gravel surfacing in all designated construction staging areas. Ref. Logistics drawings typ.
- Install temporary stair towers / trash chutes to service this phase.
  Excavate / Facilitate all major utility work throughout the site servicing multiple phases

- Excavate / Install new concrete flatwork and curbing complimenting phase work areas.
- Maintain existing school parking for school use. NO CONSTRUCTION PARKING IS ALLOWED ON CAMPUS OR ADJACENT RESIDENTIAL ROADS. Parking arrangements shall be the responsibility of the employer (subcontractor).
- Maintain existing traffic flow for entry /exit drives, parking lot access, and bus drop-off / Pick-up times. All deliveries shall be scheduled around peak traffic times noted on the logistics drawings.

Building

- Install Temporary partitions, walls, doors, life safety to separate construction phase form occupied school.
- Install/maintain entry/egress construction within and through adjacent phases.
- Perform selective demolition and HAZMAT.
- Maintain and/or relocate aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phase.
- Remove, relocate, cut, cap and/or make safe all above ground and underground utilities to accomplish phase.
- Complete all new underground utility work within phase ensuring maintenance of existing flows and services.
- Install structural modifications for new infills and MEP equipment.
- Complete exterior envelope all elevations.
- Install MEP systems required for phase and required measures to maintain operations of existing systems in use.
- Perform overtime and “off-hours” work as required to accomplish phase. Existing school building operations shall not be disrupted.
- Install structural modifications at exterior overhangs Install structural modifications to support new and existing details by phase
- Install new Water/Sprinkler service to be made immediately available to zones servicing completed space to be occupied.
- Complete all fit out and finishes for phase 2 work areas.
- Install all MEP services required up to the existing building for later connection and routing. Provide necessary measures for isolation and testing of systems.
- Providing cleaning, balancing, testing, certifications, training, mobilizations, etc. for complete operational systems necessary for Certificate of Occupancy.

PHASES 3

Objective: Renovate class spaces and misc. offices.

Existing school building occupied during school sessions.

Schedule: Begin July 2026. Complete for occupancy December 2026.

Summary of tasks:

Major Procurement Items:

1. Lockers

General

- Continue MEP Installation for all Trades.
- Closely coordinate delivery and installation of all materials, finish and fixtures.
- Source and obtain all components to meet or exceed dates in the bid schedule

Sitework

- Reconfigure temporary construction fencing/gates/signage to isolate construction areas from school activity.
- Complete site selective demolition to accomplish phase.
- Relocate site fencing and gates as necessary to accomplish phase. Install new and maintain existing sedimentation and erosion control.
- Complete site improvements as detailed on site logistics drawings
- Preparation / installation of compacted gravel surfacing in all designated construction staging areas. Ref. Logistics drawings typ.
- Install temporary stair towers / trash chutes to service this phase.
- Excavate / Facilitate all major utility work throughout the site servicing multiple phases
- Excavate / Install new concrete flatwork and curbing complimenting phase work areas.
- Maintain existing school parking for school use. NO CONSTRUCTION PARKING IS ALLOWED ON CAMPUS OR ADJACENT RESIDENTIAL ROADS. Parking arrangements shall be the responsibility of the employer (subcontractor).
- Maintain existing traffic flow for entry /exit drives, parking lot access, and bus drop-off / Pick-up times. All deliveries shall be scheduled around peak traffic times noted on the logistics drawings.

Building

- Install Temporary partitions, walls, doors, life safety to separate construction phase form occupied school.
- Install/maintain entry/egress construction within and through adjacent phases.
- Perform selective demolition and Hazmat.
- Maintain and/or relocate aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phase.
- Remove, relocate, cut, cap and/or make safe all aboveground and underground utilities to accomplish phase.
- Complete all new underground utility work within phase ensuring maintenance of existing flows and services.
- Install structural modifications for new infills and MEP equipment, and at exterior overhangs
- Complete exterior envelope all elevations.
- Install MEP systems required for phase and required measures to maintain operations of existing systems in use.
- Perform overtime and “off-hours” work as required to accomplish phase. Existing school building operations shall not be disrupted.
- Install new Water/Sprinkler service to be made immediately available to zones servicing completed space to be occupied.

- Complete all fit out and finishes for phase 3 work areas.
- Install all MEP services required up to the existing building for later connection and routing. Provide necessary measures for isolation and testing of systems.
- Providing cleaning, balancing, testing, certifications, training, mobilizations, etc. for complete operational systems necessary for Certificate of Occupancy. Complete all site improvements within phase.
- Install Specialty Equipment.

PHASES 4

Objective: Complete renovations to the Admin, Resource, Math, Accelerated Learning and 4th Grade

Existing school building and new spaces occupied during school sessions.

Schedule: Begin Jan. 2027. Complete for occupation August 2027.

Major Procurement Items:

1. VRF's
2. C/U's
3. Lockers

Summary of tasks:

General

- Continue MEP Installation for all Trades.
- Closely coordinate delivery and installation of all materials, finish and fixtures.
- Source and obtain all components to meet or exceed dates in the bid schedule

Sitework

- Reconfigure temporary construction fencing/gates/signage to isolate construction areas from school activity.
- Relocate site fencing and gates as necessary to accomplish phase. Install new and maintain existing sedimentation and erosion control.
- Complete site selective demolition to accomplish phase.
- Complete site improvements as detailed on site logistics drawings
- Preparation / installation of compacted gravel surfacing in all designated construction staging areas. Ref. Logistics drawings typ.
- Install temporary stair towers / trash chutes to service this phase.
- Excavate / Facilitate all major utility work throughout the site servicing multiple phases
- Excavate / Install new concrete flatwork and curbing complimenting phase work areas.
- Maintain existing school parking for school use. NO CONSTRUCTION PARKING IS ALLOWED ON CAMPUS OR ADJACENT RESIDENTIAL ROADS. Parking arrangements shall be the responsibility of the employer (subcontractor).

- Maintain existing traffic flow for entry /exit drives, parking lot access, and bus drop-off / Pick-up times. All deliveries shall be scheduled around peak traffic times noted on the logistics drawings.
- Develop new ramp and stairs for the main entry, develop parking lot area.

Building

- Install Temporary partitions, walls, doors, life safety to separate construction phase form occupied school.
- Install/maintain entry/egress construction within and through adjacent phases.
- Perform overtime and "off-hours" work as required to accomplish phase. Existing school building operations shall not be disrupted.
- Perform selective demolition and HAZMAT.
- Remove and store select equipment/fixtures for re-installation after renovations.
- Maintain and/or relocate aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phase.
- Remove, relocate, cut, cap and/or make safe all aboveground and underground utilities to accomplish phase.
- Complete all new underground utility work within phase ensuring maintenance of existing flows and services.
- Install new Water/Sprinkler service to be made immediately available to zones servicing completed space to be occupied.
- Install all MEP services required up to the existing building for later connection and routing. Provide necessary measures for isolation and testing of systems.
- Install VRF's and Cu's.
- Install structural modifications at exterior overhangs
- Complete all fit out and finishes for phase 4.1 work areas.
- Providing cleaning, balancing, testing, certifications, training, mobilizations, etc. for complete operational systems necessary for Certificate of Occupancy. Complete all site improvements within phase.

PHASE 5

Objective: Complete renovations Orchestra, Band, 1st Grade, Literacy, Accelerated Learning and 4th Grade

Existing school building and new spaces occupied during school sessions.

Schedule: Begin July 2027, Complete for occupancy September 2027.

Summary of Tasks:

Major Procurement Items:

1. DOAS

2. VRF's
3. CU's

Building

- Install Temporary partitions, walls, doors, life safety to separate construction phase form occupied school.
- Install/maintain entry/egress construction within and through adjacent phases.
- Perform overtime and "off-hours" work as required to accomplish phase. Existing school building operations shall not be disrupted.
- Perform selective demolition and HAZMAT.
- Remove and store select equipment/fixtures for re-installation after renovations.
- Maintain and/or relocate aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phase.
- Remove, relocate, cut, cap and/or make safe all aboveground and underground utilities to accomplish phase..
- Complete all new underground utility work within phase ensuring maintenance of existing flows and services.
- Install new Water/Sprinkler service to be made immediately available to zones servicing completed space to be occupied.
- Install all MEP services required up to the existing building for later connection and routing. Provide necessary measures for isolation and testing of systems.
- Complete all fit out and finishes for phase 5.1 work areas.
- Providing cleaning, balancing, testing, certifications, training, mobilizations, etc. for complete operational systems necessary for Certificate of Occupancy. Complete all site improvements within phase.

PHASE 6

Objective: Complete renovations to 1st Grade, Staff, Science, Media Center and 4th / 5th Grades

Existing school building and new spaces occupied during school sessions.

Schedule: Begin July 2027, Complete for occupancy December 2027.

Summary of Tasks:
Major Procurement Items:

4. DOAS
5. VRF's
6. CU's

Sitework

- Reconfigure temporary construction fencing/gates/signage to isolate construction areas from school activity.

- Relocate site fencing and gates as necessary to accomplish phase. Install new and maintain existing sedimentation and erosion control.
- Complete site selective demolition to accomplish phase.
- Complete site improvements as detailed on site logistics drawings
- Preparation / installation of compacted gravel surfacing in all designated construction staging areas. Ref. Logistics drawings typ.
- Install temporary stair towers / trash chutes to service this phase.
- Excavate / Facilitate all major utility work throughout the site concluding in this phase
- Excavate / Install new concrete flatwork and curbing.
- Maintain existing school parking for school use. NO CONSTRUCTION PARKING IS ALLOWED ON CAMPUS OR ADJACENT RESIDENTIAL ROADS. Parking arrangements shall be the responsibility of the employer (subcontractor).
- Maintain existing traffic flow for entry /exit drives, parking lot access, and bus drop-off / Pick-up times. All deliveries shall be scheduled around peak traffic times noted on the logistics drawings.
- Fencing, Landscape, and Fixtures

Building

- Install Temporary partitions, walls, doors, life safety to separate construction phase form occupied school.
- Install/maintain entry/egress construction within and through adjacent phases.
- Perform overtime and “off-hours” work as required to accomplish phase. Existing school building operations shall not be disrupted.
- Perform selective demolition and HAZMAT.
- Remove and store select equipment/fixtures for re-installation after renovations.
- Maintain and/or relocate aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phase.
- Remove, relocate, cut, cap and/or make safe all aboveground and underground utilities to accomplish phase..
- Complete all new underground utility work within phase ensuring maintenance of existing flows and services.
- Install new Water/Sprinkler service to be made immediately available to zones servicing completed space to be occupied.
- Install all MEP services required up to the existing building for later connection and routing. Provide necessary measures for isolation and testing of systems.
- Complete all fit out and finishes for phase 5.1 work areas.
- Providing cleaning, balancing, testing, certifications, training, mobilizations, etc. for complete operational systems necessary for Certificate of Occupancy. Complete all site improvements within phase.

SITEWORK

Objective: Demolition and Installation of site improvements.

Schedule: Begin Dec 2024. Complete for occupancy December 2027

Summary of Tasks:

- All Workers shall PARK OFF SITE. Exception shall be made for Foreman of primary contractors only and vehicles that are actively being utilized to perform work. Conveyance of workers shall be the responsibility of the subcontractor.
- Install compacted gravel base and assist with installation of CM Trailer compound.
- Relocate site fencing and gates as necessary to accomplish phase. Coordinate exact locations with CM.
- Install new and maintain existing sedimentation and erosion control.
- Provide and properly maintain anti-tracking mats at all vehicle gates.
- The Site work Subcontractor is responsible to provide, maintain and remove stone walk pads at all pedestrian doors and stair towers.
- Provide and maintain all temp. construction fence, enclosures, barricades etc. required to ensure security and separation of construction and Adjoining Properties at All Times
- The Site work Subcontractor is responsible to provide and maintain clean compacted gravel base access throughout the site as shaded, and provide an 80’ min. level gravel base (verified clean and free of contaminates) work area around the perimeter of the buildings for scaffold or lift access, free of debris and accessible at all times. Site Subcontractor to maintain throughout the duration of construction activities. Use of recycle or reclaim products are prohibited for use as temporary base materials
- Construction fence shall have a continuous top rail, wire bottom, and diagonal bracing at all change of directions. Height 8'-0" U.O.N. Screening shall be new material. Color to be selected by Owner.
- Gates to have full frames and commercial hardware.
- Site contractor shall supply and maintain all logistic measures required to construct athletic fields and segregate from building construction activities. Coordinate with CM.
- Building trades shall not store materials or obstruct access to Athletic fields.
- Site Contractor to coordinate temp power and water to trailer compounds, mixing station etc. etc. with MEP trades.
- Site work Subcontractor shall provide measures to ensure cleanliness of existing parking lots and driveways. Provide Daily Street sweeping entrance roadways, parking lots, temporary access pathways, by a professional sweeping service. Self-performance buy use of excavation equipment of hand labor is not an acceptable method of SWPPP maintenance.
- Site contractor shall provide a water truck to remain in site full time and dedicated to this project only. Site contractor to wet the site as many time daily as required to minimize dust. S.C. shall be responsible for dust control after hours as weekends throughout construction.
- The Site work Subcontractor is responsible to maintain access points for forklifts and/or deliveries to structure.
- Deliveries shall not be accepted during peak drop-off times 7:00Am-8:30Am & 3:00Pm-4:00Pm. During the school calendar year.
- All material storage must be coordinated and approved by the Construction Manager.
- Remove, relocate, cut, cap and/or make safe all aboveground and underground utilities to accomplish phase.
- Remove and mitigate all abandon UTC (2) coordinate in phase 1.

- All excavation work shall be live load unsuitable material and removed from site as generated. S.C. to minimized stock piles to the greatest extent possible.
- Site Contractor to expedite submission of underpinning methods and calculations to avoid delaying foundation work.
- Maintain and/or relocate aboveground and underground utility, data and life safety services to other school areas as necessary to accomplish phase.
- The Site work Subcontractor is responsible to coordinate and provide stable/level base for all aerial rigging and/or pump locations.
- Complete all new underground utility work within phase ensuring maintenance of existing flows and services.
- Drainage and utility work shall be installed in active roadways. Site Contractor shall coordinate around school activity and provide the necessary safety and roadwork traffic controls to accomplish this installation. Site Contractor to provide schedules and work plans for approval two weeks prior to intended start date.
- Complete site improvements in coordination with interior phasing. Refer to Site logistics and Bid/Project schedule.
- Perform overtime and “off-hours” work as required to accomplish phase. Existing school building operations shall not be disrupted.
- Maintain existing underground electric service within new addition footprint. Provide necessary protection and shoring/forming/boxing to install new addition foundations and other construction until the electric service is de-energized.
- Maintain Electric and communication distribution to athletic fields and walkway paths at all times.
- Install new storm/sanitary drainage, water services, electrical and communications fiber to existing building in Phase 1 and make available for new construction occupancy.
- Protect all existing items and utilities scheduled to remain. S.C. shall submit shop drawings for approval proposed method of shoring or cribbing in service utility crossings.
- Site work Subcontractor is responsible to make sure all egress pathways from the existing building must have an acceptable stable surface for pedestrian safety.
- Site work Subcontractor is responsible to restore all areas disturbed by construction activity at project conclusion without exclusion.

Scope of Work:

BID PACKAGE #1.2.1 - SELECTIVE DEMOLITION & HAZARDOUS MATERIAL ABATEMENT

1. This Bid Package Scope of work includes performing all **SITE LOGISTICS MANAGEMENT, TEMP. DOORS AND ENCLOSURES, TEMP. SAFETY MEASURES, SELECTIVE DEMOLITION OF EXISTING MEFP*, TRADE REQUIRED TEMP. LIGHT AND POWER, DUST CONTROL OUTSIDE OF WORK AREAS, ASBESTOS REMOVAL, PCB REMOVAL, LEAD PAINT ABATEMENT, SELECTIVE DEMOLITION, SAWCUTTING AND REMOVAL OF EXIST. SLABS, ENGINEERED SHORING SYSTEMS, MAINTENANCE OF EXISTING MEFP SYSTEMS AND ALL ASSOCIATED WORK** in accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, LANGAN and Downes Construction (Construction Manager).

2. Furnish all labor, material and equipment necessary to complete all work that is described in the following Sections of the Specifications, or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Specs. Sections	Description	Dated
Division 00/ Specs. Sections	**Procurement and Contract Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	3/19/2025
Division 01 / Sections:	**General Requirements**	
All other Sections:	This Subcontractor is responsible for all other sections in this division as it relates to completing this scope of work.	3/19/2025
Division 02 / Sections:	**Existing Conditions**	
020100	Protection of Existing Utilities*	3/19/2025
024113	Site Demolition*	3/19/2025
024119	Selective Demolition	3/19/2025
028200	Selective Hazardous Building Materials Abatement Demolition	3/19/2025
028213	Asbestos Abatement	3/19/2025
028313	Lead-Based Paint Awareness	3/19/2025
028416	Universal Waste Removal and Recycling	3/19/2025

028432	PCB Remediation	3/19/2025
Appendices		
1	Geotechnical Engineering Study*	5/24/2023
2	Revised Limited NESHAP Pre-Renovation Hazardous Building Materials Survey Report, September 2023	9/13/2023
3	In-Situ Waste Classification Soil Sampling, March 202*	3/25/2024

Asterisk * = Limited scope under this package. See below for details

SPECIFIC

3. **PHASING** - The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations. All work shall be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager and school Maintenance Staff. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." This Subcontractor shall closely coordinate with the MEP/FA trades throughout all phases. Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. This Subcontractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

5. This Subcontractor is required to attend a walk through and shall be fully familiar with the existing conditions. Only during a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

6. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 028432 Polychlorinated Biphenyls Waste Management for additional removal and disposal

requirements.

7. This Subcontractor shall apply for all required permits with the Town of Greenwich and all other AHJ/Regulatory Agencies. Town fees have been waived with exception of the State Education fees.

8. This Subcontractor shall coordinate with LANGAN and the Construction Manager for the remediation and abatement of all hazardous materials as defined in the contract documents.

9. This Subcontractor shall provide all dumpsters and disposal of demolition debris generated by this scope of work. This subcontractor shall follow proper disposal procedures outlined in the contract documents, as well as, in accordance with CTHPBS Management Plan. Coordinate dumpster locations with CM.

10. This Subcontractor is responsible for any and all lead in construction work necessary to execute this scope of work. All applicable OHSA rules, regulations and guidelines are applicable and shall be adhered to.

11. The Site Logistics set-up will be completed by the Sitework Subcontractor. The Demolition and HAZMAT contractor will provide necessary fence enclosure of the work areas in order to begin demolition work safely due to delays in the Sitework Subcontractors mobilization. In all other phases, the Demolition and HAZMAT contractor will “accept” all installations installed by the Sitework Subcontractor as per the Site Logistics plans and be responsible to repair, replace, maintain, relocate and/or supplement them during the course of their work activities as required. Repaired items must match original installation exactly.

12. This Subcontractor shall provide all temporary protection and enclosures required to prevent weather infiltration into the existing building at all times. Maintain this enclosure through the course of construction Special attention shall be placed to window and door openings, exposed roof edges, roof openings, mechanical curbs, existing cavity wall construction and existing edges of slabs that are exposed due to the demolition process. All window and door openings at grade level or accessible from grade level must have plywood and 2x4 framing infills for security. The temporary protection shall include but may not be limited to the installation and maintenance of fire retardant tarps, heavy mil polyethylene sheeting, EPDM sheeting plywood, and associated wood support framing, sand bags etc.. This Subcontractor must provide on call response time to maintain temporary protection and enclosures 7 days weekly. This subcontractor shall submit a temporary protection and enclosure plan for review by the CM. Temporary protection shall not interfere with the ability to commence with new construction. This plan shall include all products to be utilized as well as elevation /plans detailing location of protection types. The CM reserves the right to amend the proposed plan at no additional cost to the owner if they feel it is not a sufficient means of protection at a given location. Coordinate access door locations in temp enclosures for work access as well as trash chute and loading zones typical at each work area. This Subcontractor shall return to the jobsite and remove these items when directed to do so by the Construction Manager.

13. This Subcontractor shall plan and implement all necessary safety and work procedures to minimize impact to surrounding properties and city streets and sidewalks during the demolition process.

14. This Subcontractor is responsible for all Temporary Dust Control on the site and sweeping of existing parking lots, driveways and adjacent public streets throughout the course of their work activities. Refer to appropriate Specifications as may be applicable.

15. This Subcontractor is responsible to sufficiently protect (as determined by the construction manager) all existing items to remain which may be damaged by demolition activities. Protection will include plywood, 2x enclosures, Ram Board etc. depending on the condition as approved by CM. In regards to the exterior, this may include existing hydrants, survey monuments and traffic control boxes as example.

    Perform a site walk through the CM and "flag"/mark all items to remain prior to commencing with demolition activities.

16. This Subcontractor shall provide (10) and maintain sufficient portable, UL-rated 20 lb. Class ABC fire extinguishers Including temporary signage and carts or stands throughout the building(s). Similar or equal to "Amerex #859 HD Dolly Cart". These extinguishers will be utilized for temporary fire protection during construction. Locations will be determined by the Construction Manager.

17. This Subcontractor is responsible for temporary water as required to execute this scope of work from the closest source within the existing building. Piping (PEX) to be professionally installed and suspended off of the floor (7'-0"min). Rubber water hose in or adjacent to occupied areas is not acceptable.

18. This Subcontractor is responsible to comply and exceed all OSHA regulations 1926.502 for perimeter fall protection while performing its scope of work at all floor levels of the existing building. This Subcontractor shall supply, install and maintain an independent self-supporting engineered guard rail system at 24" (final set back dimension to be confirmed by the CM based on condition) inside of the leading edge of the existing building slabs at all levels where fall hazards exist and/or are created by the demolition/HAZMAT process. Guard rail shall be a "Guardian 15203, 8' L Rail w/ Multi-Directional Base Plate Kit" or equivalent. Fall protection shall remain throughout construction until area is turned over to the next responsible contractor as agreed with CM.

19. **TEMPORARY SHORING** - This Subcontractor is responsible for any and all engineered temporary shoring required to stabilize the existing structure as shown on the drawings to facilitate new construction in order to execute this scope. Shoring support shall be kept it in place until final installations are complete and are inspected by the EOR. ALL engineered shoring shop drawings and calculations will be submitted to the project's structural engineer for approval. Coordinate with notes on Structural Drawings. Duration shall be coordinated with the project schedule and shall remain in place until longer needed. This Subcontractor shall return to the jobsite when directed to remove the systems in their entirety as directed by the CM.

20. The base bid for all Subcontractors shall **NOT** include the use of lifts, heavy machinery or any equipment to be used within the building on any elevated concrete slabs or slabs on grade due to structural restrictions, protection of floors to remain, and/or coordination requirements. Bidder shall note restrictions on the contract drawings and be responsible for all protection and or shoring required for the use of mechanical equipment that exceeds loads provided by the EOR.
    - Provide a complete engineering analysis from an independent licensed Engineer based on the above-mentioned criteria. Lifts and/or other equipment/machinery can only be used after the Subcontractor's Engineer has visited the site and the engineered analysis reviewed by the Architect, Engineer, Owner and/or Downes. All Subcontractors are responsible for taking this into consideration when submitting their bids. RFIs are to be submitted during the bidding period. No additional compensation will be made regarding the use of heavy equipment or lifts, production loss or change of method etc. etc. due to assumptions made by the bidder on this Project.
    - Maintain the proper indoor air quality requirements in accordance with the IAQ Management Plan by utilizing electric powered equipment. Equipment with combustion motors shall be LP. Use of

diesel-powered equipment shall be contingent of approval by DCC. Subcontractor shall submit a work plan and include all maintenance records for exhaust scrubbers.

- Provide maintenance, inspection, and safety records on-site for all equipment;
- Provide protection of all existing concrete slabs, new flooring and new finished flooring. Any damage or contamination of the building is the responsibility of this Subcontractor to correct to "like new condition."
- Coordination with other trades to meet the above-mentioned guidelines;
- Provide a complete and detailed work plan with product literature, in accordance with the above-mentioned guidelines.

21. This Subcontrctor is responsible for the material and amounts of Asbestos Abatement as identified in Specification 028213

22. This Subcontractor is responsible to make all existing and new structural openings safe until the subcontractor of the next sequence accepts the area. (i.e. installation of new masonry, installation of lintels, bracing, guardrails, temporary shoring, etc.)

23. This Subcontractor is responsible for all General Notes and Demolition Keynotes shown on all demolition drawings. Coordinate with other drawings such as the structural drawings and the architectural building elevations that describe demolition requirements. Coordinate with the Mason Contractor and others contractors on final dimensions for new openings in masonry walls and provide shoring in the best method based on condition. The Mason Contractor will install new loose lintels for new door openings and provide final masonry "toothing in" at jambs to create new M.O.s. Coordinate in similar manner with the Structural Steel/Misc. Metal Contractor(s) for larger openings where shown.

24. This Subcontractor is responsible for the complete demolition of all mechanical systems, electrical systems, special systems, tele/data systems, low voltage systems, IT Systems, plumbing systems, fire protection systems etc. within or adjacent to the existing buildings in accordance with MEP demolition notes and the Contract Documents. No additional compensation will be made for unforeseen demolition of the above-mentioned systems. Existing systems must be maintained to other parts of the building at all costs. Abandoning unused systems above or below new work is not acceptable. This subcontractor shall include removal of old systems used for temp service or overlapped by phasing.

    Removal may require access through new work (I.E. ceilings) in occupied spaces. Coordinate all selective demolition of existing MEFP with the appropriate trade contractors prior to commencing work by way of a pre-demolition walk-throughs.

    For all Phases, the MEFP Subcontractors will be responsible for the cut, cap make safe for this Subcontractor to drop, remove from the building and dispose of per applicable regulations.

25. **RESPONSIBILITY FOR DUST CONTROL (DURING SELECTIVE DEMOLITION & HAZMAT REMOVAL ACTIVITIES)** - This Subcontractor is responsible for the control of dust within the building in and outside construction areas from the point of mobilization until CM acceptance of completion of selective demolition. The Demolition and HAZMAT removal contractor shall include BASE BID and employ whatever means and methods necessary to control construction generated dust inside the building at all times during their work and must have appropriate labor and equipment on-site at all times. The Demolition and HAZMAT contractor, by use of negative air machines, shall maintain negative air pressure in the existing building construction areas from the commencement of HAZMAT removal through selective demolition until accepted completion. Exhaust fans shall be run continuously and filters changed daily to ensure a clean work environment. A record of inspection and filter maintenance

shall be submitted to DCC weekly. Include all provisions necessary, but not limited to cutting and patching, ducting and sealing to accommodate venting of the fans. Inspect at the start and end of each shift to repair /plug holes in order to maintain volumetric pressure of the space.

Note: The following are specific base bid requirements for dust control outside the construction area:

A. Include a laborer on standby to continually broom sweep, vacuum AND wet mop all adjacent occupied corridors/classrooms to 50' from the construction areas to ensure a dust free environment at all times during abatement activities. Once HAZMAT removal activities have been completed and clearance has been obtained, this task can be reduced to twice per day. This activity must be cautious of air sampling devices that will be set-up as it relates to the manner the cleaning occurs. Coordinate with CM and LANGAN.

Upon completion of this scope of work, dust control as described will be assumed by the General Trades Scope of Work Subcontractor.

26. This Subcontractor shall coordinate between the structural drawings and the demolition drawings to ensure a complete scope. Include all slab removal, shoring, cutting and removal of structural steel and joists, removal of existing walls, floors and ceilings, cutting of beam pockets or similar and any other selective demolition required to enable structural steel and misc. metals to be installed as shown.

27. This Subcontractor shall note there will be multiple mobilizations due the schedule and phasing on this project associated selective demolition including but not limited to cutting of beam pockets, MEFP coring, saw cutting of existing slabs, new masonry openings etc. All work in support of new structural and MEFP components etc. must be coordinated closely with the CM and those trade contractors prior to commencing. Do not overcut.

28. **SAWCUTTING OF EXISTING SLABS** – This Subcontractor is responsible to saw cut and remove existing slabs for the placement of new UG plumbing, footings etc. Coordinate between **all** drawings to ascertain scope. (For instance, reference 1st Floor Plumbing Plans which identifies saw cutting for the underground sanitary). E&B and concrete infill are by others. Assume plumbing trenches are a minimum of 30" wide if drawings depict less. Include an additional 20% of slab removal beyond what is shown.

29. This Subcontractor shall supply and utilize ¼" X 24"x 36" (100pc.) trench covers for bridging cut slabs for new plumbing in occupied areas of the school. Plates shall be placed and supported by 6" of slab each side and all joints taped ready for pedestrian traffic. Covers shall be palletized removed and replaced each shift to facilitate new work. Where plating is not feasible Demo contractor to install ¾" plywood flush to adjacent surfaces fasted to 2x framing / ledger with 2 ½" Tapcon 16" o.c. Material to be removed and replaced as needed for trade installations.

30. This Subcontractor is responsible to maintain a secure and safe site and shall keep the main building secure at all times. This includes but may not limited to installing temporary doors to prevent access.

31. This Subcontractor is responsible to verify and maintain all the existing roof drains and drainage systems (interior and exterior) free of construction/demolition debris and continual proper drainage throughout the demolition phase. Do not remove existing rainwater leaders until such time temporary measures have been put in place to divert water

32. The site shall be left in a safe manner to allow access for other trades after completion of demolition activities.

33. This Subcontractor is responsible to provide a complete system cleaning and video inspection of all existing storm and sanitary piping upon completion of selective demolition activities. This includes but may not limited to, jetting, vacuuming, auguring/snaking, off-site disposal of system containments, electronic video recording, as-built video/correlation drawings etc.

34. Note: in order to complete this scope of work shifts 6 days shall be required. Base bid shall include all hours necessary and no additional compensation shall be made for premium time or loss of production. The construction schedule provided is subject to change and requires demolition and other trades work to be performed in the occupied building areas throughout all phases.

35. For Phases 3, 4, 5 and 6 the Window subcontractor shall remove two (2) windows at each floor level for entrances from temporary stair tower and trash chute. Windows are to be stored, protected and reinstalled by Window Contractor upon direction from the Construction Manager. This Subcontractor shall perform required abatement prior to removal of windows.

36. This Subcontractor is to perform the Phase 4 demolition and abatement scope of work off hours when school is not occupied. Workers are **not** to begin work prior to 4:00 PM. It is also understood that the demolition and abatement for the other Phases is to occur during the summer breaks.

37. This subcontractor will need to perform, Ground Penetrating Radar before any saw cutting or drilling of existing concrete flooring.

38. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion.
    2. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    3. Provide additional Guarantees/Warrantees as may be required per the Specifications.

39. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

40. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description

41. This Subcontractor shall specifically **EXCLUDE** the following:
    - As may be indicated above.

42. The above listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's

sole responsibility to review all drawings, specifications and other contract documents in order include a complete scope.

BID BREAKDOWN - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization			**$ Provided by bidder. Fill in on bid form.**
Safety/Temp Protection			**$ Provided by bidder. Fill in on bid form.**
MEP Cut, Cap, Make Safe			**$ Provided by bidder. Fill in on bid form.**
Submittals/Engineering			**$ Provided by bidder. Fill in on bid form.**
Shoring			**$ Provided by bidder. Fill in on bid form.**
Asbestos Abatement			**$ Provided by bidder. Fill in on bid form.**
Lead Abatement			**$ Provided by bidder. Fill in on bid form.**
PCB Abatement			**$ Provided by bidder. Fill in on bid form.**
Haz Mat Disposal			**$ Provided by bidder. Fill in on bid form.**
Interior Demolition			**$ Provided by bidder. Fill in on bid form.**
Elevator Demolition			**$ Provided by bidder. Fill in on bid form.**
Slab Removal			**$ Provided by bidder. Fill in on bid form.**
Construction Debris Removal			**$ Provided by bidder. Fill in on bid form.**
Demob/Closeout			**$ Provided by bidder. Fill in on bid form.**
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**
	Total Estimated Man Hours		**Bidder to fill in on bid form.**

43. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by the Downes Construction or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior submission and/or execution of these items.

44. **SUBMITTALS** – Reference Supplemental Instructions paragraph G.

    Package Specific Submittal Comments–
    - This Subcontractor shall expedite state and federal notifications immediately upon the receipt of a notice to proceed and provide evidence of such within two (2) business days of the notice to proceed.
    - This Subcontractor furnish all required LANGAN submittals for approval within five (5) business days of a notice to proceed.

45. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time frame as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time frames included in the preliminary baseline schedule. "Time is of the essence" in approaching work.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the work day Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

46. **CHANGE ORDERS –** Reference Supplemental Instructions paragraph I.

47. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions paragraph H.

48. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

49. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are to only be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the DCC Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP # 1.2.1 – Selective Demolition & HAZMAT Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
Total Allowance 1 Included in Base Bid (Bidder to calculate):				
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
Total Allowance 2 Included in Base Bid:				
BP #1.2.1 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

50. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:
<u>Review section 012200</u> – UNIT PRICES

No.	Description	Unit Cost	Per
1	Small Containment Preparation Containment (Less than 160 square\260 linear feet of asbestos containing material) Pricing for containments with larger amounts of materials are to be INCLUDED in the unit prices themselves listed below. There is no separate unit price for containments with larger amounts.	$	Containment
2	Cove Base and Adhesives (multiple layers) (including contaminated substrates) Removal and Disposal as ACM	$	Linear Foot
3	Floor Tile/Flooring Materials and Mastics (Includes All layers of carpeting, adhesives, multiple layers of floor tiles/ flooring materials/ linoleum/rolled gym flooring/sheet flooring/ vinyl flooring/wood/mastics, levelastics, contaminated flooring materials, etc.) Removal and Disposal as ACM	$	Square Foot
4	Mudded Pipe Fitting Insulation Removal and Disposal as ACM	$	Fitting/Joint
5	Glove Bag Removal and Disposal as ACM.	$	Bag
6	Pipe, Pipe Fitting, Pipe Hanger and Roof Drain Insulation Removal and Disposal as ACM.	$	Linear Foot
7	Floor Spacer Material (including contaminated substrates) Removal and Disposal as ACM.	$	Liner Foot

No.	Description	Unit Cost	Per
8	Duct Insulation (including contaminated substrates) Removal and Disposal as ACM.	$	Square Foot
9	Duct Adhesives (including contaminated substrates) Removal and Disposal as ACM.	$	Square Foot
10	Duct Seam/Flange Sealants (including contaminated substrates) Removal and Disposal as ACM.	$	Linear Foot
11	Duct Vibration Isolation Cloth Removal and Disposal as ACM.	$	Cloth
12	Boiler/Incinerator (including all exterior and interior materials) Removal and Disposal as ACM.	$	Boiler
13	Freezers/Damp-Proofing/Contaminated Cork/Contaminated Substrates/Other Material Removal and Disposal as ACM.	$	Freezer
14	Light Backing Paper Insulation Removal and Disposal as ACM.	$	Light Fixture
15	Electrical Insulation Removal and Disposal as ACM.	$	Linear Foot
16	Sink Undercoating Removal and Disposal as ACM	$	Sink
17	Fire Door/Insulation Removal and Disposal as ACM.	$	Door
18	Water Fountain/Damp-Proofing Removal and Disposal as ACM	$	Fountain
19	Custodial Slop Sink/Damp-Proofing Removal and Disposal as ACM.	$	Slop Sink
20	Countertop/Adhesive/Caulking Compounds Removal and Disposal as ACM.	$	Square Foot
21	Transite Cement Board Removal and Disposal as ACM.	$	Square Foot
22	Wall Adhesives Including Contaminated Substrates (mirrors/blackboards/bulletin boards/wood/wall tiles, etc) Removal and Disposal as ACM.	$	Square Foot
23	Vermiculite and Associated Wall/Ceiling Materials (Including Contaminated Substrates) Removal and Disposal as ACM.	$	Square Foot
24	Ceramic Wall/Floor Tile and Terrazzo Wall/Floor Tile, Adhesives, Mudset, Grout, Damp-proofing and Contaminated Substrates Removal and Disposal as ACM.	$	Square Foot
25	Wall/Ceiling Plaster (multiple layers) and Supporting Systems and Contaminated Substrates Removal and Disposal as ACM.	$	Square Foot
26	Wall/Ceiling Board/Sheetrock/Taping/Joint Compounds (multiple layers) and Removal and Disposal as ACM.	$	Square Foot
27	Wall, Ceiling Tile and Glue Daubs and Contaminated Substrates Removal and Disposal as ACM.	$	Square Foot
28	Damp-proofing/Tars/Mastics – Interior/Exterior Walls/Floors/Slab/ Foundations and Associated Substrate/Adjacent Materials (includes multiple layers, contaminated materials and substrates) Removal and Disposal as ACM:		
	A. Walls	$	Square Foot
	B. Slabs	$	Square Foot
	C. Foundations	$	Square Foot
29	A. Caulking, Glazing and Sealant Compounds (includes substrates and contaminated materials) Removal and Disposal as ACM.	$	Linear Foot
	B. Window Opening (Multiple Windows/Sizes Exist in Openings)	$	Window
	C. Door Opening (Multiple Doors/Sizes Exist in Openings)	$	Door Opening

No.	Description	Unit Cost	Per
30	A. Caulking, Glazing and Sealant Compounds Removal and Disposal as PCB>50 ppm (PCB Bulk Product Waste).	$	Linear Foot
	B. Window Opening (Multiple Windows/Sizes Exist in Openings)	$	Window Opening
	C. Door Opening (Multiple Doors/Sizes Exist in Openings)	$	Door Opening
31	A. Caulking, Glazing and Sealant Compounds Removal and Disposal as ACM and PCB>50 ppm (PCB Bulk Product Waste).	$	Linear Foot
	B. Window Opening (Multiple Windows/Sizes Exist in Openings)	$	Window Opening
	C. Door Opening (Multiple Doors/Sizes Exist in Openings)	$	Door Opening
32	Roofing Core/Field Base Material (includes multiple layers and substrates) Removal and Disposal as ACM.	$	Square Foot
33	Roof Flashing and Gutter Flashing (includes multiple layers and substrates) Removal and Disposal as ACM.	$	Square Foot
34	Off-Site Transportation and Disposal of Hazardous Lead-Based Paint Demolition Debris.		
	A. 40 Yard Dumpster	$	40Y Dumpster
	B. 100 Yard Dumpster	$	100Y Dumpster
	C. Drum or Box	$	Drum/Box

51. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 “Exterior Finish Carpentry” for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 “Resilient Sheet Flooring” for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 “Metal Storage Shelving” for additional information.	**ADD**

6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE # 1.2.1 – HAZARDOUS ABATEMENT & SELECTIVE DEMOLITION

Scope of Work:

BID PACKAGE #1.3.1 – CONCRETE

1. This Bid Package Scope of work includes performing all **WINTER CONDITIONS PROTECTION, CAST-IN-PLACE CONCRETE, MISC. CAST-IN-PLACE CONCRETE*, CAST-IN-PLACE CONCRETE WITHIN AND ADJACENT TO EXISTING BUILDING (INCLUDES SLAB INFILLS AND STRUCTURAL FOUNDATIONS, MISC. INTERIOR CONCRETE ETC.), SELF-ADHERED SHEET WATERPROOFING, THERMAL INSULATION*, JOINT SEALANT*, EXPANSION CONTROL* AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Procurement and Contract Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	3/19/2025

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **PHASING -** The renovation and addition to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. Multiple mobilizations will be required to complete the work. This subcontractor will be required to complete foundations, footings, slabs, slab infills and other misc. concrete as the areas become available on separate mobilizations. See phasing plans.

8. This Subcontractor is responsible for hot and/or cold weather concreting procedures and requirements per the American Concrete Institute (ACI) to execute this scope of work in accordance with the construction schedule.

9. **WINTER CONDITIONS** – All Subcontractors are responsible for working under "winter conditions" throughout the course of this scope of work as may be applicable per the baseline construction schedule. The following are the responsibilities of the various Subcontractors:
   Responsibility of the Sitework Subcontractor base bid:
   - Implement "Cold weather concreting" throughout the course of this scope of work.
   - Removal of snow for general site access for all trades.
   - Include all labor, material, tools and equipment necessary to remove snow and prevent the ground from freezing to allow utility work, foundation excavation, underground plumbing work and site concrete work to be completed under winter conditions based on the construction schedule (i.e. ground heaters, blankets etc.). Remove any frost impacted soils necessary throughout the excavation and backfill process.
   - The Cast-In Place Concrete Subcontractor shall assume protection of open excavations from freezing conditions immediately upon completion by the Sitework Subcontractor. Immediately upon completion of foundation placement, the Sitework Subcontractor will re-assume protection of the open excavation from freezing conditions until such time it is completely back-filled.
   - Submit temporary winter conditions plan accounting for above and additional as required to CM as a submittal.

   Responsibility of Cast-In-Place Concrete Subcontractor base bid:
   - Implement "Cold weather concreting" throughout the course of this scope of work.
   - Snow removal within their active work area.
   - Include all labor, material, tools and equipment required to ensure that Cast-In-Place Concrete is placed and protected in accordance ACI "Cold Weather Concreting" standards (i.e. ground heaters, blankets etc.). In addition, include all necessary measures to install waterproofing/damp proofing systems under cold weather conditions.
   - The Cast-In Place Concrete Subcontractor shall assume protection of open excavations from freezing conditions immediately upon completion by the Sitework Subcontractor. Include all labor, material, tools and equipment necessary to prevent the ground from freezing (i.e. ground heaters, blankets etc.).

- Submit temporary winter conditions plan accounting for above and additional as required to CM as a submittal.

Responsibility of the Carpentry & General Trades Subcontractor base bid:

- Provide and maintain enclosure of the structural steel framed additions to retain heat.
- Provide temporary doors and window opening protection in the new additions.

Responsibility of the Mason Subcontractor base bid:

- Provide complete enclosure of the new additions masonry work area to retain heat.
- Provide all temporary heat measures for the installation of their scope of work as may be required within the enclosure.
- Keep materials dry and free from ice.
- Extend protection to allow proper curing.
- Submit a temporary heating plan including detailed drawings, equipment cuts and safety procedures shall to Downes for review and approval in accordance with IMI and IBC standards.

Responsibility of the Construction Manager:

- None

10. This Subcontractor shall note there will be **NO** dry cutting of concrete within the building of any kind. Comply with OSHA's Respirable Crystalline Silica standard for construction.

11. Provide, maintain and remove OSHA compliant guardrail systems for any fall hazard created during the course of concrete construction.

12. This Subcontractor shall coordinate all concrete work with all other Subcontractors having work adjacent to or embedded with the Cast-In-Place Concrete Scope of Work.

13. This Subcontractor will work closely with the Sitework Subcontractor to coordinate the scheduling and excavation for concrete footings, foundations and other work items requiring excavation covered by this Scope of Work.

14. Coordinate receiving, unloading, distributing and installing all concrete embedded items prior to any concrete pour that may be furnished by others.

15. This Subcontractor will assist the testing agency taking and necessary concrete ready-mix samples to be tested.

16. This Subcontractor is responsible for drilling, grouting, cutting/patching, epoxy, etc. for all anchor bolts, rods, deformed steel bars, dowels into all existing slabs, footings and/or walls.

17. This Subcontractor shall provide minor misc. addl. selective demolition required to complete SOG infills.

18. This Subcontractor will be responsible for installing/grouting of bearing plates/base plates and installing anchor bolts, tie rods, shear wall anchors and other misc. items furnished by others.

19. This Subcontractor is responsible for pinning of the slabs to walls.

20. This Subcontractor is responsible for concrete work at the radon pits. Piping by Plumbing Subcontractor. Reference Drawing S603 for details.

21. This Subcontractor is responsible to coordinate all foundation wall depressions, shelves and slab haunches with the Architectural drawings prior to placement of concrete.

22. This Subcontractor is responsible for all bentonite waterstop, waterproof bond breakers and all foundation and slab waterstops and similar as necessary to execute this Scope of Work.

    a) This Subcontractor is to provide "Krystol Internal Membrane" or equal additive in Elevator ma foundation and foundation wall concrete materials.

23. This Subcontractor is responsible to furnish and install the waterproofing at elevator pit.

24. Survey and plug all open penetrations/holes/gaps, etc. prior to concrete pours

25. Furnish and install all pour stops necessary to complete this scope of work that are not clearly called for the Structural Steel Contractor to install.

26. This Subcontractor is responsible to furnish and install all vertical dowels protruding from the foundation and slabs for masonry walls. Including safety caps upon installation, and maintenance of caps until the next trade initiate's work. Coordinate with Masonry Subcontractor on locations and provide engineered fix for field correction if misplaced.

27. This Subcontractor is responsible for providing and maintaining rebar protection at all times in complete accordance with OSHA.

28. As clarification of scope, this Subcontractor is responsible for underpinning and dry packing in phased placement as shown on the structural drawing / contract documents. Site Subcontractor is responsible for any temporary shoring required for excavation and will coordinate closely with the excavation / removal of temporary shoring with this Subcontractor who is responsible for the permanent shoring. This Subcontractor is responsible to provide a Delegated Design.

29. Cast-in place concrete work includes, but not limited to, the following:
    a) Footings
    b) Foundation walls
    c) Slabs-on-grade
    d) Concrete Repairs
    e) Formwork
    f) Steel Reinforcement & Accessories
    g) Concrete materials
    h) Admixtures
    i) Waterstops
    j) Vapor Retarders
    k) Liquid Floor Treatments
    l) Curing Materials
    m) Related and Repair Materials
    n) Placement procedures, and finishes

30. This Subcontractor shall include vapor mitigation add mixture to the concrete for the new addition.

31. As clarification of scope, this Subcontractor is responsible for all cast-in-place concrete work at interior of existing building. Including but not limited to slab infills, footings, elevator pits, and trench infills and associated drilling and doweling etc. Review all drawings to ensure a complete scope. Include twenty (20) % additional slab infill per details beyond what is shown base bid. Assume all slab trenching is a minimum 30" wide if scaled smaller on drawings.

32. Reference Plumbing Drawings for locations where underground plumbing work is to occur as this Subcontractor will be responsible to furnish and install concrete slab infills. This infill work is **not** shown on the slab infill drawings.

33. As clarification of scope, this Subcontractor is responsible for new concrete sills and similar details at the transition between the new addition and existing building.

34. As clarification of scope, this Subcontractor is responsible for all PIP concrete steps, ramps and pan infills. Exterior site stairs not attached to the building are installed by the site contractor.

35. This Subcontractor is to furnish and install the abrasive metal nosings on the stairs.

36. This Subcontractor is responsible to coordinate and provide all openings in formwork for other trades as required, which includes penetrations in foundation walls and/or slabs for MEP items. Misalignment of sleeves, boxes, drains, etc. caused by this concrete placement process are the responsibility of this Subcontractor to properly correct in timely fashion.

37. This Subcontractor is responsible to coordinate with all Subcontractors the limits and requirements of all recess slab areas, pit dimensions, and/or depressions with appropriate trades involved prior to the placement of concrete. Return to the jobsite to make any corrections in depth/elevation on slab depressions as may be required to receive finish products by others.

38. This Subcontractor shall leave out sections of foundation to allow access to the interior of the foundation as may be required to allow backfill operations to be completed. Provide any addl. Rebar, splicing etc. to accomplish this.

39. This Subcontractor is required to provide a high-early concrete mix design for use as required to coordinate concrete strength for steel erection in coordination with the Project Schedule, in order to satisfy the requirements of CFR 1920 Sub part R verification of minimum design strength prior to steel erection, load bearing masonry construction and foundation wall backfill.

40. This Subcontractor shall include shoring of elevated slabs as necessary to ensure there shall be no deflection of SOD. This contractor shall be responsible for additional concrete required to compensate for the deflection of beams and metal deck. No Change Orders will be issued for additional concrete quantities.

41. The Structural Steel Contractor will provide a certified survey of installed anchor bolts and bearing plates no later than three (3) business day after final placement and prior to the scheduled start of structural steel erection.

42. This Subcontractor shall perform any corrections to the foundation that are determined to be necessary based on a foundation survey of embedded items immediately upon being notified of the discrepancy so as not to delay the scheduled start of erection.

43. All concrete slabs scheduled to receive finish flooring are to be wet cured. Curing compounds will not be acceptable.

44. This Subcontractor is responsible for placing concrete slabs to the tolerances (Flatness / Levelness) outlined in Specifications. Provide a complete survey based on ASTM E 1155 in addition to the Owner's Testing Agency. Coordinate with all finish flooring materials and requirements.

45. This Subcontractor is responsible to submit a proposed construction and control joint plan prior to the placement of the SOG for approval. Saw cutting of joints shall be done according to ACI standards within 12hrs of pour.

46. This Subcontractor is responsible for all expansion, isolation joints and compressible joint fillers & sealants between slabs, foundations and/or adjacent construction as may be required at both the new and existing building.

47. This Subcontractor is responsible for coordinating all expansion joint covers within any and all concrete cast-in-place systems.

48. This Subcontractor is responsible for any mechanical equipment pads. Infill of inertia pads, etc. Review Structural and MEP drawings for quantity and sizes.

49. This subcontractor is responsible to coordinate and set all trench drains and similar. Drains furnished by others.

50. This Subcontractor shall patch transitions between all new and existing floor slabs to achieve a smooth and level surface regardless of detail.

51. This Subcontractor is responsible to patch/repair all abandon penetrations in slabs left behind in floors and ceilings resulting from the removal of existing MEP piping, ductwork and conduits indicated to be removed on the demolition drawings.

52. This Subcontractor shall furnish and install any necessary shimming and leveling of mechanical equipment set on new concrete that is placed out of level.

53. This Subcontractor is responsible for all "exterior door stoops" slabs and haunches/foundations that are attached to the building, as shown on the site, civil, or structural drawings.

54. This subcontractor is responsible for all haunches under slabs for masonry support, trench drains, dowels, construction joints weather specifically shown or not. Subcontractor to familiarize themselves with all wall layouts and details.

55. This subcontractor shall supply and install vapor barriers and insulation (slabs / foundation walls) in accordance with the specifications and coordinate with CxA for inspection and manufacturer site inspections as applicable.

56. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

57. Furnish and install temporary protection of new concrete slabs that do not receive finish flooring with ProGuard Duracover by Scofield Systems or approved equal. Tape all joints as recommended by the manufacturer. Return to jobsite when directed to remove and dispose of temporary protection into the jobsite dumpster.

58. This Subcontractor shall include "rubbing" (i.e smooth rubbed finish, or grout cleaned finish) of all surfaces on both the interior and exterior, which are exposed or are within 6" of being exposed throughout. Parging will not be accepted. Finish all rubbed concrete surfaces in accordance with ACI 301, Section 5.3.3.4. Typical.

59. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by Phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.

12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

60. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

61. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

078413	Penetration Firestopping*
079200	Joint Sealants*

62. This Subcontractor shall specifically **EXCLUDE** the following:

63. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

64. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Winter Conditions	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Footings/Walls/Piers	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Slabs on Grade	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Concrete in-fills	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Foundation Reinforcement	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Slabs Reinforcement	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Rigid Insulation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Housekeeping Pads / Misc. Interior Concrete	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Concrete accessories	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Waterproofing/Damp-proofing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Vapor Barrier	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Expansion Control	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

65. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

66. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

67. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

68. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

69. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

70. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

71. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP # 1.3.1 – Concrete Allowances:				
Allowance 1	**Misc. Concrete Slab Patching & Repair**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Ninety (90) Labor Hours (Blended Rate)	90 Hours (Fill In On Bid Form)		
C	Misc. Material and Equipment	1 Lump Sum	$5,000	$5,000
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				

Total Allowance 2 Included in Base Bid (Bidder to calculate):	

BP #1.3.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.

72. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

Unit Price No.	Description	Unit Price	Unit
1.3.1-1	Concrete Material Foundations	Fill in on bid form	CY
1.3.1-2	All-Inclusive Foundation Unit Price (labor, material, rebar, forming, accessories, curing, winter conditions, etc.)	Fill in on bid form	CY
1.3.1-3	Concrete Material Slabs	Fill in on Bid Form	CY
1.3.1-4	All Inclusive Foundation Unit Price (Price (labor, material, rebar, forming, accessories, curing, winter conditions, etc.)		

73. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms.	**ADD**

	Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.3.1 – CONCRETE

Scope of Work:

BID PACKAGE #1.4.1 – MASONRY

1. This Bid Package Scope of work includes performing all **LEAD PAINT AWARENESS*, SELECTIVE DEMOLITION*, PRECAST ARCHITECTURAL CONCRETE, PRECAST CONCRETE, UNIT MASONRY, RE-TOOTHING/RE-BUILDING OF NEW MASONRY OPENINGS, MASONRY INFILLS, EXTERIOR STONE CLADDING, CAST STONE MASONRY, METAL FABRICATIONS*, COMMISSIONING OF BUILDING ENVELOPE SYSTEMS*, THERMAL INSULATION*, SHEET AIR BARRIERS, SELF-ADHERING SHEETWATERPROOFING, WATER-RESISTIVE AIR-BARRIER MEMBRANES, SHEETMETAL FLASHING & TRIM*, FIRE RESISTIVE JOINT SYSTEMS*, JOINT SEALANTS, EXPANSION CONTROL* AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Bidding and Contracting Requirements**

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **PHASING -** The renovation and addition to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor

shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

8. This Subcontractor shall provide all dumpsters for masonry debris generated by this scope of work following proper and documented construction waste management and disposal in accordance with CT HPBS Management Plan. Coordinate dumpster locations with CM.

9. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

10. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment

that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet this criteria, or for loss of production due to the subcontractor's assumptions.

11. This Subcontractor is responsible to provide engineered shoring/bracing of CMU bearing walls as required for plumb construction. Submit stamped shop drawings and calculations for approval.

12. This Subcontractor is responsible for providing rebar shop drawings for all rebar in masonry walls for approval regardless of Specifications.

13. This Subcontractor shall include furnishing and installing epoxy doweling into foundations and slabs to receive interior CMU wall construction where shown.

14. **WINTER CONDITIONS** – All Subcontractors are responsible for working under "winter conditions" throughout the course of this scope of work as may be applicable per the baseline construction schedule. The following are the responsibilities of the various Subcontractors:
Responsibility of the Sitework Subcontractor base bid:
    - Implement "Cold weather concreting" throughout the course of this scope of work.
    - Removal of snow for general site access for all trades.
    - Include all labor, material, tools and equipment necessary to remove snow and prevent the ground from freezing to allow utility work, foundation excavation, underground plumbing work and site concrete work to be completed under winter conditions based on the construction schedule (i.e. ground heaters, blankets etc.). Remove any frost impacted soils necessary throughout the excavation and backfill process.
    - The Cast-In Place Concrete Subcontractor shall assume protection of open excavations from freezing conditions immediately upon completion by the Sitework Subcontractor. Immediately upon completion of foundation placement, the Sitework Subcontractor will re-assume protection of the open excavation from freezing conditions until such time it is completely back-filled.
    - Submit temporary winter conditions plan accounting for above and additional as required to CM as a submittal.

    Responsibility of Cast-In-Place Concrete Subcontractor base bid:
    - Implement "Cold weather concreting" throughout the course of this scope of work.
    - Snow removal within their active work area.
    - Include all labor, material, tools and equipment required to ensure that Cast-In-Place Concrete is placed and protected in accordance ACI "Cold Weather Concreting" standards (i.e. ground heaters, blankets etc.). In addition, include all necessary measures to install waterproofing/damp proofing systems under cold weather conditions.
    - The Cast-In Place Concrete Subcontractor shall assume protection of open excavations from freezing conditions immediately upon completion by the Sitework Subcontractor. Include all labor, material, tools and equipment necessary to prevent the ground from freezing (i.e. ground heaters, blankets etc.).
    - Submit temporary winter conditions plan accounting for above and additional as required to CM as a submittal.

    Responsibility of the Carpentry & General Trades Subcontractor base bid:
    - Provide and maintain enclosure of the structural steel framed additions to retain heat.
    - Provide temporary doors and window opening protection in the new additions.

Responsibility of the Mason Subcontractor base bid:

- Provide complete enclosure of the new additions masonry work area to retain heat.
- Provide all temporary heat measures for the installation of their scope of work as may be required within the enclosure.
- Keep materials dry and free from ice.
- Extend protection to allow proper curing.
- Submit a temporary heating plan including detailed drawings, equipment cuts and safety procedures to Downes for review and approval in accordance with IMI and IBC standards.

Responsibility of the Construction Manager:

- None

15. This Subcontractor shall coordinate with the Demolition Contractor and provide layout for new or temporary openings in existing masonry walls as shown on the demolition and structural drawings. The Demolition Contractor will provide shoring as required for their scope of work and shall not conflict with new installations. Demolition contractor is responsible for straight line cutting and bulk removal to create the opening. The masonry Contractor shall be responsible for final demolition detailing and toothing of the openings to accept new work. Coordinate in similar manner with the Structural Steel/Misc. Metal Contractor(s) for larger openings where shown. This subcontractor shall include all general materials, demolition, reconstruction, toothing, vertical chasing, re-building, reinforcing, new masonry, grout, self-adhering foam joint sealant, saw cutting, structural supports, channels, needle beams, engineered shoring/bracing, temporary protection, enclosures, scaffolding, lifts, weep holes and flashings tie insulation, Air/Vapor barrier and all other appurtenances etc. etc. Coordinate new opening dimensions with applicable trades, include openings not shown but required to install and facilitate new construction.

16. This Subcontractor shall coordinate with other contractors on final dimensions for new openings in masonry walls. This Subcontractor will install new loose lintels for new door openings and provide final masonry “toothing in” at jambs to create new M.O.s. Coordinate in similar manner with the Structural Steel/Misc. Metal Contractor(s) for larger openings where shown.

17. The Mason Contractor will furnish and install loose lintels for masonry openings in new or existing walls. This contractor shall provide ALL loose lintels at masonry openings whether or not specifically shown on the documents.

18. This Subcontractor is responsible to provide all openings / through wall penetrations for architectural, structural, MEP, interior and exterior masonry openings in new or existing construction MC shall be familiar with and responsible for all MEP&FS plan sheets depicting routing and penetrations. MC shall infill openings in coordination with project phasing. It is anticipated the existing systems may need to remain and be demolished in a later sequence. Bidder shall include closing openings in coordination with the decommissioning of existing systems by phase.

19. This Subcontractor shall furnish and install all steel loose lintels for masonry work as required to complete this scope of work regardless of detail. Lintels to be galvanized where exposed to weather.

20. This Subcontractor is to furnish and install Partition Top Anchors.

21. This Subcontractor is to furnish and install cavity wall insulation.

22. Modified bituminous sheet are barriers and all required accessories are to be furnished and installed by this Subcontractor.

23. This Subcontractor is responsible for all square or rectangular penetrations 10”x 10” or greater than 100 square inches in existing walls including lintels for the passage of structural steel, mechanical, electrical, and fire protection. Review structural and MEFP drawings for distribution layout through existing walls.

24. This Subcontractor shall receive and install all sleeves provide by others for penetrations in masonry assemblies.

25. This Subcontractor shall note there will be **NO** dry cutting of masonry within the building of any kind. Comply with OSHA's Respirable Crystalline Silica standard for construction.

26. This Subcontractor is responsible to ensure that no chipped or damaged CMU, Brick, Block, Precast etc. are installed. Quality control must be ensured on all exposed to view masonry installations. MC shall provide a mock-up of all masonry conditions for approval prior to the start of work.

27. This Subcontractor is responsible to repair unit masonry, including replacing unit and repointing joints with mortar as identified in the Contract Documents.

28. This Subcontractor is responsible to furnish and install all precast concrete caps and weather seal metal pans as indicated in Contract Document.

29. This Subcontractor is to furnish and install precast concrete coping on Seat wall.

30. This Subcontractor is responsible to include all patching existing masonry walls scheduled to remain where pipes, ducts and conduits to be removed. Bidder shall review existing MEFP drawings for quantities, include additional 25% for unforeseen penetrations and repairs.

31. This Subcontractor shall repoint joints with mortar as identified in the Contract Documents.

32. This Subcontractor is responsible for Cast Stone Masonry including but not limited to the cast stone cap, sills, lintels and accessories as required for a complete installation.

33. This Subcontractor is to furnish and install the Exterior Wall-to-Wall/Wall Corner expansion control as identified in the Contract Documents.

34. This Subcontractor shall cut beam pockets in existing walls, provide rebuilding, setting/grouting of bearing plates as shown for new construction. Refer to Structural Drawings for beam pocket / bearing plate locations.

35. This Subcontractor is responsible for all dry-packing at masonry.

36. This Subcontractor is responsible to **furnish and install all self-adhering air vapor barrier over all substrates (CMU, Plywood, Gypsum etc. at the perimeter envelope per details and Specifications).**

37. Coordinate and review all shop drawings and submittals from other Trade Contractors that affect the fabrication and installation of work covered under their Scope. This includes but is not limited to verification and comparison of rough openings in walls, ceilings and/or floors for the passage or installation of construction items furnished and installed by this scope of work or other trade Subcontractors. Downes will endeavor to provide copies of all approved shop drawings/submittals to the individual trades affected by their contents. However, this shall not relieve the Trade Subcontractor from this coordination process. If this Subcontractor feels they have not received shop drawings/submittals to properly coordinate their work, they are responsible for requesting them in writing from Downes prior to proceeding with the work.

38. This Subcontractor is responsible for coordinating with the hollow metal door and frame supplier / installer and aluminum window supplier/installer for the installation of these items within masonry and shall not proceed with masonry installation until such time they have received confirmed rough-opening dimensions.

39. This Subcontractor is responsible to grout and joint seal all hollow metal frames installed, by others, in masonry or concrete openings. Coordinate the installation as required. Include means to prevent seepage of grout at the perimeter of the frames as necessary.

40. This Subcontractor is advised that the hollow metal frames may not be available at the start of masonry walls, therefore should plan accordingly to install punched and dimpled frames in an effort to maintain MEP rough-in and the overall project schedule. No additional compensation will be made for the installation of hollow metal frames in drywall framing or masonry based on delivery schedules.

41. The Drywall / General Trades Subcontractor (BP #1.9.1) is to furnish and install the hollow metal frames, doors and hardware.

42. This Subcontractor is responsible to install access doors/doors within masonry systems, furnished by other trades.

43. This Subcontractor shall furnish accessories and coordinate required embedment/attachment of accessories with Concrete Scope of Work Subcontractor, Structural Steel and Misc. Metals Subcontractor and Elevator Subcontractor prior to the commencement of those activities. Anchors attached to structural steel must be furnished so that they can be attached at the Steel Contractors facility during fabrication.

44. As clarification of scope, this Subcontractor shall furnish and install all sill angles at masonry openings. Refer to architectural sill details as this may be where they are shown.

45. As clarification of scope, this Subcontractor is responsible to wrap structural steel embedded in masonry where shown with bond breakers.

46. As clarification of scope, this Subcontractor is responsible for all pre-molded joint filler between masonry.

47. The Roofing Scope of Work Subcontractor will furnish the masonry thru-wall flashings to this Subcontractor for installation unless specified in a Division 4 section. Do not commence with masonry installation until such time the proper flashings have been coordinated and received.

48. This Subcontractor shall clean all unit masonry after the mortar is thoroughly set and cured in accordance with the Specifications.

49. This Subcontractor shall coordinate with the respective Trade Contractors in establishing a benchmark of quality for finished masonry walls. Where the CMU will be exposed with a paint finish, the mason shall patch defects in the surface of the CMU after the block filler and prior to the application of the final coat of paint. Any corrective work required by this Subcontractor which necessitates the repainting of a surface or additional coat of paint will be solely responsible for the repainting costs. All repainting will be performed by the Project's Paint Subcontractor.

50. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or CM requests.

51. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

52. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by Phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.

11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

53. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

54. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
021149	Selective Demolition*
072100	Thermal Insulation*
078413	Penetration Firestopping*
079200	Joint Sealants*
081113	Hollow Metal Doors and Frames*
083113	Access Doors and Frames*

55. This Subcontractor shall specifically **EXCLUDE** the following:

56. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

57. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**

Other (be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

58. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

59. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

60. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work

still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

61. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

62. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

63. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

64. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP # 1.4.1 - Masonry Allowances:				
Allowance 1	**Addl. Masonry Cutting & Patching**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Ninety (90) labor hours (blended rate)	90 Hours (Fill In On Bid Form)		
C	Material & Equipment	1	$6,500	$6,500
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 2 Included in Base Bid (Bidder to calculate):	

BP #1.4.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.

65. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

66. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.4.1 – MASONRY

Scope of Work:

BID PACKAGE #1.5.1 – STRUCTURAL STEEL

1. This Bid Package Scope of work includes performing all **LEAD PAINT AWARENESS*, SELECTIVE DEMOLITION*, STRUCTURAL STEEL FRAMING, METAL DECKING, STEEL FRAMING FOR OPENININGS, STEEL SUPPORT FOR ROOF TOP EQUIPMENT, METAL FABRICATIONS*, NEW STEEL SUPPORT MODIFICATIONS AT THE PERIMETER OF THE BUILDING, STRUCTURAL LINTELS, SAFETY GUARDRAILS AT NEW ADDITIONS, AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

1. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

2. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

3. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

4. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

5. Providing all necessary cranes, lifts and rigging to accomplish this scope of work.

6. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

7. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet these criteria, or for loss of production due to the subcontractor's assumptions.

8. Provide all shoring integral to erection.

9. This Subcontractor is responsible to work with and coordinate all fabrication and installation with the Owner's Material Testing & Inspections Laboratory and Special Inspector.

10. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

11. This Subcontractor is responsible for any and all winter conditions and snow plowing/snow and ice removal required to execute this scope of work.

12. Prior to the start of steel erection, this Subcontractor will provide a certified survey of the installed anchor bolts and bearing plates and other structural steel embedded items. Any deviations will be brought to the attention of the Construction Manager and the Subcontractor having installed the item so that corrections can be made in ample time so as not to delay the start of structural steel erection.

13. This Subcontractor is responsible to coordinate between the Architectural drawings and structural steel drawings to prepare a set of fully coordinated structural steel construction documents.

14. This Subcontractor shall assume multiple resubmissions of shop drawings via their detailer at no additional cost the owner.

15. As clarification of scope, this Subcontractor is responsible for all interior steel and deck infills with the existing building.

16. This Subcontractor shall furnish and deliver all anchor bolts, bearing plates, support angles and any other structural steel items embedded in concrete or to the Concrete Scope of Work Subcontractor. These items are required to be on site at the start of concrete and masonry operations along with a complete set of layout drawings and templates.

17. This Subcontractor shall receive and install masonry anchors that may be required to be welded to steel columns, beams, etc. All masonry anchors shall be provided by the Masonry Scope of Work Subcontractor prior to structural steel fabrication.

18. This Subcontractor is required to coordinate all structural steel work with all other Subcontractors having work adjacent to or connecting to the structural steel scope of work.

19. This Subcontractor shall perform field layout of beam pockets and all locations where structural steel is required to be attached to existing structures in an expeditious manner so work by others may commence at these conditions. Provide dimensioned drawings for field use.

20. This Subcontractor is to furnish and install roof deck, composite floor deck, roof deck ceiling systems and accessories for a complete installation.

21. This Subcontractor is responsible for coordinating with the appropriate subcontractors all sizes and locations of mechanical and architectural openings in metal decks and providing steel frames for the openings in accordance with design parameters. *Assume that these frames may not be complete established at the time of shop drawing approval and that the installation will be required below the metal deck in the field at no additional cost.*

22. This Subcontractor is responsible accommodate, coordinate and to install all supplemental framing (i.e.: AHUs, DOAs, ERUs, RTUs, Roof Drains, duct openings, floor penetrations, mechanical screen supports, etc.) from beneath the roof/floor decking out of sequence from initial steel fabrication and erection for the new and existing building.

23. This Subcontractor is responsible for furnishing and installing any steel angles, bulb-T's, and channels that are required in slabs, foundation walls and roof penetrations.

24. This Subcontractor shall furnish and install any necessary temporary connections, shoring and support of decking that may be required prior to placement of new concrete and/or for the structural steel scope of work.

25. This Subcontractor is responsible for any metal closure plates/strips, cover plates, pour stops, edge angles and stops, cell closures, edge closure plates, metal butt plates required to provide a structurally supported metal deck free from voids to allow a concrete placement by others.

26. Furnish and install all "supplementary" bent plates and angles that are indicated on the Architectural drawings for installation and support of surrounding construction that may not be detailed on the Structural drawings. If sizes are not indicated submit an RFI during the bid stages of the project. Failure to review the architectural drawings and submitting questions prior to submitting a bid will not be grounds for change order requests after contract award.

27. Furnish and install all clips required to support structural steel.

28. Provide punched holes in beams, plates and angles to receive blocking installed by others.

29. Immediately upon completion of each level of deck this Subcontractor will furnish, install, a complete safety cable system(s) with a minimum of (2) cable clamps at every connection sufficient to hold tension, of both upper and mid-rail cables, include stanchions, flagging and other appurtenances to meet and exceed OSHA regulations. This requirement applies at all perimeter (interior and exterior) fall exposures, including but not limited to, roof edges, shafts, and stairwell openings, in accordance with all local, state and federal OSHA regulations. The exact location of the cables shall be determined in advance with the CM (i.e.: cables along floor slab edges shall be on the inside or outside (not punched in the middle of the column as example)), possibly independent of the building columns, coordinated with other trades work and approved by the CM (i.e.: not Installed at the middle of the column in direct conflict with new work). Roof stations shall be located to specifically allow the roof to be installed and left in place. This subcontractor shall coordinate stanchion and rail height and allow for adjustment to roof taper or blocking thicknesses. No additional compensation shall be allowed for rework due to a lack of coordination. This Subcontractor is to maintain this fall protection on a daily basis until the structural steel work is complete. This contractor shall remobilize as required to maintain cable compliance in coordination with new installations. The safety cable system shall remain in place until directed to be removed by Construction Manager. Loading zone corral and ladder access will be established by this subcontractor in coordination with the Construction Manager to be utilized by subcontractors for loading.

30. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

31. This Subcontractor shall paint a beam selected by the CM white to be used for a “beam signing” by the owner. Deliver the beam to the jobsite with sawhorse dunnage for signing when directed.

32. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

33. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by Phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner’s warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.

5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

34. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

35. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
055000	Metal Fabrication*
055000	Metal Fabrication*
055119	Metal Gratings Stairs*
078100	Applied Fireproofing*
078413	Penetration Firestopping*
079200	Joint Sealants*

36. This Subcontractor shall specifically **EXCLUDE** the following:
    - Grout
    - Loose Lintels

37. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

38. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Shop Drawings/ Engineering Calculations/ Coordination	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Mobilization/ Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Structural Steel Materials & Fabrication	Provided by bidder. Fill in on bid form.	Tons	$ Provided by bidder. Fill in on bid form.
Structural Steel Erection	Provided by bidder. Fill in on bid form.	Tons	$ Provided by bidder. Fill in on bid form.
Decking	Provided by bidder. Fill in on bid form.	Tons	$ Provided by bidder. Fill in on bid form.
Other Misc. Steel Fabrication & Erection	Provided by bidder. Fill in on bid form.	SF	$ Provided by bidder. Fill in on bid form.
Crane	Provided by bidder. Fill in on bid form.	Days	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

39. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

40. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

41. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

42. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

43. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

44. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

45. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP # 1.5.1 – Structural Steel Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				

B				
C				
Total Allowance 2 Included in Base Bid (Bidder to calculate):				

BP #1.5.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.

46. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

47. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional	**ADD**

	information.	
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.5.1 – STRUCTURAL STEEL

Scope of Work:

BID PACKAGE #1.5.2 – MISCELLANEOUS METALS (SA)

1. This Bid Package Scope of work includes performing all **LEAD PAINT AWARENESS*, METAL FABRICATIONS, METAL STAIRS AND METAL RAILINGS, DECORATIVE METAL RAILINGS, COLUMN COVERS AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Bidding and Contracting Requirements**

SPECIFIC

3. **SET-ASIDE (SA) -** This Bid Package is set-aside for pre-approved Small, Minority or Women Owned Business Enterprises. Bid Bond and 100% Performance & Labor and Material Payment Bond is required.

4. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

5. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

6. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

7. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

8. This Subcontractor is responsible to work with and coordinate all fabrication and installation with the Owner's Material Testing & Inspections Laboratory and Special Inspector.

9. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. Refer to Eagle Environmental Reports in the Specifications.

10. This Subcontractor is responsible to coordinate between the Landscape, Civil, Architectural, MEFP drawings to understand the full extent of the Misc. Metals Scope of Work.

11. This Subcontractor shall assume multiple resubmissions of shop drawings via their detailer at no additional cost the owner. Drawings shall be submitted and approved timely as to not delay other trades.

12. This Subcontractor is required to coordinate all Misc. Metal work with all other Subcontractors having work adjacent to or connecting to the structural steel scope of work. This subcontractor is responsible for the layout of all blocking in new or existing rail locations. Layout shall be coordinated with as to not delay other trades.

13. This Subcontractor shall furnish and install any necessary temporary connections, shoring and support that may be required for the installation of Misc. Metals.

14. This subcontractor shall furnish and install the following including all required accessories for a complete installation product:
    - Metal Ladders
    - Elevator Pit Ladder
    - Elevator pit sump covers
    - Shelf angles
    - Metal Railings
    - Steel railings
    - Elevator hoist-way beams
    - Metal Gratings and Stairs

15. This Subcontractor is responsible to immediately install the metal stair handrails/guardrails or install, maintain and remove temporary hand/guardrails at all stairs so they may be used immediately.

16. The Concrete Subcontractor shall furnish and install the abrasive metal nosings at the stairs.

17. As clarification of scope, this Subcontractor shall furnish and install all elevator door sill angles, misc. steel trim including and metal ladders.

18. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

19. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

20. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.

2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

21. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

22. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
055000	Metal Fabrications*
079200	Joint Sealants*
084113	Aluminum Frame Entrances and Storefronts*

23. This Subcontractor shall specifically **EXCLUDE** the following:
    a.) Abrasive Metal Nosings

24. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

25. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN			
Description of area of work	Quantity	Unit	Value
Mobilization / Demobilization	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings / Engineering	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Exterior Handrails	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Interior Hand Rails	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Metal Stairs	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Misc Metals	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:		**LS**	**$ Provided by bidder. Fill in on bid form.**

26. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

27. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

28. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work

still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

29. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

30. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

31. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

32. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP # 1.5.2 – Misc. Metals Allowances:				
Allowance 1	**Misc. Metals**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Addl. Misc. Steel Framing	1 LS	$10,000	$10,000
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 2 Included in Base Bid (Bidder to calculate):	
BP #1.5.2 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

33. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

34. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.5.2 – MISCELLANEOUS METALS (SA)

Scope of Work:

BID PACKAGE #1.6.1 – ARCHITECTURAL WOODWORK

1. This Bid Package Scope of work includes performing all **MISC. ROUGH CARPENTRY*, INTERIOR FINISH CARPENTRY, INTERIOR ARCHITECTURAL WOODWORK, JOINT SEALANTS* AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work.

8. Coordinate and review all shop drawings and submittals from other Trade Contractors that affect the fabrication and installation of work covered under their Scope. This includes but is not limited to verification and comparison of rough openings in walls, ceilings and/or floors for the passage or installation of construction items furnished and installed by this scope of work or other trade Subcontractors. Downes will endeavor to provide copies of all approved shop drawings/submittals to the individual trades affected by their contents. However, this shall not relieve the Trade Subcontractor from this coordination process. If this Subcontractor feels they have not received shop drawings/submittals to properly coordinate their work, they are responsible for requesting them in writing from Downes prior to proceeding with the work.

9. This Subcontractor shall allow sufficient time to inspect and accept the work of the previous Subcontractors. Should any discrepancies be discovered, the Construction Manager shall be notified sufficiently in advance so that corrective action can be accomplished without affecting the progress of any other Subcontractor.

10. Provide all required field measuring, field layout, engineering etc. required to accomplish this scope of work.

11. This Subcontractor shall coordinate with the responsible subcontractors on the location of blocking and confirmed dimensions of rough openings in new walls for items attached to or recessed in new construction provided by this scope.

12. This subcontractor is responsible for the layout of all in-wall blocking required to complete this scope of work with bid package 9.1 Carpentry & Drywall. External blocking shall be by bid package 6.2.

13. **ARCHITECTURAL WOODWORK AND TRIM** - As indicated under Item #1 and #2 above, this subcontractor is responsible for providing, receiving, unloading, distributing, and installing these items. In addition this scope should include but may not be limited to:
    A. This Subcontractor shall include the filing and sanding of all recessed nail holes in exposed millwork items and shall utilize similar materials so these will not read through when stained or finished.
    B. This Subcontractor is responsible to coordinate, furnishing and installing all cut-outs and locations for all trades, including but not limited to, mechanical, electrical, tele/data, audio video, special systems, plumbing, mechanical, etc., as it relates to the execution of this Scope of Work. Seal all exposed edges of cutouts with silicone caulking, to prevent water damage.
    C. This Subcontractor is responsible to coordinate all openings requiring appliances, equipment and appurtenances, etc.
    D. To the greatest extent possible, finish Architectural Woodwork at the factory. Defer only final touch-up, cleaning, and polishing until after installation.
    E. This Subcontractor shall employ a qualified individual to take all necessary field dimensions for new architectural woodwork. It should be noted that multiple trips for field measuring will be required as not all areas may be available for measuring at one time.
    F. This Subcontractor will provide multiple shipments, as required, to meet the requirements and needs of the Project Schedule. Arch. Woodwork CANNOT be stored on site. Subcontractor shall ensure material is fabricated and stored off site under suitable conditions and delivered by phase. Phasing is subject to change to accommodate project requirements, and there will be NO change orders for additional deliveries/shipments of materials, equipment, labor, etc. Fabrication shall consider consistency of selected colors and products over the length of the project schedule to avoid substitutions due to discontinuation or supply interruptions.
    G. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.
    H. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work. Protection to be 100% coverage of all surfaces with a non-staining corrugated product manufactured for this application.
    I. The “As-Built” documents are hereby defined for the Project as record copy of Architectural Woodwork shop drawings.

14. This Subcontractor is responsible for the interior finish carpentry, including but not limited to exposed shelving, standards, brackets and fasteners as identified in the Contract Documents.

15. This Subcontractor is to furnish and install solid wood top and side panels at lockers as identified on Contract Document.

16. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Construction Manager's request.

17. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

18. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

19. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
079200	Joint Sealants*

20. This Subcontractor shall specifically **EXCLUDE** the following:

21. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

22. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization/Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Plastic Laminate Cabinetry	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Countertops	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Caulking	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (not specifically listed above)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

23. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

24. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

25. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

26. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

27. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

28. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

29. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.6.1 –Architectural Woodwork Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
BP #1.6.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

30. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

31. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.6.2 – ARCHITECTURAL WOODWORK

Scope of Work:

BID PACKAGE #1.7.1 ROOFING

1. This Bid Package Scope of work includes performing all **EXISTING ROOF SELECTIVE DEMOLITION, PREVENTION OF WEATHER INFILTRATION DURING ROOF REMOVAL/REPLACEMENT/FLASHING AND TEMRINATION OF ROOF CURBS AND OTHER PENETRATIONS, TEMPORARY ROOFING MEASURES AT PERIMETER AND PENETRATIONS, TEMPORARY GUARDRAIL SYSTEM, PERIMETER WARNING LINE SYSTEM, TEMPORARY ROOF PROTECTION, ROOF BLOCKING, COMMISSIONING OF BUILDING ENVELOPE SYSTEMS*, ASPHALT SHINGLES, SOFFIT PANELS, TPO ROOFING, MODIFIED BITUMINIOUS SHEET AIR BARRIER*, SHEET METAL FLASHING AND TRIM*, CORNICE AND TRIMS, ROOF WALKWAYS, ROOF SPECIALTIES, ROOF ACCESSORIES, ROOF SPECIALTIES, MANUFACTURED ROOF EXPANSION JOINTS, EXPANSION CONTROL* (ROOF ONLY), JOINT SEALANTS AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field

examination can the complete type and scope of work and existing conditions be determined and quantified.

7. This Subcontractor shall provide alternate adhesive products compatible with winter conditions base bid regardless of the baseline schedule.

8. **SAFETY GUARDRAIL SYSTEM** – This Subcontractor shall supply, install and maintain an independent self-supporting engineered guard rail system base bid outwards from and connected to the four (4) roof access points (scaffolding stair towers) provided by the General Trade contractors to beyond 15' from the roof edge for each phase. In addition, provide the same system 6 ft. min. out on the perimeter of ALL new roof openings required for the installation of new roof top mechanical equipment and structural steel to protect against fall hazard. The Guard rail shall be a "Guardian 15203, 8' L Rail w/ Multi-Directional Base Plate Kit" or equivalent. Maintain throughout construction until area is turned over until the completion of the phase or if no longer required as directed by the CM. Reference Roof logistic mark-ups North and South for all proposed locations for roofing fall protection. All materials associated will be considered "part of the project" and will not be available for return to the installing subcontractor.

9. **PERIMETER WARNING LINE** – This subcontractor shall supply, install and maintain a perimeter warning line with flags at 15' from the roof edge for each phase to allow safe work access to the roofs to support construction for all trades.

10. **TEMPORARY ROOF PROTECTION** - This Subcontractor is responsible to provide temporary protection of the new and/or existing roof surfaces at all roof top units, at the top and bottom of access ladders. Provide ¾" plywood walkways from the roof access points (ladders) to all new roof top units and work areas throughout new and existing roof areas for worker travel and conveyance of materials. In addition, this subcontractor shall provide, install, and maintain roof protection as directed by the CM. Loading zones are subject to change by phase. Existing membrane shall be protected from damage and discoloration due to traffic. Roofer shall restore membrane to its original condition when work is complete. All protection material to be removed by the roofer when no longer needed at the direction of the CM.

11. This subcontractor is responsible for a full tear-off of roof system at areas indicated on Drawings as well as removal of flashings and counter flashings.

12. This Subcontractor shall supply and install (4) 20' Warner D7200-2 Type AAD Fiberglass extension ladders or equal, at roof access point locations as determined by the CM. Ladders to be fixed in place. Roofer to provide protection and anti-slip rubber matting as referenced elsewhere in this scope. Roofer to protect coping edge and affix ladder as required by OSHA regulation. Ladder to have *"Safe-T"* walk off ladder extension or equivalent. All materials associated will be considered "part of the project" and will be turned over to the Owner at the end of the project.

13. This Subcontractor shall include base bid twenty (20) small roof repairs (2 x 2 or less) of the existing roof system attributable to construction activities but not assignable to a specific trade contractor.

14. This Subcontractor is responsible to maintain temporary weather proof protection including any means necessary to divert water and to prevent weather infiltration during the roof tear off and re-roofing/re-flashing process throughout and in-between phases for mechanical equipment and roof drains. Include

all temporary tie-in/flashing of new roofing to old roofing to prevent weather infiltration and temporary membrane etc. over new roof curbs etc.

15. This Subcontractor is required to cut out and provide full watertight temporary roofing measures at all new roof top equipment to be installed in the existing roof system as coordinated with the MEFP contractors in accordance with manufacturers recommendations. This Subcontractor is responsible to roof through new equipment curb and penetrations areas and selectively remove for the installation of the new curb and penetrations at a later date, maintain weather tight at all times.

16. Roofing contractor shall maintain the roof as clean and free of all debris generated by all trades on a daily basis. Roofer shall provide conveyance of debris from the roof to the designated dumpster via fork lift and trash box or other approved means. Stock piling of debris on the roof is not allowed at any time.

17. Roofing contractor shall maintain the roof in a condition that will weather high winds when roofing work is in progress. Material shall be staged from the ground and material in use shall be secured at all times to avoid flying debris.

18. This Subcontractor shall include base bid shift and Saturday work in coordination with all trades and as depicted in the project schedule for roofing work affecting occupied areas of the school. This includes but may not be limited to vapor and odor intrusion concerns. This Subcontractor shall provide Generator/Light Towers to illuminate work areas performed off hours.

19. Beyond what is required for temporary measures to prevent weather infiltration throughout the roof areas, this Subcontractor shall include additional roofing membrane or other weatherproof sheet product (approx. 6’-0” or greater as required) to extend over the perimeter of the roof edge to act as a temporary measure to prevent water infiltration into the perimeter roof edge and exterior wall system until such time perimeter work is completed. Upon completion of the perimeter work, the Roofing Scope of Work Subcontractor will return to the jobsite and provide final termination/completion of the roof system in accordance with details and manufacturer’s requirements. This will require multiple mobilizations over each phase.

20. This Subcontractor shall provide all wood blocking for the rooftop equipment bases, curbs, RTUs, AHUs, DOAs, condensers, miscellaneous mechanical and plumbing curbs, and support curbs as shown on the contract documents. This Subcontractor is responsible to coordinate the layers of all blocking required to coordinate with the specified roofing insulation thickness to achieve a full manufacturer’s warranty. There will be no additional compensation made for blocking required but not shown on the Contract Drawings. Note: Curbs shall be provided by the HVAC Subcontractor. Roof blocking to also include the wooden curbs or cants for mounting roof expansion joints and roof hatches.

21. This Subcontractor is responsible to furnish and install asphalt shingles, underlayment, metal flashing and trim, accessories, etc. as required for a complete roofing system.

22. This Subcontractor is responsible to furnish and install the sheet metal flashing and trim, including but not limited to formed roof-drainage sheet metal fabrications, formed low-slope roof sheet metal fabrications, formed steep slope roof sheet metal fabrications and formed brake metal including underlayments and miscellaneous materials.

23. Pipe and duct supports are to be furnished and installed by MEP subcontractors, however, this Subcontractor is to furnish and install the flashing sleeves.

24. This Subcontractor is to furnish and install the Pre-Fab Roof Guard Railing as identified in the Contract Documents.

25. As clarification of scope, this Subcontractor is responsible for all roof expansion joints.

26. This Subcontractor is responsible for providing a manufacturer's warranty for the roofing system in accordance with the Specifications regardless of details shown on the drawings. Review all roof termination and perimeter coping/flashing details shown on the drawings prior to submitting a bid and submit any questions or concerns in the form of an RFI that might prevent the receipt of the warrantee by the manufacturer. Failure to properly review drawing details during the bid stages will not be grounds for change order requests related to providing the warranty as specified after contract award

27. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

28. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

29. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
061053	Miscellaneous Rough Carpentry*
072100	Thermal Insulation*
078413	Penetration Firestopping*
078446	Fire-Resistive Joint System*
079200	Joint Sealants*

30. This Subcontractor shall specifically **EXCLUDE** the following:

31. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

32. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Insulation w/ Board	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
TPO	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Blocking	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Safety / Temporary Protection	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Sheet Metal Flashing & Trim	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder.	LS	$ Provided by bidder.

	Fill in on bid form.		Fill in on bid form.
Standard 20 Year Warranty	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Specified 40 Year Warranty	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

33. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

34. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

35. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

36. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

37. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

38. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as

to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

39. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.7.1 – Roofing Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
BP #1.7.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

40. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

41. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the	**ADD**

	provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.7.1 – ROOFING

Scope of Work:

BID PACKAGE #1.8.1 ALUMINUM GLASS & GLAZING

1. This Bid Package Scope of work includes performing all **COMMISSIONING OF BUILDNG ENVELOPE SYSTEMS*, JOINT SEALANTS*, FLOOR DOORS, ALUMINUM-FRAMED ENTRANCES AND STOREFRONTS, SECURITY ENTRANCES AND STOREFRONTS, GLAZED ALUMINUM CURTAINWALLS, ALUMINUM WINDOWS, DOOR HARDWARE*, OPENING SCHEDULE, GLAZING, AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as

the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. Furnish all lifts and staging required to accomplish this scope of work.

8. This Subcontractor shall review and coordinate all drawings and specifications to ensure the design intent is clear regarding aluminum window frame depth and width dimensions on the first submission of shop drawings to avoid delays in procurement due to multiple submissions.

9. This Subcontractor shall expedite the procurement of aluminum window and metal panel shop drawings and is solely responsible for coordination with the Specifications and Drawing details upon first submission to avoid delays in approval. RFIs related to conflicting information and/or unachievable details based on the manufacturer shall be made during the bid process so as not to cause delay after contract award.

10. All products shall meet the warranty requirements as set forth in the relevant specification sections. Written warranties shall be signed by the Manufacturer, Installer and the Subcontractor.

11. Regardless of detail, this Subcontractor shall provide a complete weather tight metal panel system guaranteed by the manufacturer at project conclusion. All necessary addl. beads of sealants including low expansion spray foam, metal trim, caps, flashing etc. to accomplish this shall be provided at no additional cost.

12. This subcontractor shall be responsible for all transitional flashings and proper termination to frames installed by this scope of work, for a complete envelope in coordination with the AVB installer. Products must be compatible according to manufacturer's recommendations.

13. This subcontractor is responsible for the layout of blocking in cavity walls as well as coordination of stud layout required for panel installations.

14. This subcontractor shall be responsible for any and all blocking and strapping applied external of the AVB layer, for the installation of panels systems.

15. This Subcontractor is responsible for all insulated infill panels in the window systems as may be shown on the contract documents.

16. This Subcontractor is responsible for all aluminum channels, break-metal, soffit panels or similar terminology to match window finish as may be shown.

17. This Subcontractor is to ensure that erected components are left attached in a safe and secure manner at the end of each workday so as to avoid damage from wind, weather, etc.

18. This Subcontractor shall provide windows with removable glass stops such that the glass may be removed and replaced without damage to adjacent construction.

19. For Phases 3, 4, 5 and 6 this subcontractor shall remove two (2) windows at each floor level for entrances from temporary stair tower and trash chute. Windows are to be stored, protected and reinstalled upon direction from the Construction Manager. Abatement, if required, at windows will be performed by the Demolition / Abatement Subcontractor prior to removal.

20. There shall be no exposed fasteners (other than weep holes) incorporated into any part of the work.

21. This Subcontractor shall be responsible for removal of all factory stickers, emblems, grease pencil marks, factory markings, etc. adhered to the glass and or frames. All windows, glass and glazing, panel systems, curtain wall, frames, and storefronts are to be left in a clean condition upon completion of installation. Final cleaning shall be by others.

22. As clarification of scope, this Subcontractor is responsible for all aluminum brake metal sills and flashings at window openings.

23. As clarification of scope, this Subcontractor is responsible for sheet metal jamb trim.

24. This Subcontractor is required to touch-up all surfaces which are scratched, bare or become rusty due to shop coating errors, inadequate protection or storage, careless erection procedures, etc. all to the satisfaction of the Architect, Construction Manager, Owner and the Manufacturer who will warranty the work.

25. This Subcontractor shall provide caulking at the perimeter interior and exterior of window openings to provide an aesthetically pleasing finished condition regardless of detail and whether or not those caulk joints are required for proper window performance.

26. This Subcontractor shall provide glass in all doors, borrowed lite frames, side lites, and window frames supplied and installed by this scope of work.

27. Glazing of HM, and wood doors shall be installed and provided by this Subcontractor.

28. This Subcontractor shall furnish and install all glazing for doors, frames, entrances, windows, interior borrowed lights, storefront framing, glazed curtain walls including all glazing sealants and accessories.

29. This Subcontractor will be responsible for installing all the aluminum door hardware. The Doors, Frames and Hardware Subcontractor/General Trades Contractor is responsible to provide hardware as specified in appropriate Division 08 Section and the cylinders, keying and will include the aluminum storefront entrance doors on the keying schedule.

30. This Subcontractor shall supply and install all ballistic transaction window units. Expedite submittal in coordination with the project schedule as to not delay trades from completing work.

31. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

32. This subcontractor shall provide raceways for all electronic security, access control wiring etc. etc. Coordinate with electric trades for routing and access within store front and curtainwall systems.

33. This subcontractor is responsible to coordinate and participate in 3rd party testing of work as specified. Storefront contractor shall provide lifts safety equipment or any other apparatus needed for 3rd party testing and commissioning. Store front contractor shall be present to represent their work at all inspections.

34. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work. Furnish and install pre-fabricated jamb protection at all entrance doors. Apply Ram-Board to aluminum door faces both sides at least for ¾ of the door height and full width.

35. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

36. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

37. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
078413	Penetration Firestopping*
078446	Fire-Resistive Joint Systems*
083123	Floor Doors* - Floor finish by others
084113	Aluminum Framed Entrances and Storefronts*
088000	Glazing*

38. This Subcontractor shall specifically **EXCLUDE** the following:

39. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

40. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Storefront / Curtain Wall Shop Drawings & Calculations	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Floor Doors	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Storefront Material	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Storefront Glazing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Storefront Installation w/ Glazing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Security Entrances and Storefronts	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Security Windows	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Curtainwall Material	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Curtain Wall Installation w/ Glazing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Aluminum Windows	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other Glazing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Caulking / Expansion Control	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

41. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

42. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

43. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

44. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

45. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

46. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as

to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

47. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.8.1 – Aluminum Glass & Glazing Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
BP #1.8.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

48. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

49. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**

3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.8.1 ALUMINUM GLASS & GLAZING

Scope of Work:

BID PACKAGE #1.9.1 GYPSUM DRYWALL & GENERAL TRADES

1. This Bid Package Scope of work includes performing all **TEMPORARY ENCLOSURES, TEMPORARY DOORS, INTERIOR DUST CONTROL, TRASH CHUTES, TEMPORARY PARTITIONS, SELECTIVE DEMOLITION*, COLD FORMED METAL FRAMING, MISC. ROUGH CARPENTRY*, SHEATHING, PLASTIC PANELING, COMMISSIONING OF BUILDING ENVELOPE SYSTEMS*, THERMAL INSULATION*, FIBER CEMENT SIDING, FIRE RESISTIVE JOINT SYSTEMS*, APPLIED FIREPROOFING, JOINT SEALANTS*, EXPANSION CONTROL*, HOLLOW METAL FRAMES, ACCESS DOORS*, FLUSH WOOD DOORS, DOOR HARDWARE, GLAZING*, GYPSUM BOARD, GYPSUM BOARD SHAFT WALL ASSEMBLIES, PLASTIC TOILET COMPARTMENTS, WALL AND DOOR PROTECTION, TOLIET, BATH AND LAUNDRY ACCESSORIES, EMERGENCY AID SPECIALTIES, FIRE PROTECTION CABINETS, FIRE EXTINGUISHERS, METAL STORAGE SHELVING, RETRACTABLE STAIRS, WHEELCHAIR LIFTS AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

1. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

2. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

3. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

4. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field

examination can the complete type and scope of work and existing conditions be determined and quantified.

5. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

6. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low lb-psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet this criteria, or for loss of production due to the subcontractor's assumptions.

7. This subcontractor is responsible to provide DAILY progress cleaning and remove debris from the work areas generated by this scope of work. This subcontractor as convey material to the appropriate dumpster location.

8. **RESPONSIBILITY FOR INTERIOR DUST CONTROL** – This Subcontractor is responsible for the control of dust within the building in and outside construction areas from the time each phase is turned over from the Demo/Abetment Subcontractor until substantial completion of each phase. This Subcontractor shall employ whatever means and methods necessary to control construction generated dust inside the building at all times and must have appropriate individuals with appropriate equipment on-site at all times. The General Trades Contractor, by use of negative air machines, shall maintain negative air pressure in the existing building construction areas from the commencement of demolition to substantial completion for each phase. Exhaust fans shall be run continuously and filters changed when fouled. Include the necessary provisions including, but not limited to cutting and patching to accommodate venting of the fans. The following are specific requirements for dust control in and around the construction areas itself:
    A. Include base bid a broom sweep, vacuum (with HEPA filter) of all work areas twice per week.
    B. Include base bid a broom sweep, vacuum AND wet mop of adjacent occupied corridors/classrooms to 50' from the construction areas twice per day. This activity must be cautious of air sampling devices as it relates to the manner the cleaning occurs. Coordinate with CM.

This sweeping, vacuuming and wet mopping is in addition to the weekly progress cleaning that will be performed by ALLOWANCE (i.e. the allowance will NOT be used for this scope). It is not the intent of this requirement to relieve other contractors from cleaning up on a daily basis as required, but to control dust due to occupancy.

All contractors shall be responsible to provide additional dust control and ventilation measures to control dust and odors generated from sanding, cutting, grinding and welding. This task is separate from the abatement work and commences upon completion of the abatement work. The Abatement Contractor is responsible for dust control during abatement and demolition activities.

9. **TEMPORARY ENCLOSURES** – This Subcontractor shall provide all temporary protection and enclosures required to prevent weather infiltration into the perimeter of the building. The enclosures and protection will include but may not be limited to the installation and maintenance of fire retardant tarps., heavy mil polyethylene sheeting and associated wood support framing, sand bags etc. This Subcontractor must provide immediate response time to maintain temporary protection and enclosures. Submit a temporary protection and enclosure plan for review by the CM. Following completion of the wall systems and/or selective demolition activities all new and existing window openings shall be infilled using similar methods until such time window installation commences. All window openings at grade level or accessible from grade level must have plywood infills for security. The CM reserves the right to amend the proposed plan at no additional cost to the owner if they feel it is not a sufficient means of protection at a given location. Return to the jobsite and remove these items when directed to do so by the Construction Manager. Temporary protection shall not interfere with the ability to commence with new construction. The Mason Subcontractor is responsible for providing enclosure to their work at the facade. See allowances for additional temp. enclosures to include.

10. This subcontractor is responsible for providing compete safety rail system at all levels of the Elevator shaft. Including but not limited to removeable toe boards, mid-rail, top-rail, and protective mesh. Coordinate installation with the Elevator Subcontractor.

11. **TEMPORARY DOORS** - This Subcontractor is responsible to furnish, install and maintain temporary wood frame and plywood doors made up of single or paired openings depending on opening condition for the all-exterior door openings within a given phase (complete with exterior/interior lockable hardware and hasps) to be installed at all grade level doors upon removal of the existing doors. These door openings may require plywood partitions and transoms to fully enclose the opening and shall be performed by an experienced carpenter. Include Remove/modify them as necessary to allow permanent doors to be installed.

12. **TEMPORARY PARTITIONS** – This Subcontractor shall include in the base bid temporary partitions as outlined on the phasing drawings. Walls shall be 3-5/8” metal stud framed, 3-1/2” sound bats, 5/8” taped gyp board on each side to the underside of the deck above and fully fire caulked/firestopped/acoustical sealed to create a one (1) hour separation. Each partition shall include a 1 hour rated HM, Door, Frame and Hardware set with electronic keypad entry. The wall on the occupied side shall be fully taped. The wall and door shall be painted by Painting Subcontractor on the school occupied side. This subcontractor shall furnish and install 4” Vinyl cove base on occupied side. All scope shall be included by this Subcontractor base bid. Also include and additional three (3) temporary one (1) hour rated doors including all components base bid to be installed internally to the building within existing openings or within temp. partitions.

13. This Subcontractor is responsible to install, maintain and remove negative air machines and enclosures to keep construction areas under negative pressure, including but not limited to changing filters, signage, hospital grade dust/tacky mats, ducting to exterior, relocations, as required to accommodate construction activities / phasing. Coordinate IAQ measures to that all work areas shall be isolated to prevent the migration of duct into other areas.

14. OSHA’s lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA’s lead in construction standard when performing this scope of work. Paints that

will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

15. This Subcontractor is responsible for but not limited to furnishing and installing all interior and exterior load-bearing wall framing and exterior non-load bearing wall framing as identified in the Contract Documents. Including required engineered shop drawings, framing accessories, anchors, clips and fasteners, shims, sealer gaskets and any other miscellaneous accessory as required in accordance with the Contract Documents for a complete installation.

16. This Subcontractor is responsible for but not limited to furnishing & installing all gypsum board shaft wall assemblies including but not limited to general materials, shaft-wall enclosures, chase enclosures, horizontal enclosures, rates assemblies, performance requirements, gypsum shaft-liner board, non-load bearing steel framing, tracks, firestop tracks, miscellaneous auxiliary materials and miscellaneous accessories etc. in accordance with **Specification Section 092116.23 Gypsum Board Shaft Wall Assemblies** and the contract documents.

17. This Subcontractor is responsible for but not limited to furnishing & installation of non-load-bearing framing systems, suspension systems for interior gypsum ceilings, soffits, grid systems, studs, runners, tracks, deflection tracks, deflection joints, trim accessories, slip-type head joints, flat strap & backing plate, hat-shaped rigid furring channels, fasteners, etc. for **Specification Section 092216 Non-Structural Metal Framing** and the contract documents.

18. This Subcontractor is responsible for but not limited to furnishing & installing all metal framing, gypsum board and shaft wall assemblies, including but not limited to, general materials, shaft-wall enclosures, chase enclosures, horizontal enclosures, rates assemblies, performance requirements, non-load bearing framing for interior gypsum board assemblies, interior framing systems, non-load bearing steel framing, grid suspension systems for interior gypsum ceilings and soffits, framing systems, suspension systems, all panel products, interior gypsum wallboard, exterior gypsum board for sheathing and soffits, rated gypsum enclosures, rated walls and ceilings, deflection track, deflection joint, type X interior gypsum wallboard with moisture and mold resistant core and faces, cementitious and tile backer board, gypsum board shaft wall assemblies, aluminum reveal trim, moisture resistant gypsum board at all wet locations, fascia, fire ratings, ceiling framing, soffits, ceilings, suspension systems, boxed beams, trim accessories, joint treatment materials, specialty gypsum board, acoustical sealants, acoustical walls, metal framing and trimming systems, joint sealants, control joints, joint materials, fur drywall systems, fasteners, Z-Clips/channels, sound attenuation insulation, gypsum plastering on expanded metal lath and/or existing plaster, miscellaneous metal framing and blocking, installation of access panels, cleaning and protection, field preparation of new and existing substrates, performance requirements miscellaneous auxiliary materials and miscellaneous accessories, etc. in accordance with **Specification Sections 092900 Gypsum Board** and the Contract Documents.

19. This subcontractor is responsible to furnish and install framing and sheathing where the dormers were removed from the roof. In addition, this subcontractor is to frame and sheath where sections of the roof were removed in order to install MEP equipment.

20. This Subcontractor shall allow sufficient time to inspect and accept the work of the previous Subcontractors. Should any discrepancies be discovered, the Construction Manager shall be notified sufficiently in advance so that corrective action can be accomplished without affecting the progress of any other Subcontractor.

21. This Subcontractor is responsible to coordinate this scope of work to allow for additional studding or framing to accommodate the work of others, including but not limited to cutting, patching, etc.

22. This Subcontractor is responsible for all rough carpentry in accordance with **Specification Section 061000 Rough Carpentry** and the contract documents. This work shall be coordinated with other trades.

23. This Subcontractor is responsible to cut and patch, as required, gypsum drywall for the Elevator Contractor.

24. Include furnishing and installing a complete, coordinated, registered Connecticut Engineer stamped cold formed metal framing (CFMF) system that achieves the architectural intent shown on the drawings regardless of detail. This includes but is not limited to all supplementary LG steel sheet, clips, stud members, headers, bridging, bracing and other components necessary to provide a complete system and as may be required to achieve the intent and as may be required for attachment of adjacent construction by others.

25. Coordinate and review all shop drawings and submittals from other Trade Contractors that affect the fabrication and installation of work covered under their Scope. This includes but is not limited to verification and comparison of rough openings in walls, ceilings and/or floors for the passage or installation of construction items furnished and installed by this scope of work or other trade Subcontractors. Downes will endeavor to provide copies of all approved shop drawings/submittals to the individual trades affected by their contents. However, this shall not relieve the Trade Subcontractor from this coordination process. If this Subcontractor feels they have not received shop drawings/submittals to properly coordinate their work, they are responsible for requesting them in writing from Downes prior to proceeding with the work.

26. This contractor shall coordinate supply and install all in-wall blocking with various trades I.E. but not limited to; millwork, arch woodwork, plumbing, toilet partitions, visual display, electric, etc.

27. This Subcontractor shall furnish and install all required wood blocking, nailers and plywood backing panels as identified in the Contract Documents. Roof blocking will be by Roofing Subcontractor.

28. Cementitious Backer panels are to be furnished and installed by this Subcontractor.

29. This Subcontractor is responsible for all wall and roof sheathing.

30. FT Plywood over R49 rigid insulation, rim board in the attics is to be furnished and installed by this Subcontractor.

31. R30 batt insulation on FRT plywood board supported by CFMF frame system above ceiling is to be furnished and installed by this Subcontractor.

32. Sound Absorbing Spray is to be furnished and installed by this Subcontractor.

33. This contractor is responsible for the exterior finish carpentry which includes the following:
    a) Exterior trim, panels and moldings, etc.
    b) Lumber soffits.
    c) Exterior wood stairs and railings, including decking

34. This subcontractor shall furnish and install Expansion Control - Wall-to-Wall/Wall Corner per specification 079500.

35. This contractor shall furnish and install floor to floor expansion joint system.

36. Remove, refurbish and reinstall wooden and metal lockers as indicated in contract drawings. Including wood blocking required at bases.

37. This Subcontractor is to furnish and install the hollow metal frames, doors and hardware.

38. This Subcontractor shall provide all proper closure of door frame throats where they abut walls regardless of wall thickness.

39. This Subcontractor shall furnish and install all Gyp. Board control joints as coordinated with the architect on locations regardless of detail.

40. This Subcontractor shall furnish and install all LG stud bracing and clips for CMU walls where shown.

41. This subcontractor is responsible for a complete thermal and acoustical insulation system as specified and applied per the contract documents

42. Spray on Applied fire proofing shall be applied to all structural steel to achieve required fire rating.

43. This Subcontractor is responsible to provide hardware as specified in appropriate Division 08 Section and the cylinders, keying and will include the aluminum storefront entrance doors on the keying schedule. BP #1.8.1 Glass and Glazing Subcontractor will be responsible for installing all the aluminum door hardware.

44. This Subcontractor is responsible to provide, install, maintain and remove when finished, one (1) ea. multiple story (based on highest floor in building) trash chute for the duration of each phase for work at upper levels. With relocation for each with access hoppers at each floor installed in window openings. In addition, a hinged plywood door and pad lock hasp at each access point is to be provided. Chute to be similar to Superchute brand. Only one (1) trash chute will be used during each Phase. Once Phase is completed trash chute is to be relocated to next Phase accordingly.

45. **TEMPORARY SCAFFOLD STAIR TOWERS –** This Subcontractor shall coordinate, furnish, install and maintain all temporary scaffold stair towers:
    - Three Story Scaffold Tower
    - Tower to 1st be built for Phase 3. Once Phase 3 is complete scaffold stair tower is to be relocated to Phase 4, then 5 and then 6.

- Base of Stair tower to be enclosed with a lockable door to prevent trespassing during off hours.
- Include temp doors at window openings

46. The following items are to be furnished by the Owner but INSTALLED by this Subcontractor:
    a.) Toilet tissue (roll) dispenser
    b.) Paper towel (roll) dispenser
    c.) Soap dispenser.

47. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

48. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

49. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
061053	Miscellaneous Rough Carpentry*
078413	Penetration Firestopping*
078446	Fire-Resistive Joint Systems*
079200	Joint Sealants*
081113	Hollow Metal Doors and Frames*
083113	Access Doors and Frames*

50. This Subcontractor shall specifically **EXCLUDE** the following:

51. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

52. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings / Calculations	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
CFMF	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Exterior Sheathing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Interior Framing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Gypsum Drywall & Taping	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Blocking / Sheathing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Hollow Metal Doors, Frames and Hardware	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Batt / Mineral Wool Insulation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Expansion Control	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Caulking / Firestopping / Acoustical Sealing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Equipment / Lifts	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Temporary Enclosures	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Temporary Doors	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Temporary Stair Towers	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Temporary Enclosures for Scaffold Stair Towers	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Toilet & Bath Accessories	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Fire Extinguishers & Cabinets	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Trade Work Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Allowances	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

53. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

54. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

55. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction

will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

56. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

57. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

58. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

59. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.9.1 – Gypsum Drywall Allowances:				
Allowance 1	**Patch Existing Finishes**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Two Hundred Eighty (280) labor hours (blended rate)	280 Hours (Fill In On Bid Form)		
C	Materials & Equipment	1	$10,000	$10,000
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2	**Safety & Carpentry**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate	Included in blended rate

			below	below
B	One Hundred Sixty (160) labor hours (blended rate)	160 Hours (Fill In On Bid Form)		
C	Materials & Equipment	1	$8,000	$8,000
			Total Allowance 2 Included in Base Bid (Bidder to calculate):	
Allowance 3	**Additional Temporary Partitions & Enclosures**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Two Hundred Eighty (280) labor hours (blended rate)	280 Hours (Fill In On Bid Form)		
C	Materials & Equipment	1	$15,600	$15,600
			Total Allowance 3 Included in Base Bid (Bidder to calculate):	
Allowance 4	**Progress Cleaning**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Five Thousand Three Hundred Ninety-Five (5395) labor hours (blended rate)	5395 Hours (Fill In On Bid Form)		
C	Misc. Materials and Equipment	1	$12,500	$12,500
			Total Allowance 4 Included in Base Bid (Bidder to calculate):	
BP #1.9.1 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

60. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

61. **<u>ALTERNATE BIDS</u>** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price

1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.9.1 GYPSUM DRYWALL

Scope of Work:

BID PACKAGE #1.9.2 FLOORING & TILE (SA)

1. This Bid Package Scope of work includes performing all **TILE BACKING PANEL PREPARATION, UNDERLAYMENT, TILING, FLOOR PREPARATION FOR ALL RESILIENT FLOORING, DEEP SLAB IN-FILLS 2" OR LESS, RESILIENT BASE AND ACCESSORIES, RESILIENT SHEET FLOORING, RESILIENT TILE FLOORING, TILE CARPETING, ENTRANCE FLOOR MATS AND FRAMES, FINAL CLEANING / WAXING / SEALING / POLISHING, RAMBOARD FLOOR PROTECTION AND ALL ASSOCIATED WORK.** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

SPECIFIC

3. **SET-ASIDE (SA)** - This Bid Packages are set-aside for pre-approved Small, Minority or Women Owned Business Enterprises. A Bid Bond and 100% Performance & Labor and Material Payment Bond is required.

4. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

5. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

6. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

7. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

8. This Subcontractor is responsible for inspecting the floor and wall surfaces prior to starting work. All substrates will be provided in accordance with the tolerances defined in the specifications. This Subcontractor, however, shall include the cost to correct dips, cracks, treating joints, flash patching around floor drains/cleanouts, electrical floor boxes, and imperfections in the new or existing concrete slabs and existing or new walls, etc. in order to properly install their work and achieve a full warranty.

9. This Subcontractor is responsible for all sloping to drain per drawings and specs at tile locations.

10. Include all preparation of ceramic tile backer-board that is furnished and installed by the Gypsum Drywall and Metal Framing Subcontractor regardless of Specifications.

11. This Subcontractor is responsible for all necessary concrete slab preparation in accordance with Contract Documents and Manufacturer's recommendations to achieve a full warranty.

12. **TOPICAL MOISTURE MITIGATION** - This Subcontractor is responsible for furnishing and installing a topical moisture mitigation coating system over all **EXISTING** concrete **SLABS ON GRADE and SLABS ON DECK** that receive flooring (include over new concrete slab infills within the existing building) that is compatible with the adhesives and flooring products specified on this project. This Subcontractor assumes sole responsibility for flooring system failures due to vapor emission, unacceptable PH levels, high alkalinity etc. from the concrete slabs to the fullest extent of the warranties/guarantees required to be provided in the Specifications. Provide written confirmation from the adhesive and flooring manufacturers confirming compatibility and warranty compliance with all products used.

13. **SUBSTRATE PREPARATION** –*Existing Building* - This Subcontractor is responsible for inspecting all floor surfaces including areas to be sealed by others prior to starting work. This Subcontractor shall include a cementitious self-leveling underlayment over 100% of all areas that are going to receive new flooring and or tile up to a thickness of 3/8" (regardless of specification) and to sand all substrates to correct small dips, minor cracks, and imperfections in order to properly install their all-flooring materials, in accordance with the Manufacturers installation instructions. Furthermore, this Subcontractor shall include floor preparation at all floor drains/cleanouts, electrical floor boxes, SOG diamonds and control joints, and imperfections in the existing or new concrete slabs and existing or new walls etc. in order to properly install their work and achieve a full warranty. In abated areas this self-leveling underlayment wearing surface shall be installed immediately following floor and mastic abatement. Include separate mobilizations and 2nd shift labor as required for the poured underlayment at abated slabs. This material will be used as a wearing surface and is required to perform as such, patching and skim coating and sanding will be required prior to floor installation.
New Additions – All items above apply to the new additions with the exception of abatement areas and that a skim coat up to 1/8" thick on all new slabs shall be provided in lieu of self-leveling underlayment.

14. This Subcontractor will replace all tiles which the Architect and/or the Construction Manager have determined to sound hollow or contain factory defects.

15. This Subcontractor is responsible to provide, maintain and remove temporary protection/barriers of all materials installed within this Scope of Work. This shall include but not be limited to cleaning of tile and installation, maintenance and removal of temporary protection. Protective paper will not be acceptable for protection. Material to be similar or equal to "Ram Board".

16. This Subcontractor is responsible to provide an expansion joint layout for all tile installed as part of this Scope of Work.

17. This Subcontractor is responsible for all resilient base and accessories, including but not limited to, general materials, resilient wall base, rubber stair treads/risers/nosing's and accessories, resilient molding accessories, stair-tread nose filler, preparation of concrete(or other) substrates, floor preparation, primer, underlayment/self-leveling underlayment, transition strips, reducer strips, rubber for tile and tread, sheet vinyl at stair landings, concrete slab primer, metal edge strips, floor polish & sealers, sealants, adhesives, mockups, floor polish/wax, final cleaning, adhesion testing, moisture/RH and pH testing, special warranties, wall to wall temporary floor protection, maintenance materials, miscellaneous accessories, etc. and in accordance with the **Specification Section 096513 Resilient Base and Accessories,** the Finish Schedule and the Contract Documents to provide a complete resilient base and accessories system.

18. This Subcontractor is responsible for all resilient flooring, including but not limited to, general materials, rubber floor tile, homogeneous linoleum tile, resilient linoleum modular tile, vinyl sheet floor covering with backing, resilient wall base, resilient wall base and accessories, resilient molding accessories, rubber sheet flooring, resilient tile flooring, rubber tile, vinyl composition floor tile(VCT), solid vinyl tile with special design insets, trawlable leveling and patching compounds, preparation of concrete(or other) substrates, floor preparation, primer, underlayment/self-leveling underlayment, transition strips, reducer strips, rubber for tile and tread, sheet vinyl, concrete slab primer, metal edge strips, floor polish & sealers, sealants, adhesives, mockups, floor polish/wax, final cleaning, adhesion testing, moisture/RH and pH testing, special warranties, wall to wall temporary floor protection, maintenance materials, miscellaneous accessories, etc. and in accordance with the **Specification Section 096516 Resilient Sheet Flooring,** Finish Schedule and the Contract Documents to provide a complete resilient flooring system.

19. This Subcontractor is responsible for all tile carpeting, including but not limited to, general materials, carpet tile, resilient wall base, resilient wall base and accessories, trawlable leveling and patching compounds, preparation of concrete(or other) substrates, floor preparation, primer, underlayment/self-leveling underlayment, metal edges, transition strips, reducer strips, concrete slab primer, metal edge strips, sealants, adhesives, mockups, final cleaning, adhesion testing, moisture/RH and pH testing, special warranties, wall to wall temporary floor protection, maintenance materials, miscellaneous accessories, etc. and in accordance with the **Specification Section 096813 Tile Carpeting,** Finish Schedule and the Contract Documents to provide a complete resilient flooring system. This Subcontractor is responsible for 3% attic stock of the total quantity for all materials furnished as part of this Scope of Work, if not identified in the Specifications.

20. Due to Phasing requirements on this project existing finish flooring in corridors will be removed on a phased basis but will NOT receive new finish flooring immediately. This Subcontractor shall include the installation of a temporary sealer to inhibit dust in the corridors for all phases and sub-phases. The sealer shall be compatible with the toppings and/or finish flooring adhesives installed at a later date. Provide submittal and written verification of compatibility.

21. This Subcontractor is responsible for all deep slab infills shown on the architectural drawings 2" or less.

22. Flooring in Elevator cab is by this Subcontractor.

23. This Subcontractor shall include installing cementitious underlayment in the recesses to achieve level and dept in order to receive entrance floor mats and frames as necessary.

24. This Subcontractor shall provide, maintain and remove barriers and floor protection (RAM Board or equal) to prevent other Subcontractors from damaging finished work during and after the setting period. This Subcontractor is also responsible for taking precautions to avoid damage to finish work adjacent to their work.

25. This Subcontractor shall include final cleaning of all floor systems installed by this Scope of Work as approved by the individual flooring manufacturers and as outlined in Division 01. This shall include but not be limited to final cleaning, waxing, sealing and/or polishing of the resilient flooring based on manufacturers recommendations. All cleaning and cleaning products intended to be used are to be coordinated with the owner's maintenance staff and the Construction Manager prior to commencing. Mockups will be required.

26. This Subcontractor is responsible for coordinating the installation of the flooring with all Subcontractors.

27. This Subcontractor is responsible to provide resilient base in areas not scheduled for finish flooring whether shown on the drawings or not.

28. This Subcontractor is responsible for the transition strips between the resilient flooring and all other dissimilar finish flooring material new or existing.

29. This Subcontractor shall include removal and replacement of 100 SF of each type of flooring type in their base bid. Replacement not to be used for installation issues, damage caused by this Subcontractor or defective material. Removal and replacement will be as directed by the CM.

30. This Subcontractor will replace all materials which the Architect and/or the Construction Manager determined to be defective at no additional cost.

31. This Subcontractor is responsible for attic stock = 3% for all materials furnished as part of this Scope of Work, if not identified in the Specifications. Attic stock shall be full inventoried, palletized and shrink wrapped upon delivery to the site. Refer to individual Spec Section assigned to this scope of work for exact quantities and ratio requirements.

32. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

33. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

34. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

35. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

36. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
035416	Hydraulic Cement Underlayment*
079200	Joint Sealants*

37. This Subcontractor shall specifically **EXCLUDE** the following:

38. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's

sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

39. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization/ Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Temporary Floor Protection	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Substrate Preparation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Unglazed Ceramic Mosaic Tile	Provided by bidder. Fill in on bid form.	SF	$ Provided by bidder. Fill in on bid form.
Unglazed Porcelain Floor Tile	Provided by bidder. Fill in on bid form.	SF	$ Provided by bidder. Fill in on bid form.
Glazed Wall Tile	Provided by bidder. Fill in on bid form.	LF	$ Provided by bidder. Fill in on bid form.
Thresholds	Provided by bidder. Fill in on bid form.	SF	$ Provided by bidder. Fill in on bid form.
Crack Isolation Membrane	Provided by bidder. Fill in on bid form.	LF	$ Provided by bidder. Fill in on bid form.
Resilient Sheet Flooring	Provided by bidder. Fill in on bid form.	SF	$ Provided by bidder. Fill in on bid form.
Resilient Tile Flooring	Provided by bidder. Fill in on bid form.	SF	$ Provided by bidder. Fill in on bid form.
Carpet Tile	Provided by bidder. Fill in on bid form.	LF	$ Provided by bidder. Fill in on bid form.

Other (be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder.**

			Fill in on bid form.

40. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the

contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

41. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

42. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

43. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

44. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

45. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

46. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.9.2 – Flooring & Tile Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**

A				
B				
C				
Total Allowance 1 Included in Base Bid (Bidder to calculate):				
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
Total Allowance 2 Included in Base Bid (Bidder to calculate):				
BP #1.9.2 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

47. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

48. **<u>ALTERNATE BIDS</u>** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**

4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.9.2 FLOORING & TILE

Scope of Work:

BID PACKAGE #1.9.3 ACOUSTICAL CEILINGS (SA)

1. This Bid Package Scope of work includes performing all **SELECTIVE DEMOLITION* EXPANSION CONTROL*, JOINT SEALANTS*, ACOUSTICAL PANEL CEILINGS, SOUND ABSORBING CEILING AND WALL UNITS AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Bidding and Contracting Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	03/19/2025

SPECIFIC

3. **SET-ASIDE (SA) -** This Bid Package is set-aside for pre-approved Small, Minority or Women Owned Business Enterprises. A Bid Bond and 100% Performance & Labor and Material Payment Bond is required.

4. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

5. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

6. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

7. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

8. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

9. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a

CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet this criteria, or for loss of production due to the subcontractor's assumptions.

10. This Subcontractor is responsible for coordinating all ceilings in this scope with the Drywall, Specialties, Fire Protection, Mechanical, Electrical, Special Systems and Tele/Data Subcontractors and Construction Manager, in order to provide a complete acoustical ceiling system.

11. This Subcontractor is responsible to coordinate, provide and accommodate any and all ceiling to ceiling and ceiling to wall expansion joint assemblies and covers, in accordance with the Contract Documents, whether shown on the reflected ceiling plan or not.

12. This Subcontractor is responsible for all required support and termination of the acoustical ceiling system to adjacent construction. Including but not limited to any special aluminum closure trim, axiom trim, fascia's of soffits. This subcontractor is responsible for and shall be familiar with all specification sections related to this scope of work whether or not specifically listed above.

13. This Subcontractor is responsible for coordinating the installation of the acoustical panel ceilings, including final ceiling grid layout, with all Subcontractors having to install work above the ceilings.

14. This Subcontractor is responsible for coordinating all track systems (ie: curtains, draperies, cubicle curtains, projector pockets, etc.) within the acoustical panel ceiling systems.

15. This Subcontractor is responsible for all grid and edge moldings to support MEP or specialty items within or adjacent to the acoustical ceiling systems.

16. This Subcontractor is responsible for all acoustical panel ceilings, including but not limited to general materials, acoustical ceiling panels and exposed suspension systems for ceilings, metal edge moldings and trim, metal suspension systems, wire hangers, fasteners, main runners, cross tees, wall angle, seismic performance, Seismic RX suspension system, seismic clips, hold down clips, metal trim and closure pieces, ceiling perimeter and trim system, metal edge moldings and trim, attachment devices, grid, closure panels/pieces, joint sealants and acoustical sealants, performance requirements, special warranties, miscellaneous accessories, etc. in accordance with the **Specification Sections 095113 Acoustical Panel Ceilings, 098433 Sound Absorbing Wall Units and 098436 Sound Absorbing Ceiling Units,** finish schedule and the Contract Documents to provide a complete system.

17. This Subcontractor is responsible for all axiom trim or similar, in accordance with the Contract Documents.

18. This subcontractor is to furnish and install Wall-to-Ceiling/Ceiling to Ceiling expansion control as identified in the contract documents – reference Spec Section 079500

19. This Subcontractor is responsible for attic stock as per the Project Documents.

20. This Subcontractor shall include base bid replacement of one hundred (100) ceiling tile per Specs. and associated adjacent grid at the discretion of the CM. Replacement quantity shall not be used for work described in the contract documents or damage caused by this subcontractor. Replacement shall be all-inclusive to supervision, labor, material, tools and equipment etc. required to accomplish the task.

21. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this

22. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

23. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

24. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
079200	Joint Sealants*
079500	Expansion Control*

25. This Subcontractor shall specifically **EXCLUDE** the following:

26. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

27. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Other (be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

28. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

29. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

30. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

31. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

32. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

33. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

34. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.9.3 – Acoustical Ceiling Allowances:				
Allowance 1	**Temporary Ceilings**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Eighty (80) labor hours (blended rate)	80 Hours (Fill in on bid form)		
C	Ceiling Material	1 LS	$3,000	$3,000
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 2 Included in Base Bid (Bidder to calculate):	
BP #1.9.3 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

35. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

36. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.9.3 ACOUSTICAL CEILINGS (SA)

Scope of Work:

BID PACKAGE #1.9.4 PAINTING & WALLCOVERING (SA)

1. This Bid Package Scope of work includes performing all **LEAD PAINT AWARENESS*, WALL PREPARATION FOR ALL PAINTING AND EXISTING STAIR AND RAIL PREPARATION AND PAINTING, PAINTING, CONCRETE FLOOR SEALER AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

SPECIFIC

3. **SET-ASIDE (SA) -** This Bid Package is set-aside for pre-approved Small, Minority or Women Owned Business Enterprises. A Bid Bond and 100% Performance & Labor and Material Payment Bond is required.

4. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

5. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

6. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

7. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

8. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work.

9. This Subcontractor is responsible to properly prep, clean, scrape, sand, caulk, and fill as required all interior and exterior substrates required to receive new paint for proper adhesion. Proper PPE and JHA's will be required. Refer to any HAZMAT reports and comply with all OSHA Lead In Construction Guidelines as applicable.

10. This Subcontractor shall include all sanding and surface preparation necessary for an acceptable finish at all (new and existing as applicable) HM doors and frames, guardrails, handrails, ladders, access panels and miscellaneous metals to receive paint.

11. This Subcontractor shall assume that all interior walls, hard ceilings, door frames, HM doors, guardrails/handrails etc. at a minimum are to receive finish painting regardless of any conflicts with the finish schedule and the drawings. This Subcontractor is responsible to bring forth conflicts to the CM during the bid process.

12. This Subcontractor is solely responsible for reviewing and coordinating the products and sheens specified as they relate to the areas in which they are installed to ensure an acceptable aesthetic finished product acceptable to the architect. Pay special attention to walls that receive natural light, have accent lighting or lighting adjacent to the vertical surface that might enhance imperfections in the finish paint. Provide all refinishing and repainting of unacceptable areas as requested at no additional cost.

13. This Subcontractor is to include fire rated painting of plywood in all telecommunications, data and electrical closets.

14. This Subcontractor is responsible to paint and/or seal all exposed concrete floors, concrete and masonry substrates. Include tinting of products necessary to cover unsightly floor conditions. Proper testing and preparation of all substrates is the responsibility of this Subcontractor. Coordinate materials with mason and concrete subcontractors for compatibility and warranty.

15. This Subcontractor is responsible for all caulking at all HM/Wood frames, fire extinguisher cabinets, lockers, display cabinets, access panels, sprinkler hose cabinets or similar condition. This Subcontractor shall also caulk the joint between steel lintels and dissimilar materials i.e. millwork, drywall and masonry.

16. This Subcontractor shall include the painting of all interior and exterior pipe railings.

17. This Subcontractor shall provide painting as specified of all mechanical rooms, boiler rooms, electrical closets, tele/data closets, etc. This shall include but not be limited to painting conduit, piping, etc. as indicated on the contract documents or as directed by the CM.

18. This Subcontractor is responsible to inspect all substrates for painting and wall coverings prior to installation. Any discrepancies must be brought to the attention of the Construction Manager in writing with sufficient time in the schedule for corrections to be made otherwise this Subcontractor accepts the substrate as is and will be responsible for any/all corrections directed by the Architect, CM and Owner.

19. This Subcontractor shall assume multiple mobilizations and "come back" work as required and directed by the CM to accomplish this scope of work.

20. This Subcontractor is responsible for coordinating the installation of priming and painting with all Subcontractors and Construction Manager.

21. This Subcontractor is to paint temporary walls with one coat of primer and 1 cost of paint. Reference Phasing and Egress Plans.

22. This Subcontractor is responsible to paint all exposed structures, ductwork, piping, electrical, fire protection piping, special systems, etc. Coordinate manufacture's requirements of the aforementioned systems prior to painting so not to void warranties, UL ratings, fire ratings, etc.

23. This Subcontractor is responsible for all interior painting, including but not limited to general materials, preparation/treatment of substrates, priming and finish coats, scraping and sanding of existing paint to sound substrate, sanding and preparation of existing and new substrates, caulking/joint sealants, CMU, stairs and railings, guardrails, hollow metal doors and frames, gypsum board, lintels, ferrous metals, steel doors, steel, cast iron, galvanized metal, aluminum, plaster, hardwood flooring, concrete, wood casings, exposed steel ceilings, exposed surfaces, bollards, wood, pipes, PVC trim, hangers, fasteners, ducts, conduits, misc. supports, exposed steel and iron supports, surfaces of mechanical and electrical equipment that do not have factory –applied final finish, block filler, sealers, primers, polyurethane, adhesion tests, latex paints, specialty paints, epoxy paint on CMU and ground face block, alkyd paints, solvent based paints, painting of mechanical and electric items, maintenance materials, special warranties, adhesion testing, lead paint work and disposal plans, miscellaneous accessories, etc. and in accordance with the **Specification Section 099120 Painting,** Finish Schedule and the Contract Documents.

24. This Subcontractor is required to paint ***all*** walls of an enclosed area if a single wall or area is called to be painted, patched or repaired as part of this project.

25. This Subcontractor is responsible to properly prep, clean, scrape, sand, caulk, and fill as required all interior and exterior substrates required to receive new paint for proper adhesion. Proper PPE and JHA's will be required.

26. This Subcontractor is responsible for painting of the exterior and interior finish carpentry as noted in the Contract Documents.

27. This Subcontractor shall include all sanding and surface preparation necessary for an acceptable finish at all HM doors and frames, guardrails, handrails, ladders, access panels and miscellaneous metals to receive paint.

28. This Subcontractor shall assume that all interior walls, hard ceilings, door frames, HM doors, guardrails/handrails etc. at a minimum are to receive finish painting regardless of any conflicts with the finish schedule and the drawings. This Subcontractor is responsible to bring forth conflicts to the CM during the bid process.

29. This Subcontractor is solely responsible for reviewing and coordinating the products and sheens specified as they relate to the areas in which they are installed to ensure an acceptable aesthetic finished product acceptable to the architect. Pay special attention to walls that receive natural light, have accent lighting or lighting adjacent to the vertical surface that might enhance imperfections in the finish paint. Provide all refinishing and repainting of unacceptable areas as requested at no additional cost.

30. This Subcontractor shall include all costs to perform testing (i.e. adhesion, moisture, pH, relative humidity, etc.) as detailed in the contract documents and required, per the resinous floor manufacturers recommendations and provide a complete and comprehensive report.

31. This Subcontractor is responsible for all caulking at all HM/Wood frames, fire extinguisher cabinets, lockers, display cabinets, access panels, sprinkler hose cabinets or similar condition. This Subcontractor shall also caulk the joint between steel lintels and dissimilar materials i.e. millwork, drywall and masonry.

32. This Subcontractor is responsible for coordinating the installation of priming and painting with all Subcontractors and Construction Manager.

33. This Subcontractor is responsible to paint all exposed structures, ductwork, piping, electrical, fire protection piping, special systems that are replaced as part of this project, etc. Coordinate manufacture's requirements of the aforementioned systems prior to painting so not to void warranties, UL ratings, fire ratings, etc.

34. This Subcontractor is responsible to protect items not scheduled to be painted so not to void warranties, ratings, performance, etc.

35. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

36. This Subcontractor is responsible for all "Special Warranties", warranties, guaranties, training, start-up, required for this Scope of Work. "Substantial Completion" shall be defined as when the Owner accepts the building for its intended use. All required warranties and guarantees are to be project specific with a clearly defined start date and commence at this time.

37. This Subcontractor is responsible to protect items not scheduled to be painted so not to void warranties, ratings, performance, etc.

38. This Subcontractor is responsible for attic stock as per the contract documents.

39. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

40. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

41. This Subcontractor shall include base bid one hundred and sixty (160) man-hours for painting touch-up to be used as directed by the CM not to be associated with painting allowance #1. Touch-up shall not be used for base contract work. Man-hours shall be all-inclusive to supervision, labor, material, tools and equipment etc. required to accomplish the task.

42. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

43. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

44. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description

024119	Selective Demolition*

45. This Subcontractor shall specifically **EXCLUDE** the following:

46. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

47. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Interior Paint	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Polished / Sealed / Painted Floors	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Exterior Paint	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
High Performance Coatings	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Joint Sealants	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Manlifts and Staging	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Closeout	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

48. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

49. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

50. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

51. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

52. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

53. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

54. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.9.4 – Painting & Wallcovering Allowances:				
Allowance 1	Paint Existing As Directed			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Two Hundred Eighteen (218) labor hours (blended rate)	218 Hours (Fill in on bid form)		
C	Material	Included in blended rate above	Included in blended rate	Included in blended rate above

			above	
Total Allowance 1 Included in Base Bid (Bidder to calculate):				
BP #1.9.4 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

55. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

56. **<u>ALTERNATE BIDS</u>** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**

7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.9.4 PAINTING & WALLCOVERING

Scope of Work:

BID PACKAGE #1.10.1 SPEACIALTIES & EQUIPMENT

1. This Bid Package Scope of work includes performing all **MISC. ROUGH CARPENTRY*, JOINT SEALANTS*, VISUAL DISPLAY UNITS, VISUAL DISPLAY FABRICS, SIGNAGE, DIMENSIONAL LETTER SIGNAGE, CUBICLE CURTAIN TRACK, ROLLER WINDOW SHADES AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field

examination can the complete type and scope of work and existing conditions be determined and quantified.

7. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work.

8. This Subcontractor is responsible to participate in the preparation of composite MEP coordination drawings, which will be initiated by the Mechanical Subcontractor due to the potential for conflict between equipment provided under this scope of work and the MEFP trades. Include all costs. Coordination will be performed in BIM 3D.

9. Coordinate and review all shop drawings and submittals from other Trade Contractors that affect the fabrication and installation of work covered under their Scope. This includes but is not limited to verification and comparison of rough openings in walls, ceilings and/or floors for the passage or installation of construction items furnished and installed by this scope of work or other trade Subcontractors. Downes will endeavor to provide copies of all approved shop drawings/submittals to the individual trades affected by their contents. However, this shall not relieve the Trade Subcontractor from this coordination process. If this Subcontractor feels they have not received shop drawings/submittals to properly coordinate their work, they are responsible for requesting them in writing from Downes prior to proceeding with the work.

10. As clarification of scope, this Subcontractor shall provide and install any necessary surface mounted support and blocking for gym wall pads and other gym equipment.

11. The Visual Display Fabric as per spec section 101146 is to be furnished and installed by this Subcontractor

12. As clarification of scope, this Subcontractor shall furnish and install all specialized control wiring for equipment furnished and/or installed under this scope of work beyond was is clearly defined on the electrical, technology or audio-visual drawings. This Subcontractor is responsible for coordinating and providing a complete and functional system.

13. This Subcontractor shall fully comply with the Specifications in subcontracting lower tier subcontractors and vendors that have experience in installing the equipment to be included in this bid package.

14. This Subcontractor shall provide engineered attachment and seismic details for all equipment installed under this scope. Attachments are a delegated design and must be reviewed and stamped by a Ct. licensed engineer.

Provide sufficient protection as determined by the CM of surrounding completed construction during the installation of work included in this scope of work.

15. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.

2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

16. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

17. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
061053	Miscellaneous Rough Carpentry*
078413	Penetration Firestopping*
078446	Fire-Resistive Joint System*
079200	Joint Sealant*

18. This Subcontractor shall specifically **EXCLUDE** the following:

19. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

20. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization/ Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings / Submittals	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Visual Display Units	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Signage	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Dimensional Letter Signage	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Cubicle Curtain Tracks	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Roller window Shades	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Close-out	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

21. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

22. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

23. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

24. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

25. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

26. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

27. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.10.1 – Specialties & Equipment Allowances:			
Description	**Quantity**	**Unit Price**	**Amount**
Total Allowance 1 Included in Base Bid (Bidder to calculate):			
BP #1.10.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.			

28. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

29. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.10.1 SPEACIALTIES & EQUIPMENT

Scope of Work:

BID PACKAGE #1.14.1 - ELEVATOR

1. This Bid Package Scope of work includes performing all **ELEVATORS AND ALL ASSOCIATED WORK** in accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Bidding and Contracting Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	3/19/2025
Division 00 /Specs. Sections	**Information Available to Bidders**	
All Sections:	This Subcontractor is responsible for all sections in this division as it relates to completing this scope of work. Note specifically the following related to this scope:	3/19/2025
Division 01 / Sections:	**General Requirements**	
All Sections:	This Subcontractor is responsible for all sections in this division as it relates to completing this scope of work.	3/19/2025
Division 09 / Sections:	**FINISHES**	
090000	Schedule of Finishes*	3/19/2025
Division 14 / Sections:	**Conveying Equipment**	
142123.16	Machine Room-less Electric Traction Passenger Elevators	3/19/2025

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

4. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

5. This Subcontractor shall furnish and deliver all inserts, clips, brackets, anchors and sleeves to be embedded in concrete or masonry by others. Provide in advance exact location and size of sleeved openings in walls and floors as necessary for the work under this Subcontract. Any cutting and patching that may later be required, shall be the responsibility of this Subcontractor. Any securing of rails to the elevator pit walls or masonry walls shall be bolted connections by this Subcontractor.

6. This Subcontractor shall verify from the structural drawings that the shaft openings are correct for car capacity and shall verify from the electrical drawings that the power source for the elevators are compatible with the equipment proposed for the project prior to the bidding. If discrepancies are found they should be noted with the base bid. After Subcontract award this Subcontractor shall review the structural steel shop drawings and verify that the shaft openings are correct for car capacity.

7. This Subcontractor is to verify the dimensions of the hoistway, pit, machine room if applicable, and headroom clearances as shown and constructed. Notify the Construction Manager in writing of any discrepancies or omissions prior to starting elevator work.

8. Safety and temporary protection at elevator openings at all floor landings will be furnished and installed by BP 1.9.1 Drywall/General Trades. This subcontractor shall coordinate installation and provide any required signage.

9. This Subcontractor will coordinate with the appropriate Subcontractors as to the location of elevator hoist beams, pit ladders, light fixtures, light switches, sprinkler heads, smoke detectors, etc.

10. The pit ladder and sump cover and frame will be furnished and installed by BP 1.5.2 Misc Metals. This Subcontractor shall coordinate installation of pit ladder with BP 1.5.2 Misc Metals.

11. This Subcontractor will have the sole responsibility of the elevator shafts' fall protection as soon as their work begins in the shaft. Upon arrival on-site, this Subcontractor will inspect the condition of the fall protection and notify the Construction Manager of any conditions that need correcting.

12. This Subcontractor shall furnish and install all the finishes in the elevator cab as detailed on the contract documents.

13. This Subcontractor shall furnish and install the Operation Systems as indicated on the contract documents.

14. This Subcontractor is responsible to include in this base bid the required State inspection fee and plan review fees.

15. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

16. This Subcontractor is responsible for attic stock materials furnished as part of this Scope of Work, as identified in the Specifications.

17. The floor finishes will be furnished and installed by BP 1.9.2 Flooring. This subcontractor shall coordinate installation of finish floors with BP 1.9.2 Flooring.

18. This Subcontractor shall include 80 hours of elevator run time in their base bid, to be used at the direction of the CM.

19. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.

11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

20. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

21. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
090000	**Finish Schedule** - This Subcontractor is responsible for this section as it relates to completing this Scope of Work.

22. This Subcontractor shall specifically **EXCLUDE** the following:

23. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

24. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

SPECIFIC

3. **PHASING -** The renovation and addition to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in

order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.
7. This Subcontractor shall file for their permit to the Town, City or AHJ. Fees have been waived or will be paid for by others.

8. **FIRE SUPPRESSION SYSTEM EXPECTATIONS** - This Subcontractor is responsible for the design of the sprinkler piping system to satisfy the design criteria in the specifications, and all applicable codes and regulations. If more heads (and related piping) or different type of heads are required than shown in order to provide the specified discharge and coverage, these additional heads shall be provided as part of the base bid cost. This included but is not limited to those that may be required by Project Phasing, under soffits, large ductwork and piping, closets, attics, etc.

9. **FIRE SUPPRESSION SYSTEM DURING CONSTRUCTION**- This Subcontractor shall be responsible for maintaining the installed fire suppression system and tying in each new phase to the previously completed phases.

10. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

11. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14’-0” AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low lb-psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet this criteria, or for loss of production due to the subcontractor’s assumptions.

12. Where mechanical, electrical, plumbing, and fire protection work (MEP/FP) is inferred architecturally however not translated to specific MEP / FP drawings or specifications, the subcontractor shall either have requested clarification prior to bid or will have clarified the work during scope review with Downes Construction Company. Absent the subcontractors pre-bid or pre-award coordination, the subcontractor shall be bound by that information shown architecturally and shall provide a complete operating system

that is code compliant and ready for beneficial use by the Owner. All necessary communication and coordination with other subcontractors during the construction process to address such matters shall be included by the subcontractor at no additional cost.

13. This Subcontractor is responsible to expedite all drawings and calculations through the approval process, which includes proper sign off by building officials and Fire Marshall. This Subcontractor is also responsible to ensure that the Owner's Insurance Underwriter also obtains a copy of these drawings and encompasses any additional requirements to satisfy the same. This shall be completed in accordance with the project schedule.

14. This Subcontractor is responsible to participate in the preparation of composite MEP coordination drawings, which will be initiated by the Mechanical Subcontractor. All respective trades shall then label their own work onto these drawings and after coordination issues are resolved, they shall become the documents that field personnel utilize to install their work. The MEP coordination drawing process will be constructed in a 3D "BIM" environment using the latest version of Auto-Cad compatible software and with the latest version of REVIT/NAVISWORKS 3D modeling software. This Subcontractor is responsible for the MEP Coordination Drawing Process as outlined in the Downes Supplemental Instruction, Paragraph P. **Time is of the essence in coordinating areas as soon as possible so installations may begin since a great deal of the building will be ready for roughing upon start of the coordination process.**

15. This Subcontractor is responsible for all building commissioning requirements, including but not limited to, assisting the Commissioning Agent (CxA) in facilitating the commissioning described in this Specifications Section, attending any all meetings, completing all paperwork and responding to all questions and punch-lists issued by the CxA in a timely and professional manner as it relates to this Scope of Work, in accordance with the Specifications and the Contract Documents.

16. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

17. This Subcontractor is responsible for all Fire Department Connections and associated piping necessary for a complete, code compliant system.

18. This subcontractor shall include any/all signage required for FDC connections, valve cabinets zone maps, inspector tests fire pump riser valves alarm devices backflows etc.etc..for a complete sprinkler system.

19. This Subcontractor is responsible to coordinate installation and connection to utilities outside the building with the BP #1.31.1 Sitework. If this Scope of Work is installed prior to outside utilities, provide such caps or fittings to seal piping and properly identify the location of piping. This Subcontractor shall install their utilities to five (5) feet outside the buildings foundations [exception to remote FDC connection piping] and is to include final connections along with any necessary transitional fittings,

chlorination and 200 PSI NFPA test. Refer to specifications for testing and cleaning requirements that should also be included.

20. This Subcontractor shall furnish and install the fire alarm devices related to the sprinkler system (flow and tamper switches). The Electrical Subcontractor is responsible to wire and connect these devices to the Fire Alarm System. This Subcontractor will coordinate with the Electrical Subcontractor the exact number and location of these devices.

21. This Subcontractor is responsible to continuously record the progress of their work. If requested, this Subcontractor shall provide copies of the "As-Built" status of their work. Satisfactory "As-Built" progress drawings shall be a condition for continued requisition payments. Also refer to the DCC Supplemental Instructions for additional information regarding "As-Built" requirements.

22. This Subcontractor is advised that the room name number designations on the construction documents do not represent the final room numbers. Do not use construction document room name and numbers for programming/as-built's Fire Alarm, Fire Protection, Security, Tele/Data, Paging, All Special Systems, BMS, tagging, labeling, or other building systems. Obtain permanent room names and numbering system from the Owner prior to performing this work and with enough time for the Owner to secure information. Any programming or as-builts started with the construction room names and numbers will have to be reprogrammed and redone with the final room name and numbering system at this Subcontractor's expense. Provide final room names and numbers on all as-built drawings.

23. This Subcontractor shall be responsible to cut for vertical & horizontal runouts of piping through new/existing floors, walls and slabs, as required, to execute this Scope of Work.

24. This Subcontractor is responsible for all cutting, patching, core drilling and sleeves as required to execute this Scope of Work through all new/existing walls, floors and slabs.

25. This Subcontractor is responsible to provide all fittings and varying lengths of piping and similar conduits required for the complete installation of the systems as required by the coordination drawing process whether or not such fittings and/or lengths and sizes were shown on the Contract documents.

26. This Subcontractor is responsible to provide all necessary shut-downs and tie-ins for their systems. All overtime costs associated with this work shall be included.

27. This Subcontractor shall coordinate all fire suppression rough-in and finish locations with the structural and architectural RCP drawings.

28. This Subcontractor is responsible for working through all existing ceilings to remain as shown to remain on the Contact Drawings for the installation of the Fire Protection Systems.

29. This Subcontractor shall be responsible for all reopening and closing of ceilings in connection with any corrective or adjustment work above completed ceiling, including related costs for damaged ceiling grid, tile, etc.

30. This Subcontractor shall be responsible to protect heads from finish trades until the building is turned over to the Owner. Sprinkler drops in drywall ceilings shall be plugged until after finish trades have

completed their work and the heads can be installed. Other arrangements can be made to achieve this but must be agreeable to the Construction Manager prior to installation.

31. This Subcontractor is responsible to provide all vibration and seismic restraints as required by code, regardless of details.

32. This Subcontractor is responsible for all testing, flushing, and cleaning of the Fire Protection System, properly collect and dispose of discharge in accordance with Local practices, code and laws. This subcontractor shall be responsible for water erosion, staining and/or damage resulting from draining or flushing of the sprinkler system. Sprinkler contractor to plan and implement measures to controls for discharge.

33. This Subcontractor is responsible for all means of support and attachments to the existing structures (provide engineering analysis if required) for all Fire Protection work, including but not limited to, any trapeze hangers to clear ductwork or other interferences, include all vibrations and seismic restraints as required.

34. This Subcontractor is responsible to provide backflow preventers associated with this Scope of Work, include all necessary permits, testing /certifying and registration of same through all phases.

35. This Subcontractor shall provide all Fire Protection related signage, valve tags, labeling, tagging, banding and pipe identification prior to the installation of the ceiling gird so as to allow for inspection as to the thoroughness of these items.

36. This Subcontractor is responsible for all sleeves, inserts, hangers, supporting devices, miscellaneous steel and equipment dunnage required to complete this Scope of Work.

37. This Subcontractor is responsible for all their own core drilling and sleeves for penetrating the building foundation/envelope/slabs, etc. and shall fill void space around pipes the penetration with elastomeric waterproof caulk, rubber link seals or other methods as may be specified or required.

38. This Subcontractor shall furnish and install all sleeves for all fire suppression items penetrating any wall, floor, ceiling, slab roof or deck. Sleeves through decks to receive concrete shall be rigid and capable of withstanding concrete placement and are to be filled with rigid insulation and secured to prevent concrete infiltration. A fire suppression sleeve coordinated drawing shall be developed during MEP Coordination and provided to the Construction Manager at least fifteen (15) calendar days prior to the scheduled placement of concrete. This Subcontractor will be responsible for cutting/core drilling and reinforcing slabs if it is determined that addl. penetrations are required after concrete placement.

39. This Subcontractor is responsible to perform and flow test of the existing fire hydrants located on site. The results of this flow test shall be the basis of this Subcontractors Hydraulic Calculations.

40. This Subcontractor is responsible to provide and maintain weather and safety protection of all openings made by this Subcontractor until the permanent work is installed. Remove and replace weather and safety protection provided by others as necessary to access and execute your work.

41. This Subcontractor is responsible for all costs associated to provide project specific pull test data in the form of a complete submittal for all fasteners scheduled to be installed in all existing construction. Owner's testing agency is not responsible for this item.

42. This Subcontractor is responsible to prepare an agenda for approval and video tape all Owner instructional training, demonstrations and closeout procedures, reference DCC Supplemental Instructions Paragraph PP.

43. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

44. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

45. Final Cleaning of mechanical equipment installed is the responsibility of this subcontractor. As well as frequent daily cleaning to maintain the water /riser room in a professional condition.

46. This Subcontractor is required to touch-up all factory finished surfaces which are scratched, bare or become rusty due to shop coating errors, inadequate protection or storage, careless erection procedures, etc., all to the satisfaction of the Architect, Construction Manager and Owner.

47. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.

10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

48. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

49. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
078413	Penetration Firestopping*
078446	Fire-Resistive Firestopping*
079200	Joint Sealants*

50. This Subcontractor shall specifically **EXCLUDE** the following:

51. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

52. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization/ Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
MEP / FP Coordination	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings / Calcs	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Piping - Mains	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Piping - Distribution	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Sprinkler Heads	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Flow Control Assemblies	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Hoisting/Staging/Lifts	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Seismic Engineering/Implementation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Firesafing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Commissioning	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Closeout (O&Ms, Training, Etc.)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Allowances	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	1	**LS**	**$** Provided by bidder. Fill in on bid form.

53. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

54. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

55. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

56. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

57. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

58. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

59. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.21.1 – Fire Suppression Allowances:				
Allowance 1				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
BP #1.21.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

60. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

61. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.21.1 – FIRE SUPPRESSION SYSTEM

Scope of Work:

BID PACKAGE #1.22.1 – PLUMBING SYSTEM

1. This Bid Package Scope of work includes performing all **EXPEDITED MEFP COORDINATION*, CUT, CAP & MAKE SAFE EXISTING PLUMBING, SELECTIVE DEMOLITION OF EXISTING PLUMBING SYSTEMS, MAINTENANCE OF EXISTING PLUMBING SYSTEMS THROUGHOUT CONSTRUCTION, TEMP. ENVIRONMENTAL CONDITIONING*, ROOF ACCESSORIES*, PENETRATION FIRESTOPPING*, JOINT SEALANTS*, FURNISHING OF ACCESS DOORS AND FRAMES FOR THE PLUMBING SYSTEM, DIVISION 22 – PLUMBING COMPLETE AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Procurement and Contract Requirements**

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient

documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. **MAINTENANCE OF EXISTING SYSTEMS** - Each Subcontractor is responsible base bid to: relocate, support, remove, re-install, maintain coverage, maintain functionality and continuity of existing building services, and systems at all times. This includes but is not limited to; utilities entering or exiting the building to its source, piping, relocation/reconfiguration/re-supporting of existing MEFP, temporary piping/valves, sealing, cutting/patching insulation, existing vales, new valves for isolation or bypass as required, caps, loops, blanks, pipe/duct identifications, re-certification's, training, filling and coordination with all trades. Temporary work shall not be abandoned in place. Abandon MEFP shall be removed complete to the source per applicable codes. All service terminations to be left in a finished and complete condition for the next Phase of Construction if applicable. This shall include old work that was repurposed for temporary use. Assume that is some if not all cases, piping runs will need be in corridors to avoid occupied spaces regardless of drawings showing alternate routing. Each Subcontractor shall include temporary re-supporting of all existing MEFP in existing corridors in a neat and orderly fashion as existing ceilings will be removed by others during school recess periods beyond the individual phase being currently undertaken to allow for new MEFP distribution between phases. This work in most cases will need to be performed off-hours be each trade. The following are additional comments regarding scope and existing systems:
    A. **EXISTING PLUMBING SYSTEM** - The existing Plumbing systems including but not limited to associated equipment, boilers, water heaters, potable domestic water, sanitary / grease drainage, pumps, insulation, controls and valves etc. are to remain operational until no longer required to maintain occupied areas. Existing components will be removed as the new piping is implemented. The new plumbing system will be installed on a phased basis and be utilized to service new equipment as soon as possible. Include all temporary connections, valves, electrical, plumbing and controls as required based on the individual trade contractors' scope of work. Provide action / safety plans as needed for each phase, sub-phase or other transition event for approval and coordination.

    All Subcontractors shall provide a written plan within ten (10) days of notice to proceed to the CM for approval on how it is intended to maintain existing systems covered under this scope of work. Update as required throughout construction.

8. **TEMPORARY ENVIRONMENTAL CONDITIONING FOR AREAS UNDER CONSTRUCTION –** The Subcontractors below are responsible for include BASE BID all required scope to maintain temporary environmental conditioning in the areas under construction for phase:

- *Responsibility of the HVAC Subcontractor Base Bid* - Include furnishing, installing, maintaining and remove when no longer necessary, complete thermostatically controlled temporary heating and conditioning systems. These systems shall provide heat, relative humidity control, and cooling, for distribution to all areas under construction during the heating / cooling seasons based on the project schedule. The existing mechanical system may be utilized where possible and/or supply supplemental temporary equipment to maintain sufficient temperatures (min 50*f : 40%RH / Max. 80*f : 60%RH) for the installation of finishes in all areas. The HVAC contractor shall furnish a complete system including but not limited to; temporary climate control planning, coordination, permitting, testing, hydronic piping, fittings, hangers, unit heaters, radiators, blowers, fans required to distribute air, boilers, pumps, meters, gauges, open flame blower heaters, gas piping, dehumidifiers, desiccant units, ductless VRF equipment, automatic thermostatic controls, filters and maintenance, etc. All temporary HVAC climate systems shall comply with the sustainable design requirements outlines in the contract documents and specifically IAQ Guidelines for Occupied Buildings Under Construction ANSI/SMACNA 008-2008.
- *Responsibility of the Plumbing Subcontractor Base Bid* - Include gas connection manifold from the existing services, valves, regulators and coordination with the utility as necessary to ensure the proper line pressure is available at the point of connection in coordination with the HVAC contractor's temp heat plan. PC shall coordinate and install any and all necessary temporary water or condensation piping needed for cooling of RH control equipment. The PC shall be responsible for their work, and on call for repair on a 24hr / 7 day weekly basis. Installation shall be coordinated with all other trades and will not obstruct installation of new work. Relocation of equipment is anticipated and included in this scope of work.
- *Responsibility of the Electrical Subcontractor Base Bid* - Include wiring and terminations needed for all temporary climate control equipment and coordinated with the HVAC temporary climate control plan for each phase of construction. Power shall be drawn from new or existing circuits, EC shall provide any necessary equipment including but not limited to; panels, subpanels, raceways, wire, hangers, breakers, transformers etc. for a complete electric system. Automatic thermostatic controls furnished by the HVAC Subcontractor shall be wired by the Electrical Contractor. The EC shall be responsible for their work, and on call for repair on a 24hr / 7 day weekly basis. Installation shall be coordinated with all other trades and will not obstruct installation of new work. Relocation of equipment is anticipated and included in this scope of work.
- *Responsibility of the Sitework Subcontractor Base Bid* **-** shall include all temporary measures (i.e.: temporary concrete barriers, level pad, fencing, signage, etc.) required to accommodate installation of all temporary HVAC equipment. All disturbed building and site elements shall be restored their original condition.

Note: The costs for utility consumption gas, water, & electric using existing or new systems for this temporary climate control shall be paid by the Owner and shall require sub-metering of consumption related to construction work.

9. **PLUMBING SYSTEM EXPECTATIONS** - This Subcontractor is responsible for but not limited to furnish and install a complete an operational plumbing system complete with all equipment, piping, vents, insulation coordination, equipment, accessories, anchor bolts, pipe, hangers, valves, scaffolding, lifts, fittings, brackets, inserts, clamps, hardware, sleeves, sealants, escutcheons, fixtures, identifications, testing, tanks, sump pits, flushing, cleaning, disinfection, temporary protection and provisions for equipment furnished by others, in accordance with Specification Sections referenced in this scope of work and to the related specification sections referenced within them, Contract Documents, State and Local Codes.

10. Where mechanical, electrical, plumbing, and fire protections work (MEP/FP) is inferred architecturally however not translated to specific MEP / FP drawings or specifications, the subcontractor shall either have requested clarification prior to bid or will have clarified the work during scope review with Downes Construction Company. Absent the subcontractors pre-bid or pre-award coordination, the subcontractor shall be bound by that information shown architecturally and shall provide a complete operating system that is code compliant and ready for beneficial use by the Owner. All necessary communication and coordination with other subcontractors during the construction process to address such matters shall be included by the subcontractor at no additional cost.

11. **MEFP COORDINATION** - This Subcontractor is responsible to participate in the preparation of composite MEP coordination drawings, which will be initiated by the Mechanical Subcontractor. All respective trades shall then label their own work onto these drawings and after coordination issues are resolved, they shall become the documents that field personnel utilize to install their work. The MEP coordination drawing process will be constructed in a 3D "BIM" environment using the latest version of Auto-Cad compatible software and with the latest version of REVIT/NAVISWORKS 3D modeling software. This Subcontractor is responsible for the MEP Coordination Drawing Process as outlined in the Downes Supplemental Instruction, Paragraph P. **Time is of the essence in coordinating areas as soon as possible so installations may begin since a great deal of the building will be ready for roughing upon start of the coordination process.**

12. This Subcontractor is responsible to provide all fittings and varying lengths of piping and similar conduits required for the complete installation of the systems as required by the coordination drawing process whether or not such fittings and/or lengths and sizes were shown on the Contract documents.

13. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

14. This Subcontractor is responsible to include (coordinate/draw) in their underslab 3D coordinated drawings all the underslab drainage, footing drains and coordinate tie-in to the Civil storm systems, for installation by the Sitework Subcontractor.

15. This Subcontractor is responsible to provide an "as-built" of all underground work to the Construction Manager no later than (10) ten business days after the work is covered.

16. This Subcontractor is responsible to continuously record the progress of their work. If requested, this Subcontractor shall provide copies of the "As-Built" status of their work. Satisfactory "As-Built" progress drawings shall be a condition for continued requisition payments. Also refer to the Downes Supplemental Instructions for additional information regarding "As-Built" requirements.

17. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

18. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low lb-psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet this criteria, or for loss of production due to the subcontractor's assumptions.

19. This Subcontractor is responsible for all building access and is to take note of access and make provisions to ensure that equipment will fit through permanent doorways and/or structure. Any work requiring creating openings or removal of doors/windows or walls in areas where equipment won't fit through existing openings shall be paid for by this Subcontractor.

20. This Subcontractor is responsible for all building commissioning requirements, including but not limited to, assisting the Commissioning Agent (CA) in facilitating the commissioning described in this Specifications Section, attending any all meetings, completing all paperwork and responding to all questions and punch-lists issued by the CA in a timely and professional manner as it relates to this Scope of Work, in accordance with Specifications and the Contract Documents.

21. This Subcontractor is advised that the room name number designations on the construction documents do not represent the final room numbers. Do not use construction document room name and numbers for programming/as-builts Fire Alarm, Fire Protection, Security, Tele/Data, Paging, All Special Systems, BMS, tagging, labeling, or other building systems. Obtain permanent room names and numbering system from the Owner prior to performing this work and with enough time for the Owner to secure information. Any programming or as-builts started with the construction room names and numbers will have to be reprogrammed and redone with the final room name and numbering system at this Subcontractor's expense. Provide final room names and numbers on all as-built drawings.

22. This Subcontractor is responsible for the coordination, installation and connection to utilities outside the building with the Sitework Scope of Work Subcontractor. If this Scope of Work is installed prior to outside utilities, provide such caps or fittings to seal piping and properly identify the location of piping. This Subcontractor is responsible to install their utilities to five (5) feet outside the building's foundations. Refer to specifications for testing and cleaning requirements that should also be included.

23. This Subcontractor shall provide a temporary watertight seal around roof drains and vents until all roofing is permanently installed. This Subcontractor will also furnish and install roof drains so as not to delay the roofing operations. This Subcontractor is to ensure that all rain leaders are completed prior to roofing. This Subcontractor will also install, maintain and remove temporary roof drainage piping (PVC) to the exterior of the building as required during construction for both new and existing as may be

applicable. Temporary piping shall be constructed of schedule 40 PVC sufficiently supported a minimum of 7'-0" AFF elevation. Corrugated drain pipe is NOT acceptable.

24. This Subcontractor is responsible for all inserts, hangers, supporting devices, miscellaneous steel and equipment dunnage required to complete this Scope of Work.

25. This Subcontractor is responsible for temporary water for use by all trades. This Subcontractor shall furnish 1" PEX temporary cold domestic water piping through building to (2) exterior location points off the main existing building and (1) at the trailer laydown area (location to be determined in the field). At each location point, this contractor shall furnish (4) 3/4" garden hose connection hose bibbs. This contractor to include temporary water meter, temporary reduced pressure zone backflow preventer, watts #8A vacuum breakers at each hose bibb valve, pipe supports, heat trace and insulation. This Subcontractor shall obtain, pay and coordinate necessary permits/inspections, maintain this system for a period of five (5) months and turn over to the next phase of construction. Remove when requested to do so by CM.

26. This Subcontractor is responsible for all cutting, patching, core drilling and sleeves as required to execute this Scope of Work through all new/existing walls, floors, foundations, metal decking, roofs, decks and slabs. Fill void space around pipes the penetration with elastomeric waterproof caulk, rubber link seals or other methods as may be specified or required. Sleeves through decks to receive concrete shall be rigid and capable of withstanding concrete placement and are to be filled with rigid insulation and secured to prevent concrete infiltration. A sleeve coordinated drawing shall be developed during MEP Coordination and provided to the Construction Manager at least fifteen (15) calendar days prior to the scheduled placement of concrete. This Subcontractor will be responsible for cutting/core drilling and reinforcing slabs if it is determined that addl. penetrations are required after concrete placement.

27. This Subcontractor is responsible to provide all vibration and seismic restraints as required by code, regardless of details.

28. This Subcontractor is responsible for all means of support and attachments to the existing structures (provide engineering analysis if required) for all Plumbing work, including but not limited to, any trapeze hangers to clear ductwork or other interferences.

29. This Subcontractor is responsible for all costs associated to provide project specific pull test data in the form of a complete submittal for all fasteners scheduled to be installed. Owner's testing agency is not responsible for this item.

30. This Subcontractor is responsible to provide backflow preventers associated with this Scope of Work, include all necessary permits, testing and registration of same.

31. This subcontractor shall include in base bid, isolation valves as needed for phased construction of plumbing systems. Ref. to phasing drawings for sequence. Valves shall become part of the permanent installation with specified identification and as-built locations.

32. This Subcontractor is responsible for any and all penetrations 10" in diameter and/or less than 100 square inches in all existing walls. Any square or rectangular penetrations 10"x10" or greater than 100 square inches will be by the Masonry Subcontractor. This Subcontractor will be responsible to provide

field and drawing layout to coordinate all cut and patch items. Infills around penetrations to fill up to fire stopping requirements and all fire/smoke stopping are by this Subcontractor.

33. This Subcontractor is responsible to provide all necessary shut-downs and tie-ins for their systems. All overtime costs associated with this work shall be included.

34. This Subcontractor shall coordinate all plumbing rough-in locations with the Architectural, Millwork, Civil drawings and the Structural Drawings.

35. This Subcontractor is responsible for working through all new and/or existing ceilings to remain as shown to remain on the Contact Drawings for the installation of the Plumbing Systems.

36. This Subcontractor shall be responsible for all reopening and closing of ceilings in connection with any corrective or adjustment work above completed ceiling, including related costs for damaged ceiling grid, tile, etc.

37. This Subcontractor is responsible to provide all Plumbing related signage, valve tags, labeling, tagging, banding and pipe identification prior to the installation of the ceiling gird so as to allow for inspection as to the thoroughness of these items. Pipe identification is to be installed after insulation is installed and coordinated with the Plumbing Insulation Subcontractor.

38. This Subcontractor is responsible to provide all interlock and control wiring integral with, or specialized for this Subcontractors equipment and Automatic Temperature Controls.

39. The heat trace material / equipment is to be furnished by this Subcontractor, the Electrical Subcontractor is to install the heat trace material and equipment.

40. Furnish and install Radon Mitigation per specification to include piping, fitting, couplings, fan and monitor. Geotextile fabric, stone and CMU are by Site Contractor.

41. The HVAC Subcontractor shall provide all condensate piping for all mechanical units and systems provided by BP # 1.23.1 HVAC.

42. This Subcontractor shall weatherproof all plumbing penetrations made prior to equipment being installed.

43. This subcontractor to furnish and install any required pipe or duct support as it relates to work performed by this Subcontractor on the roof – reference Spec 077200 Roof Accessories.

44. This Subcontractor shall include all utility companies' costs for furnishing and maintaining temporary water, through construction and include utility companies' costs for furnishing and installing new water meter.

45. This Subcontractor is responsible to coordinate testing so no insulation is to be installed until work has been completely tested according to Specifications. Provide all necessary equipment to allow testing to meet the project schedule.

46. This Subcontractor shall provide all joint sealants at all plumbing fixtures.

47. This Subcontractor is responsible to provide and maintain weather and safety protection of all openings made by this Subcontractor until the permanent work is installed. Remove and replace weather and safety protection provided by others as necessary to access and execute your work.

48. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

49. This Subcontractor is required to touch-up all factory finished surfaces which are scratched, bare or become rusty due to shop coating errors, inadequate protection or storage, careless erection procedures, etc., all to the satisfaction of the Architect, Construction Manager and Owner.

50. This Subcontractor is responsible to provide a complete system cleaning and video inspection of all storm and sanitary piping, including associated structures prior to final acceptance of the systems, including but not limited to, jetting, vacuuming, auguring/snaking, off-site disposal of system containments, electronic video recording, as-built video/correlation drawings etc.

51. This subcontractor shall provide prior to work in phase 1, base line video inspection of all under slab piping scheduled to remain for reuse. Confirm all elevations for tie-in and submit this documentation to the design team clearly identifying and defects or anticipated coordination discrepancies.

52. This Subcontractor shall be responsible to clean and protect items furnished as part of this Scope of Work from finish trades until the building is turned over to the Owner.

53. This Subcontractor is responsible to prepare an agenda for approval and video tape all Owner instructional training, demonstrations and closeout procedures, reference Downes Supplemental Instructions Paragraph PP.

54. This Subcontractor is responsible for all testing, flushing, and cleaning of all the Plumbing Systems and A/C condensate waster drain piping prior to building turn over, properly collect and dispose of discharge in accordance with Local practices, code and laws.

55. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

56. This Subcontractor is responsible to furnish access panels required for their work to BP #1.9.1 Drywall/General Trades for installation. This Subcontractor shall coordinate sizes and locations with the Drywall/General Trades Contractor.

57. This Subcontractor shall provide plumbing fixture templates and coordination of fixtures with BP #1.6.1 Architectural Millwork for the installation of plumbing fixtures at millwork countertops.

58. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:

1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

59. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

60. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
078413	Penetration Firestopping*
078446	Fire-Resistive Firestopping*
079200	Joint Sealants*

61. This Subcontractor shall specifically **EXCLUDE** the following:

62. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

63. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization/ Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
MEP / FP Coordination	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Sanitary Piping System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Domestic Water Piping System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Gas Piping System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Storm Drain Piping	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Equipment	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Plumbing Fixtures	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Insulation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Hoisting/Staging/Lifts	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Seismic Engineering/Implementation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Firesafing/Firestopping	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on	LS	$ Provided by bidder. Fill in on bid form.

	bid form.		
Commissioning/TAB	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Closeout (O&Ms, Training, Etc.)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Allowances	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	1	**LS**	**$** Provided by bidder. Fill in on bid form.

64. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

65. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

66. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

67. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

68. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

69. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as

to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

70. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.22.1 – Plumbing Allowances:				
Allowance 1	**Utility Fees**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Utility Fees	1 LS	$16,830	$16,830
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2	**Maintenance of Occupancy (Unforeseen)**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Eighty (80) labor hours (blended rate)	80 Hours (Fill in on bid form)		
C	Materials & Equipment	1	$4,500	$4,500
			Total Allowance 2 Included in Base Bid (Bidder to calculate):	
Allowance 3				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 3 Included in Base Bid (Bidder to calculate):	
Allowance 4				
	Description	**Quantity**	**Unit Price**	**Amount**

A				
B				
C				
Total Allowance 4 Included in Base Bid (Bidder to calculate):				
BP #1.22.1 – Confirm by checking the following box that all of the above allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

71. **UNIT PRICES** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

72. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 “Exterior Finish Carpentry” for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 “Resilient Sheet Flooring” for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete	**ADD**

	installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.22.1 – PLUMBING SYSTEM

Scope of Work:

BID PACKAGE #1.23.1 – HVAC SYSTEM

1. This Bid Package Scope of work includes performing all **EXPEDITED MEFP COORDINATION*, CUT, CAP & MAKE SAFE EXISTING HVAC, SELECTIVE DEMOLITION OF EXISTING HVAC SYSTEMS, MAINTENANCE OF EXISTING HVAC SYSTEMS THROUGHOUT CONSTRUCTION IN OCCUPIED AREAS, TEMPORARY ENVIRONMENTAL CONDITIONING*, ROOF ACCESSORIES, PENETRATION FIRESTOPPING*, JOINT SEALANTS*, FURNISHING OF ACCESS DOORS AND FRAMES FOR HVAC SYSTEMS, LOUVERS AND VENTS, CONDENSATE DRAIN PIPING, DIVISION 23 – HVAC COMPLETE AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated

230519	Meters and Gages for HVAC Piping	3/19/2025
230523	General Duty Valves for HVAC Piping	3/19/2025
230529	Hangers and Supports for HVAC Piping and Equipment	3/19/2025
230548	Vibration and Seismic Controls for HVAC Piping and Equipment	3/19/2025
230553	Identification for HVAC Piping and Equipment	3/19/2025
230593	Testing, Adjusting, and Balancing for HVAC	3/19/2025
230713	Duct Insulation	3/19/2025
230719	HVAC Piping Insulation	3/19/2025
230800	Commissioning of HVAC Systems	3/19/2025
230900	Instrumentation and Control for HVAC	3/19/2025
230993	Sequence of Operation for HVAC Controls	3/19/2025
232113	Hydronic Piping	3/19/2025
232123	Hydronic Pumps	3/19/2025
232300	Refrigerant Piping	3/19/2025
233113	Metal Ducts	3/19/2025
233300	Air Duct Accessories	3/19/2025

233346	Flexible Ducts	3/19/2025
233423	HVAC Power Ventilators	3/19/2025
233713	Diffusers, Registers, and Grilles	3/19/2025
235100	Breechings, Chimneys, and Stacks	3/19/2025
235216	Condensing Boilers	3/19/2025
237416.13	Packaged, Large Capacity, Rooftop Air-Conditioning Units	3/19/2025
237423	Indirect-Fuel-Fired, Outdoor, Heating-Only Make-up Air Units	3/19/2025
237433	Dedicated Outdoor-Air Units	3/19/2025
238126	Split-System Air-Conditioners	3/19/2025
238129	Variable-Refrigerant-Flow HVAC Systems	3/19/2025

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation To Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. **MAINTENANCE OF EXISTING SYSTEMS** - Each Subcontractor is responsible base bid to: relocate, support, remove, re-install, maintain coverage, maintain functionality and continuity of existing building services, and systems at all times. This includes but is not limited to; utilities entering or exiting the building to its source, RTUs, AHU's, pumps, supply air, exhaust, return air ducted systems, automatic temperature controls, mechanical piping, relocation/reconfiguration/re-supporting of existing MEFP, ATC wiring and sensors, temporary piping/valves/ductwork, sealing, cutting/patching insulation, existing vales, new valves for isolation or bypass as required, caps, loops, blanks, pipe/duct identifications, re-certification's, training, filling and coordination with all trades. This includes site areas. Temporary work shall not be abandoned in place. Abandon MEFP shall be removed complete to the source per applicable codes. All service terminations to be left in a finished and complete condition for the next Phase of Construction if applicable. This shall include old work that was repurposed for temporary use. Assume that in some if not all cases, duct and piping runs will need to be in corridors to avoid occupied spaces regardless of location on the contract drawings. Each Subcontractor shall include temporary re-supporting of all existing MEFP in existing corridors in a neat and orderly fashion as existing ceilings will be removed by others during school recess periods beyond the individual phase being currently undertaken to allow for new MEFP distribution between phases. This work in most cases will need to be performed off-hours by each trade. The following are additional comments regarding scope and existing systems:
    A. **EXISTING MECHANICAL SYSTEM** - The existing mechanical systems including but not limited to associated equipment, ductwork, piping, insulation, controls and pumps etc. are to remain operational until no longer required to maintain climate control and indoor air quality for occupied areas. Existing heating zones will be removed as the new piping is implemented. The new mechanical system will be installed on a phased basis and be utilized to satisfy heating loads for new equipment as soon as possible. Include all temporary connections, valves, electrical, plumbing and controls as required based on the individual trade contractors' scope of work. Provide action / safety plans as needed for each phase, sub-phase or other transition event for approval and coordination.
    B. **EXISTING PLUMBING SYSTEM*** - The existing Plumbing systems including but not limited to associated equipment, boilers, water heaters, potable domestic water, sanitary / grease drainage, pumps, insulation, controls and valves etc. are to remain operational until no longer required to maintain occupied areas. Existing components will be removed as the new piping is implemented. The new plumbing system will be installed on a phased basis and be utilized to service new equipment as soon as possible. Include all temporary connections, valves, electrical, plumbing and controls as required based on the individual trade contractors' scope of work. Provide action / safety plans as needed for each phase, sub-phase or other transition event for approval and coordination.

All Subcontractors shall provide a written plan within ten (10) days of notice to proceed to the CM for approval on how it is intended to maintain existing systems covered under this scope of work. Update as required throughout construction.

7. **TEMPORARY ENVIRONMENTAL CONDITIONING FOR AREAS UNDER CONSTRUCTION –** The Subcontractors below are responsible for include BASE BID all required scope to maintain temporary environmental conditioning in the areas under construction for phase:
   - *Responsibility of the HVAC Subcontractor Base Bid* - Include furnishing, installing, maintaining and remove when no longer necessary, complete thermostatically controlled temporary heating and conditioning systems. These systems shall provide heat, relative humidity control, and cooling, for distribution to all areas under construction during the heating / cooling seasons based on the project schedule. The existing mechanical system may be utilized where possible and/or supply supplemental temporary equipment to maintain sufficient temperatures (min 50*f : 40%RH / Max. *f : 60%RH80) (See the Nalco Water Analysis of existing hot water loop for reference) for the installation of finishes in all areas. The HVAC contractor shall furnish a complete system including but not limited to; temporary climate control planning, coordination, permitting, testing, hydronic piping, fittings, hangers, unit heaters, radiators, blowers, fans required to distribute air, boilers, pumps, meters, gauges, open flame blower heaters, gas piping, dehumidifiers, desiccant units, ductless VRF equipment, automatic thermostatic controls, filters and maintenance, etc. All temporary HVAC climate systems shall comply with the sustainable design requirements outlines in the contract documents and specifically IAQ Guidelines for Occupied Buildings Under Construction ANSI/SMACNA 008-2008.
   - *Responsibility of the Plumbing Subcontractor Base Bid* - Include gas connection manifold from the existing services, valves, regulators and coordination with the utility as necessary to ensure the proper line pressure is available at the point of connection in coordination with the HVAC contractor's temp heat plan. PC shall coordinate and install any and all necessary temporary water or condensation piping needed for cooling of RH control equipment. The PC shall be responsible for their work, and on call for repair on a 24hr / 7 day weekly basis. Installation shall be coordinated with all other trades and will not obstruct installation of new work. Relocation of equipment is anticipated and included in this scope of work.
   - *Responsibility of the Electrical Subcontractor Base Bid* - Include wiring and terminations needed for all temporary climate control equipment and coordinated with the HVAC temporary climate control plan for each phase of construction. Power shall be drawn from new or existing circuits, EC shall provide any necessary equipment including but not limited to; panels, subpanels, raceways, wire, hangers, breakers, transformers etc. for a complete electric system. Automatic thermostatic controls furnished by the HVAC Subcontractor shall be wired by the Electrical Contractor. The EC shall be responsible for their work, and on call for repair on a 24hr / 7 day weekly basis. Installation shall be coordinated with all other trades and will not obstruct installation of new work. Relocation of equipment is anticipated and included in this scope of work.
   - *Responsibility of the Sitework Subcontractor Base Bid* **-** shall include all temporary measures (i.e.: temporary concrete barriers, level pad, fencing, signage, etc.) required to accommodate installation of all temporary HVAC equipment. All disturbed building and site elements shall be restored their original condition.

   Note: The costs for utility consumption gas, water, & electric using existing or new systems for this temporary climate control shall be paid by the Owner and shall require sub-metering of consumption related to construction work.

8. **TEMPORARY INTERIOR ENABLING** –This Subcontractor is responsible for coordination and installation of a temporary HVAC system including full controls for the new temporary "swing" spaces as well as retrofitting of existing spaces into "swing" spaces as described on the contract documents. This Subcontractor shall maintain, without interruption, these systems throughout the extent of the phasing and will add / modify as needed to support the needs of the school operations.

9. **HVAC SYSTEM EXPECTATIONS** - This Subcontractor is responsible for but not limited to furnish and install a complete an operational HVAC system complete with all equipment, piping, condensate piping, vents, insulation, equipment, controls, control wiring, low voltage wiring, accessories, anchor bolts, pipe, hangers, valves, scaffolding, lifts, fittings, brackets, inserts, clamps, hardware, sleeves, sealants, escutcheons, fixtures, identifications, testing, tanks, flushing, cleaning, disinfection, temporary protection and provisions for equipment furnished by others, in accordance with Specification Sections referenced in this scope of work and to the related specification sections referenced within them, Contract Documents, State and Local Codes.

10. This Subcontractor is responsible for all building commissioning requirements, including but not limited to, assisting the Commissioning Agent (CA or Cx) in facilitating the commissioning described in this Specifications Section, attending any all meetings, completing all paperwork and responding to all questions and punch-lists issued by the CA in a timely and professional manner as it relates to this Scope of Work, in accordance with Specifications and the Contract Documents.

11. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

12. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

13. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall not assume the use of man lifts throughout the project, given access restrictions, low height of structure, and low psf of one-way reinforced slabs. Ref: Plan note #3&4 on S1.1 for example. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet this criteria, or for loss of production due to the subcontractor's assumptions.

14. Where mechanical, electrical, plumbing, and fire protection work (MEP/FP) is inferred architecturally however not translated to specific MEP / FP drawings or specifications, the subcontractor shall either

have requested clarification prior to bid or will have clarified the work during scope review with Downes Construction Company. Absent the subcontractors pre-bid or pre-award coordination, the subcontractor shall be bound by that information shown architecturally and shall provide a complete operating system that is code compliant and ready for beneficial use by the Owner. All necessary communication and coordination with other subcontractors during the construction process to address such matters shall be included by the subcontractor at no additional cost.

15. **MEFP COORDINATION** - This Subcontractor is responsible to participate in the preparation of composite MEP coordination drawings, which will be initiated by this HVAC Subcontractor. All respective trades shall then label their own work onto these drawings and after coordination issues are resolved, they shall become the documents that field personnel utilize to install their work. The MEP coordination drawing process will be constructed in a 3D "BIM" environment using the latest version of Auto-Cad compatible software and with the latest version of REVIT/NAVISWORKS 3D modeling software. This Subcontractor is responsible for the MEP Coordination Drawing Process as outlined in the Downes Supplemental Instruction, Paragraph P. HVAC Subcontractors should note the hardware and software required to be furnished by them to facilitate the MEP Coordination process. **Time is of the essence in coordinating areas as soon as possible so installations may begin since a great deal of the building will be ready for roughing upon start of the coordination process.**

16. **HVAC SYSTEM CLEANLINESS** - This Subcontractor is responsible to "taking ownership" of a clean HVAC system and shall be proactive in implementing procedures that achieve that end result following start-up of the system. When utilizing new equipment for temporary heating/cooling or when a system is initially started, the following procedures at a minimum will take place to ensure that system will be clean upon owner occupancy:
    A. A pre-startup meeting will be held between this Subcontractor, Commissioning Agent and the Construction Manager in which expectations and procedures to prevent dust infiltration will be discussed and confirmed.
    B. This Subcontractor will furnish and install two (2) layers of temporary filter media on all return registers and outside air return grilles. The first layer preventing dust infiltration during the change of the second (outermost) layer. This Subcontractor shall change the filter media on return registers every five (5) calendar days or sooner depending on the condition of the filter media. The Construction Managers decision on condition will prevail in any difference of opinion and shall be considered final. No Change Order Requests for changing filter media will be entertained. Failure to change the filter media within twenty-four (24) hours after receiving verbal or written direction to do so will result in the Construction Manager making the change with all costs back-charged to this Subcontractor.
    C. This Subcontractor will furnish and install temporary HVAC unit air filters and they shall be changed every ten (10) calendar days or sooner depending on the condition of the unit air filter. This includes cleaning of the washable filters integral to the VRF system unites and split systems. The Construction Managers decision on condition will prevail in any difference of opinion and shall be considered final. No Change Order Requests for changing temporary HVAC unit air filters will be entertained. Failure to change the temporary HVAC unit air filters within twenty-four (24) hours after receiving verbal or written direction to do so will result in the Construction Manager making the change with all costs back-charged to this Subcontractor.
    D. This Subcontractor will submit catalog cut sheets and other manufacturer's information on all proposed temporary filters and filter media for approval.

E. This Subcontractor will be responsible for developing a log sheet by room number in which all filter and filter media changes are to be recorded. All changes must be witnessed and initialed by the Construction Manager and the log must be submitted to the Downes Project Manager periodically.
F. This Subcontractor will be responsible to ensure that all ductwork returns not in use for temporary heating and cooling remain sealed.
G. This Subcontractor will be responsible for the coordination and placement of access doors into the ductwork to allow the cleaning to take place for the entire system. Special attention shall be placed in areas that receive hard ceilings or have difficult access constraints.
H. At an agreeable time after Substantial Completion, this Subcontractor will be responsible for a complete duct cleaning in accordance with the Contract Documents and provide certification documentation for this procedure.
I. Final Cleaning of mechanical, wipe-down, vacuum of air handling equipment, filter replacement for all HVAC equipment will be the responsibility of this Subcontractor following the completion of each individual phase and one additional time at the completion of the project prior to final commissioning. Since this project is phased filter replacements shall continue throughout construction on all equipment until full substantial completion is achieved for the project.

17. This Subcontractor is responsible to provide all fittings and varying lengths of piping and similar conduits required for the complete installation of the systems as required by the coordination drawing process whether or not such fittings and/or lengths and sizes were shown on the Contract documents.

18. This Subcontractor is responsible to include (coordinate/draw) in their underground 3D coordinated drawings any underground HVAC Piping to coordination E&B by the Sitework Subcontractor.

19. This Subcontractor is responsible to provide an “as-built” of all underground work to the Construction Manager no later than (10) ten business days after the work is covered.

20. This Subcontractor is responsible to continuously record the progress of their work. If requested, this Subcontractor shall provide copies of the “As-Built” status of their work. Satisfactory “As-Built” progress drawings shall be a condition for continued requisition payments. Also refer to the Downes Supplemental Instructions for additional information regarding “As-Built” requirements.

21. This Subcontractor is responsible to coordinate installation and connection to utilities outside the building with the Sitework Scope of Work Subcontractor. If this Scope of Work is installed prior to outside utilities, provide such caps or fittings to seal piping and properly identify the location of piping. This Subcontractor shall install their utilities to five (5) feet outside the building foundations. Refer to specifications for testing and cleaning requirements that should also be included. Trenching and backfilling is by the Sitework Subcontractor.

22. This Subcontractor is responsible for all building access and is to take note of access and make provisions to ensure that equipment will fit through permanent doorways and/or structure. Any work required to create openings or removal of doors/windows or walls in areas where equipment won’t fit through existing openings shall be paid for by this Subcontractor.

23. This Subcontractor is responsible for a complete fully coordinated curb assemblies for all equipment provided by this Scope of Work, including all blocking details, flashing, insulation, etc. Coordinate with surrounding and adjacent construction to achieve full warranties and operations.

24. This Subcontractor is responsible to take the lead and implement project indoor air quality management (IAQ) plan in accordance with the contract documents.

25. This Subcontractor is advised that the room name number designations on the construction documents do not represent the final room numbers. Do not use construction document room name and numbers for programming/as-builts Fire Alarm, Fire Protection, Security, Tele/Data, Paging, All Special Systems, BMS, tagging, labeling, or other building systems. Obtain permanent room names and numbering system from the Owner prior to performing this work and with enough time for the Owner to secure information. Any programming or as-builts started with the construction room names and numbers will have to be reprogrammed and redone with the final room name and numbering system at this Subcontractor's expense. Provide final room names and numbers on all as-built drawings.

26. This Subcontractor is responsible for coordinating with BP #1.2.1 Demo/Abetment and BP #1.9.1 Drywall/General Trades for the location and sizes of roof penetrations required for the installation of equipment shown in the existing attic.

27. This Subcontractor is responsible for cutting all metal decking and concrete slab penetrations, as required, to execute this scope of work. Include installation of secured protection as required.

28. This Subcontractor shall be responsible to cut for vertical & horizontal runouts of piping & duct through new/existing floors, walls and slabs, as required, to execute this Scope of Work.

29. This Subcontractor is responsible for the duct off-set fittings, as required, within the roof top unit curb.

30. This Subcontractor is responsible for all sound board for RTU curbs if required.

31. This Subcontractor is responsible for all the slab and roof openings on the structural steel shop and within existing buildings. No additional compensation will be approved for additional, offsets, labor, material, coordination etc.

32. This Subcontractor is responsible for any existing mechanical equipment relocations shown on the drawings.

33. This Subcontractor shall provide any and all refrigerant reclaiming and/or recharging required for their work.

34. This Subcontractor is responsible to provide all necessary shut-downs and tie-ins for their systems. All overtime costs associated with this work shall be included.

35. This Subcontractor shall coordinate all mechanical rough-in locations with the Architectural, Millwork, Civil drawings and the Structural Drawings.

36. This Subcontractor is responsible for working through all new and/or existing ceilings to remain as shown to remain on the Contact Drawings for the installation of the HVAC Systems.

37. This Subcontractor shall be responsible for all reopening and closing of ceilings in connection with any corrective or adjustment work above completed ceiling, including related costs for damaged ceiling grid, tile, etc.

38. This Subcontractor shall be responsible to clean and protect items furnished as part of this Scope of Work from finish trades until the building is turned over to the Owner.

39. This Subcontractor is responsible to furnish access panels required for their work to BP #1.9.1 Drywall/General Trades for installation. This Subcontractor shall coordinate sizes and locations with the Drywall/General Trades Contractor.

40. **CONDENSATE DRAIN PIPING** –The HVAC contractor shall provide all condensate piping for the project, shown on the contract documents or otherwise. This includes all pumps, valves, connections, and other. The HVAC Contractor shall be responsible to coordinate to ensure all lines can access an available riser, shall provide additional in-wall or underslab piping or pumps to achieve proper drainage and/or proper exit as required by the contract drawings and code.

41. This Subcontractor is responsible for all testing, flushing, and cleaning of all the HVAC Systems and A/C condensate waster drain piping prior to building turn over, properly collect and dispose of discharge in accordance with Local practices, code and laws.

42. This Subcontractor is responsible to provide all vibration and seismic restraints as required by code, regardless of details.

43. This Subcontractor is responsible for all means of support and attachments for all devices, panels and equipment back to the to the existing/new structures (provide engineering analysis if required) for all HVAC work, including but not limited to, any trapeze hangers to clear other work or interferences, include all vibrations and seismic restraints as required. Provide all miscellaneous steel supports which are not shown on any of the Contract Drawings, but which are required to complete the work of the Bid Package, include primer and touch-up. Coordinate box-out framing with the Drywall and Masonry Subcontractors.

44. This Subcontractor is responsible for all costs associated to provide project specific pull test data in the form of a complete submittal for all fasteners scheduled to be installed in all existing construction. Owner's testing agency is not responsible for this item.

45. This Subcontractor is responsible to provide all HVAC related signage, valve tags, labeling, tagging, banding and pipe identification prior to the installation of the ceiling gird so as to allow for inspection as to the thoroughness of these items. Pipe identification is to be installed after insulation is installed and coordinated with the Mechanical Insulation Subcontractor.

46. This Subcontractor is responsible for all sleeves, inserts, hangers, supporting devices, miscellaneous steel and equipment dunnage required to complete this Scope of Work.

47. This Subcontractor is responsible for all cutting, patching, core drilling and sleeves as required to execute this Scope of Work through all new/existing walls, floors, foundations, metal decking, roofs, decks and slabs. Fill void space around pipes the penetration with elastomeric waterproof caulk, rubber link seals or other methods as may be specified or required. Sleeves through decks to receive concrete shall be rigid and capable of withstanding concrete placement and are to be filled with rigid insulation and secured to prevent concrete infiltration. A sleeve coordination drawing shall be developed during MEP Coordination and provided to the Construction Manager at least fifteen (15) calendar days prior to the scheduled placement of concrete. This Subcontractor will be responsible for cutting/core drilling and reinforcing slabs if it is determined that addl. penetrations are required after concrete placement.

48. This Subcontractor shall provide access doors in any duct, plenum, etc. for access to all duct smoke detectors and also must allow sufficient room in the ductwork/plenums, etc. for all tubes and sampling chambers.

49. This Subcontractor is responsible for any and all penetrations 10” in diameter and/or less than or/equal to 100 square inches in all existing walls. Any square or rectangular penetrations 10”x10” or greater than 100 square inches will be by the Masonry Subcontractor. This Subcontractor will be responsible to provide field and drawing layout to coordinate all cut and patch items. Infills around penetrations to fill up to fire stopping requirements and all fire/smoke stopping are by this Subcontractor.

50. This Subcontractor is responsible to layout all duct penetrations in masonry and concrete walls prior to masonry or concrete being installed. All pipe openings and duct openings in sheetrock walls will be by this Trade Contractor. Also, this Subcontractor is responsible for all firestopping and patching of all openings as well as protection and clean up associated with this Subcontractor’s operations.

51. This Subcontractor is responsible to provide all interlock and control wiring integral with, or specialized for this Subcontractors equipment and Automatic Temperature Controls.

52. This Subcontractor shall provide all electrical components that are an integral part of packaged mechanical equipment or not, including but not limited to factory installed (or loose) motors, starters, motor controllers, disconnect switches, variable frequency drives, etc. as detailed in the contract documents.

53. This Subcontractor shall include all costs associated with a complete review of all motors, etc. (power requirements), supplied by this Subcontractor. This review is to specifically include a listing of all such motors, etc., showing motor size, voltage, amperage, phasing, fusing, starter sizes, disconnects, wire size required and/or control sequences for submission to the Electrical Subcontractor and the Construction Manager.

54. This Subcontractor is responsible to provide weatherproofing of all mechanical penetrations. A watertight metal cap fastened down over each roof curb, which must be maintained until the permanent equipment is installed. Any counter flashing to be installed over the curb shall be furnished and installed by this Subcontractor. Installation of wood blocking will be by others. Provide complete coordination of openings with the Structural Steel, Drywall, and Roofing Subcontractors. All seismic connections from the roof curb to equipment are the responsibility of this Subcontractor.

55. This subcontractor to furnish and install any required pipe or duct support as it relates to work performed by this Subcontractor on the roof – reference Spec 077200 Roof Accessories.

56. This Subcontractor is responsible to provide all fire and smoke dampers as required by applicable codes and the Contract Documents.

57. This Subcontractor shall provide any and all coordination with the Electrical Subcontractor relative to control of the HVAC system during Fire Alarm situations. This shall specifically include any and all meetings, drawings, tests, etc. required to provide a completely coordinated and fully functional HVAC/Fire Control System.

58. This Subcontractor is responsible to protect new and/or existing roofs when working on or above. At a minimum provide plywood protection in areas under ladders, tools, where material is stored, etc., plywood is to be placed in a manner and with sufficient protection underneath so as to not puncture or damage the roofing membrane.

59. This Subcontractor is responsible to provide 110v power where required for BMS operations but not specifically shown on the Electrical Drawings.

60. This Subcontractor is responsible to coordinate with their testing and balancing subcontractor and will recommend all sheave changes required to balance the system according to the Specifications. Sheave changes will be executed by this Subcontractor according to those recommendations at no additional compensation.

61. This Subcontractor is responsible to coordinate testing so no insulation is to be installed until work has been completely tested according to Specifications. Provide all necessary equipment to allow testing to meet the project schedule.

62. This Subcontractor is responsible to provide and maintain weather and safety protection of all openings made by this Subcontractor until the permanent work is installed. Remove and replace weather and safety protection provided by others as necessary to access and execute your work.

63. This Subcontractor is responsible for filling, testing and flushing of the hydronic systems.

64. This Subcontractor shall be responsible for including in their bid "SMACNA Duct Cleanliness for New Construction Guidelines using the "Advanced Level." This Subcontractor is to engage a certified duct cleaning subcontractor and submit a complete plan for duct cleanliness to the Construction Manager, Architect/Engineer and Owner for approval. Prior to turnover, this Subcontractor will perform complete duct cleaning and supply a certificate of cleanliness.

65. This Subcontractor is required to touch-up all factory finished surfaces which are scratched, bare or become rusty due to shop coating errors, inadequate protection or storage, careless erection procedures, etc., all to the satisfaction of the Architect, Construction Manager and Owner.

66. This Subcontractor is responsible to prepare an agenda for approval and video tape all Owner instructional training, demonstrations and closeout procedures, reference Downes Supplemental Instructions Paragraph PP.

67. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

68. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

69. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
    10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
    11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
    12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

70. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

71. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*

072100	Thermal Insulation*
078413	Penetration Firestopping*
078446	Fire-Resisting Joint System*
079200	Joint Sealants*
220000	Plumbing System*

72. This Subcontractor shall specifically **EXCLUDE** the following:

73. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

74. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization/Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
MEFP Coordination	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Maintenance of Existing Systems / Temporary Environmental Controls	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
RTUs	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Exhaust Fans	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Heat Exchangers	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Pumps	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
VRF System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
HVAC Piping	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Ductwork	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
RGDs	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Controls	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Vibration Control	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Seismic Engineering and Implementation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Roof Duct Insulation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Insulation	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Hoisting/Staging/Lifts	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Firestopping	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Final Duct Cleaning	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Commissioning	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Testing/Adjusting/Balancing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Closeout (O&Ms, Training, Etc.)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Allowances	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	1	**LS**	**$** Provided by bidder. Fill in on bid form.

75. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

76. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

77. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

78. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

79. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

80. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

81. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.23.1 – HVAC Allowances:				
Allowance 1	**Maintenance of Occupancy (Unforeseen)**			
	Description	**Quantity**	**Unit Price**	**Amount**

A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	One Hundred Twenty (120) labor hours (blended rate)	120 Hours (Fill in on bid form)		
C	Materials & Equipment	1	$10,000	$10,000
			Total Allowance 1 Included in Base Bid (Bidder to calculate):	
Allowance 2				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 2 Included in Base Bid (Bidder to calculate):	
Allowance 3				
	Description	**Quantity**	**Unit Price**	**Amount**
A				
B				
C				
			Total Allowance 3 Included in Base Bid (Bidder to calculate):	
BP #1.23.1 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

82. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

83. **<u>ALTERNATE BIDS</u>** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the	**ADD**

	addition as indicated on Drawings CS101 and CS502.	
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.23.1 – HVAC SYSTEM

Scope of Work:

BID PACKAGE #1.26.1 – ELECTRICAL SYSTEMS

1. This Bid Package Scope of work includes performing all **EXPEDITED MEFP COORDINATION*, CUT, CAP AND MAKE SAFE EXISTING ELECTRICAL, SELECTIVE DEMOLITION OF EXISTING ELECTRICAL SYSTEMS, MAINTENANCE OF EXISTING ELECTRICAL AND ELECTRICALLY POWERED SYSTEMS, COMMUNICATIONS SYSTEMS and ELECTRONIC SAFETY AND SECURITY SYSTEMS THROUGHOUT CONSTRUCTION, TEMPORARY LIGHTING FOR CONSTRUCTION, TEMPORARY POWER FOR USE BY ALL TRADES FOR CONSTRUCTION, TEMPORARY POWER AND LIGHTING FOR THE JOBSITE TRAILERS, TEMPORARY ENVIRONMENTAL CONDITIONING*, ROOF ACCESSORIES, PENETRATION FIRESTOPPING*, FIRE RESISTING JOINT SYSTEMS, JOINT SEALANTS*, FURNISHING OF ACCESS DOORS AND PANELS FOR ELECTRICAL SYSTEMS*, DOOR HARDWARE*, PROJECTION SCREENS, POWER TO AND WIRING AND SOME INSTALLATION OF ELECTRICALLY POWERED DIVISION 10, 11, 14, 21, 22, 23 DIVISION 26 – ELECTRICAL COMPLETE, DIVISION 27 – COMMUNICATIONS SYSTEMS COMPLETE and DIVISION 28 – ELECTRONIC SAFETY AND SECURITY SYSTEMS COMPLETE AND ALL ASSOCIATED WORK** in accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Procurement and Contract Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	3/19/2025
Division 01 / Sections:	**General Requirements**	
All Sections:	This Subcontractor is responsible for all sections in this division as it relates to completing this scope of work.	3/19/2025
Division 02/ Sections:	**Existing Conditions**

283111	Digital, Addressable Fire Alarm System	3/19/2025

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base

bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. **MAINTENANCE OF EXISTING SYSTEMS** - Each Subcontractor is responsible base bid to: relocate, support, remove, re-install, maintain coverage, maintain functionality and continuity of existing building services, and systems at all times. This includes but is not limited to; utilities entering or exiting the building to its source, gear, panels, branch circuits, electrical devices, clocks, intercom systems, public address systems, data infrastructure, fire alarm devices, fire alarm equipment, MDFs', IDFs., data device system, security & camera systems, phones, RTUs, AHU's, pumps, exhaust fans, automatic temperature controls, Temporary work shall not be abandoned in place. Abandon MEFP shall be removed complete to the source per applicable codes. All service terminations to be left in a finished and complete condition for the next Phase of Construction if applicable. This shall include old work that was repurposed for temporary use. Assume that is some if not all cases, conduit and cable runs will need be in corridors to avoid occupied spaces regardless of drawings showing alternate routing. Each Subcontractor shall include temporary re-supporting of all existing MEFP in existing corridors in a neat and orderly fashion as existing ceilings will be removed by others during school recess periods beyond the individual phase being currently undertaken to allow for new MEFP distribution between phases. This work in most cases will need to be performed off-hours by each trade. The following is additional comments regarding scope and existing systems:

    A. **EXISTING MECHANICAL SYSTEM** - The existing mechanical systems including but not limited to associated equipment, ductwork, piping, insulation, controls and pumps etc. are to remain operational until no longer required to maintain climate control and indoor air quality for occupied areas. Existing heating zones will be removed as the new piping is implemented. The new mechanical system will be installed on a phased basis and be utilized to satisfy heating loads for new equipment as soon as possible. Include all temporary connections, valves, electrical, plumbing and controls as required based on the individual trade contractors' scope of work. Provide action / safety plans as needed for each phase, sub-phase or other transition event for approval and coordination.
    B. **EXISTING PLUMBING SYSTEM** - The existing Plumbing systems including but not limited to associated equipment, boilers, water heaters, potable domestic water, sanitary / grease

drainage, pumps, insulation, controls and valves etc. are to remain operational until no longer required to maintain occupied areas. Existing components will be removed as the new piping is implemented. The new plumbing system will be installed on a phased basis and be utilized to service new equipment as soon as possible. Include all temporary connections, valves, electrical, plumbing and controls as required based on the individual trade contractors' scope of work. Provide action / safety plans as needed for each phase, sub-phase or other transition event for approval and coordination.

C. **EXISTING ELECTRICAL SYSTEM** - The existing electrical system shall remain functional to serve all areas of the existing building until the new electrical service distribution is established. The Electrical subcontractor shall expedite all system components to be installed and energized no later than the milestone dates established in the preliminary baseline schedule. The Electrical Subcontractor shall take immediate lead with Eversource to ensure complete coordination and adherence to milestone dates. EC shall submit within 10 days of notice to proceed a Temporary Electric Plan. This plan shall include submission of all equipment necessary for the permanent installation of MDC switchgear and associated panels required for a complete temporary power distribution system. The plan shall include line diagram for the temporary power system integrating the old and new. The temporary power plan shall be coordinated with sub-phases identified in the project phasing drawings and schedule, and shall become a living document for coordination of all phased work. The Electrical Subcontractor shall be responsible for all components, and appurtenances for complete and functioning system. Weekly inspection, maintenance and documentation is the responsibility of the EC. Provide action / safety plans as needed for each phase, sub-phase or other transition event for approval and coordination. This Subcontractor shall include temporary supporting all existing light fixtures, PA etc. and other electrical and communications conduit and wiring in existing corridors and classrooms that are still occupied. This Subcontractor shall relocate and/or provide new temporary exit signage in occupied areas affected by phasing as required for proper egress. Existing PA, Clock and Security System must remain fully operational.

D. **EXISTING FIRE ALARM SYSTEM** – The existing fire alarm system shall remain functional in all occupied areas existing and new at all times. FAC to Submit within 10 days of notice to proceed a Temporary Alarm Plan w/ line diagram for the temporary systems integrating the old and new for approval and coordination with the AHJ and BOE Maintenance Staff for each phase of construction. The temporary alarm plan shall be coordinated with sub-phases identified in the project phasing drawings and schedule, and shall become a living document for coordination of all phased work. This Subcontractor shall include temporary supporting all fire alarm devices and wiring and other life safety devices and wiring in existing corridors and classrooms that are still occupied. Existing ceilings will be removed by others during school recess periods beyond the individual phase being currently undertaken. Perform selective demolition of these existing items in the scheduled phase as previously indicated. This Subcontractor shall furnish, install and maintain additional fire alarm devices due to phasing and specifically related to the installation of temporary partitions. In addition, this Subcontractor shall furnish, install and maintain a temporary fire alarm annunciator panel tied into the existing system in the new Stair 1 that becomes the temporary main entrance to the school in Phase 2.

E. **EXISTING COMMUNICATIONS & SECURITY SYSTEMS** - The existing telecommunication / technology systems shall remain functional in all occupied areas existing and new at all times. Communications contractor to Submit within 10 days of notice to proceed a Temporary Communications Plan /w/ line diagram for the integration of the old and new system for approval and coordination with the AHJ and BOE Maintenance Staff for each phase of

construction. The temporary communications plan shall be coordinated with sub-phases identified in the project phasing drawings and schedule, and shall become a living document for coordination of all phased work.

All Subcontractors shall provide a written plan within ten (10) days of notice to proceed to the CM for approval on how it is intended to maintain existing systems covered under this scope of work. Update as required throughout construction.

8. **TEMPORARY ENVIRONMENTAL CONDITIONING FOR AREAS UNDER CONSTRUCTION –** The Subcontractors below are responsible for include BASE BID all required scope to maintain temporary environmental conditioning in the areas under construction for phase:
    - *Responsibility of the HVAC Subcontractor Base Bid* - Include furnishing, installing, maintaining and remove when no longer necessary, complete thermostatically controlled temporary heating and conditioning systems. These systems shall provide heat, relative humidity control, and cooling, for distribution to all areas under construction during the heating / cooling seasons based on the project schedule. The existing mechanical system may be utilized where possible and/or supply supplemental temporary equipment to maintain sufficient temperatures (min 50*f : 40%RH / Max. 80*f : 60%RH) for the installation of finishes in all areas. The HVAC contractor shall furnish a complete system including but not limited to; temporary climate control planning, coordination, permitting, testing, hydronic piping, fittings, hangers, unit heaters, radiators, blowers, fans required to distribute air, boilers, pumps, meters, gauges, open flame blower heaters, gas piping, dehumidifiers, desiccant units, ductless VRF equipment, automatic thermostatic controls, filters and maintenance, etc. All temporary HVAC climate systems shall comply with the sustainable design requirements outlines in the contract documents and specifically IAQ Guidelines for Occupied Buildings Under Construction ANSI/SMACNA 008-2008.
    - *Responsibility of the Plumbing Subcontractor Base Bid* - Include gas connection manifold from the existing services, valves, regulators and coordination with the utility as necessary to ensure the proper line pressure is available at the point of connection in coordination with the HVAC contractor's temp heat plan. PC shall coordinate and install any and all necessary temporary water or condensation piping needed for cooling of RH control equipment. The PC shall be responsible for their work, and on call for repair on a 24hr / 7 day weekly basis. Installation shall be coordinated with all other trades and will not obstruct installation of new work. Relocation of equipment is anticipated and included in this scope of work.
    - *Responsibility of the Electrical Subcontractor Base Bid* - Include wiring and terminations needed for all temporary climate control equipment and coordinated with the HVAC temporary climate control plan for each phase of construction. Power shall be drawn from new or existing circuits, EC shall provide any necessary equipment including but not limited to; panels, subpanels, raceways, wire, hangers, breakers, transformers etc. for a complete electric system. Automatic thermostatic controls furnished by the HVAC Subcontractor shall be wired by the Electrical Contractor. The EC shall be responsible for their work, and on call for repair on a 24hr / 7-day weekly basis. Installation shall be coordinated with all other trades and will not obstruct installation of new work. Relocation of equipment is anticipated and included in this scope of work.
    - *Responsibility of the Sitework Subcontractor Base Bid* **-** shall include all temporary measures (i.e.: temporary concrete barriers, level pad, fencing, signage, etc.) required to accommodate installation of all temporary HVAC equipment. All disturbed building and site elements shall be restored their original condition.

Note: The costs for utility consumption gas, water, & electric using existing or new systems for this temporary climate control shall be paid by the Owner and shall require sub-metering of consumption related to construction work.

9. **TEMPORARY LIGHT & POWER FOR CONSTRUCTION** – The Electrical Contractor is responsible to furnish all labor, material, tools, equipment, transportation, fees, permits and services required to provide fully code compliant temporary power and lighting to all construction work areas as depicted in the phasing plan, as well as maintaining uninterrupted services to the occupied portions of the building throughout construction.
   a. This Subcontractor shall assume coordination with Eversource and ensure timely installations. Provide and pay for expedited Installation of new power service as shown in the contract drawings.
   b. Include power and lighting for all trades throughout the building new and existing, as well as power needed on site and out buildings
   c. This Subcontractor shall provide / connect all temporary connection of heaters, air conditioning, generators, chillers, fans, filters, shot blasting, saws, or any other trade equipment needed to perform work or support school operations.
   d. Include installation of the temporary LED lighting strings in an amount double OSHA requirement at all areas of construction. include all re-lamping as required, relocation and installation of additional temporary LED lighting and power as jobsite conditions dictate throughout the duration of project. Light strings shall be inspected and maintained daily. This Subcontractor shall be responsible for the removal temp lighting complete and patching of holes in masonry and drywall upon removal. Portable Light stands are not acceptable for long term usage.
   e. Include Ten (10) 1000-watt LED Flood Light Fixtures (controlled by photocell with light pollution shields):
      i. Two (2) to illuminate the trailer compound area in locations reviewed with CM.
      ii. Eight (8) to be installed on the perimeter of the building in locations reviewed with CM.
      iii. Reduced wattage may be used as reviewed with CM in areas where light pollution to neighboring homes and businesses may be of concern.
   f. This Subcontractor shall provide new sub-panels, (4) quad receptacle (2) GFI protected circuit power boards that are constructed and located in a frequency that exceeds 2x the minimum OSHA standard. no more than 50’ OC feet apart for use by all trades in the construction areas and roof level. Provide GFI inspection through the duration of all phases. Inspection logs shall be submitted to Downes Construction for record WEEKLY.
   g. Include OSHA recommended material in areas subject to physical damage.
   h. Include temporary light, power, data & security for the CM trailer as described elsewhere in this scope.
   i. Assume full responsibility to provide, supplement and maintain temporary LED lighting and power at all times.

10. **TEMPORARY LIGHT AND POWER TO CONSTRUCTION TRAILERS AND TEMPORARY CLASSROOMS -**This Subcontractor shall provide, disconnect and remove the temporary service to the construction trailers.

11. **ELECTRICAL SYSTEM EXPECTATIONS** - This Subcontractor is responsible for a complete and operational electrical system(s), including but not limited to, furnishing and installing all electrical power, wiring, devices, rough-in, conduits, sleeves, wire mold, circuitry, grounding, lighting controls, panels, terminations, testing, fixtures, floor boxes, raceways, pathways, identification, all interior and exterior lighting, exterior communications rough-in, standalone intercoms systems, theatrical lighting and systems, emergency power, vaults, manholes, handholes, cages around devices, CATV/Fiber, CATV IP Distribution, power to all specialty items, miscellaneous accessories, etc. in accordance with the Specification Sections those referenced within them and all other Contract Documents.

12. **COMMUNICATIONS SYSTEM EXPECTATIONS** - This Subcontractor is responsible for a complete and operational Communication System, including but not limited to furnishing and installing all backbone cabling (including fiber), horizontal and vertical cabling (CAT, COAX, Phone), patch cords, all HDMI cabling, MDF/IDF buildout (racks, ladder racks, cable tray, patch panels) communications system grounding, supports, sleeves within walls and floors, identification, miscellaneous accessories, commissioning etc. in accordance with the Specification Sections, those referenced within them and all other Contract Documents.

13. **SECURITY SYSTEM EXPECTATIONS** - This Subcontractor is responsible for a complete and operational Security and Fire Alarm Systems, including but not limited to furnishing and installing all backbone cabling (including fiber), horizontal and vertical cabling (CAT, COAX, Phone), patch cords, all HDMI cabling, MDF/IDF buildout (racks, ladder racks, cable tray, patch panels) communications system grounding, fire alarm devices, annunciator panels, remote annunciator panels, fire alarm graphics, fire alarm programming and testing, supports, sleeves within walls and floors, identification, miscellaneous accessories, commissioning etc. in accordance with the Specification Sections, those referenced within them and all other Contract Documents.

14. Where mechanical, electrical, plumbing, and fire protection work (MEP/FP) is inferred architecturally however not translated to specific MEP / FP drawings or specifications, the subcontractor shall either have requested clarification prior to bid or will have clarified the work during scope review with Downes Construction Company. Absent the subcontractors pre-bid or pre-award coordination, the subcontractor shall be bound by that information shown architecturally and shall provide a complete operating system that is code compliant and ready for beneficial use by the Owner. All necessary communication and coordination with other subcontractors during the construction process to address such matters shall be included by the subcontractor at no additional cost.

15. **MEFP COORDINATION** - This Subcontractor is responsible to participate in the preparation of composite MEP coordination drawings, which will be initiated by the HVAC Subcontractor. All respective trades shall then label their own work onto these drawings and after coordination issues are resolved, they shall become the documents that field personnel utilize to install their work. The MEP coordination drawing process will be constructed in a 3D "BIM" environment using the latest version of Auto-Cad compatible software and with the latest version of REVIT/NAVISWORKS 3D modeling software. This Subcontractor is responsible for the MEP Coordination Drawing Process as outlined in the Downes Supplemental Instruction, Paragraph P. **Time is of the essence in coordinating areas as soon as possible so installations may begin since a great deal of the building will be ready for roughing upon start of the coordination process.**

16. OSHA's lead in construction standard applies to all construction work where an employee may be exposed to lead. The existing building contains lead-based paints etc., so therefore this Subcontractor must comply with OSHA's lead in construction standard when performing this scope of work. Paints that will be impacted by the renovation project are presumed to contain polychlorinated biphenyls (PCB). All painted components impacted by the renovation work shall be properly removed, packaged and disposed of presumed PCB Bulk Product Waste greater than fifty parts per million (>50 ppm). Refer to Section 021100 Polychlorinated Biphenyls Waste Management for additional removal and disposal requirements.

17. This Subcontractor shall include all man-lifts and staging in their lump sum bid required to complete this scope of work. Subcontractor shall be responsible for the means and methods of obtaining safe access for their workers in compliance with OSHA regulations.

18. The use of man-lifts on this project shall be limited to areas of the school where deck heights exceed 14'-0" AFF, and can be safely supported by the existing /new structure. This contractor shall submit for approval to DCC and the EOR, proposed equipment with supporting data independently confirmed by a CT. licensed engineer on behalf of the subcontractor. Subcontractor shall visit the site pre-bid and be familiar with the existing conditions and design documents. This subcontractor shall carry equipment that is fully coordinated to this project to provide a complete scope of work. No additional compensation shall be paid for the exclusion of lifts or methods that do not meet these criteria, or for loss of production due to the subcontractor's assumptions.

19. This Subcontractor is responsible to provide all fittings and varying lengths of piping and similar conduits required for the complete installation of the systems as required by the coordination drawing process whether or not such fittings and/or lengths and sizes were shown on the Contract documents.

20. The drawings show only the general run of raceways and approximate locations of outlets/devices etc. Any significant changes in locations necessary in order to meet field conditions shall be brought to the attention of the Construction Manager for review before such alternations are made. Modifications, relocations and alternations are to be included in the Subcontractors base bid.

21. This Subcontractor is responsible for all cutting, patching, core drilling and sleeves as required to execute this Scope of Work through all new/existing walls, floors, foundations, metal decking, roofs, decks and slabs. Fill void space around pipes the penetration with elastomeric waterproof caulk, rubber link seals or other methods as may be specified or required. Sleeves through decks to receive concrete shall be rigid and capable of withstanding concrete placement and are to be filled with rigid insulation and secured to prevent concrete infiltration. A sleeve coordinated drawing shall be developed during MEP Coordination and provided to the Construction Manager at least fifteen (15) calendar days prior to the scheduled placement of concrete. This Subcontractor will be responsible for cutting/core drilling and reinforcing slabs if it is determined that addl. penetrations are required after concrete placement.

22. This Subcontractor is responsible to coordinate installation and connection to utilities outside the building with the Sitework Scope of Work Subcontractor. This Subcontractor is responsible for all exterior utilities, including but not limited to, underground utility work associated with generator, permanent power (primary/secondary), fiber, site lighting, etc. Refer to specifications for testing and cleaning requirements that should also be included. Trenching and backfilling is by the Sitework

23. Due to the lead times of various electrical equipment, an early release electrical equipment package has been procured in order to meet the construction schedule. The following is a list of the electrical equipment which was pre-purchased and will be delivered to the jobsite:

EARLY RELEASE ELECTRICAL EQUIPMENT		
PRODUCT ID	**PRODUCT ID**	**QUANTITY**
Generator with Level 2 Sound Attenuated Enclosure	Generator	1
ATS-E	Transfer Switches	1
ATS-S	Transfer Switches	1

SWBD-1 - 480-volt w/CT & Main Switch and utility meter enclosure	Switchboard	1
SWBD-2 - 208-volt	Switchboard	1
TX-1	Transformer	1
TX-1E	Transformer	1
TX-S1	Transformer	1
DP-E2	Panelboard	1
DP-S1	Panelboard	1
DP-S2	Panelboard	1
RP-SW (Wing D)	Panelboard	1
SPP-1D (Wing D)	Panelboard	1
60A Fused Disconnect Switch	Switches	1

- This Subcontractor (BP #1.26.1 – Electrical System) shall receive the above listed equipment onsite and install in its permanent location along with all necessary connections, etc.
- In addition, this Subcontractor is to assist and provide all required information for the Coordination Study to the pre-purchased equipment contractor / vendor.

24. This Subcontractor is responsible for cutting all metal decking and concrete slab penetrations, as required, to execute this scope of work. Include protection as required.

25. This Subcontractor is responsible for any and all penetrations 10” in diameter and/or less than 100 square inches in all existing walls. Any square or rectangular penetrations 10” x 10” or greater than 100 square inches will be by the Masonry Subcontractor. This Subcontractor will be responsible to provide field and drawing layout to coordinate all cut and patch items. Infill’s around penetrations to fill up to fire stopping requirements and all fire/smoke stopping are by this Subcontractor

26. This Subcontractor is responsible for providing lighting shown on the Electrical and Architectural Drawings. If a conflict exists between these two sets of documents, provide the greater quantity or greater value, immediately notify the Construction Manager of the conflict.

27. This Subcontractor is responsible for coordinating and providing power for all locations for electrical equipment with Architectural Drawings and FF&E Drawings. Relocate any electrical devices that interfere with furniture shown in documents at no additional cost.

28. This Electrical Contractor is responsible for all raceway, backboxes and pull-strings as shown on the drawings. This Subcontractor shall furnish and install all cable tray/ladder racks/inner-duct as shown and any additional conduit/pathways/sleeves etc. not shown but required for a fully functional system. Furnish and install all sleeves between room walls and floors.

29. This Subcontractor is responsible to provide all wire mold pathways for all systems provided by this Scope of Work on new or existing walls, whether shown or not.

30. This Subcontractor is responsible for all means of support and attachments for all devices, panels, conduits, feeders and equipment back to the to the existing/new structures (provide engineering analysis if required) for all Electrical work, including but not limited to, any trapeze hangers to clear other work or interferences, include all vibrations and seismic restraints as required. Provide all miscellaneous steel supports which are not shown on any of the Contract Drawings, but which are

required to complete the work of the Bid Package, include primer and touch-up. Coordinate box-out framing with the Drywall and Masonry Subcontractors. Coordinate with BIM Modeling for actual hanger placements as multiple trades may not be able to suspend at same location.

31. This Subcontractor is responsible to continuously record the progress of their work. If requested, this Subcontractor shall provide copies of the "As-Built" status of their work. Satisfactory "As-Built" progress drawings shall be a condition for continued requisition payments. Also refer to the Downes Supplemental Instructions for additional information regarding "As-Built" requirements.

32. This Subcontractor is advised that the room name number designations on the construction documents do not represent the final room numbers. Do not use construction document room name and numbers for programming/as-builts Fire Alarm, Fire Protection, Security, Tele/Data, Paging, All Special Systems, BMS, tagging, labeling, or other building systems. Obtain permanent room names and numbering system from the Owner prior to performing this work and with enough time for the Owner to secure information. Any programming or as-builts started with the construction room names and numbers will have to be reprogrammed and redone with the final room name and numbering system at this Subcontractor's expense. Provide final room names and numbers on all as-built drawings.

33. This Subcontractor is responsible to furnish all electrical manholes, handholes and associated covers to the Sitework Subcontractor for installation.

34. Open electrical panels are not acceptable. Electrical panels are required to be covered at all times. Cardboard panel covers will not be allowed.

35. The Site Subcontractor is responsible to furnish and install the transformer concrete pad/vault, in accordance with the governing utility details and requirements of applicable to this project. Sitework Subcontractor will excavate, prep, backfill and set pad. It should be assumed that the new transformer will have to be installed alongside the existing service so that service can be maintained. Downtime for change over must be minimized.

36. This Subcontractor shall also coordinate permanent power installations with the local utility company.

37. This Subcontractor is responsible to provide all necessary shut-downs and tie-ins for their systems. All overtime costs associated with this work shall be included.

38. This Subcontractor shall be responsible for all reopening and closing of ceilings in connection with any corrective or adjustment work above completed ceiling, including related costs for damaged ceiling grid, tile, etc.

39. This Subcontractor is responsible to provide all vibration and seismic restraints as required by code, regardless of details.

40. This Subcontractor shall provide all sleeves required for their work and shall seal all sleeves with the appropriate waterproofing, sound sealing or fireproofing material as shown and specified.

41. This Subcontractor is responsible to provide all electrical related signage, labeling, tagging, banding and pipe identification prior to the installation of the ceiling grid so as to allow for inspection as to the thoroughness of these items.

42. This Subcontractor shall weatherproof all electrical penetrations made prior to equipment being installed.

43. This Subcontractor shall include all costs associated with a complete review of all motors, Motor Control Centers, etc. (power requirements), supplied by the Mechanical & Plumbing Subcontractor. This review is to specifically include a listing of all such motors, to determine quantity etc., showing motor size, voltage, amperage, phasing, fusing, starter sizes, disconnects, wire size required and/or control sequences.

44. This Subcontractor is to wire all emergency gas shutoff valves, panels, master switches, etc., as well as coordinate with Kitchen Equipment, Mechanical & Plumbing Subcontractor for tie-in to building control system and Fire alarm system where applicable.

45. The heat trace material / equipment is to be furnished by the Plumbing Contractor, the Electrical Subcontractor is to install the heat trace material and equipment.

46. This Subcontractor shall take sole responsibility for the proper installation of any exterior recessed light fixtures in sidewalks, concrete pads or similar. Responsibility consists of but may not be limited to accepting conditions provided by others at the time of roughing, ensuring roughing is installed per manufacturers recommendations and at proper grade and is properly sealed to prevent weather or concrete infiltration during placement.

47. The plywood backboards required at the telephone and electrical rooms will be provided by others. This Subcontractor will be responsible for coordinating the location of these backboards.

48. This Subcontractor is responsible to include coordination, wiring, power, controls, etc. for all Division 8, 10, 11, 12 and 14 items, whether shown on the Documents are not to provide a fully functioning system.

49. This Subcontractor is responsible to include coordination, wiring, power, controls, etc. for all Division 21, 22, and 23, whether shown on the Documents or not to provide a fully functioning system.

50. This Subcontractor shall wire all electrically operated drinking fountains and wall mounted coolers provided by the Plumbing Subcontractor.

51. This subcontractor shall complete all final terminations for all automated door operators including but not limited to; line voltage, and access control, in coordination with BP 1.8.1 Glass & Glazing. Remote power supplies to be provided by BP 1.9.1 and installed by BP 1.26.1 Electric. Coordinate with hardware supplier / installer, and all other trades to provide a complete commissioned system per contract documents

52. This subcontractor shall take the lead in coordination with the Fire Alarm and complete all final terminations for the interconnectivity of security, fire alarm, and communication systems with respect to lock-down, fire egress, and communications programming and commissioning. Include all necessary devices, switches, relays, and programming required for a complete functioning system that meets the Owner’s requirements.

53. This Subcontractor shall install all disconnect switches, starters, and variable frequency drives for HVAC and Plumbing equipment, furnished by the Mechanical and/or Plumbing Subcontractors for their equipment.

54. This Subcontractor shall wire all electrically operated VAV boxes, smoke, and smoke/fire combination dampers.

55. The Elevator Subcontractor will terminate all wiring for elevator interfacing with fire alarm, security system, access control, intercom, etc. to a termination box for the elevator. The Electrical Contractor shall assist the Elevator contractor with termination of line voltage, complete and test and commission each system provided by this scope of work. The Electrical Contractor is responsible to furnish and install an independent telephone line(s) to the elevator as required by code, including; pathways, and raceway, necessary.

56. This Subcontractor is responsible to protect new and/or existing roofs when working on or above. At a minimum provide plywood protection in areas under ladders, tools, where material is stored, etc. Plywood is to be placed in a manner and with sufficient protection underneath so as to not puncture or damage the roofing membrane.

57. This subcontractor to furnish and install any required pipe or duct support as it relates to work performed by this Subcontractor on the roof – reference Spec 077200 Roof Accessories.

58. This Subcontractor is responsible to provide and maintain weather and safety protection of all openings made by this Subcontractor until the permanent work is installed. Remove and replace weather and safety protection provided by others as necessary to access and execute your work.

59. This Subcontractor is responsible for all building commissioning requirements, including but not limited to, assisting the Commissioning Agent (CA) in facilitating the commissioning described in this Specifications Section, attending any all meetings, completing all paperwork and responding to all questions and punch-lists issued by the CA in a timely and professional manner as it relates to this Scope of Work, in accordance with the Contract Documents.

60. This Subcontractor is responsible for all costs associated to provide project specific pull test data in the form of a complete submittal for all fasteners scheduled to be installed in all existing construction. Owner's testing agency is not responsible for this item.

61. This Subcontractor is responsible for working through all ceilings (new or existing) on the Contact Drawings for the installation of the Electrical Systems.

62. This Subcontractor is responsible to coordinate and integrate with the Owners Systems vendors as may be required.

63. This Subcontractor is responsible for the protection of all cabling from other trades (i.e.: paint, spray fireproofing, mortar, taping compound, etc.) so not to void warranty or code compliance requirements.

64. This Subcontractor is responsible to provide all Communications System signage, labeling, tagging, banding and pipe identification prior to the installation of the ceiling gird so as to allow for inspection as to the thoroughness of these items.

65. The fire alarm devices related to the sprinkler system (flow and tamper switches) shall be installed by this subcontractor. Coordinate with BP 1.21.1 Fire Suppression for exact number and location of these devices. Provide all necessary raceways and wiring to the coordinated locations weather or not specifically shown on the drawings. Ensure that the flow of water through the fire protection system is monitored by the fire alarm system and any exterior bells are wired and integrated to the Fire Alarm.

66. This Subcontractor is responsible for any and all connections to existing utilities/systems required by the Contract Documents and/or Authorities Having Jurisdiction (AHJ).

67. This Subcontractor shall coordinate device locations with ALL Subcontractors and Contract Documents for this Subcontractors scope of work.

68. Include base bid and additional four (4) of each type of fire alarm device complete and installed as may be requested by the AHJ.

69. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

70. All products shall meet the warranty requirements as set forth in the relevant specification sections. Written warranties shall be signed by the Manufacturer, Installer, and by this Subcontractor.

71. This Subcontractor is required to touch-up all factory finished surfaces which are scratched, bare or become rusty due to shop coating errors, inadequate protection or storage, careless erection procedures, etc., all to the satisfaction of the Architect, Construction Manager and Owner.

72. This Subcontractor shall be responsible to clean and protect items furnished as part of this Scope of Work from finish trades until the building is turned over to the Owner.

73. This Subcontractor is responsible to prepare an agenda for approval and video tape all Owner instructional training, demonstrations and closeout procedures, reference Downes Supplemental Instructions Paragraph PP.

74. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:

1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.

3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

75. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

76. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
078413	Penetration Firestopping*
078446	Fire-Resisting Joint System*
079200	Joint Sealants*

77. This Subcontractor shall specifically **EXCLUDE** the following:

78. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

79. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**

Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
MEP / FP Coordination	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Shop Drawings / Submittals	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Temp. Lighting and Power	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Site Electrical	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Concrete Duct Bank for Primaries	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Light Fixtures	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Light Fixture Controls	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Branch Conduit and Wiring	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Switches and Devices	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Public Address System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Audio Visual System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Structured Cabling	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Clock System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Security Conductor Cables	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Pathways for Security Systems	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Access Control System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Intrusion Detection Systems	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Video Surveillance System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Digital, Addressable Fire Alarm System	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Grounding and bonding	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Testing	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Commissioning	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Clean-up	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Closeout (O&Ms)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Allowances	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Other (Be specific on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

80. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

81. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

82. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

83. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

84. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

85. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

86. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field*

Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.) Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.26.1 – Electrical Systems Allowances:				
Allowance 1	**Maintenance of Occupancy (Unforeseen)**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Eighty (80) labor hours (blended rate)	80 Hours (Fill in on bid form)		
C	Material and Equipment	1 LS	$4,500	$4,500
	Total Allowance 1 Included in Base Bid (Bidder to calculate):			
Allowance 2	**Temporary Environmental Conditioning (Unforeseen)**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Sixty-Five (65) labor hours (blended rate)	65 Hours (Fill in on bid form)		
C	Material and Equipment	1 LS	$3,000	$3,000
	Total Allowance 2 Included in Base Bid (Bidder to calculate):			
Allowance 3	**Utility Fees**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Utility Fees	1 LS	$25,000	$25,000
	Total Allowance 3 Included in Base Bid (Bidder to calculate):			
Allowance 4	**Maintenance of Occupancy (Unforeseen) - Communication**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Sixty-Five (65) labor hours (blended rate)	65 Hours (Fill in on bid form)		

C	Materials & Equipment	1	$3,000	$3,000
	Total Allowance 4 Included in Base Bid (Bidder to calculate):			
Allowance 5	**Additional Data Infrastructure Wiring**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Sixty-Five (65) labor hours (blended rate)	65 Hours (Fill in on bid form)		
C	Materials & Equipment	1	$3,000	$3,000
	Total Allowance 5 Included in Base Bid (Bidder to calculate):			
Allowance 6	**Maintenance of Occupancy (Unforeseen) – Electronic and Security Systems**			
	Description	**Quantity**	**Unit Price**	**Amount**
A	Foreman/Supervision (Included w/ blended rate below)	Included in blended rate below	Included in blended rate below	Included in blended rate below
B	Eighty (80) labor hours (blended rate)	80 Hours (Fill in on bid form)		
C	Materials & Equipment	1	$3,000	$3,000
	Total Allowance 6 Included in Base Bid (Bidder to calculate):			
BP #1.26.1 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

87. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

88. **<u>ALTERNATE BIDS</u>** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**

2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.26.1 – ELECTRICAL SYSTEMS

Scope of Work:

BID PACKAGE #1.31.1 – SITEWORK

1. This Bid Package Scope of work includes performing all **WINTER CONDITIONS PROTECTION, SITE LOGISTICS (SET-UP, MAINTENANCE AND REMOVAL), TEMPORARY ENVIRONMENTAL CONTROLS*, PROTECTION OF EXISTING UTILITIES, SELECTIVE SITE DEMOLITION, EXCAVATE, PREP AND BACKFILL FOR ALL NEW CONCRETE FOUNDATIONS AND UTILITIES (NEW ADDITIONS AND WITHIN EXISTING BUIDLING), PRECAST CONCRETE STAIRS, THERMAL INSULATION*, JOINT SEALANTS*, FLAGPOLES, SITE FURNISHINGS, NATURAL GAS PIPING* , DIVISION 31 – EARTHWORK COMPLETE, DIVISION 32 – EXTERIOR IMPROVEMENTS*, TOP SOIL, DIVISION 33 – UTILITIES COMPLETE AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Procurement and Contract Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	3/19/2025
Division 01 / Sections:	**General Requirements**	
All Sections:	This Subcontractor is responsible for all sections in this division as it relates to completing this scope of work.	3/19/2025
Division 02/ Sections:	**Existing Conditions**	
020100	Protection of Existing Utilities	3/19/2025
022113	Project Surveying and Layout	3/19/2025

3	In-Situ Waste Classification Soil Sampling, March 202	3/25/2024

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **PHASING -** The renovations and additions to Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

4. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

5. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

6. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

7. **SITE LOGISTICS DRAWING** – The Site Logistics drawings (SL series) for the project are intended to provide an overall plan and approach to implement the work and secure the site while maintaining school function. The drawing does not contain all notes and details necessary to achieve the tasks that

are/may be required. The following list is intended to provide further clarification of the Sitework Contractor's scope but should not be considered all inclusive.

a) The Sitework Contractor is responsible to furnish, install, maintain and remove temporary construction fence as follows for EACH phase as shown:
    1. 8'-0" high galvanized chain-link style fence with top and bottom rail for stability. Fence shall consist of IW-40 posts with IW-15 top and bottom rails and any required bracing.
    2. Posts shall be driven where shown.
    3. Full privacy mesh shall be provided except at gates. Furnish and install custom privacy mesh at CM office trailer enclosure. Design to be provided by CM.
    4. Furnish and install gates as shown.
    5. Contact CBYD and/or hire an independent utility locating company prior to commencing post installation.
    6. Include an additional 10% LF fence beyond what is shown to be used as directed by the CM.

b) Reference temp fence locations based on Site Logistics plan. Note the fence in blue outside the Cafeteria and Gym (north) needs to be in place prior to taking out play equipment.

c) Include all temporary construction signage on the fence as shown on the Site Logistics Drawings. Relocate all signs as directed at the conclusion of the phase to the next phase. Furnish, install and maintain an additional ten (10) customized signs where directed by CM. Assume additional signs will be 3' x 5' or less.

d) The Sitework Contractor shall furnish and install anti-tracking pads per drawing details at all site entrances/exits as shown on the logistics plan. Include the installation of two (2) additional tracking pads in a location to be determined by the CM. Provide unit price for each as requested elsewhere in this scope of work and on the bid form.

e) The Sitework Contractor shall include maintenance and protection of all pedestrian and vehicular traffic control management as required for the execution of their scope of work. The Sitework Contractor will provide local police officers, traffic control devices, flagmen, signage, barricades, temporary road plates, guardrails, permits, fees, etc. as required by authorities having jurisdiction (AHJ) and/or Downes. All work affecting public roadways will be performed in a manner to maintain safe traffic patterns and to minimize disruption to traffic and pedestrian flow. The Sitework Contractor will avoid obstructing vehicular and pedestrian traffic into and out of adjacent neighbors. This Subcontractor shall provide a complete logistics plans for work in public roadways at least two (2) weeks prior to work start for approval by Downes and local authorities.

f) The Sitework Contractor shall furnish, prepare/compact base material, install geotextile fabric, Install, maintain, and remove temporary bituminous binder course (1.5"min.) access driveway and sidewalks per the site logistic plans.

g) The Sitework Contractor shall include; providing, maintaining and removing crane/lift pad(s)/laydown staging area sufficient for crane set up and deliveries for the erection of structural steel. Pad shall consist of 12" compacted process aggregates over geotextile fabric (40'x60'). Coordinate with Mechanical & Steel Contractors for final sizes and locations.

h) The Sitework Contractor shall include maintenance and removal of the temporary jobsite trailer/storage compound which consists of 8" of compacted processed stone over geotextile fabric that was installed by others. Maintain throughout construction. Maintain site drainage structures that may be affected. Return to the site to restore area to as new condition at project completion.

i) The Sitework Contractor shall include excavation for the installation, maintenance and removal of the temporary power and tele/data services to the Downes Construction trailer and to web-cams as may be required. Electrical and tele/data work by others.
j) The Sitework Contractor shall include excavation work for the installation of the temporary power to the trade contractor's logistics area on the South site as well as all temp water feeds to service masonry mixing stations relocate as required by phase.
k) The Sitework Contractor shall furnish, install and maintain all sedimentation and erosion control. Include all temporary erosion and sedimentation control shown on the drawings and any additional deemed necessary by Downes throughout the balance of the construction period. Maintain a SWPCP Control log in the Construction Manager's trailer. Provide all labor, material, tools and equipment necessary to comply with the DEEP Stormwater permit regulations throughout construction. Site work contractor shall be present and coordinate with the 3rd party engineer conducting weekly & storm event inspections.
l) The Sitework Contractor shall mow the lawn within the construction fence during the construction period. Include trimming along fence lines interior and exterior. Growth shall not to exceed 6" before re-cutting.
m) The Sitework Contractor is responsible to restore all areas disturbed by the logistical set-up at project conclusion.

8. This Subcontractor is assigned and shall take lead responsibility in executing, managing and maintaining the Connecticut Department of Environmental Protection (CT DEEP) general permit for the discharge of storm water and dewatering wastewaters associated with the general site construction activities for all Subcontractors. This includes but may not be limited to all documentation, reports, logs, installation and maintenance of all erosion control measures etc. that will need to be organized in the Construction Manager's office trailer. This Subcontractor is made aware that willful violation of these policies and requirements carry severe penalties under General Statues of the State of Connecticut. Refer to pertinent Specifications Sections for additional information. Coordinate with and respond to the owner's 3rd party inspector.

9. This subcontractor is to provide a delegated design for the dewatering system(s) as noted in the Contract Documents. Dewatering includes the design, testing, operation, monitoring, and maintenance of a dewatering system of sufficient scope, size, and capacity to control ground-water flow into excavations and permit construction to proceed on dry, stable subgrade. It is understood that this Subcontractor to reference the Contract Documents for soil characterization and in order to dispose / treat water within Federal, State and Local regulations.

10. This Subcontractor is responsible for the Storm Water Control Plan as required by the Connecticut DEEP per the **General Permit for the Discharge of Stormwater and Dewatering Wastewaters from Construction Activities**. Routine weekly inspections during the work are the responsibility of this subcontractor.

11. Based on the analytical results of on-site waste classification, soils at the Site may be classified as polluted or contaminated for the purposes of disposal. Analytical results for soil compared to a local landfill that accepts non-hazardous contaminated soil demonstrated acceptable characteristics for disposal. Based on the information provided, this Subcontractor is to develop a Soil Management Plan (SMP) to direct the proper excavation, handling, dewatering, offsite disposal of soils, and development

and implementation, as needed, of wastewater treatment for groundwater remediation wastewater generated during redevelopment activities.

12. **WINTER CONDITIONS** – All Subcontractors are responsible for working under "winter conditions" throughout the course of this scope of work as may be applicable per the baseline construction schedule. The following are the responsibilities of the various Subcontractors:

Responsibility of the Sitework Subcontractor base bid:

- Implement "Cold weather concreting" throughout the course of this scope of work.
- Removal of snow for general site access for all trades. Coordinate with Town Maintenance on placement of snow stockpiles.
- Include all hand snow removal and de-icing work for building access/egress points, stairs within construction areas.
- Snow / ice removal to be completed 1hour in advance of shift start times. Include all OT and shift work necessary to remove snow in coordination with the storm event.
- Include all labor, material, tools and equipment necessary to remove snow and prevent the ground from freezing to allow utility work, foundation excavation, underground plumbing work and site concrete work to be completed under winter conditions based on the construction schedule (i.e. ground heaters, blankets etc.). Remove any frost impacted soils necessary throughout the excavation and backfill process.
- The Cast-In Place Concrete Subcontractor shall assume protection of open excavations from freezing conditions immediately upon completion by the Sitework Subcontractor. Immediately upon completion of foundation placement, the Sitework Subcontractor will re-assume protection of the open excavation from freezing conditions until such time it is completely back-filled.
- Submit temporary winter conditions plan accounting for above and additional as required to CM as a submittal.

Responsibility of Cast-In-Place Concrete Subcontractor base bid:

- Implement "Cold weather concreting" throughout the course of this scope of work.
- Snow removal within their active work area.
- Include all labor, material, tools and equipment required to ensure that Cast-In-Place Concrete is placed and protected in accordance ACI "Cold Weather Concreting" standards (i.e. ground heaters, blankets etc.). In addition, include all necessary measures to install waterproofing/damp proofing systems under cold weather conditions.
- The Cast-In Place Concrete Subcontractor shall assume protection of open excavations from freezing conditions immediately upon completion by the Sitework Subcontractor. Include all labor, material, tools and equipment necessary to prevent the ground from freezing (i.e. ground heaters, blankets etc.).
- Submit temporary winter conditions plan accounting for above and additional as required to CM as a submittal.

Responsibility of the General Trades Subcontractor base bid:

- Provide and maintain enclosure of the structural steel framed additions to retain heat.
- Provide temporary doors and window opening protection in the new additions.

Responsibility of the Mason Subcontractor base bid:

- Provide complete enclosure of the new additions masonry work area to retain heat.
- Provide all temporary heat measures for the installation of their scope of work as may be required within the enclosure.
- Keep materials dry and free from ice.

- Extend protection to allow proper curing.
- Submit a temporary heating plan including detailed drawings, equipment cuts and safety procedures shall to Downes for review and approval in accordance with IMI and IBC standards.

Responsibility of the Construction Manager:

- None

13. This Subcontractor shall closely review, comply, and coordinate all work with the geotechnical report included in the bid documents. Means and methods should be reviewed and adjusted as may be necessary to deal with existing soil conditions as documented in the report.

14. This Subcontractor is responsible to use materials for backfill that meet the specified requirements. Submittals for imported fill materials shall be clearly marked with the exact descriptions utilized in the specifications AND the geotechnical report and a clear description on exactly where the material intends to be utilized on the jobsite. Submittals will be rejected without this information clearly marked. Subcontractor is responsible for all material testing of samples in accordance with the requirements of the specification and geotech report. Amendment of material to meet specifications is the responsibility of this subcontractor as well as, any delay caused by non-conforming materials.

15. This Subcontractor is responsible obtaining the services of a licensed underground utility locating company. Locate, record and protect all existing utilities to remain running through the site, existing street lights, signs, utility structures, electrical, drainage, fiber optic lines etc. Submit to Downes for record.

16. This Subcontractor is responsible for all Temporary Dust Control on the site. Sweeping of existing parking lots, driveways and adjacent public streets shall be performed by a professional service or equivalent vacuum sweeping equipment designed for roadway maintenance. Sweeping shall be performed daily or more frequently as needed, throughout the construction period as directed by CM in accordance with the SWPCP. Site contractor to maintain a dedicated water truck to remain on site for this purpose. Site contractor to assign labor as necessary to water all construction areas prone to dusting.

17. This subcontractor shall pay all fees to obtain a water hydrant meter from the water company, for the purpose of filling dust control, paving, seeding, equipment etc. for the duration of the project. Usage costs shall by Owner.

18. This Subcontractor is responsible to properly remove all standing water, ground water and water infiltrating all open excavations during the execution of this Scope of Work.

19. This Subcontractor is responsible for contacting ‘CALL BEFORE YOU DIG’ prior to start of work.

20. This Subcontractor is responsible for all site demolition, removals and relocations shown on the civil drawings and as may be necessary where existing conditions are in conflict with new construction but is not shown on the drawings. Coordinate all drawings, specifications and existing conditions observed at a walk-through to ensure a complete scope. This Subcontractor shall remove demolition debris from the site in its entirety to a legal off-site disposal location. Construction Managers dumpsters shall not be used for site demolition debris.

21. Site demolition shall include, but not be limited to the following:
    a.) Remove and replace existing utility vaults
    b.) Full depth removal of hardscapes
    c.) Removal of bituminous pavement for utility installation
    d.) Repair and replace sections of site wall along property line that conflict with utility and drainage work
    e.) Sidewalk, curbing and landscaped removal as indicated
    f.) Removal of existing stairs
    g.) Existing shed to be relocated or removed – confirm with OWNER.
    h.) Remove and store existing basketball hoops for relocation
    i.) Completely remove all existing utilities and site features within limits of proposed building addition.

22. Existing Storm and Sanitary piping and manholes are to be completely removed.

23. Restore all disturbed pavement markings

24. Maintain catch basin operation at all times until switch over to new catch basin

25. Protect and relocate existing GAGA pit.

26. Protect and maintain existing Play Equipment.

27. Cap existing sanitary piping as indicated.

28. The Play Equipment will be furnished and installed by others. For clarification please be advised of the following:
    a.) The concrete work for the playground post foundations is BY OTHERS
    b.) The demolition of the existing playgrounds (wood chip Play Grounds) as shown on Contract Drawings are by the Sitework Subcontractor (BP #1.31.1) including but not limited to benches and tables.
    c.) New curbs are by the Sitework Subcontractor (BP #1.31.1)
    d.) The excavation, backfill, and compaction associated with the foundation posts for Play Equipment are BY OTHERS.
    e.) Spoils generated by excavation of footings by Play Equipment Subcontractor is the Sitework Subcontractors (BP #1.31.1) responsibility to legally remove from site
    f.) Sitework Subcontractor (BP #1.31.1) is to leave the grade in the playground areas 8” below finish grade. Play Equipment Subcontractor will install 4” of stone and place the poured in place rubber surfaces.
    g.) It is to be understood by this Subcontractor (BP #1.31.1) that the Play Equipment is to be 100% complete ASAP. Therefore, the Sitework Subcontractor (BP #1.31.1) is to complete all utility, hardscapes, finishes, etc. that are in the Play Area. This will allow the Play Equipment Contractor to complete installation and make playground available to students.
    h.) The play equipment for Pre-K / Kindergarten located on the back of the existing school is to be furnished and installed for the start of school year 2026.

29. As clarification of scope, the Concrete Subcontractor is responsible for underpinning and dry packing in phased placements as shown on the structural drawings / contract documents. This Subcontractor is responsible for any temporary shoring required for excavation and will coordinate closely with the excavation / removal of temporary shoring with the Concrete Subcontractor who is responsible for the permanent shoring. The Concrete Subcontractor is responsible to provide a Delegated Design.

30. Plumbing Subcontractor is to furnish and install Radon Mitigation per specification which includes piping, fittings, couplings, fan and monitor. Geotextile fabric, stone and CMU are by this Subcontractor.

31. The existing pad mounted transformer along with primary feeders underground will be removed by others. The existing electrical pad shall be removed and legally disposed of by this Subcontractor.

32. This Subcontractor is responsible for all sitework related exploratory work shown or inferred on the drawings.

33. This Subcontractor is responsible for the protection of any existing or new underground or aboveground tanks, wells, utilities or structures, required by the Contract Documents, Authorities Having Jurisdiction (AHJ) or having conflict with new or temporary construction work. This Subcontractor is to review all existing conditions as they relate to the installation of new work in order to protect existing conditions and coordinate new work accordingly.

34. This Subcontractor shall include temporary shoring, support and/or engineered earth retention systems for existing underground utility systems, sidewalks, streets, adjacent foundations and site entrances etc.

35. This Subcontractor is responsible for the complete demolition and abandonment of all above and below grade utilities and structures in accordance with the drawings and Specifications. Maintain flows for all systems during this process. Provide pumping as required. Special attention must be allocated to establishing and implementing a plan to ensure existing storm services are uninterrupted throughout construction.

36. This Subcontractor shall provide, maintain and remove multiple concrete wash-out areas as required.

37. This Subcontractor is responsible for excavation and backfilling for the new concrete foundations both on the interior and exterior. Coordinate work with Concrete subcontractor. Review MEP drawings for full scope. Provide all means and methods to accomplish the work within the existing building. Utilize electric to the extent possible, LP or diesel combustion equipment cannot be utilized in close proximity to student or staff.

38. This Subcontractor shall assume base bid there will be twenty percent (20%) additional existing slab removal performed by others beyond what is shown on the drawings. Include all E&B for underground plumbing within the building including the additional 20%. Spoils from trench work shall not be stockpiled in the building. Provide all interior excavation and backfill as indicated elsewhere.

39. This Subcontractor shall furnish and install bollards including any special finishes as may be noted on the drawings.

40. This Subcontractor shall furnish and install all site fencing, gates and associated footings. Including all panic hardware and accessories at gates as indicated.

41. This Subcontractor shall furnish and install four foot steel picket fence as indicated on the contract documents.

42. Topsoil will be provided and spread by this Subcontractor in accordance with the Specifications. The Landscape Contractor shall provide all necessary coordination as may be required for the proper planting of turfs and grasses. Final raking shall be by Landscape Subcontractor.

43. As clarification of scope, this Subcontractor is responsible for the precast stairs, curbing and thrust blocks etc. The Masonry Subcontractor is to furnish and install precast concrete coping on Seat wall.

44. This subcontractor shall provide all concrete encasement of duct banks as required by the contract documents and or Utility Co. requirements

45. This subcontractor shall supply and install flowable fills as applicable to trench work where compaction equipment is not feasible at no additional cost.

46. As clarification, coordinate all required excavation and backfill of site lighting systems with the Electrical Subcontractor. Provide all site lighting bases by coordination with same.

47. As clarification of scope, the Concrete Subcontractor is responsible for all PIP concrete steps, ramps and pan infills. Exterior site stairs not attached to the building are installed by the site contractor.

48. This Subcontractor shall note sidewalk completion will be phased. Maintain pedestrian access to walk-ways at all times. Provide pedestrian and traffic control management as necessary to complete this scope of work.

49. This Subcontractor is responsible for any and all connections to existing utilities required by the Contract Documents and/or Authorities Having Jurisdiction (AHJ).

50. This Subcontractor is responsible for any and all transition fittings for all utilities installed by this subcontractor exiting the building.

51. This Subcontractor is responsible to coordinate installation and connection to utilities outside the building with the MEP Subcontractors. This Subcontractor is responsible for trenching and backfilling of all exterior utilities, including but not limited to, underground utility work associated with mechanical equipment, permanent power (primary/secondary), fiber, site lighting, etc. Refer to specifications for testing and cleaning requirements that should also be included.

52. This Subcontractor is responsible to furnish and install the transformer concrete pad/vault, in accordance with the governing utility details and requirements of applicable to this project. Sitework Subcontractor will excavate, prep, backfill and set the pad. It should be assumed that the new transformer will have to be installed alongside the existing service so that service can be maintained. Downtime for change over must be minimized

53. This Subcontractor is required to provide mockups as required, in accordance with the Specifications and Architect, Owner or Downes requests.

54. This Subcontractor is responsible to initiate and maintain (weekly site visits and log book are to be kept on site) a complete active pest control/wildlife (refuge) management for the entire site and building areas in order to obtain the final Certificate of Occupancy, in accordance with Division 1 and Town/City's requirements. This Subcontractor is required to maintain pest control/wildlife (refuge) management for the entire Project on a regular basis from this Subcontractors Notice to Proceed to the final completion of the Project. A final report and certification is required for the Certificate of Occupancy. This vendor must have the required insurance coverage and back ground check as per the project requirements.

55. This Subcontractor is responsible for complete restoration of all site areas disturbed by construction activities whether new or existing. This includes but is not limited to, bollards, fencing, bituminous pavement, concrete sidewalks, curbs, signage miscellaneous site improvements, granite and marble etc. Extent of restoration is not dictated by the contract limit line if shown but rather the extent of disturbance that occurred during the construction process.

56. This Subcontractor is responsible to provide a complete system video inspection of all storm and sanitary piping, including associated structures prior to the start of construction. This inspection shall document existing conditions and shall locate piping, identify blockages or other issues before system modification. Include, jetting, vacuuming, auguring/snaking, off-site disposal of system containments, electronic video recording, as-built video/correlation drawings to be submitted for record.

57. This Subcontractor is responsible to provide a complete system cleaning and video inspection of all storm and sanitary piping, including associated structures prior to final acceptance of the systems, including but not limited to, jetting, vacuuming, auguring/snaking, off-site disposal of system containments, electronic video recording, as-built video/correlation drawings etc..

58. In This Subcontractor is responsible to provide an A-2 and T-2 survey in auto-cad as part of the closeout documentation. This Subcontractor is to work with the other trades, as required, to gather the proper information in order to provide a complete and stamped/certified A-2 and T-2 survey.

59. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

60. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.

4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.
10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

61. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

62. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
079200	Joint Sealants*
329116	Topsoil and Planting Mix*
331000	Water Utilities*
333000	Sanitary Sewerage Utilities*
334000	Storm Drainage Utilities*
337000	Electrical Utilities*
338000	Communication Utilities*

63. This Subcontractor shall specifically **EXCLUDE** the following:

64. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

65. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Mobilization / Demobilization	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Winter Conditions	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.

Other (Please describe on bid form)	Provided by bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:	**1**	**LS**	**$ Provided by bidder. Fill in on bid form.**

66. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

67. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

68. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

69. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

70. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

71. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

72. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.31.1 - Sitework Allowances:

C				
	Total Allowance 5 Included in Base Bid (Bidder to calculate):			
BP #1.31.1 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed Exclusion of allowances is NOT compliant with the bid documents.				

73. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

74. **ALTERNATE BIDS** – See Specifications Sections and as further elaborated and amended below. In the spaces on the bid form, indicate the following alternate pricing as may be applicable to your scope of work. Also, reference Specifications for additional information:

Alternate No.	Description	Price
1	**Raised Garden Planter:** Add to the Base Bid the labor, material, and equipment for the provision and installation of the raised planter located South of the addition as indicated on Drawings CS101 and CS502.	**ADD**
2	**Exterior Cornice, Fascia, and Soffit Repairs:** Add to the Base Bid the labor, material, and equipment for the repairs to the existing exterior cornice, fascia, and soffit where indicated by Demolition Note 6.06. Refer to Section 062013 "Exterior Finish Carpentry" for additional information.	**ADD**
3	**Sheet Flooring:** Add to the Base Bid the labor, material, and equipment for the provision and installation of sheet flooring instead of vinyl composition flooring excluding corridors; therefore **VCT-2** to be **SF-1** and **VCT-3** to be **SF-2**. Work to include all necessary preparation and components for a complete installation. Refer to Section 096516 "Resilient Sheet Flooring" for additional information. **VCT-1** to remain where indicated.	**ADD**
4	**Pre-K Cabinetry at Bay Windows:** Add to the Base Bid the labor, material, and equipment for the provision and installation of 6 linear feet (plus or minus) of base and upper cabinets on each side of the bay window in Pre-K classrooms. Refer to Typical Details 3/A800 and 1/A801. Finishes are to match Kindergarten classrooms. Work to include all necessary components for a complete and working installation. Refer to individual sections for additional information. Existing cabinetry to remain as Base Bid.	**ADD**
5	**Stage Shelving Units:** Add to the Base Bid the labor, material, and equipment for the provision and installation of metal storage shelving where indicated on Drawings. Work to include all necessary components for a complete installation. Refer to Section 105613 "Metal Storage Shelving" for additional information.	**ADD**
6	**Lintel Replacement:** Deduct from the Base Bid the replacement of existing steel lintels with new at windows where indicated by Demolition Note 5.01. Base Bid to still include sanding, priming, and painting of lintel.	**DEDUCT**
7	**Roof Replacement – Part 'A' Shingles:** Deduct from the Base Bid the removal and replacement of the existing asphalt shingles with new, including all integral gutter work, in Part 'A' of the Drawings. Existing shingles and gutters will remain except where the new connector of Part 'D' meets the existing building in Part 'A'.	**DEDUCT**

END BID PACKAGE #1.31.1 – SITEWORK

Scope of Work:

BID PACKAGE #1.32.2 – LANDSCAPING (SA)

1. This Bid Package Scope of work includes performing all **FINAL TOPSOIL PREPARATION, PLANTINGS, PLANTING SOILS, LAWNS AND GRASSES, LANDSCAPE MAINTENANCE, ARBORICULTURE AND ALL ASSOCIATED WORK** In accordance with the Contract Documents enumerate herein prepared by SP+A (Architect), their Consultants, and Downes Construction (Construction Manager).

2. Furnish all labor, material, and equipment necessary to complete all work that is described in the following Sections of the Specifications or is shown on the drawings and relates to one of the following Specification Sections but is not referenced in a Specification Section.

Division/Spec Section	Description	Dated
Division 00 /Specs. Sections	**Procurement and Contract Requirements**	
All Sections:	This Subcontractor is responsible for the Downes Project Manual and its complete contents as it relates to completing this scope of work.	03/19/2025
Division 01 / Sections:	**General Requirements**	
All Sections:	This Subcontractor is responsible for all sections in this division as it relates to completing this scope of work.	03/19/2025
Division 02 / Sections:	**Existing Conditions**	
024119	Selective Demolition*	03/19/2025
Division 32/ Sections:	**Exterior Improvements***	
329000	Planting	03/19/2025
329100	Planting Soils	03/19/2025
329200	Lawns and Grasses	03/19/2025
329353	Landscape Maintenance	03/19/2025
329400	Arboriculture	03/19/2025

Asterisk * = Limited scope under this package. See below for details.

SPECIFIC

3. **SET-ASIDE (SA) -** This Bid Package is set-aside for pre-approved Minority and Women Owned Business Enterprises. A Bid Bond and 100% Performance & Labor and Material Payment Bond is required.

4. **PHASING -** The renovations and additions Old Greenwich School will be divided into six (6) separate phases and subsequent sub-phases in order to maintain school operations throughout construction. All work shall be performed in such a manner to support and maintain school operations and will be closely coordinated with the Construction Manager and appropriate School Administration. Shutdowns and "tie-ins" of all utility services will be scheduled in advance with the Construction Manager during hours that minimize or eliminate any impact to school operations. Shut-down of systems affecting school operations are not allowed, and must be scheduled "off-hours." Each MEP/FA Subcontractor is responsible to relocate, support, remove, re-install, maintain and ensure continuous operation of existing infrastructure. MEP/FA trades shall identify all systems to remain prior to demolition. MEP/FA trades shall make separation of systems in coordination with their scope of work. Demolition contractor shall be responsible for the mass removal of MEP/FA systems after disconnection / separation work is completed. All work shall be performed within construction areas designated by, 1 hour rated assemblies. Any work in common areas of the building shall be performed when the building is unoccupied by staff and students. (shift work and weekends) All costs associated shall be included base bid by each and every Subcontractor. Refer to the Phasing Narrative and Phasing Plans provided for additional information.

5. **QUALIFICATION STATEMENT –** Any subcontractor bidding on this scope of work shall provide sufficient evidence of completion of equivalent size/scope of municipal or state projects within the past 5 years in order to be eligible to submit pricing for the scope of work described within. Provide sufficient documentation and a project list attached to your bid form for documentation purposes to ensure your firm can complete this scope of work. Failure to do so could result in rejection of your bid(s). Refer to AIA A305 form for inclusion as part of your bid.

6. **BACKGROUND CHECKS** - The cost of background checks and badging shall be included base bid. Refer to the Invitation to Bid and General Items – All Trade Packages for specific instructions.

7. This Subcontractor is required to attend a walk-through, or a jobsite visit and shall be fully familiar with the existing conditions. Only by doing a walk-through can the full scope of the work be determined as the bid package and bid documents indicate the intent of the project, but only through field examination can the complete type and scope of work and existing conditions be determined and quantified.

8. Topsoil will be provided and spread by the Sitework Subcontractor in accordance with the Specifications. This Subcontractor shall provide all necessary coordination as may be required for the proper planting of turfs and grasses. Final raking shall be by this Subcontractor.

9. This Subcontractor is responsible accept the previous work and elevations left by the Earthwork Subcontractor and include miscellaneous rough grade "touchups" +/- 1" (import/export materials) in order to facilitate this Scope of Work.

10. This Subcontractor shall include seeding and establishment of grass at all areas disturbed by construction activities. In some areas this will be outside the contract limit line.

11. This Subcontractor is responsible for all cleaning and protection of materials furnished as part of this Scope of Work.

12. This Subcontractor is responsible to furnish and install all required plants per planting schedule.

13. This Subcontractor is responsible to coordinate and analysis the plant list to provide substitutions at no additional costs to coordinate with fall hazard/spring hazard digging and planting and meet the Project Schedule.

14. This Subcontractor is responsible to re-establish with turf all areas disturbed by Construction activities.

15. This Subcontractor regardless of whether seeding is done "in-season" or "out-of-season" is responsible for two (2) additional slit seeding applications. This scope item does not relieve this Subcontractor of warranty and maintenance outlined in the Specifications.

16. This Subcontractor is responsible for an additional 6 months of warranty/maintenance for the seed establishment period above and beyond what is outlined in the Specifications.

17. **GUARANTEE/WARRANTEE PERIOD –** This Subcontractor shall provide full maintenance and warranties for this Scope of Work for a period of **EIGHTEEN (18) MONTHS** from the substantial completion date by phase. Signed Agreements are to be made with the Owner. Substantial Completion will be signified by the issuance of an AIA G704 form. In addition:
    1. The above-mentioned 18-month warranty is in addition to all Special Warranties identified in the Contract Documents.
    2. This Subcontractor shall warrant that the equipment, materials, and workmanship are of excellent quality and new and that the work shall be free from defects not inherent in the quality required or permitted and that the Work confirms to the Contract Documents.
    3. Provide all necessary extended maintenance agreements, warranties, and guarantees to account for the time period from start-up to substantial completion. This is in addition to the contractually required maintenance agreements, warranties, and guarantees.
    4. The Owner's warranty (including all warranties specified) shall be exactly as specified and shall not commence until the final acceptance date.
    5. All materials and equipment are to be "like new" prior to turnover to Owner. Signed Agreements are to be made with the Owner, if applicable.
    6. If the project is Phased and if agreeable to the Architect and Owner, a partial Substantial Completion for the phases will be established signifying the start of Guarantees/Warrantees.
    7. Provide additional and special Guarantees/Warrantees as may be required per the Specifications.
    8. This Subcontractor is responsible for providing maintenance of all materials and equipment installed under this scope of work until the project substantial completion date.
    9. This Subcontractor is responsible for presenting the Owner with all special maintenance contracts/agreements required and specified within the Contract Documents prior to substantial completion.

10. This Subcontractor acknowledges they will provide a full investigation of any warranty claim made by the Owner and shall provide any means / methods required in the field to review such claims at no additional cost.
11. This Subcontractor is required to participate in any collaborative effort required with other trades regarding warranty claims made by the Owner at no additional cost.
12. This Subcontractor shall be responsible for the cost to repair or replace any damage created by faulty work or warranty issues with their work that affected the finished and completed project.

18. Project closeout documentation, O&M's, as-built drawings, owner turnover items, and training will be completed by phase.

19. In reference to the Specifications Sections marked with asterisk (*) under Item #2 above please find the following scope clarifications:

Section	Description
024119	Selective Demolition*
329116	Topsoil and Planting Mix*

20. This Subcontractor shall specifically **EXCLUDE** the following:

21. The above-listed items are NOT intended to be an all-inclusive listing of the scope of work required to be performed by this Subcontractor but merely to highlight major items of work. It is this Subcontractor's sole responsibility to review all drawings, specifications, and other contract documents in order to include a complete scope.

22. **BID BREAKDOWN** - This Subcontractor shall provide the following breakdown of their bid in the designated spaces on the Bid Form.

BID BREAKDOWN:			
Description of area of work	**Quantity**	**Unit**	**Value**
Lawns and Grasses	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Trees & Plantings	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Mulch Areas	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Stone Mulch Maintenance Strip	Provided by the bidder. Fill in on bid form.	LS	$ Provided by bidder. Fill in on bid form.
Lump Sum Bid Total:		**LS**	**$ Provided by bidder. Fill in on bid form.**

23. **STARTUP CHECKLIST** - This Subcontractor will not be allowed to begin work on the project until the following items have been submitted: Executed Contract, Performance and Payment Bonds, Certificate of Insurance in accordance with the contract documents, Project Specific Safety Plan including SDS sheets, Job Hazard Analysis and other such information requested by Downes or required by the contract documents. Downes Construction is not responsible for any associated costs incurred prior to submission and/or execution of these items.

24. **SUBMITTALS** – Reference Supplemental Instructions Paragraph G. This Subcontractor shall expedite state and federal notifications and submittals associated with the abatement and PCB removal immediately upon the receipt of a notice to proceed.

25. **SCHEDULE** – The schedule included with the bidding documents is provided to give the bidder a general time limit as to when their scope of work will take place. Changes to this schedule during construction will not be grounds for any change orders or claims. This Subcontractor is responsible for providing the Construction Manager a detailed schedule including submittals, deliveries, and man-loading. **This Subcontractor is to understand that this project is a "fast-track" project and they will be held in strict compliance with the time limits included in the preliminary baseline schedule.**

    WORK HOURS TO BE INCLUDED IN BASE BID: All Subcontractors are required to work a six (6) day work week. Full crews are to be included. At the conclusion of the workday Friday, if there is work still to be performed by the Trade Contractor, then that contractor will be required to work Saturday. Associated premium time is to be included in the base bid.

26. **CHANGE ORDERS –** Reference Supplemental Instructions Paragraph I.

27. **LABOR AND EQUIPMENT RATES** – Reference Supplemental Instructions Paragraph H.

28. **Liquidated Damages** per section 6.1.6 AIA133 – 2019 will be assessed per schedule phases. Individual trade partners will be held accountable for any slippage that will hold up millstones & completion as shown on the schedule. It is imperative that all documents required are turnover in a timely manner as to not allow missed dates on the phased schedules. These include but are not limited to the following: Contract execution, COI's, Submittals, RFI's, Fabrication timeline, attending meetings & manpower.

29. **ALLOWANCES** – This Subcontractor shall include the following allowances in their lump sum bids. *(All allowances are only to be used when specifically indicated by the Construction Manager and it is this Subcontractors responsibility to document usage via T&M tickets submitted to the Downes Field Superintendent. Allowance expenditure submissions are required to follow the same procedures as Change Order Requests/Proposals. However, overhead and profit for allowances shall be included in the base bid and cannot be added to expenditure submissions.)* Fill in and complete allowances in the appropriate spaces on the bid form.

BP #1.32.1 – Landscaping Allowances:	
Allowance 1	

	Description	Quantity	Unit Price	Amount
Total Allowance 1 Included in Base Bid (Bidder to calculate):				
BP #1.32.1 – Confirm by checking the following box that all of the <u>above</u> allowances are included in the Base Bid as directed. Confirmed ☐ Exclusion of allowances is NOT compliant with the bid documents.				

30. **<u>UNIT PRICES</u>** – In the spaces provided on the Bid Form, indicate the following Unit Pricing requested. (Unit prices will be used to add or deduct from contract price based on project requirements). Also, reference Specifications for additional information:

No.	Description	Unit Price	Unit

SUBCONTRACT PERFORMANCE BOND FORM A

Sample

KNOW ALL MEN BY THESE PRESENTS: That

as Principal,

(Here insert the name and address, or legal title, of the Subcontractor)

hereinafter called Principal, and

, as Surety, hereinafter called Surety, are held and firmly bound unto

(Here insert the name and address, or legal title of the General Contractor)

as Obligee, hereinafter called Obligee, in the amount of

for the payment whereof Principal and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal has by written agreement dated:

entered into a subcontract with Obligee for

in accordance with drawings and specifications prepared by

(Here insert full name and title)

which subcontract is by reference made a part hereof, and is hereinafter referred to as the subcontract. NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Principal shall promptly and faithfully perform said subcontract, then this obligation shall be null and void; otherwise it shall remain in full force and effect.

Whenever Principal shall be, and be declared by Obligee to be in default under the subcontract, the Obligee having performed Obligee's obligations thereunder:

(1) Surety may promptly remedy the default subject to the provisions of paragraph 3 herein, or;

(2) Obligee after reasonable notice to Surety may, or Surety upon demand of Obligee may arrange for the performance of Principal's obligation under the subcontract subject to the provisions of paragraph 3 herein;

(3) The balance of the subcontract price, as defined below, shall be credited against the reasonable cost of completing performance of the subcontract. If completed by the Obligee, and the reasonable cost exceeds the balance of the subcontract price the Surety shall pay the Obligee such excess, but in no event shall the aggregate liability of the Surety exceed the amount of this bond. If the Surety arranges completion or remedies the default, that portion of the balance of the subcontract price as may be required to complete the subcontract or remedy the default and to reimburse the Surety for its outlays shall be paid to the Surety at the times and in the manner as said sums would have been payable to Principal had there been no default under the subcontract. The term "balance of the subcontract price," as used in this paragraph, shall mean the total amount payable by Obligee to Principal under the subcontract and any amendments thereto, less the amounts heretofore properly paid by Obligee under the subcontract.

Any suit under this bond must be instituted before the expiration of two years from date on which final payment under the subcontract falls due.

No right of action shall accrue on this bond to or for the use of any person or corporation other than the Obligee named herein or the heirs, executors, administrators or successors of the Obligee.

Signed and sealed this day of , 2011 .

which subcontract is by reference made a part hereof, and is hereafter referred to as the subcontract. NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that if the Principal shall promptly make payments to all claimants as hereinafter defined, for all labor and material used or reasonably required for use in the performance of the subcontract, then this obligation shall be void; otherwise it shall remain in full force and effect subject, however, to the following conditions:

(1) A claimant is defined as one having a direct contract with the Principal for labor, material, or both, used or reasonably required for use in the performance of the contract, labor and material being construed to include that part of water, gas, power, light, heat, oil, gasoline, telephone service or rental of equipment directly applicable to the subcontract.

(2) The above-named Principal and Surety hereby jointly and severally agree with the Obligee that every claimant as herein defined, who has not been paid in full before the expiration of a period of ninety (90) days after the date on which the last of such claimant's work or labor was done or performed, or materials were furnished by such claimant, may sue on this bond for the use of such claimant, prosecute the suit to final judgment for such sum or sums as may be justly due claimant, and have execution thereon. The Obligee shall not be liable for the payment of any costs or expenses of any such suit.

(3) No suit or action shall be commenced hereunder by any claimant,

(a) After the expiration of one (1) year following the date on which Principal ceased work on said subcontract it being understood, however, that if any limitation embodied in this bond is prohibited by any law controlling the construction hereof such limitation shall be deemed to be amended so as to be equal to the minimum period of limitation permitted by such law.

(b) Other than in a state court of competent jurisdiction in and for the county or other political subdivision of the state in which the project, or any part thereof, is situated, or in the United States District Court for the district in which the project, or any part thereof, is situated, and not elsewhere.

(4) The amount of this bond shall be reduced by and to the extent of any payment or payments made in good faith hereunder.

Signed and sealed this day of , 2011 .

DUAL OBLIGEE RIDER

Sample

This Rider is to be attached to and forms a part of Performance Bond No. issued by , (hereinafter referred to as "Surety"), as Surety, on the day of , 20 (hereinafter referred to as "Bond").

WHEREAS, on or about the day of , 20 , (hereinafter called the "Principal"), entered into a written agreement with (hereinafter called the "Primary Obligee") for the construction of the (hereinafter called the "Contract"); and

WHEREAS, the Principal and the Surety executed and delivered to said Primary Obligee the Bond in connection with the Contract; and

WHEREAS, the Primary Obligee has requested the Principal and the Surety to execute and deliver this Rider.

NOW, THEREFORE, the undersigned hereby agree and stipulate that shall be added to said bond as a named obligee (hereinafter referred to as "Additional Obligee"), subject to the conditions set forth below:

1. The Surety shall not be liable under the Bond to the Primary Obligee, the Additional Obligee, or any of them, unless the Primary Obligee, the Additional Obligee, or any of them, shall make payments to the Principal (or in the case the Surety arranges for completion of the Contract, to the Surety) strictly in accordance with the terms of said Contract as to payments and shall perform all other obligations to be performed under said Contract at the time and in the manner therein set forth.

2. The aggregate liability of the Surety under the Bond, to any or all of the obligees (Primary and Additional Obligees), as their interests may appear, is limited to the penal sum of the Bond; the Additional Obligee's rights hereunder are subject to the same defenses Principal and/or Surety have against the Primary Obligee, and the total liability of the Surety shall in no event exceed the amount recoverable from the Principal by the Primary Obligee under the Contract. At the Surety's election, any payment due under the performance bond may be made by joint check payable to one or more of the obligees.

3. The Surety may, at its option, make any payments under said Performance Bond by check issued jointly to all of the obligees.

Except as herein modified, the Bond shall be and remains in full force and effect.

Signed this day of , 20 .

AIA® Document A305™ – 2020 Exhibit A

General Information

This Exhibit is part of the Contractor's Qualification Statement, submitted by and dated the day of in the year
(In words, indicate day, month and year.)

§ A.1 ORGANIZATION
§ A.1.1 Name and Location
§ A.1.1.1 Identify the full legal name of your organization.

§ A.1.1.2 List all other names under which your organization currently does business and, for each name, identify jurisdictions in which it is registered to do business under that trade name.

§ A.1.1.3 List all prior names under which your organization has operated and, for each name, indicate the date range and jurisdiction in which it was used.

§ A.1.1.4 Identify the address of your organization's principal place of business and list all office locations out of which your organization conducts business. If your organization has multiple offices, you may attach an exhibit or refer to a website.

§ A.1.2 Legal Status
§ A.1.2.1 Identify the legal status under which your organization does business, such as sole proprietorship, partnership, corporation, limited liability corporation, joint venture, or other.

.1 If your organization is a corporation, identify the state in which it is incorporated, the date of incorporation, and its four highest-ranking corporate officers and their titles, as applicable.

.2 If your organization is a partnership, identify its partners and its date of organization.

.3 If your organization is individually owned, identify its owner and date of organization.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

User Notes: (1869768266)

.4 If the form of your organization is other than those listed above, describe it and identify its individual leaders:

§ A.1.2.2 Does your organization own, in whole or in part, any other construction-related businesses? If so, identify and describe those businesses and specify percentage of ownership.

§ A.1.3 Other Information

§ A.1.3.1 How many years has your organization been in business?

§ A.1.3.2 How many full-time employees work for your organization?

§ A.1.3.3 List your North American Industry Classification System (NAICS) codes and titles. Specify which is your primary NAICS code.

§ A.1.3.4 Indicate whether your organization is certified as a governmentally recognized special business class, such as a minority business enterprise, woman business enterprise, service disabled veteran owned small business, woman owned small business, small business in a HUBZone, or a small disadvantaged business in the 8(a) Business Development Program. For each, identify the certifying authority and indicate jurisdictions to which such certification applies.

§ A.2 EXPERIENCE

§ A.2.1 Complete Exhibit D to describe up to four projects, either completed or in progress, that are representative of your organization's experience and capabilities.

§ A.2.2 State your organization's total dollar value of work currently under contract.

§ A.2.3 Of the amount stated in Section A.2.2, state the dollar value of work that remains to be completed:

§ A.2.4 State your organization's average annual dollar value of construction work performed during the last five years.

§ A.3 CAPABILITIES

§ A.3.1 List the categories of work that your organization typically self-performs.

§ A.3.2 Identify qualities, accreditations, services, skills, or personnel that you believe differentiate your organization from others.

User Notes: (1869768266)

§ A.3.3 Does your organization provide design collaboration or pre-construction services? If so, describe those services.

§ A.3.4 Does your organization use building information modeling (BIM)? If so, describe how your organization uses BIM and identify BIM software that your organization regularly uses.

§ A.3.5 Does your organization use a project management information system? If so, identify that system.

§ A.4 REFERENCES

§ A.4.1 Identify three client references:
(Insert name, organization, and contact information)

§ A.4.2 Identify three architect references:
(Insert name, organization, and contact information)

§ A.4.3 Identify one bank reference:
(Insert name, organization, and contact information)

§ A.4.4 Identify three subcontractor or other trade references:
(Insert name, organization, and contact information)

AIA® Document A305™ – 2020 Exhibit B

Financial and Performance Information

This Exhibit is part of the Contractor's Qualification Statement, submitted by and dated the day of in the year
(In words, indicate day, month and year.)

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

§ B.1 FINANCIAL

§ B.1.1 Federal tax identification number:

§ B.1.2 Attach financial statements for the last three years prepared in accordance with Generally Accepted Accounting Principles, including your organization's latest balance sheet and income statement. Also, indicate the name and contact information of the firm that prepared each financial statement.

§ B.1.3 Has your organization, its parent, or a subsidiary, affiliate, or other entity having common ownership or management, been the subject of any bankruptcy proceeding within the last ten years?

§ B.1.4 Identify your organization's preferred credit rating agency and identification information.
(Identify rating agency, such as Dun and Bradstreet or Equifax, and insert your organization's identification number or other method of searching your organization's credit rating with such agency.)

§ B.2 DISPUTES AND DISCIPLINARY ACTIONS

§ B.2.1 Are there any pending or outstanding judgments, arbitration proceedings, bond claims, or lawsuits against your organization, its parent, or a subsidiary, affiliate, or other entity having common ownership or management, or any of the individuals listed in Exhibit A, Section 1.2, in which the amount in dispute is more than $75,000?
(If the answer is yes, provide an explanation.)

§ B.2.2 In the last five years has your organization, its parent, or a subsidiary, affiliate, or other entity having common ownership or management:
(If the answer to any of the questions below is yes, provide an explanation.)

.1 failed to complete work awarded to it?

.2 been terminated for any reason except for an owners' convenience?

AIA® Document A305™ – 2020 Exhibit C

Project Specific Information

This Exhibit is part of the Contractor's Qualification Statement, submitted by and dated the day of in the year
(In words, indicate day, month and year.)

PROJECT:
(Name and location or address.)

CONTRACTOR'S PROJECT OFFICE:
(Identify the office out of which the contractor proposes to perform the work for the Project.)

TYPE OF WORK SOUGHT
(Indicate the type of work you are seeking for this Project, such as general contracting, construction manager as constructor, design-build, HVAC subcontracting, electrical subcontracting, plumbing subcontracting, etc.)

CONFLICT OF INTEREST
Describe any conflict of interest your organization, its parent, or a subsidiary, affiliate, or other entity having common ownership or management, or any of the individuals listed in Exhibit A Section 1.2, may have regarding this Project.

§ C.1 PERFORMANCE OF THE WORK

§ C.1.1 When was the Contractor's Project Office established?

§ C.1.2 How many full-time field and office staff are respectively employed at the Contractor's Project Office?

§ C.1.3 List the business license and contractor license or registration numbers for the Contractor's Project Office that pertain to the Project.

§ C.1.4 Identify key personnel from your organization who will be meaningfully involved with work on this Project and indicate (1) their position on the Project team, (2) their office location, (3) their expertise and experience, and (4) projects similar to the Project on which they have worked.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

AIA Document A305™ – 2020 Exhibit C. Copyright © 2020 by The American Institute of Architects. All rights reserved. User Notes: (1514549102)

§ C.1.5 Identify portions of work that you intend to self-perform on this Project.

§ C.1.6 To the extent known, list the subcontractors you intend to use for major portions of work on the Project.

§ C.2 EXPERIENCE RELATED TO THE PROJECT

§ C.2.1 Complete Exhibit D to describe up to four projects performed by the Contractor's Project Office, either completed or in progress, that are relevant to this Project, such as projects in a similar geographic area or of similar project type. If you have already completed Exhibit D, but want to provide further examples of projects that are relevant to this Project, you may complete Exhibit E.

§ C.2.2 State the total dollar value of work currently under contract at the Contractor's Project Office:

§ C.2.3 Of the amount stated in Section C.2.2, state the dollar value of work that remains to be completed:

§ C.2.4 State the average annual dollar value of construction work performed by the Contractor's Project Office during the last five years.

§ C.2.5 List the total number of projects the Contractor's Project Office has completed in the last five years and state the dollar value of the largest contract the Contractor's Project Office has completed during that time.

§ C.3 SAFETY PROGRAM AND RECORD

§ C.3.1 Does the Contractor's Project Office have a written safety program?

§ C.3.2 List all safety-related citations and penalties the Contractor's Project Office has received in the last three years.

§ C.3.3 Attach the Contractor's Project Office's OSHA 300a Summary of Work-Related Injuries and Illnesses form for the last three years.

§ C.3.4 Attach a copy of your insurance agent's verification letter for your organization's current workers' compensation experience modification rate and rates for the last three years.

§ C.4 INSURANCE

§ C.4.1 Attach current certificates of insurance for your commercial general liability policy, umbrella insurance policy, and professional liability insurance policy, if any. Identify deductibles or self-insured retentions for your commercial general liability policy.

§ C.4.2 If requested, will your organization be able to provide property insurance for the Project written on a builder's risk "all-risks" completed value or equivalent policy form and sufficient to cover the total value of the entire Project on a replacement cost basis?

Minimum Rates and Classifications
for Building Construction

ID#: 25-3264

Connecticut Department of Labor
Wage and Workplace Standards Division

By virtue of the authority vested in the Labor Commissioner under provisions of Section 31-53 of the General Statutes of Connecticut, as amended, the following are declared to be the prevailing rates and welfare payments and will apply only where the contract is advertised for bid within 20 days of the date on which the rates are established. Any contractor or subcontractor not obligated by agreement to pay to the welfare and pension fund shall pay this amount to each employee as part of his/her hourly wages.

Project Number: Project Town: Greenwich
State#: FAP#:
Project: Additions and Alteration to Old Greenwich School

CLASSIFICATION	Hourly Rate	Benefits
1b) Asbestos/Toxic Waste Removal Laborers: Asbestos removal and encapsulation (except its removal from mechanical systems which are not to be scrapped), toxic waste removers, blasters.**See Laborers Group 7**		
1c) Asbestos Worker/Heat and Frost Insulator	47.06	33.30
2) Boilermaker	48.21	30.01
3a) Bricklayer, Cement Mason, Concrete Finisher (including caulking), Stone Masons	42.61	35.92 + a
3b) Tile Setter	38.81	32.20
3c) Tile and Stone Finishers	32.0	26.69
3d) Marble & Terrazzo Finishers	33.0	25.69
3e) Plasterer	44.52	29.63

As of: March 30, 2025

------LABORERS------

4) Group 1: General laborers, carpenter tenders, concrete specialists, wrecking laborers and fire watchers.	34.5	27.26
4) Group 1a: Acetylene Burners (Hours worked with a torch)	35.5	27.26
4a) Group 2: Mortar mixers, plaster tender, power buggy operators, powdermen, fireproofer/mixer/nozzleman (Person running mixer and spraying fireproof only).	34.75	27.26
4b) Group 3: Jackhammer operators/pavement breaker, mason tender (brick), mason tender (cement/concrete), forklift operators and forklift operators (masonry).	35.0	27.26
4c) **Group 4: Pipelayers (Installation of water, storm drainage or sewage lines outside of the building line with P6, P7 license) (the pipelayer rate shall apply only to one or two employees of the total crew who primary task is to actually perform the mating of pipe sections) P6 and P7 rate is $26.80.	35.5	27.26
4d) Group 5: Air track operator, sand blaster and hydraulic drills.	35.25	27.26
4e) Group 6: Blasters, nuclear and toxic waste removal.	37.5	27.26
4f) Group 7: Asbestos/lead removal and encapsulation (except it's removal from mechanical systems which are not to be scrapped).	37.5	27.26
4g) Group 8: Bottom men on open air caisson, cylindrical work and boring crew.	35.0	27.26
4h) Group 9: Top men on open air caisson, cylindrical work and boring crew.	34.5	27.26

4i) Group 10: Traffic Control Signalman	20.7	27.26
4j) Group 11: Toxic Waste Removers A or B With PPE	37.5	27.26
5) Carpenter, Acoustical Ceiling Installation, Soft Floor/Carpet Laying, Metal Stud Installation, Form Work and Scaffold Building, Drywall Hanging, Modular-Furniture Systems Installers, Lathers, Piledrivers, Resilient Floor Layers.	39.54	28.68
5a) Millwrights	43.25	29.13
6) Electrical Worker (including low voltage wiring) (Trade License required: E1,2 L-5,6 C-5,6 T-1,2 L-1,2 V-1,2,7,8,9)	44.0	42.745
7a) Elevator Mechanic (Trade License required: R-1,2,5,6)	66.72	40.035+a+b
-----LINE CONSTRUCTION----		
Groundman	26.5	6.5% + 9.00
Linemen/Cable Splicer	48.19	6.5% + 22.00
8) Glazier (Trade License required: FG-1,2)	41.63	25.80+ a
9) Ironworker, Ornamental, Reinforcing, Structural, and Precast Concrete Erection	45.25	41.27 + a
----OPERATORS----		

Group 1: Crane Handling or Erecting Structural Steel or Stone; Hoisting Engineer (2 drums or over). (Trade License Required)	55.42	28.80 + a
Group 1a: Front End Loader (7 cubic yards or over); Work Boat 26 ft. and Over	50.79	28.80 + a
Group 2: Cranes (100 ton rate capacity and over); Bauer Drill/Caisson. (Trade License Required)	55.03	28.80 + a
Group 2a: Cranes (under 100 ton rated capacity).	54.09	28.80 + a
Group 2b: Excavator over 2 cubic yards; Pile Driver ($3.00 premium when operator controls hammer)	50.4	28.80 + a
Group 3: Excavator; Gradall; Master Mechanic; Hoisting Engineer (all types of equipment where a drum and cable are used to hoist or drag material regardless of motive power of operation), Rubber Tire Excavator (Drott-1085 or similar);Grader Operator; Bulldozer Finegrade. (slopes, shaping, laser or GPS, etc.). (Trade License Required)	49.45	28.80 + a
Group 4: Trenching Machines; Lighter Derrick; CMI Machine or Similar; Koehring Loader (Skooper); Goldhofer.	48.97	28.80 + a
Group 5: Specialty Railroad Equipment; Asphalt Spreader, Asphalt Reclaiming Machine; Line Grinder; Concrete Pumps; Drills with Self Contained Power Units; Boring Machine; Post Hole Digger; Auger; Pounder; Well Digger; Milling Machine (over 24 mandrel).	48.22	28.80 + a
Group 5 continued: Side Boom; Combination Hoe and Loader; Directional Driller.	48.22	28.80 + a
Group 6: Front End Loader (3 up to 7 cubic yards); Bulldozer (rough grade dozer).	47.83	28.80 + a
Group 7: Asphalt Roller; Concrete Saws and Cutters (ride on types); Vermeer Concrete Cutter; Stump Grinder; Scraper; Snooper; Skidder; Milling Machine (24" and under mandrel).	47.4	28.80 + a

As of: March 30, 2025

Group 8: Mechanic; Grease Truck Operator; Hydroblaster; Barrier Mover; Power Stone Spreader; Welding; Work Boat Under 26 ft.; Transfer Machine; Rigger Foreman.	46.9	28.80 + a
Group 9: Front End Loader (under 3 cubic yards); Skid Steer Loader regardless of attachments; (Bobcat or Similar); Forklift, Power Chipper; Landscape Equipment (including Hydroseeder); Vacuum Excavation Truck and Hydrovac Excavation Truck (27 HG pressure or greater).	46.35	28.80 + a
Group 10: Vibratory hammer; ice machine; diesel and air, hammer, etc.	43.77	28.80 + a
Group 11: Conveyor, earth roller, power pavement breaker (whiphammer), robot demolition equipment.	43.77	28.80 + a
Group 12: Wellpoint Operator.	43.69	28.80 + a
Group 13: Compressor Battery Operator.	42.97	28.80 + a
Group 14: Elevator Operator; Tow Motor Operator (solid tire no rough terrain).	41.52	28.80 + a
Group 15: Generator Operator; Compressor Operator; Pump Operator; Welding Machine Operator; Heater Operator.	41.01	28.80 + a
Group 16: Maintenance Engineer.	40.19	28.80 + a
Group 17: Portable Asphalt Plant Operator; Portable Crusher Plant Operator; Portable Concrete Plant Operator; Portable Grout Plant Operator; Portable Water Filtration Plant Operator.	45.63	28.80 + a
Group 18: Power Safety Boat; Vacuum Truck; Zim Mixer; Sweeper; (Minimum for any job requiring a CDL license); Rigger; Signalman.	42.57	28.80 + a

As of: March 30, 2025

Surveyor: Chief of Party	45.87	28.80 + a
Surveyor: Assistant Chief of Party	42.3	28.80 + a
Surveyor: Instrument Man	40.7	28.80 + a
Surveyor: Rodman or Chainman	35.03	28.80 + a
------PAINTERS (Including Drywall Finishing)------		
10a) Brush and Roller	38.07	25.80
10b) Taping Only/Drywall Finishing	38.82	25.80
10c) Paperhanger and Red Label	38.57	25.80
10e) Blast and Spray	41.07	25.80
11) Plumber (excluding HVAC pipe installation) (Trade License required: P-1,2,6,7,8,9 J-1,2,3,4 SP-1,2)	49.58	35.25
12) Well Digger, Pile Testing Machine	37.26	24.05 + a
Roofer: Cole Tar Pitch	45.0	24.85 + a
Roofer: Slate, Tile, Composition, Shingles, Singly Ply and Damp/Waterproofing	43.5	24.85 + a

15) Sheetmetal Worker (Trade License required for HVAC and Ductwork: SM-1,SM-2,SM-3,SM-4,SM-5,SM-6)	53.22	46.19
16) Pipefitter (Including HVAC work) (Trade License required: S-1,2,3,4,5,6,7,8 B-1,2,3,4 D-1,2,3,4, G-1, G-2, G-8 & G-9)	49.58	35.25
------TRUCK DRIVERS------		
17a) 2 Axle, Helpers	33.16	32.36 + a
17b) 3 Axle, 2 Axle Ready Mix	33.27	32.36 + a
17c) 3 Axle Ready Mix	33.33	32.36 + a
17d) 4 Axle	33.39	32.36 + a
17e) 4 Axle Ready Mix	33.44	32.36 + a
17f) Heavy Duty Trailer (40 Tons and Over)	35.66	32.36 + a
17g) Specialized Earth Moving Equipment (Other Than Conventional Type on-the-Road Trucks and Semi-Trailers, Including Euclids)	33.44	32.36 + a
17h) Heavy Duty Trailer up to 40 tons	34.39	32.36 + a
17i) Snorkle Truck	33.54	32.36 + a
18) Sprinkler Fitter (Trade License required: F-1,2,3,4)	49.98	32.85 + a

19) Theatrical Stage Journeyman	25.76	7.34

Welders: Rate for craft to which welding is incidental.

Surveyors: Hazardous material removal: $3.00 per hour premium.

*Note: Hazardous waste removal work receives additional $1.25 per hour for truck drivers.

**Note: Hazardous waste premium $3.00 per hour over classified rate

Crane with 150 ft. boom (including jib) - $1.50 extra
Crane with 200 ft. boom (including jib) - $2.50 extra
Crane with 250 ft. boom (including jib) - $5.00 extra
Crane with 300 ft. boom (including jib) - $7.00 extra
Crane with 400 ft. boom (including jib) - $10.00 extra

All classifications that indicate a percentage of the fringe benefits must be calculated at the percentage rate times the "base hourly rate".

Apprentices duly registered under the Commissioner of Labor's regulations on "Work Training Standards for Apprenticeship and Training Programs" Section 31-51-d-1 to 12, are allowed to be paid the appropriate percentage of the prevailing journeymen hourly base and the full fringe benefit rate, providing the work site ratio shall not be less than one full-time journeyperson instructing and supervising the work of each apprentice in a specific trade.

The Prevailing wage rates applicable to this project are subject to annual adjustments each July 1st for the duration of the project.
Each contractor shall pay the annual adjusted prevailing wage rate that is in effect each July 1st, as posted by the Department of Labor.
It is the contractor's responsibility to obtain the annual adjusted prevailing wage rate increases directly from the Department of Labor's website.
The annual adjustments will be posted on the Department of Labor's Web page: www.ct.gov/dol. For those without internet access, please contact the division listed below.
The Department of Labor will continue to issue the initial prevailing wage rate schedule to the Contracting Agency for the project.
All subsequent annual adjustments will be posted on our Web Site for contractor access.
Contracting Agencies are under no obligation pursuant to State labor law to pay any increase due to the annual adjustment provision.

Effective October 1, 2005 - Public Act 05-50: any person performing the work of any mechanic, laborer, or worker shall be paid prevailing wage

All Person who perform work ON SITE must be paid prevailing wage for the appropriate mechanic, laborer, or worker classification.

All certified payrolls must list the hours worked and wages paid to All Persons who perform work ON SITE regardless of their ownership i.e.: (Owners, Corporate Officers, LLC Members, Independent Contractors, et. al)

Reporting and payment of wages is required regardless of any contractual relationship alleged to exist between the contractor and such person.

As of: March 30, 2025

~~Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clause (29 CFR 5.5 (a) (1) (ii)).

Please direct any questions which you may have pertaining to classification of work and payment of prevailing wages to the Wage and Workplace Standards Division, telephone (860)263-6790.

AIA® Document A401® – 2017

Standard Form of Agreement Between Contractor and Subcontractor

AGREEMENT made as of the **00** day of **April** in the year **Two Thousand Twenty-Five**
(In words, indicate day, month and year.)

BETWEEN the Contractor:
(Name, legal status, address and other information)

Downes Construction Company, LLC
200 Stanley Street
New Britain, CT 06051

and the Subcontractor:
(Name, legal status, address and other information)

ABC Construction Inc.
123 Main Street
Somewhere, CT 00000

BP 0.00.0 – SOME WORK

The Contractor has made a contract for construction (hereinafter, the Prime Contract) dated: 9/22/

with the Owner:
(Name, legal status, address and other information)

Board of Education of the Town of Greenwich
acting by and through the Old Greenwich School Building Committee
290 Greenwich Avenue
Greenwich, CT 06830

for the following Project:
(Name, location and detailed description)

Additions and Alterations to Old Greenwich School
285 Sound Beach Road
Old Greenwich, CT 06870

The Prime Contract provides for the furnishing of labor, materials, equipment and services in connection with the construction of the Project. A copy of the Prime Contract, consisting of the Agreement Between Owner and Contractor (from which compensation amounts may be deleted), the General Conditions thereto and the other Contract Documents enumerated or incorporated therein or made Exhibits thereto, have been made available to the Subcontractor. The Prime Contract, including the General Conditions thereto, is hereby expressly incorporated by reference herein, in its entirety, and is expressly made a part hereof as restated herein. As a courtesy to Subcontractor, Contractor may, in the text of this Subcontract, direct Subcontractor's attention to certain sections and provisions of the Prime Contract. Such direction is not intended to be in lieu of Subcontractor's review of and compliance with the entirety of the Prime Contract and General Conditions thereto.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

15 ENUMERATION OF SUBCONTRACT DOCUMENTS

ARTICLE 1 THE SUBCONTRACT DOCUMENTS

§ 1.1 The Subcontract Documents consist of (1) this Agreement; (2) the Prime Contract, consisting of the Agreement between the Owner and Contractor, the General Conditions thereto and the other Contract Documents enumerated therein (see §15.2 of the Prime Contract); (3) Modifications and Amendments to the Prime Contract, whether issued before or after the execution of this Agreement, in accordance with the provisions of Article 5; (4) other documents listed in Article 15 of this Agreement; and (5) Modifications to this Subcontract issued after execution of this Agreement, in accordance with the provisions of Article 5. These documents form the Subcontract and are as fully a part of the Subcontract as if attached to this Agreement or repeated herein. The Subcontract, Prime Contract and the other Contract Documents are intended to supplement and complement each other and shall, where possible, be thus interpreted. If, however, any provision of the Subcontract irreconcilably conflicts with a provision of the Prime Contract or the other Contract Documents, the provision imposing the greater duty or obligation on the Subcontractor shall govern and apply. The correlation and intent of the Contract Documents is as set forth in §1.2 of the General Conditions to the Prime Contract.

Subcontractor acknowledges that delays resulting from changes in the work, extreme or unusual weather, changes to the sequencing of the work, material shortages, transportation, strikes, and other causes are inherent in the

construction process. Subcontractor acknowledges that it has accounted for potential and/or actual delays in its bid price(s) and agrees it shall not assert, make or bring claims for money damages as a result of any delay or hindrance it incurs or encounters. In the event that Subcontractor claims that it has been delayed or hindered, it shall submit a request for a time extension to Contractor in the manner and pursuant to the time periods set forth in the Prime Contract and in the Contract Documents. If it is determined that Subcontractor has been delayed or hindered through no fault of its own, conditioned expressly upon the approval of the Owner, the time for performance hereunder will be extended and the extension of time shall be Subcontractor's sole remedy for the delay. Under no circumstances shall the Contractor or Owner be liable to the Subcontractor for money damages resulting from any delays or hindrances.

§ 1.2 The Subcontract Documents form the Subcontract for Construction. The Subcontract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. An enumeration of the Subcontract Documents, other than Modifications to the Prime Contract or Modifications to this Subcontract issued subsequent to the execution of this Agreement, appears in Article 15.

§ 1.3 Except to the extent of a conflict with a specific term or condition contained in the Subcontract Documents, the General Conditions governing this Subcontract shall be the AIA Document A201™–2017, General Conditions of the Contract for Construction, as modified.

§ 1.4 The Subcontract may be amended or modified only by a Modification to this Subcontract. A Modification to this Subcontract is a written amendment to this Agreement signed by both parties, or as otherwise described in, and in accordance with the provisions of, Article 5.

§ 1.5 The Subcontract Documents shall not be construed to create a contractual relationship of any kind (1) between the Architect and the Subcontractor, (2) between the Owner and the Subcontractor, or (3) between any persons or entities other than the Contractor and Subcontractor. Subcontractor shall not be deemed an intended or unintended third-party beneficiary of the Prime Contract.

§ 1.6 The Contractor has made the Subcontract Documents available to the Subcontractor prior to execution of this Agreement, and thereafter, upon written request. The Contractor may charge the Subcontractor for the reasonable cost to reproduce the Subcontract Documents provided to the Subcontractor.

ARTICLE 2 MUTUAL RIGHTS AND RESPONSIBILITIES

The Contractor and Subcontractor shall be mutually bound by the terms of this Agreement and, to the extent that the provisions of AIA Document A201–2017 apply to this Agreement pursuant to Section 1.3 and provisions of the Prime Contract apply to the Work of the Subcontractor, the Contractor shall assume toward the Subcontractor all obligations and responsibilities that the Owner, under such documents, assumes toward the Contractor, and the Subcontractor shall assume toward the Contractor all obligations and responsibilities that the Contractor, under such documents, assumes toward the Owner and the Architect. The Contractor shall have the benefit of all rights, remedies, and redress against the Subcontractor that the Owner, under such documents, has against the Contractor, and the Subcontractor shall have the benefit of all rights, remedies, and redress against the Contractor that the Contractor, under such documents, has against the Owner, insofar as applicable to this Subcontract. Where a provision of such documents is inconsistent with a provision of this Agreement, this Agreement shall govern.

ARTICLE 3 CONTRACTOR

§ 3.1 General

§ 3.1.1 The Contractor is Downes Construction and is referred to throughout the Subcontract Documents as if singular in number. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all Project matters requiring the Contractor's approval or authorization. The term "Contractor" means the Contractor or the Contractor's authorized representative.

§ 3.1.2 The Contractor shall render decisions in a timely manner and in accordance with the Contractor's construction schedule.

§ 3.2 Services Provided by the Contractor

§ 3.2.1 The Contractor shall cooperate with the Subcontractor in scheduling and performing the Contractor's Work to avoid conflicts or interference in the Subcontractor's Work and shall review, and expedite written responses to,

submittals made by the Subcontractor in accordance with Section 4.2.3 and Article 5. Promptly after execution of this Agreement, the Contractor shall provide the Subcontractor with copies of the Contractor's construction schedule and schedule of submittals, together with such additional scheduling details as will enable the Subcontractor to plan and perform the Subcontractor's Work properly. The Contractor shall promptly notify the Subcontractor of subsequent changes in the construction and submittal schedules and additional scheduling details.

§ 3.2.2 The Contractor shall provide suitable areas for storage of the Subcontractor's materials and equipment during the course of the Work. Except as previously agreed upon, additional costs to the Subcontractor resulting from relocation of such storage areas at the direction of the Contractor shall be reimbursed by the Contractor.

§ 3.3 Communications

§ 3.3.1 The Contractor shall promptly make available to the Subcontractor information, including information received from the Owner, that affects the performance of this Subcontract and that becomes available to the Contractor subsequent to execution of this Subcontract. The Subcontractor shall respond promptly to communications received from Contractor.

§ 3.3.2 The Contractor shall not give instructions or orders directly to the Subcontractor's employees or to the Subcontractor's Sub-subcontractors or suppliers unless such persons are designated as authorized representatives of the Subcontractor.

§ 3.3.3 Deleted.

§ 3.3.4 If hazardous materials or substances are being used on the site by the Contractor, a subcontractor, or anyone directly or indirectly employed by them (other than the Subcontractor), and they are a type of hazardous material or substance of which an employer is required by law to notify its employees, the Contractor shall, prior to delivery to the Project site or exposure of the Subcontractor's employees to such material or substance, give notice of the chemical composition thereof to the Subcontractor in sufficient detail and time to permit the Subcontractor's compliance with such laws.

§ 3.3.5 The Contractor shall promptly notify the Subcontractor of any fault or defect in the Work under this Subcontract or nonconformity with the Subcontract Documents.

§ 3.3.6 Deleted – public property used for public purpose, no mechanic's lien rights.

§ 3.3.7 If the Contractor asserts a Claim against, or defends a Claim by, the Owner that relates to the Work of the Subcontractor, the Contractor shall promptly make available to the Subcontractor all information relating to the portion of the Claim that relates to the Work of the Subcontractor.

§ 3.4 Claims by the Contractor

§ 3.4.1 Liquidated damages, as provided for in §6.1.6 of the Prime Contract, shall be assessed against the Subcontractor, at the rate set forth in the Prime Contract, to the extent delays are caused by the Subcontractor or any person or entity for whose acts the Subcontractor may be liable, and in no case for delays or causes arising outside the scope of this Subcontract.

§ 3.4.2 The Contractor's Claims for the costs of services or materials provided due to the Subcontractor's failure to execute the Work shall require:

.1 three days' notice prior to the Contractor's providing services or materials, except in an emergency; and

.2 written compilations to the Subcontractor of services and materials provided by the Contractor and charges for such services and materials no later than the fifteenth day of the month following the Contractor's providing such services or materials.

§ 3.4.3 The Subcontractor agrees that it shall not be entitled to nor claim any cost reimbursement, compensation or damages for any delay, obstruction, acceleration, hindrance or interference to the Work except to the extent that Contractor has actually recovered corresponding cost reimbursement, compensation or damages from the Owner under the Contract Documents for such delay, obstruction hindrance or interference, and then only to the extent of the amount, if any, which Contractor on behalf of the Subcontractor, actually received from the Owner on account of such

User Notes: (1383412816)

delay, obstruction, hindrance or interference. Notwithstanding any term or provision herein to the contrary, Subcontractor expressly waives and releases all claims or rights to recover lost income and/or profit (except for profit on work actually performed), recovery of overhead (including home office overhead), and any other indirect damages, costs or expenses in any way arising out of or related to the Agreement, including the breach thereof by Contractor, consequential and incidental damages, damages for delays, idle equipment, suspension, delays, charges, acceleration, loss of efficiency or productivity disruptions and interferences with the performance of the work. The no damages for delay and no damages for impact provisions set forth in the Prime Contract are also expressly incorporated herein. The limitations on damages for delay and related damages set forth in §8.3 of the General Conditions to the Construction Manager's Agreement with the Owner are also expressly incorporated herein.

It shall be an express condition precedent to any obligation on the part of Contractor to make payment of any such cost, reimbursement, compensation or damages to the Subcontractor hereunder that Contractor shall first be determined to be entitled to such compensation on behalf of the Subcontractor and then receive such payment from Owner, and Subcontractor expressly acknowledges that Contractor is not obligated or required to pursue Subcontractor claims as against Owner if Contractor, in its sole discretion, after review of Subcontractor's claim, has deemed the claim to lack merit or be contractually barred in whole or in part. Subcontractor also agrees that any claim for, arising from, related to or due to concealed or unknown conditions shall be made in strict accordance with and governed by 3.7.4 of the General Conditions to the Prime Contract. Failure of Subcontractor to comply with 3.7.4 of the General Conditions to the Prime Contract shall be deemed a waiver of Subcontractor's claim.

§ 3.5 Contractor's Remedies

If the Subcontractor defaults or neglects to carry out the Work in accordance with this Agreement and fails within five (5) calendar days after receipt of notice from the Contractor to commence and continue correction of such default or neglect with diligence and promptness, the Contractor may, without prejudice to other remedies the Contractor may have, remedy such default or neglect and withhold, in accordance with Section 11.1.7.2, the reasonable cost thereof from current or future payments due the Subcontractor. If payments due to the Subcontractor are not sufficient to cover such amounts, the Subcontractor shall pay the difference to the Contractor. Should the Subcontractor at any time, whether before or after final payment, refuse or neglect to supply a sufficiency of skilled workers or materials of the proper quality and quantity, or fail in any respect to prosecute the Work with promptness and diligence, or cause by any act or omission the stoppage, impede, obstruct, hinder or delay of or interference with or damage to the work of Contractor or of any other contractors or subcontractors on the Project, or fail in the performance of any of the terms and provisions of this Agreement or of the other Contract Documents, or should the Architect determine that the work or any portion thereof is not being performed in accordance with the Contract Documents, or should there be filed by or against the Subcontractor a petition in bankruptcy or for an arrangement or reorganization, or should the Subcontractor become insolvent or be adjudicated a bankrupt or go into liquidation or dissolution, either voluntarily or involuntarily or under a court order, or make a general assignment for the benefit of creditors, or otherwise acknowledge insolvency, then in any of such events, each of which shall constitute a default hereunder on the Subcontractor's part, Contractor shall have the right, in addition to any other rights and remedies provided by this Agreement and the other Contract Documents or by law, after five (5) working days written notice to the Subcontractor mailed or delivered to the last known address of the latter, (a) to perform and furnish through itself or through others any such labor or materials for the Work and to deduct the cost thereof from any monies due or to become due to the Subcontractor under this Agreement, and/or (b) to terminate the employment of the Subcontractor for all or any portion of the Work, enter upon the premises and take possession, for the purpose of completing the Work, of all materials, equipment, scaffolds, tools, appliances and other items thereon, all of which the Subcontractor hereby transfers, assigns and sets over to Contractor for such purpose, and to employ any person or persons to complete the Work and provide all the labor, services, materials, equipment and other items required therefore. In case of such termination of the employment of the Subcontractor, the Subcontractor shall not be entitled to receive any further payment under this Agreement until the Work shall be wholly completed to the satisfaction of Contractor and the Architect and shall have been accepted by then, at which time, if the unpaid balance of the amount to be paid under this Agreement shall exceed the cost and expense incurred by Contractor in completing the Work, such excess shall be paid by Contractor to the Subcontractor; but if such cost and expense shall exceed such unpaid balance, then the Subcontractor and its surety, if any, shall pay the difference to Contractor. Such cost and expense shall include, not only the cost of completing the Work to the satisfaction of Contractor and the Architect and of performing and furnishing all labor, services, materials, equipment, and other items required therefore, but also all losses, damages, costs and expenses (including legal fees and disbursements incurred in connection with re-procurement, in defending claims arising from such default and in seeking recovery of all such cost and expense from the Subcontractor and/or its surety), and disbursements sustained, incurred or suffered by reason of or resulting from the Subcontractor's default.

User Notes: (1383412816)

Should Contractor take action by effectuating the provisions of this paragraph, and should it subsequently be determined that a termination effectuated by the terms of this Article was improper, such termination shall be treated as a termination for convenience.

Subcontractor, in addition to any other rights available to and duties/obligations owed by Subcontractor to Contractor hereunder, agrees to indemnify, hold harmless and defend Contractor from and against any and all claims, demands, suits, damages, judgments, liabilities, costs and expenses (including legal fees and disbursements) arising out of or related to Subcontractor's breach of any term of the Subcontract.

Under no circumstances shall Subcontractor communicate directly with or contract directly with the Owner. Any such communications or contracting constitutes intentional interference with Contractor's contractual relations with the Owner and Subcontractor acknowledges that such conduct would constitute a material breach of the Subcontract.

ARTICLE 4 SUBCONTRACTOR

§ 4.1 General

The Subcontractor is the person or entity identified as such in this Agreement and is referred to throughout the Subcontract Documents as if singular in number. The Subcontractor shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Subcontractor shall designate in writing a representative who shall have express authority to act on the Subcontractor's behalf with respect to the Project. The term "Subcontractor" means the Subcontractor or the Subcontractor's authorized representative.

§ 4.2 Execution and Progress of the Work

§ 4.2.1 For all Work the Subcontractor intends to subcontract, the Subcontractor shall enter into written agreements with Sub-subcontractors performing portions of the Work of this Subcontract by which the Subcontractor and the Sub-subcontractor are mutually bound, to the extent of the Work to be performed by the Sub-subcontractor, assuming toward each other all obligations and responsibilities that the Contractor and Subcontractor assume toward each other and having the benefit of all rights, remedies and redress each against the other that the Contractor and Subcontractor have by virtue of the provisions of this Agreement. Subcontractor acknowledges and understands that: (a) the Project is being funded, in whole or in part, by a grant from the State of Connecticut, (b) grant is being administered by the State of Connecticut Department of Administrative Services' Office of Grant Review; (c) Subcontractor is responsible for complying with all statutes, regulations, and requirements of the Office of Grant Review in order to maximize the Owner's eligibility for reimbursement of the Cost of the Work.

§ 4.2.2 The Subcontractor shall supervise and direct the Subcontractor's Work and shall cooperate with the Contractor in scheduling and performing the Subcontractor's Work to avoid conflict, delay in, or interference with the Work of the Contractor, other subcontractors, the Owner, or Separate Contractors.

§ 4.2.3 Submittals

§ 4.2.3.1 The Subcontractor shall submit Shop Drawings, Product Data, Samples, and similar submittals required by the Subcontract Documents with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Contractor or other subcontractors.

§ 4.2.3.2 By submitting Shop Drawings, Product Data, Samples, and similar submittals, the Subcontractor represents to the Contractor that the Subcontractor has (1) reviewed and approved them; (2) determined and verified materials, field measurements, and field construction criteria related thereto, or will do so; and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Subcontract Documents.

§ 4.2.4 The Subcontractor shall furnish to the Contractor periodic progress reports on the Work of this Subcontract as mutually agreed, including information on the status of materials and equipment that may be in the course of preparation, manufacture, or transit.

§ 4.2.5 The Subcontractor agrees that the Contractor and the Architect each have the authority to reject Work of the Subcontractor that does not conform to the Prime Contract. The Architect's decisions on matters relating to aesthetic effect shall be final and binding on the Subcontractor if consistent with the intent expressed in the Prime Contract.

User Notes: (1383412816)

§ 4.2.6 The Subcontractor shall pay for all materials, equipment, and labor used in connection with the performance of this Subcontract through the period covered by previous payments received from the Contractor, and shall furnish satisfactory evidence, when requested by the Contractor, to verify compliance with the above requirements.

§ 4.2.7 The Subcontractor shall take necessary precautions to properly protect the work of the Contractor, Separate Contractors, and other subcontractors from damage caused by operations under this Subcontract.

§ 4.2.8 The Subcontractor shall cooperate with the Contractor, other subcontractors, the Owner, and Separate Contractors whose work might affect the Subcontractor's Work. The Subcontractor shall participate in the preparation of coordinated drawings in areas of congestion, if required by the Prime Contract, specifically noting, and advising the Contractor of potential conflicts between the Work of the Subcontractor and that of the Contractor, other subcontractors, the Owner, or Separate Contractors.

§ 4.3 Permits, Fees, Notices, and Compliance with Laws

§ 4.3.1 The Subcontractor shall give notices and comply with applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities bearing on performance of the Work of this Subcontract. The Subcontractor shall secure and pay for permits, fees, licenses, and inspections by government agencies necessary for proper execution and completion of the Subcontractor's Work, the furnishing of which is required of the Contractor by the Prime Contract.

§ 4.3.2 Without limiting the Subcontractor's obligations to comply with all applicable laws, regulations and ordinances the Subcontractor shall comply with Federal, state, and local tax laws; social security acts; unemployment compensation acts; and workers' compensation acts, insofar as applicable to the performance of this Subcontract. Subcontractor shall also comply with Connecticut's prevailing wage laws.

§ 4.3.3 The Subcontractor's attention is especially directed to the Equal Employment requirements set forth in the Prime Contract and the statutory requirements listed therein, including those promulgated pursuant to Connecticut Public Act 15-5. The foregoing are not intended and shall not be deemed to be an all-inclusive or exhaustive list of applicable legal requirements but are expressly applicable to the Project. The Project is funded by the state of Connecticut. The Subcontractor agrees and warrants that in the performance of the contract, it will not discriminate or permit discrimination against any person or group of persons on the grounds of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, status as a veteran, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by Subcontractor that such disability prevents performance of the work involved, in any manner prohibited by the laws of the United States or of the state of Connecticut; and the Subcontractor further agrees to take affirmative action to ensure that applicants with job-related qualifications are employed and that employees are treated when employed without regard to their race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, status as a veteran, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by Subcontractor that such disability prevents performance of the work involved.

§ 4.4 Safety Precautions and Procedures

§ 4.4.1 The Subcontractor shall take reasonable safety precautions with respect to performance of this Subcontract. The Subcontractor shall comply with safety measures initiated by the Contractor and with applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities, for the safety of persons and property, in accordance with the requirements of the Prime Contract. The Subcontractor shall notify the Contractor immediately of an injury to an employee or agent of the Subcontractor which occurred at the site. Subcontractor acknowledges that the Work will be performed in a public school building and that public health, safety and security are of the utmost importance. Subcontractor shall, at all times, treat all information obtained by Subcontractor in connection with the Work and the Project as highly confidential and shall not disclose, divulge, or otherwise share such information with any third parties without the prior express written approval of Owner. Subcontractor shall also take such actions as are necessary to protect the health, safety and security of the occupants and users of the subject building in connection with the Work and the Project.

§ 4.4.2 If hazardous materials or substances are being used on the site by the Subcontractor, the Subcontractor's Sub-subcontractors, or anyone directly or indirectly employed by them, and they are a type of hazardous material or substance of which an employer is required by law to notify its employees, the Subcontractor shall, prior to delivery to the Project site or exposure of the Contractor, other subcontractors, and other employers on the site to such material or

User Notes: (1383412816)

substance, give notice of the chemical composition thereof to the Contractor in sufficient detail and time to permit compliance with the laws by the Contractor, other subcontractors, and other employers on the site.

§ 4.4.3 If reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a hazardous material or substance, including but not limited to asbestos or polychlorinated biphenyl (PCB), encountered on the site by the Subcontractor, the Subcontractor shall, upon recognizing the condition, immediately stop Work in the affected area and promptly report the condition to the Contractor in writing. When the material or substance has been rendered harmless, the Subcontractor's Work in the affected area shall resume upon written agreement of the Contractor and Subcontractor. The Subcontract Time shall be extended appropriately and the Subcontract Sum shall be increased in the amount of the Subcontractor's reasonable additional direct costs of demobilization and remobilization, which adjustments shall be accomplished as provided in Article 5 of this Agreement.

§ 4.4.4 To the fullest extent permitted by law, the Contractor shall indemnify and hold harmless the Subcontractor, the Subcontractor's Sub-subcontractors, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area if in fact the material or substance presents the risk of bodily injury or death as described in Section 4.4.3 and has not been rendered harmless, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself) except to the extent that such damage, loss, or expense is due to the fault or negligence of the party seeking indemnity.

§ 4.4.5 The Subcontractor shall reimburse the Contractor for the cost and expense the Contractor incurs (1) for remediation of a hazardous material or substance brought to the site and negligently handled by the Subcontractor or (2) where the Subcontractor fails to perform its obligations under Section 4.4.3, except to the extent that the cost and expense are due to the Contractor's fault or negligence.

§ 4.4.6 Subcontractor acknowledges that public health, safety, and security are of the utmost importance in connection with its performance of the Work. Subcontractor shall, at all times, implement and maintain commercially reasonable safety, health, and security protocol with respect to its personnel on site, including implementing best practices as defined by the United States Centers for Disease Control and state and local public health agencies. Subcontractor shall also take such actions as are necessary to protect the health, safety and security of the occupants and users of the subject property in connection with the Work and the Project, including adherence to sector guidelines, rules and Executive Orders promulgated by the State of Connecticut applicable to the construction industry.

§ 4.5 Cleaning Up

§ 4.5.1 The Subcontractor shall keep the premises and surrounding area free from accumulation of waste materials or rubbish caused by operations performed under this Subcontract. The Subcontractor shall not be held responsible for conditions caused by other contractors or subcontractors. Subcontractor's attention is directed to the requirements set forth in §§3.3.2.22 – 3.3.23 of the Prime Contract and the General Conditions to the Prime Contract, with respect to cleaning and related obligations. Subcontractor shall comply with these requirements at all times.

§ 4.5.2 As provided under Section 3.4.2, if the Subcontractor fails to clean up as provided in the Subcontract Documents, the Contractor may charge the Subcontractor for the Subcontractor's appropriate share of cleanup costs.

§ 4.6 Warranty

§ 4.6.1 The Subcontractor warrants to the Owner, Architect, and Contractor that materials and equipment furnished under this Subcontract will be of good quality and new unless the Subcontract Documents require or permit otherwise. The Subcontractor further warrants that the Work will conform to the requirements of the Subcontract Documents and will be free from defects, except for those inherent in the quality of the Work the Subcontract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Subcontractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Subcontractor, improper or insufficient maintenance, improper operation, or normal wear and tear under normal usage. If required by the Architect and Contractor, the Subcontractor shall provide satisfactory evidence as to the kind and quality of materials and equipment furnished or to be furnished. Subcontractor's attention is directed to the warranty requirements set forth in §3.5 of the General Conditions to the Prime Contract. Subcontractor acknowledges that it has reviewed the aforementioned requirements and will comply with same in their entirety.

User Notes: (1383412816)

§ 4.6.2 All material, equipment, or other special warranties required by the Subcontract Documents shall be issued in the name of the Owner, or shall be transferable to the Owner, and shall commence in accordance with the Subcontract Documents.

§ 4.7 Indemnification

§ 4.7.1 To the fullest extent permitted by law and in strict compliance with the terms and conditions of the Prime Contract (Subcontractor's attention is directed to §3.18 of the General Conditions to the Prime Contract), the Subcontractor shall indemnify, defend and hold harmless the Owner, Contractor, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorney's fees, arising out of or resulting from performance of the Subcontractor's Work under this Subcontract, provided that any such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), but only to the extent caused by the negligent acts or omissions of the Subcontractor, the Subcontractor's Sub-subcontractors, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss, or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or otherwise reduce other rights or obligations of indemnity which would otherwise exist as to a party or person described in this Section 4.7.

§ 4.7.2 In claims against any person or entity indemnified under this Section 4.7 by an employee of the Subcontractor, the Subcontractor's Sub-subcontractors, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, the indemnification obligation under Section 4.7.1 shall not be limited by a limitation on the amount or type of damages, compensation or benefits payable by or for the Subcontractor, or the Subcontractor's Sub-subcontractors under workers' compensation acts, disability benefit acts, or other employee benefit acts.

§ 4.8 Remedies for Nonpayment

If the Contractor does not pay the Subcontractor through no fault of the Subcontractor, within seven days from the time payment should be made as provided in this Agreement, the Subcontractor may, without prejudice to any other available remedies, upon seven additional days' notice to the Contractor, stop the Work of this Subcontract until payment of the amount owing has been received. The Subcontract Sum shall, by appropriate Modification, be increased by the amount of the Subcontractor's reasonable and substantiated direct costs of demobilization and remobilization.

§ 4.9 Professional Services Provided by Subcontractor

§ 4.9.1 The Subcontractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Subcontract Documents or unless the Subcontractor is required to provide such services in order to carry out the Subcontractor's responsibilities for its own construction means, methods, techniques, sequences, and procedures. The Subcontractor shall not be required to provide professional services in violation of applicable law.

§ 4.9.2 If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of the Subcontractor by the Subcontract Documents, the Contractor will provide all performance and design criteria that such services must satisfy to the extent the Contractor has received such performance and design criteria from the Owner and Architect under the terms of the Prime Contract.

§ 4.9.3 If professional design services or certifications by a design professional are required because of means, methods, techniques, sequences, or procedures required by the Contractor and related to the Work of the Subcontractor, the Contractor will provide all performance and design criteria that such services must satisfy.

§ 4.9.4 The Subcontractor shall be entitled to rely upon the adequacy, accuracy, and completeness of the performance and design criteria received from the Contractor under this Section 4.9.

§ 4.9.5 The Subcontractor shall cause the professional services performed under this Section 4.9 to be provided by a properly licensed design professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop Drawings, and other submittals prepared by such professional. Shop drawings and other submittals related to the Work designed by such design professional shall bear the professional's written approval when submitted to the Contractor. The Contractor shall be entitled to rely upon the adequacy, accuracy, and completeness of the services, certifications, and approvals performed or provided by the design professionals,

provided the Contractor has provided to the Subcontractor all performance and design criteria required by this Section 4.9.

§4.9.6 The Subcontractor shall, at all times, perform its Work in strict compliance with the Contract Documents and applicable industry standards. All costs associated with non-compliant Work shall be borne by Subcontractor.

ARTICLE 5 CHANGES IN THE WORK

§ 5.1 The Owner may make changes in the Work by issuing Modifications to the Prime Contract. Upon receipt of a Modification to the Prime Contract issued subsequent to the execution of this Agreement, the Contractor shall promptly notify the Subcontractor of such Modification. Unless otherwise directed by the Contractor, the Subcontractor shall not thereafter order materials or perform Work that would be inconsistent with the changes made by the Modification to the Prime Contract. Subcontractor is directed to closely review and adhere to Article 7 of the General Conditions of the Prime Contract.

§ 5.2 The Subcontractor may be ordered in writing by the Contractor, without invalidating this Subcontract, to make changes in the Work within the general scope of this Subcontract consisting of additions, deletions, or other revisions, including those required by Modifications to the Prime Contract issued subsequent to the execution of this Agreement, with the Subcontract Sum and the Subcontract Time adjusted accordingly. The Subcontractor, prior to the commencement of such changed or revised Work, shall submit promptly to the Contractor written copies of a Claim for adjustment to the Subcontract Sum and Subcontract Time for such revised Work in a manner consistent with requirements of the Subcontract Documents. Subcontractor shall, without delay and upon receipt of written direction from Contractor, prosecute the changed Work and document the adjustments to the Subcontract Sum and Subcontract Time contemporaneously.

§ 5.3 The Subcontractor shall make all Claims promptly (and in no event, not later than the time required by the Prime Contract) to the Contractor for additional cost, extensions of time and damages for delays, or other causes in accordance with the Subcontract Documents. A Claim which will affect or become part of a Claim which the Contractor is required to make under the Prime Contract within a specified time period or in a specified manner shall be made in sufficient time to permit the Contractor to satisfy the requirements of the Prime Contract. Such Claims shall be received by the Contractor not less than two working days preceding the time by which the Contractor's Claim must be made. Failure of the Subcontractor to make such a timely Claim shall bind the Subcontractor to the same consequences as those to which the Contractor is bound.

ARTICLE 6 CLAIMS AND DISPUTES

§ 6.1 Mediation

§ 6.1.1 Claims, disputes, or other matters in controversy arising out of or related to this Subcontract, except those waived as provided for in Sections 6.4 and 11.3.2, shall be presented and submitted in accordance with the General Conditions (see §§15.1.3-15.4) to the Prime Contract and shall be subject to mediation as a condition precedent to binding dispute resolution.

§ 6.1.2 Any Claims, disputes, or other matters in question between Contractor and Subcontractor that are not resolved via mediation shall be resolved as provided in the Prime Contract unless Contractor expressly opts to arbitrate such dispute.

The parties shall endeavor to resolve their Claims by mediation which, unless the parties mutually agree upon a mediator, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to this Subcontract and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration is stayed pursuant to this Section 6.1.2, the parties may nonetheless proceed to the selection of the arbitrators(s) and agree upon a schedule for later proceedings.

§ 6.1.3 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 6.2 Binding Dispute Resolution

For any Claim subject to, but not resolved by mediation pursuant to Section 6.1, the method of binding dispute resolution shall be as follows:

(Check the appropriate box.)

[X] Arbitration pursuant to Section 6.3 of this Agreement,

[ ] Litigation in a court of competent jurisdiction

[ ] Other: *(Specify)*

§ 6.3 Arbitration

§ 6.3.1 If the Contractor opts to arbitrate any Claim subject to, but not resolved by, mediation , the arbitration, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of this Agreement. The arbitration should be conducted in the place where the Project is located unless another location is mutually agreed upon. A demand for arbitration shall be made in writing, delivered to the other party to the Subcontract, and filed with the person or entity administering the arbitration. The party filing a notice of demand for arbitration must assert in the demand all Claims then known to that party on which arbitration is permitted to be demanded.

§ 6.3.2 A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the Claim would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the Claim.

§ 6.3.3 The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof. The award shall be in writing, contain findings of fact and conclusions of law, and apply Connecticut law.

§ 6.3.4 The foregoing agreement to arbitrate, and other agreements to arbitrate with an additional person or entity duly consented to by parties to the Agreement, shall be specifically enforceable under applicable law in any court having jurisdiction thereof.

§ 6.3.5 Consolidation or Joinder

§ 6.3.5.1 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation; (2) the arbitrations to be consolidated substantially involve common questions of law or fact; and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).

§ 6.3.5.2 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an additional person or entity shall not constitute consent to arbitration of a Claim, dispute, or other matter in question not described in the written consent.

§ 6.3.5.3 The Contractor and Subcontractor grant to any person or entity made a party to an arbitration conducted under this Section 6.3, whether by joinder or consolidation, the same rights of joinder and consolidation as the Contractor and Subcontractor under this Agreement.

§ 6.4 Waiver of Claims for Consequential Damages

The Contractor and Subcontractor waive claims against each other for consequential damages arising out of or relating to this Subcontract, including without limitation, any consequential damages due to either party's termination in accordance with Article 7. Nothing contained herein shall be deemed to preclude an award of liquidated damages pursuant to §6.1.6 of the Prime Contract. Subcontractor acknowledges that to the extent Owner assesses liquidated damages against Contractor due to delays caused by Subcontractor, Subcontractor shall be liable for such liquidated

damages or its proportionate share of same. Subcontractor waives any and all claims for lost profits, lost opportunities, displaced labor, and consequential or incidental damages of any kind or nature which claims are expressly, knowingly, and intentionally waived by Subcontractor and its suppliers.

ARTICLE 7 TERMINATION, SUSPENSION OR ASSIGNMENT OF THE SUBCONTRACT

§ 7.1 Termination by the Subcontractor

The Subcontractor may terminate the Subcontract for the same reasons and under the same circumstances and procedures with respect to the Contractor as the Contractor may terminate with respect to the Owner under the Prime Contract, or for nonpayment of amounts due under this Subcontract for 60 days or longer from the date such payments are due. In the event of such termination by the Subcontractor for any reason which is not the fault of the Subcontractor, the Subcontractor's Sub-subcontractors, or their agents or employees or other persons or entities performing portions of the Work under contract with the Subcontractor, the Subcontractor shall be entitled to recover from the Contractor payment for direct costs for Work executed.

§ 7.2 Termination by the Contractor

§ 7.2.1 Termination for Cause

If the Subcontractor repeatedly fails or neglects to carry out the Work in accordance with the Subcontract Documents or otherwise to perform in accordance with this Subcontract and fails within a ten-day period after receipt of notice to commence and continue correction of such default or neglect with diligence and promptness, the Contractor may, by notice to the Subcontractor and without prejudice to any other remedy the Contractor may have, terminate the Subcontract and finish the Subcontractor's Work by whatever method the Contractor may deem expedient. If the unpaid balance of the Subcontract Sum exceeds the expense of finishing the Subcontractor's Work and other damages incurred by the Contractor and not expressly waived, such excess shall be paid to the Subcontractor. If such expense and damages exceed the unpaid balance of the Subcontract Sum, the Subcontractor shall pay the difference to the Contractor.

§ 7.2.2 Termination for Convenience

§ 7.2.2.1 If the Owner terminates the Prime Contract for the Owner's convenience, the Contractor shall promptly deliver notice to the Subcontractor.

§ 7.2.2.2 In case of such termination for the Owner's convenience, the Subcontractor shall be entitled to receive payment for Work properly executed.

§ 7.2.2.3 Upon receipt of notice of termination, the Subcontractor shall

- **.1** cease operations as directed by the Contractor in the notice;
- **.2** take actions necessary, or that the Contractor may direct, for the protection and preservation of the Work; and
- **.3** except for Work directed to be performed prior to the effective date of termination stated in the notice, terminate all existing Sub-subcontracts and purchase orders and enter into no further Sub-subcontracts and purchase orders.

§ 7.3 Suspension by the Contractor for Convenience

§ 7.3.1 The Contractor may, without cause, order the Subcontractor in writing to suspend, delay, or interrupt the Work of this Subcontract in whole or in part for such period of time as the Contractor may determine. In the event of suspension ordered by the Contractor, the Subcontractor shall be entitled to an equitable adjustment of the Subcontract Time and Subcontract Sum (direct costs only). No consequential or incidental damages shall be claimed by or paid to Subcontractor.

§ 7.3.2 The Subcontract Time and Subcontract Sum shall be adjusted for increases in the direct cost and time caused by suspension as described in Section 7.3.1. Adjustment of the Subcontract Sum shall include profit on the increased cost of performance, if in fact it is proven to the Contractor's satisfaction that the cost of performance increased through no fault of the Subcontractor, caused by suspension. No adjustment shall be made to the extent that

- **.1** performance is, was or would have been so suspended, delayed, or interrupted by another cause for which the Subcontractor is responsible; or
- **.2** an equitable adjustment is made or denied under another provision of this Subcontract. No consequential or incidental damages shall be claimed by or paid to Subcontractor.

§ 7.4 Assignment of the Subcontract

§ 7.4.1 In the event the Owner terminates the Prime Contract for cause, this Subcontract is assigned to the Owner pursuant to Section 5.4 of AIA Document A201–2017 provided the Owner accepts the assignment by notifying the Contractor and Subcontractor. Subcontractor's attention is directed to §5.4 of the General Conditions to the Prime Contract.

§ 7.4.2 Without the Contractor's written consent, the Subcontractor shall not assign the Work of this Subcontract, subcontract the whole of this Subcontract, or subcontract portions of this Subcontract.

ARTICLE 8 THE WORK OF THIS SUBCONTRACT

The Subcontractor shall execute the following portion of the Work described in the Subcontract Documents, including all labor, materials, equipment, services and other items required to complete such portion of the Work, except to the extent specifically indicated in the Subcontract Documents to be the responsibility of others.

(Insert a precise description of the Work of this Subcontract, referring where appropriate to numbers of Drawings, sections of Specifications and pages of Addenda, Modifications, and accepted alternates.)

This Subcontractor is responsible for the complete Bid Package

ARTICLE 9 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

§ 9.1 The date of commencement of the Subcontractor's Work, shall be:
(Check one of the following boxes.)

[ ] The date of this Agreement.

[**X**] A date set forth in a notice to proceed issued by the Contractor. **Letter of Intent/Notice to Proceed was issued on XX/XX/2025**

[ ] Established as follows:
(Insert a date or a means to determine the date of commencement of the Subcontractor's Work.)

If a date of commencement of the Subcontractor's Work is not selected, then the date of commencement shall be the date of this Agreement.

§ 9.2 Subcontract Time

§ 9.2.1 The Subcontract Time is the period of time, including authorized adjustments, allotted in the Subcontract Documents for Substantial Completion of the Work described in the Subcontract Documents. The Subcontract Time shall be measured from the date of commencement of the Subcontractor's Work. TIME IS OF THE ESSENCE WITH REGARD TO THE SUBCONTRACTOR'S PERFORMANCE OF THE WORK. Subcontractor's attention is directed to §§8.3.2, 8.3.3 and 8.3.4 of the General Conditions to the Prime Contract, pertaining to time of performance.

AIA Document A401 – 2017. Copyright © 1915, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1967, 1972, 1978, 1987, 1997, 2007 and 2017. All rights reserved. User Notes: (1383412816)

§ 9.2.2 Subject to adjustments of the Subcontract Time as provided in the Subcontract Documents, the Subcontractor shall achieve substantial completion of the Subcontractor's Work:
(Check one of the following boxes and complete the necessary information.)

[ ] Not later than ( ) calendar days from the date of commencement of the Subcontractor's Work.

[X] By the following date: **Note: Progress schedule and completion of the work is to be in conformance with Attachment B – Project Construction Schedule, Downes Supplemental Instructions, Phasing Plan as may be applicable, and other Subcontract Documents pertaining to or referencing the completion of work.**

§ 9.2.3 Subject to adjustments of the Subcontract Time as provided in the Subcontract Documents, if portions of the Subcontractor's Work are to be completed prior to substantial completion of the Subcontractor's Work, then the Subcontractor shall achieve earlier substantial completion of such portions by the following dates.
(List all portions of the Subcontractor's Work required to achieve substantial completion of the Subcontractor's Portion of the Work.)

Portion of Work	Substantial Completion

§ 9.2.4 If the Subcontractor fails to achieve substantial completion as provided in this Section 9.2, liquidated damages, if any, shall be assessed as set forth in Section 3.4. The Prime Contract, which has been expressly incorporated herein and made a part hereof, contains a liquidated damages provision in Article 6.1.6. The liquidated damages provision of the Prime Contract applies to this Subcontract.

§ 9.3 With respect to the obligations of both the Contractor and the Subcontractor, including the Subcontractor's time of performance, TIME IS OF THE ESSENCE of this Subcontract. Subcontractor's attention is directed to "Attachment B," which is attached to and made a part of this agreement. Subcontractor shall comply, in all respects, with the requirements of this Schedule, as well as with updated schedules provided to it by Contractor. If Subcontractor claims it has been delayed through no fault of its own, Subcontractor shall substantiate and document the existence of an event for an excusable delay and need for a specific extension of time. If the Owner finds a delay alleged by Subcontractor to be unsubstantiated and backcharges the Contractor for the time and costs associated with reviewing and addressing the alleged delay, the Contractor shall, in turn, have the absolute right to backcharge the Subcontractor for all of such costs, as well as for Contractor's related costs. Any and all requests for an extension of time shall be prepared and submitted in strict compliance with and shall be subject to the General Conditions to the Prime Contract.

§ 9.4 No extension of time will be valid without the Contractor's written consent after a Claim is made by the Subcontractor in accordance with Section 5.3. The Subcontractor shall commence the Work when notified to do so by Contractor and shall diligently and continuously prosecute and complete the Work and coordinate the Work with the other work being performed on the Project, in accordance with those project schedules as may be issued from time to time during the performance of the Work, and any other scheduling requirements listed in this Agreement, so as not to delay, impede, obstruct, hinder or interfere with the commencement, progress or completion of the whole or any part of the Work or other work on the Project. Subcontractor must attend all Project meetings scheduled by Contractor.

User Notes: (1383412816)

The Subcontractor shall participate and cooperate in the development of schedules and other efforts to achieve timely completion of the Work providing information for the scheduling of the times and sequence of operations required for its Work to meet Contractor's overall schedule requirements, shall continuously monitor the project schedule so as to be fully familiar with the timing, phasing and sequence of operations of the Work and of other work on the Project, and shall execute the Work in accordance with the requirements of the project schedule including any revisions thereto.

Should the progress of the Work or of the Project be delayed, disrupted, hindered, obstructed, or interfered with by any fault or neglect or act or failure to act of the Subcontractor or any of its officers, agents, servants, employees, subcontractors or suppliers so as to cause any additional cost, expense, liability or damage to Contractor including legal fees and disbursements incurred by Contractor (whether incurred in defending claims or in seeking reimbursement and indemnity from the Subcontractor and its surety hereunder or otherwise) or to the Owner or any damages or additional costs or expenses for which Contractor or the Owner may or shall become liable, the Subcontractor and its surety shall and does hereby agree to compensate Contractor and the Owner for an indemnify them against all such costs, expenses, damages and liability.

Contractor, if it deems necessary, may direct the Subcontractor to work overtime and, if so directed, the Subcontractor shall work said overtime and, provided that the Subcontractor is not in default under any of the terms or provisions of this Agreement or of any of the other Contract Documents, Contractor will pay the Subcontractor for such actual additional wages paid, if any, at rates which have been approved by Contractor plus taxes imposed by law on such additional wages, plus workers' compensation insurance, liability insurance and levies on such additional wages if required to be paid by the Subcontractor to comply with Subcontractor's obligations under this Agreement.

If, however, the progress of the Work or of the Project are delayed by any fault or neglect or act or failure to act of the Subcontractor or any of its officers, agents, servants, employees, subcontractors or suppliers, then the Subcontractor shall, in addition to all of the other obligations imposed by this Agreement upon the Subcontractor in such case, and at its own cost and expense, work such overtime as may be necessary to make up for all time lost in the completion of the Work and of the Project due to such delay. Should the Subcontractor fail to make up for the time lost by reason of such delay, Contractor shall have the right to cause other Subcontractors to work overtime and to take whatever other action it deems necessary to avoid delay in the completion of the Work and of the Project, and the cost and expense of such overtime and/or such other action shall be borne by the Subcontractor.

ARTICLE 10 SUBCONTRACT SUM

§ 10.1 The Contractor shall pay the Subcontractor the Subcontract Sum in current funds received from the Owner for the Subcontractor's performance of the Subcontract. The Subcontract Sum shall be Dollars ($0.00), subject to additions and deductions as provided in the Subcontract Documents. Subcontractor's attention is directed to §7.9 of the Prime Contract, which sets forth Costs Not to Be Reimbursed by Owner. Contractor shall have no liability to Subcontractor for Costs not reimbursed by Owner.

Determination of Contract Sum:		**Total**
Contract Sum:		

§ 10.2 Alternates

§ 10.2.1 Alternates, if any, included in the Subcontract Sum:

Item	Price

§ 10.2.2 Subject to the conditions noted below, the following alternates may be accepted by the Contractor following execution of this Agreement. Upon acceptance, the Contractor shall issue a Modification to this Subcontract:
(Insert below each alternate and the conditions that must be met for the Contractor to accept the alternate.)

Item	Price	Conditions for Acceptance

§ 10.3 Unit prices, if any:
(Identify and state the unit price, and quantity limitations, if any, to which the unit price will be applicable.)

(Table deleted)
Once the following unit prices are agreed upon, they may be used for adds or deducts from contract price based on project requirements for the life of the project and will be included as part of the contract:

- **Unit Prices as applicable for Allowances;**

Labor & Equipment Rates: Labor & Equipment rates indicated on the Subcontractors Bid Form are not accepted under this Agreement. The Subcontractor agrees that labor & equipment rates shall be established and agreed upon in accordance with the Subcontract Documents which states Overhead & Profit, consumables, reimbursables, insurance, small tools, equipment costs, travel, safety and/or parking etc. are NOT included in the hourly rate. Rates are subject to approval by the Owner.

Bond cost reconciliation will be made at the end of the project with a receipted invoice from the Bonding Company. Bond percentage will not be allowed on individual change order proposals.

Equipment Rates: Proper substantiation is required prior to acceptance.

Receipt of labor & equipment rates will be a prerequisite to the first month's payment.

§ 10.4 Allowances, if any, included in the Subcontract Sum:
(Identify allowance and state exclusions, if any, from the allowance price.)
Subcontractor has included the following allowances, above and beyond the described Work in this scope of Work. All allowances are to be, as directed by the Contractor, and it is this Subcontractor's responsibility to document usage with daily accounting of T&M tickets. Overhead and profit for any and all allowances listed shall be included in this Subcontractor's base bid. Overhead and profit will NOT be reconciled with change order submissions drawing off of allowances. Allowance quantities, unit prices and/or dollar values will not be adjusted for deducts to this Bid Package. Also, reference Specifications for additional information:

(Table deleted)
Insert allowances here

The above-mentioned allowance(s) are to be used as directed by the Construction Manager. The value of these allowance(s) will be adjusted accordingly based on project requirements, utilizing agreed upon labor, equipment, material and/or unit price rates. The above-mentioned unit prices are to be inclusive of all labor, material, equipment, tools, transportation and services, etc.… necessary to perform the above-mentioned work.

ARTICLE 11 PAYMENTS

§ 11.1 Progress Payments

§ 11.1.1 Based upon Applications for Payment submitted to the Contractor by the Subcontractor, corresponding to Applications for Payment submitted by the Contractor to the Architect, and Certificates for Payment issued by the Architect, the Contractor shall make progress payments on account of the Subcontract Sum to the Subcontractor as provided below and elsewhere in the Subcontract Documents. The obligation of Contractor to make a payment under this Subcontract, whether a progress payment or the final payment, or for extra work or change orders or for Claims of any type, is and shall at all times be subject to the express condition precedent of receipt by Contractor of payment by the Owner. Subcontractor knowingly accepts the risk of non-payment by Owner and is not dependent upon payment from Contractor in the absence of Contractor's receipt of payment from Owner. Unless the Contractor provides the Owner with a payment bond in the full penal sum of the Contract Sum, payments received by the Contractor and Subcontractor for Work properly performed by their contractors and suppliers shall be held by the Contractor and Subcontractor for those contractors or suppliers who performed Work or furnished materials, or both, under contract with the Contractor or Subcontractor for which payment was made to the Contractor by the Owner or to the Subcontractor by the Contractor, as applicable. Nothing contained herein shall require money to be placed in a separate account and not commingled with money of the Contractor or Subcontractor, shall create any fiduciary liability or tort liability on the part of the Contractor or Subcontractor for breach of trust, or shall entitle any person or entity to an award of punitive damages against the Contractor or Subcontractor for breach of the requirements of this provision. Subcontractor shall submit, with each Application for Payment, the items required by Contractor, including such items as are required by Owner under Article 11 of the Prime Contract and §9.3 of the General Conditions to the Prime Contract.

§ 11.1.2 The period covered by each Application for Payment shall be one calendar month ending on the last day of the month, or as follows:

§ 11.1.3 Provided an Application for Payment is received by the Contractor not later than the **20th** day of a month, the Contractor shall include the Subcontractor's Work covered by that application in the next Application for Payment which the Contractor is entitled to submit to the Architect. The Contractor shall pay the Subcontractor each progress payment no later than seven working days after the Contractor receives payment from the Owner. If the Architect does not issue a Certificate for Payment or the Contractor does not receive payment for any cause which is not the fault of the Subcontractor, the Contractor shall pay the Subcontractor, on demand, a progress payment computed as provided in Sections 11.1.7, 11.1.8, 11.1.9 and 11.2. Per §7.1.3, payment from the Owner to Contractor are due forty-five (45) days after the Architect receives the adjusted Payment Application.

§ 11.1.4 If the Subcontractor's Application for Payment is received by the Contractor after the application date fixed above, the Subcontractor's Work covered by it shall be included by the Contractor in the next Application for Payment submitted to the Architect.

§ 11.1.5 The Subcontractor shall submit to the Contractor a schedule of values prior to submitting the Subcontractor's first Application for Payment. Each subsequent Application for Payment shall be based upon the most recent schedule of values submitted by the Subcontractor in accordance with the Subcontract Documents. The schedule of values shall allocate the entire Subcontract Sum among the various portions of the Subcontractor's Work and be prepared in such form and supported by such data to substantiate its accuracy as the Contractor may require, and unless objected to by the Contractor, shall be used as a basis for reviewing the Subcontractor's Applications for Payment. Subcontractor shall submit, with each Application for Payment, the items required herein and pursuant to Article 11 and §14.5.1.2 of the Prime Contract and §9.3.1 – 9.3.4 of the General Conditions to the Prime Contract.

§ 11.1.6 Applications for Payment submitted by the Subcontractor shall indicate the percentage of completion of each portion of the Subcontractor's Work as of the end of the period covered by the Application for Payment.

§ 11.1.7 Subject to the provisions of the Subcontract Documents, the amount of each progress payment shall be computed as follows:

AIA Document A401 – 2017. Copyright © 1915, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1967, 1972, 1978, 1987, 1997, 2007 and 2017. All rights reserved. This document was produced at 13:11:23 ET on 03/28/2025 under Order No.4104244902 which expires on 05/31/2025, is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
User Notes: (1383412816)

§ 11.1.7.1 The amount of each progress payment shall first include:

.1 That portion of the Subcontract Sum properly allocable to completed Work:

.2 That portion of the Subcontract Sum properly allocable to materials and equipment delivered and suitably stored at the site by the Subcontractor for subsequent incorporation in the Subcontractor's Work or, if approved by the Contractor, suitably stored off the site at a location agreed upon in writing; and

.3 The amount, if any, for changes in the Work that are not in dispute and have been properly authorized by the Contractor, to the same extent provided in the Prime Contract, pending a final determination by the Contractor of the cost of changes in the Subcontractor's Work, even though the Subcontract Sum has not yet been adjusted.

§ 11.1.7.2 The amount of each progress payment shall then be reduced by:

.1 The aggregate of previous payments made by the Contractor;

.2 The amount, if any, for Work that remains uncorrected and for which the Contractor has previously withheld a Certificate for Payment as provided in Article 9 of AIA Document A201-2017 for a cause that is the fault of the Subcontractor;

.3 For Work performed or defects discovered since the last payment application, any amount for which the Contractor may withhold payment in whole or in part, as provided in Article 9 of AIA Document A201-2017, for a cause that is the fault of the Subcontractor;

.4 Retainage withheld pursuant to Section 11.1.8 of this Agreement;

.5 the amount the Owner reduces payment to Contractor for Subcontractor's Work, per the General Conditions to the Prime Contract.

§ 11.1.8 Retainage

§ 11.1.8.1 For each progress payment made prior to substantial completion of the Subcontractor's Work, the Contractor may withhold the following amounts as retainage from the payment otherwise due:
(Insert a percentage or amount to be withheld as retainage from each Application for Payment. The amount of retainage may be limited by governing law.)

Retainage shall be held in the amount of five percent (5%) of each progress payment.

§ 11.1.8.1.1 The following items are not subject to retainage:
(Insert any items not subject to the withholding of retainage, such as general conditions, insurance, etc.)

§ 11.1.8.2 Reduction or limitation of retainage, if any, shall be as follows:
(If the retainage established in Section 11.1.8.1 is to be modified prior to substantial completion of the entire Work, including modifications for substantial completion of portions of the Subcontractor's Work as provided in Section 9.2.3, insert provisions for such modification.)

Any reduction of retainage must be approved by the Construction Manager, Owner, State of Connecticut and Architect.

§ 11.1.9 Upon the partial or entire disapproval by the Contractor of the Subcontractor's Application for Payment, the Contractor shall provide notice to the Subcontractor. If the Subcontractor disputes the Contractor's decision regarding a Subcontractor's Application for Payment in whole or in part, the Subcontractor may submit a Claim in accordance with Article 6. When the basis for the disapproval has been remedied, the Subcontractor shall be paid the amounts withheld.

§ 11.1.10 Provided the Contractor has fulfilled its payment obligations under the Subcontract Documents, the Subcontractor shall defend and indemnify the Contractor and Owner from all loss, liability, damage, or expense, including reasonable attorney's fees and litigation expenses, arising out of any lien claim or other claim for payment by any of the Subcontractor's subcontractors, suppliers, or vendors of any tier. Upon receipt of notice of such lien claim or other claim for payment, the Contractor shall notify the Subcontractor. If approved by the applicable court,

User Notes: (1383412816)

when required, the Subcontractor may substitute a surety bond for the property against which the lien or other claim for payment has been asserted.

§ 11.2 Substantial Completion

When the Subcontractor's Work or a designated portion thereof is substantially complete and in accordance with the requirements of the Prime Contract (see §9.8 of the General Conditions to the Prime Contract), the Contractor shall, upon application by the Subcontractor, make prompt Application for Payment for such Work. Within 30 days following issuance by the Architect of the Certificate for Payment covering such substantially completed Work, the Contractor shall, to the full extent allowed in the Prime Contract, make payment to the Subcontractor, deducting any portion of the funds for the Subcontractor's Work withheld in accordance with the certificate to cover costs of items to be completed or corrected by the Subcontractor. Such payment to the Subcontractor shall be the entire unpaid balance of the Subcontract Sum if a full release of retainage is allowed under the Prime Contract for the Subcontractor's Work prior to the completion of the entire Project. If the Prime Contract does not allow for a full release of retainage, then such payment shall be an amount which, when added to previous payments to the Subcontractor, will reduce the retainage on the Subcontractor's substantially completed Work to the same percentage of retainage as that on the Contractor's Work covered by the certificate.

§ 11.3 Final Payment

§ 11.3.1 Final payment, constituting the entire unpaid balance of the Subcontract Sum, shall be made by the Contractor to the Subcontractor when the Subcontractor's Work is fully performed in accordance with the requirements of the Subcontract Documents, the Architect has issued a Certificate for Payment covering the Subcontractor's completed Work, all conditions precedent to final payment as set forth in the General Conditions of the Prime Contract (see §9.10) have been satisfied and the Contractor has received payment from the Owner. Pursuant to §11.2.2.3 of the Prime Contract, final payment to the Contractor is not due until 45 days after Architect's issuance of a final Certificate for Payment. Contractor's receipt of payment from Owner is an express condition precedent to Contractor's obligation to make final payment to Subcontractor. If, for any cause which is not the fault of the Subcontractor, a Certificate for Payment is not issued or the Contractor does not receive timely payment or does not pay the Subcontractor within seven days after receipt of payment from the Owner, final payment to the Subcontractor shall be made upon demand. *(Insert provisions for earlier final payment to the Subcontractor, if applicable.)*

§ 11.3.2 Before issuance of the final payment, the Subcontractor, if required, shall submit evidence satisfactory to the Contractor that all payrolls, bills for materials and equipment, and all known indebtedness connected with the Subcontractor's Work have been satisfied. Acceptance of final payment by the Subcontractor shall constitute a waiver of claims by the Subcontractor, except those previously made in writing and identified by the Subcontractor as unsettled at the time of final Application for Payment. Subcontractor shall also submit the items required by Owner, including the items identified in §14.5.1.3 of the Prime Contract and §9.10 of the General Conditions to the Prime Contract.

(Paragraphs deleted)

ARTICLE 12 INSURANCE AND BONDS

§ 12.1 Subcontractor's Required Insurance Coverage

§ 12.1.1 The Subcontractor shall purchase and maintain the following types and limits of insurance, from a company or companies lawfully authorized to issue insurance in the jurisdiction where the Project is located, as will protect the Subcontractor from claims that may arise out of, or result from, the Subcontractor's operations and completed operations under the Subcontract:

(Specify each type of insurance, such as commercial general liability, automobile, worker's compensation, employers' liability, professional liability, and pollution, required to be carried by the Subcontractor, the limits of coverage for each type of insurance, and any other pertinent requirements.)

Type of Insurance	Limits	Other Pertinent Requirements
See attached and below		

The Subcontractor along with its entire lower tier Subcontractors will provide insurance in complete accordance with the following:

User Notes: (1383412816)

The following is applicable to all required insurance policies (See attached sample ACCORD form for additional clarification and specific requirements):

Insurer – All insurers must have an A.M. Best rating of A- VII or better and admitted to conduct business in the state.

Additional Insured –CONSTRUCTION MANAGER, Owner, Program Manager/Owner's Representative (if required) the Project Architect and other such entity(s) required by CONSTRUCTION MANAGER, shall be named Additional insureds under your policies, as well as, other parties which are required by the contract. Coverage must be written on a primary and non-contributory basis and a Waiver of Subrogation provision must be included, with respect to all parties concerned.

Waiver of Subrogation – All policies must include a Waiver of Subrogation whereby the insured waives the right to subrogate against all the Additional insured's as well as their subsidiaries, employees, volunteers, directors, and officers.

Other Insurance Clause – This clause must state that the contractor's/subcontractor's policy is Primary and (Non-contributory) the insurer will not seek contribution from other insurance available to all the Additional insureds.

Notice of Cancellation – **Non-Renewal or Material Change** – All policies shall be endorsed to require at least a 30-day written notice by the insurer of cancellation, non-renewal, or material change, except for a ten day notice for non-payment of premium. This notice shall be sent to the Project Manager at CONSTRUCTION MANAGER.

Deductibles/Self-Insured Retention – It is agreed that all deductibles and/or self-insured retentions are the responsibility of the contractor's/subcontractor's, including all claim handling and legal expenses.

Exclusions/Restrictions – All exclusion or restrictions of coverage not found in standard policies must be clearly identified.

Certificates of Insurance – Must be forwarded to the Project Manager at CONSTRUCTION MANAGER at least five days prior to commencing work or delivery of goods. Renewal Certificates of Insurance must be provided ten days prior to the expiration of required coverage. A copy of all your policy's Additional insured's Endorsements must be attached to the certificate.

Terms of Coverage – All insurance must adhere to requirements stipulated herein and be effective on or before work commences and remain in effect until final completion and acceptance of the work.

Also Subcontractors must maintain Commercial General Liability (CGL) including Completed Operations (Products – Comp/Op AGG) coverage of $1,000,000 per occurrence and $2,000,000 aggregate for itself and each Additional insureds for a minimum of three (3) years after final acceptance and closeout of said project.

Pollution Liability – Any company who performs environmental (abatement) work must maintain Pollution Liability coverage as stipulated on page 3, Item #6, including mold coverage as necessitated by its scope of work.

EIFS Work – Commercial General Liability coverage cannot contain an EIFS exclusion for those companies doing this type of work. In addition, Pollution Liability, including mold coverage, must be carried. Minimum limits of $1,000,000 per occurrence (see Item #6 on page 3).

Subcontractors – It is a requirement of the project and is the responsibility of the subcontractor to be sure that their entire subcontractors procure and maintain the same insurance required of the contractor.

1) Commercial General Liability (CGL) with Limits of Insurance of Not Less Than $1,000,000 Each Occurrence/$2,000,000 Annual Aggregate

a) If the CGL coverage contains a General Aggregate limit, such General Aggregate shall apply separately to each project.

b) CGL coverage shall be written on ISO Occurrence Form CG 00 01 1093, or a substitute form providing equivalent coverage and shall cover liability arising from premises, operations, independent contractors, products/completed operations, and personal and advertising injury.

c) CONSTRUCTION MANAGER, the Owner and All Other parties required of CONSTRUCTION MANAGER shall be included as insured's on the CGL using ISO Additional insured's Endorsement Form CG 20 10 11 85 or CG 20 10 10 93 and CG 20 37 10 01 or CG 20 33 10 01 and CG 20 37 10 01 or an endorsement providing equivalent coverage to the Additional insured's. This insurance for the Additional insureds shall be as broad as the coverage provided for the named insured subcontractor. It shall apply as Primary Insurance before any other insurance or self-insurance, including any deductible maintained by or provided to the Additional Insured. (A copy of the appropriate forms listed above must be completely filled out appropriately and attached to your Certificate of Insurance).

d) Subcontractors shall maintain CGL coverage for itself and all Additional insured's for the duration of the project according to contract documents and specification requirements; also Subcontractors must

maintain Commercial General Liability (CGL) including Completed Operations (Products – Comp/Op AGG) coverage of $1,000,000 per occurrence and $2,000,000 aggregate for itself and each Additional insured's for a minimum of three (3) years after final acceptance and closeout of said project.

e) Coverage must be on an occurrence basis.

f) If project involves residential construction, the CGL policy cannot contain a residential exclusion.

2) Automobile Liability

a) Business Auto Liability with limits of at least $1,000,000 for each accident.

b) Business Auto coverage must include coverage for liability arising out of all owned, leased, hired, and non-owned automobiles.

c) CONSTRUCTION MANAGER the Owner, and all other parties required of the CONSTRUCTION MANAGER shall be included as insureds on the auto policy.

3) Commercial Umbrella

a) Umbrella limits must be at least $10,000,000.

b) Umbrella coverage must include as insured's all entities that are Additional insureds on the CGL.

c) Umbrella coverage for such Additional insureds shall apply as primary before any other insurance or self-insurance, including any deductible, maintained by or provided to the Additional Insured's other than the CGL, Auto Liability and Employer's Liability coverages maintained by the Subcontractor.

d) Coverage must be on an occurrence basis.

4) Workers' Compensation and Employer's Liability at least $500,000 each accident

a) Employers' Liability insurance limits of at least $500,000 each accident for bodily injury by accident and $500,000 each employee for injury by disease.

b) Where applicable, U.S. Longshore and Harborworkers Compensation Act Endorsement (USL&H) shall be attached to the policy.

c) The Employer's Liability limit may be met via an Umbrella policy; however, the combined limit must be a minimum of $5,000,000.

5) Professional Liability *(if required by scope of work) at Least $1,000,000 each occurrence limit.*

a) CONSTRUCTION MANAGER, et al. shall be included as an Additional Insureds on a primary and noncontributory basis.

b) Subcontractor is responsible for any self-insured retention/deductibles, including all claim handling and legal expenses.

c) CONSTRUCTION MANAGER, et al. shall be indemnified for loss and defense.

6) Pollution Liability *(if required by scope of work) at least $1,000,000 each occurrence.*

a) Pollution Liability for transit to be included.

b) Any subcontract which includes EIFS work must carry Pollution Liability, including mold coverage.

c) Subcontractor is responsible for any self-insured retention/deductibles, including all claim handling and legal expenses.

d) CONSTRUCTION MANAGER, et al. shall be indemnified for loss and defense.

e) CONSTRUCTION MANAGER, et al. shall be included as additional insured on a primary and noncontributory basis.

Hold Harmless Agreement –

Subject only to the limitations set forth below and to the fullest extent permitted by law, the subcontractor shall indemnify, and hold harmless, and defend the Owner, CONSTRUCTION MANAGER, Architect, Consultants and the agents and employees of any of them from and against any and all injuries, claims, damages, losses, expenses, fines penalties and liabilities including but not limited to personnel related cost, attorneys' and experts' fees, court costs, and all other claim-related expenses, directly or indirectly arising out of or resulting from performance, or negligent acts of the Subcontractor's Work under this Subcontract, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury or destruction of tangible property (other than the Work itself), but only if the claim, damage, loss or expense is caused by, connected with, arising out of or resulting from an act or omission of the Subcontractor, the Subcontractor's sub-subcontractors, anyone directly or indirectly employed by any of them or anyone for whose acts they may be liable.

The Subcontractor shall not be required by this agreement to indemnify a party for that portion of any loss that is directly attributable to the negligence of the party to whom indemnification is owed, except to the extent such indemnification is permitted by law. Such obligation shall not be construed to negate, abridge, or otherwise reduce any other right or obligation of indemnity which would otherwise exist as to any party or person described in this clause.

To the fullest extent permitted by law, the Subcontractor agrees to assume the defense of the Owner, CONSTRUCTION MANAGER the Architect, Consultants, and the agents and employees of any of them, in any

User Notes: (1383412816)

claim, proceeding, lawsuit, and/or litigation arising out of any accident, incident, or occurrence that is caused by, connected with, arising out of, or resulting from the performance of the Subcontractor's work under this contract.
The Subcontractor agrees that the obligation to defend commences when a claim is made against the Owner, CONSTRUCTION MANAGER, Architect, Consultants, and/or the agents and employees of any of them, even if the Subcontractor disputes its obligation to indemnify and hold harmless. The party being defended shall have the right to choose its own counsel. The Subcontractor agrees to pay for defense of the Owner, CONSTRUCTION MANAGER, Architects, Consultants, and the agents and employees of any of them with counsel chosen by the party to be defended, upon demand.
The Subcontractor agrees to be bound to CONSTRUCTION MANAGER by the terms and conditions of CONSTRUCTION MANAGER's agreement with the Owner, a copy of said agreement being available for inspection at CONSTRUCTION MANAGER's office. The Subcontractor further agrees that all conditions and requirements imposed, or to be imposed, upon CONSTRUCTION MANAGER by its contract with the owner shall be performed by the Subcontractor insofar as applicable to the work under the subcontract, and the Subcontractor hereby assumes toward CONSTRUCTION MANAGER all obligations and responsibilities that CONSTRUCTION MANAGER, by contract, has assumed or will assume toward the owner with respect to said work.

To the fullest extent permitted by law, the Subcontractor shall reimburse the Owner and CONSTRUCTION MANAGER and the agents and employees of either of them, and any other party CONSTRUCTION MANAGER is contractually required to indemnify, for any costs or expenses, including but not limited to attorney's fees, expended in seeking the Subcontractor's compliance with the above stated duties to defend, indemnify and hold harmless.

The Subcontractor's indemnity, hold harmless, and defense obligations set forth in this agreement shall cover the claim while this contract is in force, shall extend to such claims occurring after this agreement expires or is otherwise terminated, and shall continue until such claim is adjudicated and any and all actions against the Owner and CONSTRUCTION MANAGER and the agents and employees of either of them are settled, terminated, dismissed or concluded.

§ 12.1.2 Coverages, whether written on an occurrence or claims-made basis, shall be maintained without interruption from the date of commencement of the Subcontractor's Work until the date of final payment and termination of any coverage required to be maintained after final payment to the Subcontractor, and, with respect to the Subcontractor's completed operations coverage, until the expiration of the period for correction of Work or for such other period for maintenance of completed operations coverage as specified in the Prime Contract.

§ 12.1.3 If professional services are required under Section 4.9, the Subcontractor shall provide the professional liability insurance coverage required under this Section 12.1 for the following period after completion of the Work:

In accordance with contract documents and supplemental instructions.

Professional liability at least $1,000,000 each occurrence limit

a) Downes, et al. shall be included as additional insured on a primary and noncontributory basis.
b) Subcontractor is responsible for any self-insured retention / deductibles, including all claim handling and legal expenses
c) Downes, et al. shall be indemnified for loss and defense.

Include for (3) years from Date of Substantial Completion.

§ 12.1.4 Certificates of Insurance. The Subcontractor shall provide certificates of insurance acceptable to the Contractor evidencing compliance with the requirements in this Article 12 at the following times: (1) prior to commencement of the Subcontractor's Work; (2) upon renewal or replacement of each required policy of insurance; and (3) upon the Contractor's written request. An additional certificate evidencing continuation of liability coverage, including coverage for completed operations, shall be submitted with the final Application for Payment and thereafter upon renewal or replacement of such coverage until the expiration of the time required in this Article 12. The certificates shall show the Contractor and the Owner as additional insureds on the Subcontractor's Commercial General Liability and any excess or umbrella liability policy.

§ 12.1.5 Deductibles and Self-Insured Retentions. The Subcontractor shall disclose to the Contractor any deductible or self-insured retentions applicable to any insurance required to be provided by the Subcontractor.

§ 12.1.6 Additional Insured Obligations. To the fullest extent permitted by law, the Subcontractor shall cause its commercial general liability coverage to include: (1) the Contractor, the Owner, the Architect, and the Architect's

consultants as additional insureds for claims caused in whole or in part by the Subcontractor's negligent acts or omissions during the Subcontractor's operations; and (2) the Contractor and Owner as additional insureds for claims caused in whole or in part by the Subcontractor's negligent acts or omissions for which loss occurs during the Subcontractor's completed operations. The additional insured coverage shall be primary and non-contributory to any of the Contractor's and Owner's general liability insurance policies and shall apply to both ongoing and completed operations. To the extent commercially available, the additional insured coverage shall be no less than that provided by Insurance Services Office, Inc. (ISO) CG 20 10 07 04, CG 20 37 07 04, and, with respect to the Architect and the Architect's consultants, CG 20 32 07 04**.**

§ 12.1.7 Notice of Cancellation or Change in Coverage. Within three (3) business days of the date the Subcontractor becomes aware of an impending or actual cancellation or expiration of any insurance required by the Subcontract Documents, the Subcontractor shall provide notice to the Contractor of such impending or actual cancellation or expiration. Upon receipt of notice from the Subcontractor, the Contractor shall, unless the lapse in coverage arises from an act or omission of the Contractor, have the right to suspend the Work in accordance with this Agreement until the lapse in coverage has been cured by the procurement of replacement coverage by the Subcontractor. The furnishing of notice by the Subcontractor shall not relieve the Subcontractor of any contractual obligation to provide any required coverage**.**

§ 12.2 Subcontractor's Required Performance Bond and Payment Bond

§ 12.2.1 The Subcontractor shall provide surety bonds, from a company or companies lawfully authorized to issue surety bonds in the jurisdiction where the Project is located, as follows:
(Specify type and penal sum of bonds.)

(Table deleted)

Performance and Payment Bonds

This Subcontractor shall furnish CONSTRUCTION MANAGER with 100% Performance and Labor and Material Payment bonds, in the amount of 100% of the Contract amount with a "dual Obligee" Rider. Contract and Owner shall be dual obligees. Surety companies providing performance and payment bond(s) must be licensed to do business in Connecticut and be approved as sureties on Government contract pursuant to U.S. Treasury Circular No. 570, published annually in the Federal Register. All Performance Bonds, and Labor and Material Payment Bonds submitted to CONSTRUCTION MANAGER must use a Subcontractor Performance Bond Form A, or an approved alternative thereof. Bonds should not be submitted on an AIA Document A311 or A312. The costs of said bonds are included in the Contract Sum.

State Sales Tax Bond

Non-Resident Contractor Bonds and Deposits

In accordance with Connecticut Statutes Section §12-430(7)c, the names of nonresident (out of state) Contractors are required to be reported to the State of Connecticut, Department of Revenue Services (DRS) to ensure that all applicable business taxes are being paid by Subcontractor. Subcontractor must, prior to execution of this Subcontract, furnish proof of its current status as a "verified contractor" with DRS.

An "unverified Contractor" with DRS must file a surety bond with DRS in an amount equal to 5% of the contract price. DRS has issued form AU-964, Surety Bond and Release, which must be used to post that bond.

Upon submission of the bond to DRS, the Subcontractor must promptly furnish to Contractor a copy of the Certificate of Compliance issued by the DRS. If the nonresident contractor fails to submit the bond to DRS and to provide the Contractor Certificate of Compliance, Contractor is required to withhold 5% of the total contract value and deposit it with DRS.

Payment and Performance Bonds shall be on forms approved by and satisfactory to Contractor.

§ 12.2.2 Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations under this Agreement, the Subcontractor shall promptly furnish a copy of the bonds or shall permit a copy to be made.

§ 12.3 Contractor's Insurance and Bond Obligations

§ 12.3.1 The Contractor shall furnish to the Subcontractor certificates of insurance evidencing insurance coverage required of the Contractor under the Prime Contract.

§ 12.3.2 The Contractor shall promptly, upon request of the Subcontractor, furnish a copy or permit a copy to be made of any bond covering payment of obligations arising under the Subcontract.

§ 12.4 Property Insurance

§ 12.4.1 When requested in writing, the Contractor shall provide the Subcontractor with copies of the property and equipment policies in effect for the Project, to the extent copies of the policies are available to the Contractor. The Contractor shall notify the Subcontractor if the required property insurance policies are not in effect.

§ 12.4.2 If the required property insurance is not in effect for the full value of the Subcontractor's Work, then the Subcontractor shall purchase insurance for the value of the Subcontractor's Work, and the Subcontractor shall be reimbursed for the cost of the insurance by an adjustment in the Subcontract Sum.

§ 12.4.3 Property insurance for the Subcontractor's materials and equipment required for the Subcontractor's Work, stored off site or in transit and not covered by the Project property insurance, shall be paid for through the Application for Payment process.

§ 12.5 Waivers of Subrogation

The Contractor and Subcontractor waive all rights against (1) each other and any of their subcontractors, sub-subcontractors, agents, and employees, each of the other, and (2) the Owner, the Architect, the Architect's consultants, and (3) Separate Contractors, if any, and any of their subcontractors, sub-subcontractors, agents, and employees for damages caused by fire or other causes of loss to the extent those losses are covered by property insurance provided under the Prime Contract or other property insurance applicable to the Work or to property at or adjacent to the Project site, except such rights as they may have to proceeds of such insurance held by the Owner as a fiduciary. The Subcontractor shall require similar written waivers in favor of the individuals and entities enumerated herein from the Subcontractor's Sub-subcontractors, agents, and employees. The policies of insurance purchased and maintained by each person or entity agreeing to waive claims pursuant to this Section 12.5 shall not prohibit this waiver of subrogation, which shall be effective as to a person or entity (1) even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, (2) even though that person or entity did not pay the insurance premium directly or indirectly, or (3) whether or not the person or entity had an insurable interest in the property damaged.

ARTICLE 13 TEMPORARY FACILITIES, SERVICES, EQUIPMENT AND WORKING CONDITIONS

§ 13.1 The Contractor shall furnish and make the Contractor's temporary facilities and services available to the Subcontractor at no cost, except as noted below:

In accordance with the Contract Documents and Supplemental Instructions.

§ 13.2 The Contractor's equipment will be available to the Subcontractor only at the Contractor's discretion and on mutually satisfactory terms, except as noted below:

In accordance with the Contract Documents and Supplemental Instructions.

§ 13.3 Specific working conditions as noted below:

(Insert any specific arrangements or requirements concerning working conditions and labor matters applicable to the Subcontractor's Work.)

ARTICLE 14 MISCELLANEOUS PROVISIONS

§ 14.1 Where reference is made in this Subcontract to a provision of another Subcontract Document, the reference refers to that provision as amended or supplemented by other provisions of the Subcontract Documents.

§ 14.2 The Contractor's representative:
(Name, address, email address and other information)

§ 14.3 The Subcontractor's representative:
(Name, address, email address and other information)

§ 14.4 Notice

§ 14.4.1 Except as otherwise provided in Section 14.4.2, where the Subcontract Documents require one party to notify or give notice to the other party, such notice shall be provided in writing to the designated representative of the party to whom the notice is addressed and shall be deemed to have been duly served if delivered in person, by mail, by courier, or by electronic transmission if a method for electronic notice is set forth in Section 14.4.3.

§ 14.4.2 Notice of Claims shall be provided in writing, consistent with the time limits set forth herein and in §15.1.3 of the General Conditions to the Prime Contract, and shall be deemed to have been duly served only if delivered to the designated representative of the party to whom the notice is addressed by certified or registered mail, or by courier providing proof of delivery.

§ 14.4.3 Notice in electronic format, pursuant to Section 14.4.1, may be given in accordance with AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, if completed, or as otherwise set forth below:
(If other than in accordance with AIA Document E203™–2013, insert requirements for delivering notice in electronic format such as name, title, and email address of the recipient and whether and how the system will be required to generate a read receipt for the transmission.)

N/A

§ 14.5 Neither the Contractor's nor the Subcontractor's representative shall be changed without ten days' prior notice to the other party.

§ 14.6 The invalidity of any provision of the Subcontract Documents shall not invalidate the Subcontract or its remaining provisions. If it is determined that any provision of the Subcontract violates any law or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case, the Subcontract shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Subcontract.

§ 14.7 The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form. The parties will use AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

§ 14.7.1 Any use of, or reliance on, all or a portion of a building information model without agreement to protocols governing the use of, and reliance on, the information contained in the model and without having those protocols set

forth in AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, and the requisite AIA Document G202™–2013, Project Building Information Modeling Protocol Form, shall be at the using or relying party's sole risk and without liability to the other party and its contractors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

§ 14.8 Retainage and any reduction thereto are as follows:

In accordance with the Owner's requirements, initial retainage will be in the amount of SEVEN Percent (7%). Once satisfactory proof of compliance with applicable CHRO requirements has been furnished and verified, retainage shall be 5% of each progress payment.

§ 14.9 As required by statute, regulation or other applicable law, Subcontractor shall monitor and track MBE and WBE, local workforce and overall labor participation, including Set Aside documentation. If this Project is funded in whole or in part by funds from the State of Connecticut, Public Act 15-5 (§§58-71 and 88) requires that, effective with all contracts executed after October 1, 2015, all solicitations for municipal public works contracts funded in whole or in part with State funds state in the notice of solicitation that the contract must comply with the set asides mandated by Public Act 15-5. The set aside requirements include a requirement that 25% of the total value of contracts in excess of $50,000.00 be set aside for exclusive bidding for "small contractors," as defined by Section 58 (a) (1), and 25% of such amount (that is, 6.25% of the total value), be set aside for "minority business enterprises," as defined by Section 58(a) (4). For contracts in excess of $50,000.00, Subcontractor must have obtained Commission approval of their Affirmative Action Plan prior to contract execution. Subcontractor is expressly directed to review Public act 15-5, sections 58-71 and 88, to familiarize itself with the requirements of such laws. The Contractor also directs Subcontractor's' attention to sections 63 and 64 (non-discrimination requirements) and 66-68 (affirmative action requirements).

§14.10 Non-Discrimination and Affirmative Action Provisions

The Subcontractor agrees and warrants that in the performance of the Contract such Subcontractor will not discriminate or permit discrimination against any person or group of persons on the grounds of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, sexual orientation, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by such Subcontractor that such disability prevents performance of the work involved, in any manner prohibited by the laws of the United States or of the state of Connecticut. The Subcontractor further agrees to take affirmative action to insure that applicants with job-related qualifications are employed and that employees are treated when employed without regard to of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by such Subcontractor that such disability prevents performance of the work involved; (2) the Subcontractor agrees, in all solicitations or advertisements for employees placed by or on behalf of the Subcontractor, to state that it is an ."affirmative action-equal opportunity employer" in accordance with regulations adopted by the commission; (3) the Subcontractor agrees to provide each labor union or representative of workers with which such Subcontractor has a collective bargaining agreement or other contract or understanding and each vendor with which such Subcontractor has a contract or understanding, a notice to be provided by the commission advising the labor union or workers' representative of the Subcontractor's commitments under this section, and to post copies of the notice in conspicuous places available to employees and applicants for employment; (4) the Subcontractor agrees to comply with each provision of this section and sections 46a-68e and 46a-68f and with each regulation or relevant order issued by said commission pursuant to sections 46a-56, 46a-68e,46a-68f and 46a-86; (5) the Subcontractor agrees to provide the Commission on Human Rights and Opportunities with such information requested by the commission, and permit access to pertinent books, records and accounts, concerning the employment practices and procedures of the Subcontractor as relate to the provisions of this section and section 46a-56.

Any Subcontractor who is a party to a municipal public works contract or quasi-public agency project, where any such contract is valued at less than $50,000 for each year of the contract, shall provide the Commission on Human Rights and Opportunities with a written or electronic representation that complies with the nondiscrimination agreement and warranty under subsection (A)(1) above, provided if there is any change in such representation, the Subcontractor shall provide the updated representation to the Commission not later than 30 days after such change. Any Subcontractor who is a party to a municipal public works contract or a quasi-public agency project, where any such contract is valued at $50,000 or more for any year of the contract, shall provide the Commission with any one of the following: (1) Documentation in the form of a company or corporate police adopted by

resolution of the board of directors, shareholder, managers, members or other governing body of such Subcontractor that complies with the nondiscrimination agreement and warranty under subsection (A)(1) of this section; (2) Documentation in the form of a company or corporate policy adopted by a prior resolution of the board of directors, shareholders, managers, members or other governing body of such Subcontractor if (a) the prior resolution is certified by a duly authorized corporate officer of such contractor to be in effect on the date the documentation is submitted, and the executive director of the Commission on Human Rights and Opportunities or designee certifies that the prior resolution complies with the nondiscrimination agreement and warranty under subdivision (A)(1) of this section; or (3) Documentation in the form of an affidavit signed under penalty of false statement by a chief executive officer, president, chairperson or other corporate officer duly authorized to adopt company or corporate policy that certifies that the company or corporate policy of the contractor complies with the nondiscrimination agreement and warranty under subdivision (A)(1) of this section and is in effect on the date the affidavit is signed..

The Prime Contract is a municipal public works contract or a quasi-public agency project. Accordingly, the Subcontractor agrees and warrants that s/he/it will make good faith efforts to employ minority business enterprises as subcontractors and suppliers of materials on such public works project. The Subcontractor shall include the provisions of subdivision (A)(1) of this section in every subcontract or purchase order entered into to fulfill any obligation of a municipal public works contract or contract for a quasi-public agency project, and such provisions shall be binding on a subcontractor, vendor or manufacturer, unless exempted by regulations or orders of the Commission on Human Rights and Opportunities. The Subcontractor shall take such action with respect to any such subcontract or purchase order as the Commission may direct as a means of enforcing such provisions, including sanctions for noncompliance in accordance with section 46a-56; provided, if such Subcontractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the Commission regarding a state contract, the contractor may request the state of Connecticut to enter into any such litigation or negotiation prior thereto to protect the interests of the state and the state may so enter.

"Minority business enterprise" means any small contractor or supplier of materials fifty-one per cent or more of the capital stock, if any, or assets of which is owned by a person or persons: (1) Who are active in the daily affairs of the enterprise, (2) who have the power to direct the management and policies of the enterprise and (3) who are members of a minority, as such term is defined in subsection (a) of section 32-9n; and "good faith" means that degree of diligence which a reasonable person would exercise in the performance of legal duties and obligations. "Good faith efforts" shall include, but not be limited to, those reasonable initial efforts necessary to comply with statutory or regulatory requirements and additional or substituted efforts when it is determined that such initial efforts will not be sufficient to comply with such requirements. Determination of the Subcontractor's good faith efforts shall include, but shall not be eliminated to, the following factors: The Subcontractor's employment and subcontracting policies, patterns and practices; affirmative advertising recruitment and training; technical assistance activities and such other reasonable activities or efforts as the Commission on Human Rights and Opportunities may prescribe that are designed to ensure the participation of minority business enterprises in municipal public works contracts or quasi-public agency projects. "Municipal public works project" means that portion of an agreement entered into on or after October 1, 2015, between any individual, form or corporation and a municipality for the construction, rehabilitation, conversion, extension, demolition or repair of a public building, highway or other changes or improvements in real property, which is financed in whole or in part by the state, including, but not limited to, matching expenditures, grants, loans, insurance or guarantees but excluding any project of an alliance district, as defined in section 10-262u, finance by the state funding in an amount equal to fifty thousand dollars or less. "Quasi-public agency project" means the construction, rehabilitation, conversion, extension, demolition or repair of a building or other changes or improvements in real property pursuant to a contract entered into on or after October 1, 2015, which is financed in whole or in part by a quasi-public agency using state funds, including, but not limited to, matching expenditures, grants, loans, insurance or guarantees.

§ 14.11 The Subcontractor who is selected to perform this State funded project must comply with CONN. GEN. STAT. §§ 4a-60, 4a-60a, 4a-60g, and 46a-68b through 46a-68f, inclusive, as amended by June 2015 Special Session Public Act 15-5. An Affirmative Action Plan must be filed with and approved by the Commission on Human Rights and Opportunities prior to the commencement of construction. State law requires a minimum of twenty-five (25%) percent of the state-funded portion of the contract for award to subcontractors holding current certification from the

Connecticut Department of Administrative Services ("DAS") under the provisions of CONN. GEN. STAT. § 4a-60g, as amended. (25% of the work with DAS certified Small and Minority owned businesses and 25% of that work with DAS certified Minority, Women and/or Disabled owned businesses.) The contractor must demonstrate good faith effort to meet the 25% set-aside goals. For municipal public works contracts and quasi-public agency projects, the contractor must file a written or electronic non-discrimination certification with the Commission on Human Rights and Opportunities. Forms can be found at:
http://v .

§ 14.12 The Subcontractor is responsible for compliance with all Connecticut DAS Office of Grants Administration (OGA) requirements to ensure full reimbursement of eligible costs, including costs for change orders, to the Owner. This Subcontractor is responsible to reimburse to the Owner any lost reimbursement of eligible costs, including change order monies, as a result of this Subcontractor's failure to be in compliance with all OGA requirements.

§ 14.14 EEO/LOCAL EMPLOYMENT GOALS – Each Subcontractor will be responsible to document a "Good Faith Effort" to employ a participating workforce comprised of:

Standard Form of Agreement Between Owner and Construction Manager as **Constructor** *where the basis of payment is the Cost of the Work Plus a Fee with a Guaranteed Maximum Price*

AGREEMENT made as of the 22nd day of September in the year 2023
(In words, indicate day, month, and year.)

BETWEEN the Owner:
(Name, legal status, address, and other information)

Board of Education of the Town of Greenwich,
acting by and through the Old Greenwich School Building Committee
Havemeyer Building
290 Greenwich Avenue
Greenwich, CT 06830

and the Construction Manager:
(Name, legal status, address, and other information)

Downes Construction Company, LLC
200 Stanley Street
New Britain, CT 06051

for the following Project:
(Name, location, and detailed description)

Renovations and Addition to Old Greenwich School Project
285 Sound Beach Road
Old Greenwich, CT 06870

The Architect:
(Name, legal status, address, and other information)

Silver Petrucelli & Associates, Inc.
3190 Whitney Avenue
Hamden, CT 06518

The Owner and Construction Manager agree as follows:

The only part of the Work authorized by the Owner at the time of the execution of this Agreement is the Work to be performed for Preconstruction Services described in the RFP, Section 3.1 of this Agreement and elsewhere in the Contract Documents. Unless and until the Owner provides the Construction Manager with a written notice to proceed with the Work for the Bidding and Procurement Phase described in the RFP and elsewhere in the Contract Documents, the Construction Manager shall not proceed with any such Work. Unless and until the Owner provides the Construction Manager with a written notice to proceed with the Work for the Construction and Closeout Phase described in the RFP and elsewhere in the Contract Documents, the Construction Manager shall not proceed with any such Work. Any Work performed by or on behalf of the Construction Manager without such written authorization to proceed shall be performed at the sole cost and expense of the Construction Manager without any right to reimbursement from the Owner.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

AIA Document A201™–2017, General Conditions of the Contract for Construction, is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

ARTICLE 1 INITIAL INFORMATION

§ 1.1 This Agreement is based on the Initial Information set forth in this Section 1.1.
(For each item in this section, insert the information or a statement such as "not applicable" or "unknown at time of execution.")

§ 1.1.1 The Owner's program for the Project, as described in Section 4.1.1:
(Insert the Owner's program, identify documentation that establishes the Owner's program, or state the manner in which the program will be developed.)

See Educational Specifications for the Old Greenwich School dated December 16, 2020 and attached hereto as Attachment 1.

§ 1.1.2 The Project's physical characteristics:
(Identify or describe pertinent information about the Project's physical characteristics, such as size; location; dimensions; geotechnical reports; site boundaries; topographic surveys; traffic and utility studies; availability of public and private utilities and services; legal description of the site, etc.)

See Attachment B, Owner's Request for Proposal for Construction Management Services (hereinafter "RFP 2408-23" or "RFP") dated February 23, 2023.

§ 1.1.3 The Owner's budget for the Guaranteed Maximum Price, as defined in Article 6:
(Provide total and, if known, a line item breakdown.)

TBD

§ 1.1.4 The Owner's anticipated design and construction milestone dates:

.1 Design phase milestone dates, if any:

As described in the RFP

.2 Construction commencement date:

As described in the RFP

.3 Substantial Completion date or dates:

As described in the RFP

.4 Other milestone dates:

§ 1.1.5 The Owner's requirements for accelerated or fast-track scheduling, or phased construction, are set forth below:
(Identify any requirements for fast-track scheduling or phased construction.)

As described in the RFP

§ 1.1.6 The Owner's anticipated Sustainable Objective for the Project:
(Identify and describe the Owner's Sustainable Objective for the Project, if any.)

TBD

§ 1.1.6.1 If the Owner identifies a Sustainable Objective, the Owner and Construction Manager shall complete and incorporate AIA Document E234™–2019, Sustainable Projects Exhibit, Construction Manager as Constructor Edition, into this Agreement to define the terms, conditions and services related to the Owner's Sustainable Objective. If E234–2019 is incorporated into this agreement, the Owner and Construction Manager shall incorporate the completed E234–2019 into the agreements with the consultants and contractors performing services or Work in any way associated with the Sustainable Objective.

§ 1.1.7 Other Project information:
(Identify special characteristics or needs of the Project not provided elsewhere.)

§ 1.1.8 The Owner identifies the following representative in accordance with Section 4.2:
(List name, address, and other contact information.)

James Waters
Chair, Old Greenwich School Building Committee
Address: Havemeyer Building, 290 Greenwich Avenue, Greenwich, CT 06830
Tel: 703-528-1930
Email: james.waters.ogsbc@gmail.com

§ 1.1.9 The persons or entities, in addition to the Owner's representative, who are required to review the Construction Manager's submittals to the Owner are as follows:
(List name, address and other contact information.)

Ghassan Antonios

§ 1.1.15 Other Initial Information on which this Agreement is based:

Downes Construction Company's Proposal dated March 23, 2023 in response to RFP 2408-23 but only to the extent that such proposal is not inconsistent or in conflict with the terms and conditions of any other Contract Document.

§ 1.2 The Owner and Construction Manager may rely on the Initial Information. Both parties, however, recognize that such information may materially change, and, in that event, the Owner and the Construction Manager shall appropriately adjust the Project schedule, the Construction Manager's services, and the Construction Manager's compensation. The Owner shall adjust the Owner's budget for the Guaranteed Maximum Price and the Owner's anticipated design and construction milestones, as necessary, to accommodate material changes in the Initial Information.

§ 1.3 Neither the Owner's nor the Construction Manager's representative shall be changed without ten days' prior notice to the other party.

ARTICLE 2 GENERAL PROVISIONS

§ 2.1 The Contract Documents

The Contract Documents consist of this Agreement, AIA Document A201-2017, General Conditions of the Contract for Construction, as modified by the Owner ("General Conditions"). Supplementary and other Conditions identified in this Agreement, Drawings, Specifications, Addenda issued prior to execution of this Agreement, other documents listed in this Agreement, and Modifications issued after execution of this Agreement, all of which form the Contract and are as fully a part of the Contract as if attached to this Agreement or repeated herein. Upon the Owner's acceptance of the Construction Manager's Guaranteed Maximum Price proposal, the Contract Documents will also include the Guaranteed Maximum Price Amendment executed by the Owner and the Construction Manager and the documents described in Section 3.2.3 and identified in the Guaranteed Maximum Price Amendment and revisions prepared by the Architect and furnished by the Owner as described in Section 3.2.8. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral. If anything in the other Contract Documents, other than a Modification, is inconsistent with this Agreement, this Agreement shall govern. An enumeration of the Contract Documents, other than a Modification, appears in Article 15.

§ 2.2 Relationship of the Parties

The Construction Manager accepts the relationship of trust and confidence established by this Agreement and covenants with the Owner to cooperate with the Owner and the Architect and exercise the Construction Manager's skill and judgment in furthering the interests of the Owner to furnish efficient construction administration, management services, and supervision; to furnish at all times an adequate supply of workers and materials; and to perform the Work in an expeditious and economical manner consistent with the Owner's interests, all of which shall be consistent with the Construction Manager's Standard of Care (as defined below). The Owner agrees to furnish or approve, in a timely manner, information required by the Construction Manager and to make payments to the Construction Manager in accordance with the requirements of the Contract Documents.

§ 2.2.1 Construction Manager's Standard of Care

The Construction Manager shall be responsible for the performance of the Work as an independent contractor and in a good and workmanlike manner (i) consistent with the Contract Documents; (ii) consistent with the instructions, guidance and direction of the Owner and Architect; (iii) consistent with the with the prevailing applicable professional or industry standards; (iv) consistent with sound practices; (v) as expeditiously as is consistent with such professional skill and care and the orderly progress of the Work and with the Contract Documents and the instructions, guidance and direction of the Owner and Architect; and (vi) in a manner that will not exceed the Guaranteed Maximum Price as set forth in the Contract (the standards of this Section 2.2.1 shall be referred to herein as the "Construction Manager's Standard of Care"). The Construction Manager shall exercise the Construction Manager's Standard of Care in performing all aspects of the Work. All references in the Contract Documents to the knowledge, inference, reliance, awareness, determination, belief, observation, recognition or discovery of the Construction Manager or reference to any similar term shall include the constructive knowledge, inference, reliance, awareness, determination, belief, observation, recognition attributed to the Construction Manager ("constructive knowledge"). Such constructive knowledge shall include the knowledge, inference,

reliance, awareness, determination, belief, observation and recognition the Construction Manager would have obtained upon the exercise of the Construction Manager's Standard of Care.

§ 2.2.1.1 The Construction Manager shall be responsible for the performance of the Work in accordance with the Contract Documents, the Conditions (as hereafter defined) and Applicable Laws (as hereafter defined), and the Contractor shall obtain and post all necessary permits at the site. The term "Conditions" shall mean and include all applicable laws, rules, regulations, ordinances, codes, orders, guidelines, standards and conditions of funding imposed on the Work and/or Project by the Agencies, as defined hereinafter. The term "Applicable Laws" shall mean and include the Conditions and all applicable local, state and federal laws, statutes, ordinances, codes, building codes, rules, regulations, permits, and orders enacted, promulgated, issued or ordered by any governmental body or public or quasi-public authority having jurisdiction over the Work, the Construction Manager and/ or the site of the Project.

§ 2.2.1.2 The "Agencies" are the Connecticut Department of Administrative Services ("DAS"), the Office of School Construction Grants and Review ("OSCG&R") and all other governmental authorities having regulatory or administrative jurisdiction over the Work and/or the Project and all representatives or designees of the DAS and such other governmental authorities.

§ 2.2.1.3 Notwithstanding anything to the contrary in this Agreement, the Construction Manager shall attend such meetings and site-visits, and make such submissions, as are necessary to comply with Applicable Law.

§ 2.2.1.4 Any information obtained by the Construction Manager from the Owner or Architect may not be used, published, distributed, sold or divulged by the Construction Manager, its Subcontractors, or any Sub-subcontractors for such party's own purposes or for the benefit of any person, firm, corporation or other entity other than the Owner, without the prior written consent of the Owner. Any information obtained by the Construction Manager or its Subcontractors or any Sub-subcontractors that is designated by the Owner in accordance with Applicable Law as confidential shall not be disclosed to any other parties without the prior written consent of the Owner.

§ 2.3 General Conditions

§ 2.3.1 For the Preconstruction Phase, the General Conditions shall apply as follows: Section 1.5, Ownership and Use of Documents; Section 1.7, Digital Data Use and Transmission; Section 1.8, Building Information Model Use and Reliance; Section 2.2.4, Confidential Information; Section 3.12.10, Professional Services; Section 10.3, Hazardous Materials; Section 13.1, Governing Law. The term "Contractor" as used in the General Conditions shall mean the Construction Manager.

§ 2.3.2 For the Construction Phase, the General Conditions shall apply and be incorporated herein by reference. The term "Contractor" as used in the General Conditions shall mean the Construction Manager. Where reference is made in this Agreement to a provision of the General Conditions or any other AIA document or provision, the reference refers to that document or provision as amended by the Owner and, if applicable, any other party to such document, or as amended and supplemented by other provisions of the Contract Documents.

§ 2.4 Legal Requirements

§ 2.4.1 Without limiting the responsibility of the Construction Manager under other provisions of the Contract Documents, the Construction Manager shall conduct the Work in accordance with Applicable Laws which shall mean and include, without limitation that:

.1 Construction Manager will comply with the requirements of Connecticut Regulation Sections 16a-38k-1 through 9 (High Performance Building Requirements), including any waste stream management requirements to the extent such High Performance Building Requirements are specified in the Contract Documents;

.2 Construction Manager will provide Change Orders and supporting documents and other required documentation in the form required by the DAS and any other of the Agencies, including the OSCG&R;

.3 Construction Manager will comply with bidding requirements of Section 3.1.11 herein; and

.4 Construction Manager will maintain records and reports as required by the DAS and other Agencies, including the OSCG&R.

ARTICLE 3 CONSTRUCTION MANAGER'S RESPONSIBILITIES

The Construction Manager's Preconstruction Phase responsibilities are set forth in Sections 3.1 and 3.2, and in the applicable provisions of the General Conditions referenced in Section 2.3.1. The Construction Manager's Construction

AIA Document A133 – 2019. Copyright © 1991, 2003, 2009, and 2019. All rights reserved. "The American Institute of Architects," "American Institute of Architects," "AIA," the AIA Logo, and "AIA Contract Documents" are trademarks of The American Institute of Architects. This document was produced at 11:24:19 ET on 09/21/2023 under Order No.4104244337 which expires on 07/18/2024, is not for resale, is licensed for one-time use only and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
User Notes: (1750616428)

DocuSign Envelope ID: 805EBA63-4B76-4B24-802B-56440E960352

Phase responsibilities are set forth in Section 3.3. The Owner and Construction Manager may agree, in consultation with the Architect, for the Construction Phase to commence prior to completion of the Preconstruction Phase, in which case, subject to Construction Manager's receipt of written notice from then Owner to proceed with the Construction Phase, both phases will proceed concurrently. The Construction Manager shall identify a representative authorized to act on behalf of the Construction Manager with respect to the Project which designation shall be subject to the Owner's approval and which designation may not be changed without the Owner's prior approval.

§ 3.1 Preconstruction Phase

§ 3.1.1 Extent of Responsibility

The Construction Manager shall exercise the Construction Manager's Standard of Care in performing its Preconstruction Services. The Owner and Architect shall be entitled to rely on, and shall not be responsible for, the accuracy, completeness, and timeliness of services and information furnished by the Construction Manager. The Construction Manager, however, does not warrant or guarantee estimates and schedules except as may be included as part of the Guaranteed Maximum Price. The Construction Manager is not required to ascertain that the Drawings and Specifications are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, but the Construction Manager shall promptly report to the Architect and Owner any nonconformity discovered by or made known to the Construction Manager as a request for information in such form as the Architect may require.

§ 3.1.2 The Construction Manager shall provide a preliminary evaluation of the Owner's program, schedule and construction budget requirements, each in terms of the other.

§ 3.1.3 Consultation

§ 3.1.3.1 The Construction Manager shall schedule and conduct meetings with the Architect and Owner to discuss such matters as procedures, progress, coordination, and scheduling of the Work.

§ 3.1.3.2 The Construction Manager shall advise the Owner and Architect on proposed site use and improvements, selection of materials, building systems, and equipment. The Construction Manager shall also provide recommendations to the Owner and Architect, consistent with the Project requirements, on constructability; availability of materials and labor; time requirements for procurement, installation and construction; prefabrication; and factors related to construction cost including, but not limited to, costs of alternative designs or materials, preliminary budgets, life-cycle data, and possible cost reductions. The Construction Manager shall consult with the Architect regarding professional services to be provided by the Construction Manager during the Construction Phase.

§ 3.1.3.3 The Construction Manager shall assist the Owner and Architect in establishing building information modeling and digital data protocols for the Project, using AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

§ 3.1.4 Project Schedule

When Project requirements in Section 4.1.1 have been sufficiently identified, the Construction Manager shall prepare and periodically update a Project schedule for the Architect's review and the Owner's acceptance. The Construction Manager shall obtain the Architect's approval for the portion of the Project schedule relating to the performance of the Architect's services. The Project schedule shall coordinate and integrate the Construction Manager's services, the Architect's services, other Owner consultants' services, and the Owner's responsibilities; and identify items that affect the Project's timely completion. The updated Project schedule shall include the following: submission of the Guaranteed Maximum Price proposal; components of the Work; times of commencement and completion required of each Subcontractor; ordering and delivery of products, including those that must be ordered in advance of construction; and the occupancy requirements of the Owner.

§ 3.1.5 Phased Construction

The Construction Manager, in consultation with the Architect, shall provide recommendations with regard to accelerated or fast-track scheduling, procurement, and sequencing for phased construction as described in the RFP. The Construction Manager shall take into consideration cost reductions, cost information, constructability, provisions for temporary facilities, and procurement and construction scheduling issues.

§ 3.1.6 Cost Estimates

§ 3.1.6.1 Based on the preliminary design and other design criteria prepared by the Architect, the Construction Manager shall prepare, for the Architect's review and the Owner's approval, preliminary estimates of the Cost of the Work or the cost of program requirements using area, volume, or similar conceptual estimating techniques. If the Architect or Construction Manager suggests alternative materials and systems, the Construction Manager shall provide cost evaluations of those alternative materials and systems.

§ 3.1.6.2 As the Architect progresses with the preparation of the Schematic Design, Design Development and Construction Documents, the Construction Manager shall prepare and update, at appropriate intervals agreed to by the Owner, Construction Manager and Architect, an estimate of the Cost of the Work with increasing detail and refinement. The Construction Manager shall include in the estimate those costs to allow for the further development of the design, price escalation, and market conditions, until such time as the Owner and Construction Manager agree on a Guaranteed Maximum Price for the Work. The estimate shall be provided for the Architect's review and the Owner's approval. The Construction Manager shall inform the Owner and Architect in the event that the estimate of the Cost of the Work exceeds the latest approved Project budget and make recommendations for corrective action.

§ 3.1.6.3 If the Architect is providing cost estimating services as a Supplemental Service, and a discrepancy exists between the Construction Manager's cost estimates and the Architect's cost estimates, the Construction Manager and the Architect shall work together to reconcile the cost estimates.

§ 3.1.7 As the Architect progresses with the preparation of the Schematic Design, Design Development and Construction Documents, the Construction Manager shall consult with the Owner and Architect and make recommendations regarding constructability and schedules, for the Architect's review and the Owner's approval.

§ 3.1.8 The Construction Manager shall provide recommendations and information to the Owner and Architect regarding equipment, materials, services, and temporary Project facilities.

§ 3.1.9 The Construction Manager shall provide a staffing plan for Preconstruction Phase services for the Owner's review and approval.

§ 3.1.10 If the Owner identified a Sustainable Objective in Article 1, the Construction Manager shall fulfill its Preconstruction Phase responsibilities as required in AIA Document E234™–2019, Sustainable Projects Exhibit, Construction Manager as Constructor Edition, attached to this Agreement.

§ 3.1.11 Bidding for Subcontractors and Suppliers

§ 3.1.11.1 Neither the Construction Manager, nor any subsidiary, parent, company, or other related party (as defined in Section 7.8.1 of this Agreement) of the Construction Manager may perform any part of the Work with its own forces.

§ 3.1.11.2 No element of the Work may be released for bidding prior to Construction Manager's receipt of the written notice from the Owner to proceed with bidding the Work. The Owner shall also Notices to proceed with respect to each sub-phase of the Preconstruction phase as described in the RFP.

§ 3.1.11.3 The Construction Manager shall be solely responsible for assuring that the procurement and award of Subcontracts for the Work are conducted in a manner consistent with Applicable Laws and the Contract Documents. Such responsibilities shall include, without limitation, compliance with the requirements of Connecticut General Statutes Sections 4b-91, 10-287(b)(1), 4a-100, 4a-60, et seq.; 4a-60a and 46a-68c, as applicable.

§ 3.1.11.3.1

(a) **Compliance with CGS §4a-60:**

(1) The Construction Manager agrees and warrants that in the performance of the Contract such Construction Manager will not discriminate or permit discrimination against any person or group of persons on the grounds of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by such Construction Manager that such disability prevents performance of the work involved, in any manner prohibited by the laws of the United States or of the state of Connecticut; and the Construction Manager further agrees to take affirmative action to insure that applicants with job-related qualifications are employed and that employees are treated when employed without regard to their race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression,

intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by such Construction Manager that such disability prevents performance of the work involved;

(2) The Construction Manager agrees, in all solicitations or advertisements for employees placed by or on behalf of the Construction Manager, to state that it is an "affirmative action-equal opportunity employer" in accordance with regulations adopted by the Commission on Human Rights and Opportunities;

(3) The Construction Manager agrees to provide each labor union or representative of workers with which such Construction Manager has a collective bargaining agreement or other contract or understanding and each vendor with which such Construction Manager has a contract or understanding, a notice to be provided by the Commission on Human Rights and Opportunities advising the labor union or workers' representative of the Construction Manager's commitments under this section, and to post copies of the notice in conspicuous places available to employees and applicants for employment;

(4) The Construction Manager agrees to comply with each provision of Connection General Statutes §4a-60 and Connecticut General Statutes sections 46a-68e and §46a-68f and with each regulation or relevant order issued by said commission pursuant to Connecticut General Statutes sections 46a-56, 46a-68e, 46a-68f and 46a-86; and

(5) The Construction Manager agrees to provide the Commission on Human Rights and Opportunities with such information requested by the commission, and permit access to pertinent books, records and accounts, concerning the employment practices and procedures of the Construction Manager as relate to the provisions of Connection General Statutes §4a-60 and Connection General Statutes § 46a-56.

(b) If this Contract is a public works contract, municipal public works contract or contract for a quasi-public agency project, the Construction Manager agrees and warrants that he or she will make good faith efforts to employ minority business enterprises as subcontractors and suppliers of materials on such public works or quasi-public agency project.

(c) The Construction Manager shall include the provisions of subsections (a) and (b) of this Section 3.1.11.3.1 in every subcontract or purchase order entered into in order to fulfill any obligation of a contract with the state, and in every subcontract entered into in order to fulfill any obligation of a municipal public works contract or contract for a quasi-public agency project, and such provisions shall be binding on a subcontractor, vendor or manufacturer, unless exempted by regulations or orders of the Commission on Human Rights and Opportunities. The Construction Manager shall take such action with respect to any such subcontract or purchase order as the commission may direct as a means of enforcing such provisions, including sanctions for noncompliance in accordance with Connecticut General Statutes § 46a-56; provided, if such Construction Manager becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the commission regarding a state contract, the Construction Manager may request the state of Connecticut to enter into any such litigation or negotiation prior thereto to protect the interests of the state and the state may so enter.

§ 3.1.11.3.2

(a) Compliance with Connecticut General Statutes §4a-60a:

(1) The Construction Manager agrees and warrants that in the performance of the Contract the Construction Manager will not discriminate or permit discrimination against any person or group of persons on the grounds of sexual orientation, in any manner prohibited by the laws of the United States or of the state of Connecticut, and that employees are treated when employed without regard to their sexual orientation;

(2) The Construction Manager agrees to provide each labor union or representative of workers with which such Construction Manager has a collective bargaining agreement or other contract or understanding and each vendor with which the Construction Manager has a contract or understanding, a notice to be provided by the Commission on Human Rights and Opportunities advising the labor union or workers' representative of the Construction Manager's commitments under Connecticut General Statutes §4a-60a, and to post copies of the notice in conspicuous places available to employees and applicants for employment;

(3) The Construction Manager agrees to comply with each provision of Connecticut General Statutes §4a-60a and with each regulation or relevant order issued by said Commission on Human Rights and Opportunities pursuant to Connecticut General Statutes§46a-56; and

(4) The Construction Manager agrees to provide the Commission on Human Rights and Opportunities with such information requested by the commission, and permit access to pertinent books, records and accounts, concerning the employment practices and procedures of the Construction Manager which relate to the provisions of Connecticut General Statutes §4a-60a and Connecticut General Statutes §46a-56.

(b) The Construction Manager shall include the provisions of subsection (a) of this Section 3.1.11.3.2 in every subcontract or purchase order entered into in order to fulfill any obligation of a contract with the state, and in every subcontract entered into in order to fulfill any obligation of a municipal public works contractor contract for a quasi-public agency project, and such provisions shall be binding on a subcontractor, vendor or manufacturer unless exempted by regulations or orders of the Commission on Human Rights and Opportunities. The Construction Manager shall take such action with respect to any such subcontract or purchase order as the commission may direct as a means of enforcing such provisions, including sanctions for noncompliance in accordance with Connecticut General Statutes §46a-56: provided, if such Construction Manager becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the commission regarding a state contract, the Construction Manager may request the state of Connecticut to enter into any such litigation or negotiation prior thereto to protect the interests of the state and the state may so enter.

§ 3.1.11.4 This contract is subject to state set-aside and contract compliance requirements. The Construction Manager must comply with Connecticut General Statutes §§ 4a-60, 4a-60a, 4a-60g, and 46a-68b through 46a-68f, inclusive, as amended by June 2015 Special Session Public Act 15-5. An Affirmative Action Plan must be filed with and approved by the Commission on Human Rights and Opportunities prior to the commencement of construction. The Construction Manager shall be required to make good faith efforts to place a minimum of twenty-five (25%) percent of the subcontracts awarded by the Construction Manager with eligible contractors holding current certification from the Connecticut Department of Administrative Services ("DAS") under the provisions of Connecticut General Statutes § 4a-60g, as amended (25% of the work with DAS-certified Small and Minority owned business(s) and 25% of that work with DAS-certified Minority, Women and/or Disabled owned businesses).

§ 3.1.11.5 The Construction Manager shall develop bidders' interest in the Project and, with the assistance of the Architect, develop bid packages for the various components of the Work. The Construction Manager shall develop, for the review and approval by the Owner, the criteria which the Construction Manager will use to determine whether a bidder is responsible and qualified. The Construction Manager shall include all such criteria as approved by the Owner in the bid packages. To the extent permitted under Applicable Laws, the Construction Manager shall not be obligated hereunder to contract with an individual or entity with which the Construction Manager has a reasonable objection.

§ 3.1.11.6 The Construction Manager shall summarize the bids received for each component of the Work in a spreadsheet format, including all analysis and adjustments necessary to permit a meaningful comparison among the bidders. The Construction Manager shall also provide, as appropriate, information concerning each bidder's financial strength, past performance, and current workload, along with Construction Manager's recommendations for award.

§ 3.1.11.7 The Construction Manager shall award the Subcontract for each component of the Work to the lowest responsible qualified bidder for such component of the Work only after a public invitation to bid, which shall be advertised in a newspaper having circulation in the town in which construction is to take place and posted on the State Contracting Portal maintained by the State of Connecticut.

§ 3.1.11.8 To the extent that the terms and conditions of this Section 3.1.11 fail to comply with the requirements of Applicable Laws, the Construction Manager shall notify the Owner and unless otherwise instructed by the Owner, shall comply with the requirements of Applicable Laws.

§ 3.1.12 Procurement

The Construction Manager shall prepare, for the Architect's review and the Owner's acceptance, a procurement schedule for items that must be ordered in advance of construction. Such schedule will take into account any pre-bid approvals required under Connecticut General Statutes Sections § 10-291 and § 10-292. The Construction Manager shall expedite and coordinate the ordering and delivery of materials that must be ordered in advance of construction.

§ 3.1.13 Compliance with Laws

The Construction Manager shall comply with Applicable Laws with regard to its performance under this Contract, and with equal employment opportunity programs, and other programs as may be required by governmental and quasi-governmental authorities for inclusion in the Contract Documents.

§ 3.1.13.1 In addition to the forgoing, and without limiting the generality thereof, the Construction Manager's responsibilities during the Preconstruction Phase shall include those set forth in the RFP as well as the following:

.1 Estimating: Verification of the validity of Owner's and Architect's budget assumptions. Provision of full detailed estimates at the standard milestones of the completion of Preliminary Concept Design, Schematic Design, Design Development and Bid Documents.

.2 Scheduling: Development of a detailed schedule that is tracked through the Preconstruction Phase to capture all of the anticipated work activities. Continue to use the schedule through the Construction Phase to ensure timely completion of the Work.

.3 Value Engineering: Working with design professionals, develop value engineering at the appropriate milestones of design. Manage the value engineering log as appropriate.

.4 Cost Trending: In addition to the milestone estimates, tracking of the budget as design documents are produced for review and approval. Maintain a cost trending log to document the significant scope changes from estimate to estimate.

.5 Constructability Review: Development of a listing of building systems that may have constructability or sequencing issues and inform the Architect of such potential problem design areas.

.6 Site Logistics Plan: Development of a graphic site logistics plan showing lay-down areas and access in and out of the building and Project site.

.7 Quality Plan: Develop a plan to describe how quality of the Work will be ensured in the execution of the design and communicated to the subcontractors.

.8 Safety Plan: Develop a project specific safety plan; and

.9 High Performance Building Standards. Advise on the relative costs and scheduling effects of various options, as designed by the Architect, for compliance with Connecticut General Statutes Section 16a-38k and Connecticut Regulations Sections 16a-38k-1 through 9 if applicable to the Project. The Construction Manager shall participate in any collaborative sessions held pursuant to Connecticut Regulations Section 16a-38k-3(b) and shall assist the Owner and Architect in developing any request for an exemption made pursuant to Connecticut Regulations Section 16a-38k-9.

§ 3.1.14 Other Preconstruction Services

Insert a description of any other Preconstruction Phase services to be provided by the Construction Manager, or reference an exhibit attached to this document

(Describe any other Preconstruction Phase services, such as providing cash flow projections, development of a project information management system, early selection or procurement of subcontractors, etc.)

As described in the RFP and in Article 5 below.

§ 3.2 Guaranteed Maximum Price Proposal

§ 3.2.1 At a time to be mutually agreed upon by the Owner and the Construction Manager and in consultation with the Architect, the Construction Manager shall prepare a Guaranteed Maximum Price proposal for the Owner's and Architect's review, and the Owner's acceptance. The Guaranteed Maximum Price in the proposal shall be the sum of the Construction Manager's estimate of the Cost of the Work, the Construction Contingency (as defined below) and the Construction Manager's Fee (as defined below)

§ 3.2.1.1 Construction Contingency

.1 The "Construction Contingency" is an amount available to reimburse the Construction Manager for unanticipated costs provided such costs are of the type included in the definition of the Cost of the Work under Article 7 hereafter and which costs are not included in a Change Order pursuant to this Agreement. The Construction Manager shall be required to obtain the Owner's written permission in advance of incurring costs that the Construction Manager proposes be charged to the Construction Contingency. The Construction Manager's request for such consent shall be in writing and include an explanation of the reason such cost is to be incurred. The Construction Manager shall not be entitled to reimbursement of any such cost unless, prior to incurring such cost, the Owner provided such consent.

.2 At final completion, One Hundred percent (100 %) of the unspent Construction Contingency shall inure to the benefit of the Owner.

.3 The amount of the Construction Contingency will be fixed as a component of the Guaranteed Maximum Price set forth in the Guaranteed Maximum Price Amendment after all Subcontracts have been awarded and will, under no circumstances, exceed 3% of the Cost of the Work reflected in the Guaranteed Maximum Price Amendment.

§ 3.2.2 To the extent that the Contract Documents are anticipated to require further development by the Architect, the Guaranteed Maximum Price includes the costs attributable to such further development consistent with the Contract Documents and reasonably inferable therefrom. Such further development does not include changes in scope, systems, kinds and quality of materials, finishes, or equipment, all of which, if required, shall be incorporated by Change Order or Construction Change Directive.

§ 3.2.3 The Construction Manager shall include with the Guaranteed Maximum Price proposal a written statement of its basis, which shall include the following:

.1 A list of the Drawings and Specifications, including all Addenda thereto, and the Conditions of the Contract;

.2 A list of the clarifications and assumptions made by the Construction Manager in the preparation of the Guaranteed Maximum Price proposal, including assumptions under Section 3.2.2;

.3 A statement of the proposed Guaranteed Maximum Price, including a statement of the estimated Cost of the Work organized by trade categories or systems, including allowances; the Construction Contingency; and the Construction Manager's Fee;

.4 The anticipated date of Substantial Completion upon which the proposed Guaranteed Maximum Price is based; and

.5 A period of time (of not less than forty-five (45) days after Construction Manager's submission of the Guaranteed Maximum Price proposal in accordance with the terms and conditions of this Agreement) during which such proposal may not be unilaterally modified or withdrawn by the Construction Manager (the "Proposal Period")..

§ 3.2.4 Intentionally Omitted.

§ 3.2.5 The Construction Manager shall meet with the Owner and Architect to review the Guaranteed Maximum Price proposal and the Project Schedule (as defined in Section 3.2.13.1 of this Agreement). In the event that the Owner and Architect discover any inconsistencies or inaccuracies in the information presented, they shall promptly notify the Construction Manager, who shall make appropriate adjustments to the Guaranteed Maximum Price proposal, its basis, or both, or to the Project Schedule. The risk of loss due to inconsistencies or inaccuracies in the Guaranteed Maximum Price and the Project Schedule and/or in the Guaranteed Maximum Price Amendment executed pursuant to Section 3.2.6, shall be the Construction Manager's, except to the extent any inconsistency or inaccuracy is due to the fault of the Owner or the Architect.

§ 3.2.6 If the Owner notifies the Construction Manager in writing prior to the end of the Proposal Period that the Owner has accepted the Construction Manager's Guaranteed Maximum Price proposal, the Guaranteed Maximum Price proposal shall be deemed effective without further acceptance from the Construction Manager. Following acceptance of a Guaranteed Maximum Price, the Owner and Construction Manager shall execute the Guaranteed Maximum Price Amendment amending this Agreement, a copy of which the Owner shall provide to the Architect. The Guaranteed Maximum Price Amendment shall set forth the agreed upon Guaranteed Maximum Price with the information and assumptions upon which it is based.

§ 3.2.7 The Construction Manager shall not incur any cost to be reimbursed as part of the Cost of the Work prior to the execution of the Guaranteed Maximum Price Amendment, unless the Owner provides prior written authorization for such costs. In executing this Agreement, the Construction Manager understands and agrees that the Owner reserves the right to determine at any time, in its sole discretion, whether any services beyond Preconstruction Services are to be provided by the Construction Manager. The commencement of any services by the Construction Manager beyond Preconstruction Services are dependent and expressly conditioned upon all necessary municipal approvals and the availability of funds sufficient to allocate to any such services. Accordingly, the Construction Manager shall not proceed with the performance of any services beyond Preconstruction Services without the express prior written consent of the Owner.

§ 3.2.8 The Owner shall authorize the Architect to prepare revisions to the Contract Documents that incorporate the agreed-upon assumptions and clarifications contained in the Guaranteed Maximum Price Amendment. The Owner shall promptly furnish such revised Contract Documents to the Construction Manager. The Construction Manager shall notify the Owner and Architect of any inconsistencies between the agreed-upon assumptions and clarifications contained in the Guaranteed Maximum Price Amendment and the revised Contract Documents.

§ 3.2.9 The Construction Manager shall include in the Guaranteed Maximum Price all sales, consumer, use and similar taxes for the Work provided by the Construction Manager that are legally enacted, whether or not yet effective, at the time the Guaranteed Maximum Price Amendment is executed.

§ 3.2.10 If the Guaranteed Maximum Price proposal is unacceptable to the Owner, the Owner may, by written notice to the Construction Manager, terminate this Agreement and shall pay the Construction Manager the fee for Preconstruction Phase services to the extent earned as of the effective date of termination. In the event of termination under this subsection 3.2.10, the Owner shall not be obligated to reimburse the Construction Manager for any costs incurred by the Construction Manager except as provided in Section 5.1.1 of this Agreement.

§ 3.2.11 In the event of termination of this Agreement in accordance with the provisions of subsection 3.2.10, upon payment by the Owner of the amount obligated under subsection 3.2.10, the Owner's obligations to the Construction Manager shall be fully satisfied, and the Construction Manager shall be deemed to have fully released the Owner from any claims or liabilities. Further, the Construction Manager shall, upon request of the Owner, assign to the Owner any Subcontract, vendor contract, purchase order, letter of intent or other similar agreement that the Construction Manager has entered into in connection with the Work (any such assignment shall be subject to the terms and conditions of Section 5.4 of the General Conditions).

§ 3.2.12 By executing the Guaranteed Maximum Price Amendment pursuant to Section 3.2.6 of this Agreement, the Construction Manager represents and warrants, which representation and warrantee is hereby incorporated into such Guaranteed Maximum Price Amendment, that the Drawings and Specifications and other materials and information listed in Guaranteed Maximum Price Amendment describe the scope, construction requirements and design intent of the Work in detail sufficient to enable the Construction Manager to establish firmly the Guaranteed Maximum Price, subject to the agreed upon assumptions and clarifications. So long as the further drawings, clarifications, supplemental information, and other materials are consistent with the Contract Documents, the Construction Manager shall not be permitted to claim any adjustment in the Guaranteed Maximum Price or the Construction Schedule in connection with the completion of drawings, clarifications, supplemental information and other materials issued by the Architect or the Owner (collectively, "Supplemental Materials") after the date of Guaranteed Maximum Price Amendment, in regard to items of Work that are reasonably inferable from the Contract Documents unless otherwise provided in the Contract Documents.

§ 3.2.13 Contract Time

§ 3.2.13.1 As part of its Guaranteed Maximum Price proposal, the Construction Manager shall prepare and submit to the Owner for the Owner's review and approval a schedule for completion of the Work (as approved by the Owner, the "Project Schedule"). The Project Schedule shall: (1) provide a graphic representation of material activities and events that will occur during performance of the Work; (2) identify each phase of construction separately; (3) identify the dates applicable, permits and approvals will be sought and the expected date of receipt of such permits and approvals; (4) indicate a proposed cash flow schedule for the Project; (5) identify key dates for Owner-provided information and materials; (6) set forth dates that are critical in ensuring the timely and orderly completion of the Work in accordance with the requirements of the Contract Documents; and (7) specify the Substantial Completion Date for the purposes of this Section 3.2.13.

§ 3.2.13.2 TIME IS OF THE ESSENCE in the completion of the Work. It is acknowledged that the Construction Manager's failure to achieve Substantial Completion of the Work within the Contract Time provided by the Contract Documents will cause the Owner to incur substantial economic damages and losses of types and in amounts which are impossible to compute and ascertain with certainty as a basis for recovery by the Owner of actual damages, and that liquidated damages represent a fair, reasonable and appropriate estimate thereof. Accordingly, in lieu of actual damages for such delay, Construction Manager and Owner agree that if Construction Manager fails to achieve Substantial Completion within thirty (30) days following the Substantial Completion Date specified in the Guaranteed Maximum Price Amendment (the "Outside Completion Date"), then Owner shall be entitled to assess and recover from Construction Manager and its surety an amount equal to Three Thousand and 00/100 Dollars ($3,000.00) multiplied by the number of

days from the Outside Completion Date to and including the date that the Construction Manager achieves Substantial Completion, as adjusted for time extensions as may have been granted pursuant to the terms and conditions of the Contract Documents, without the Owner being required to present any evidence of the amount or character of actual damages sustained by reason thereof. The total amount calculated in the manner set forth above is referred to as the "Liquidated Damages." Owner and Construction Manager agree that the Liquidated Damages calculated above constitute a reasonable estimate of the damages, costs and expenses that will be incurred by Owner in the event the Construction Manager fails to achieve Substantial Completion by the Outside Completion Date and that the same do not constitute a penalty. The Liquidated Damages provided herein are intended to reimburse Owner for only the damages it will suffer as a result of the Construction Manager's failure to achieve Substantial Completion by the time specified herein and shall not limit the obligations or liability of Construction Manager or the remedies of the Owner pursuant to any other provisions of this Agreement. Owner shall be entitled to deduct any Liquidated Damages due hereunder from the Contract Sum. Construction Manager shall not be liable for Liquidated Damages for delays caused solely by Owner or Owner's agents.

The parties understand and agree that, by including a provision for Liquidated Damages in this Agreement, or in pursuing any relief pursuant to such provision: (i) the parties do not intend to set a price for the privilege not to perform; (ii) the availability of Liquidated Damages may not be relied upon as a basis for argument that the Owner has an adequate remedy at law; (iii) the remedies available to the Owner under the Contract Documents are cumulative and not exclusive; and (iv) the Liquidated Damages shall be capped at 50% of the paid Fee.

§ 3.2.13.3 The Project shall be deemed to have achieved Substantial Completion when the terms and conditions of Section 9.8 of the General Conditions have been met.

§ 3.3 Construction Phase

§ 3.3.1 General

§ 3.3.1.1 For purposes of Section 8.1.2 of the General Conditions, the date of commencement of the Work shall mean the date of commencement of the Construction Phase.

§ 3.3.1.2 The Construction Phase shall commence upon the Owner's delivery to the Construction Manager of a Notice to Proceed with the Construction Phase. Under no circumstances shall the activities of the Construction Phase commence prior to the Construction Manager's receipt of the Owner's Notice to Proceed.

§ 3.3.2 Administration

§ 3.3.2.1 The Construction Manager shall schedule and conduct meetings to discuss such matters as procedures, progress, coordination, scheduling, and status of the Work. The Construction Manager shall prepare and promptly distribute minutes of the meetings to the Owner and Architect. The Construction Manager shall schedule and conduct progress meetings at the Project site on a bi-weekly basis (or interval appropriate for the level of jobsite activity) and in accordance with the Construction Manager's operations. Owner and Architect shall be notified of meeting dates and times and will be permitted to attend.

§ 3.3.2.2 Upon the execution of the Guaranteed Maximum Price Amendment, the Construction Manager shall prepare and submit to the Owner and Architect for approval a construction schedule for the Work (such construction schedule as approved, the "Construction Schedule") and a submittal schedule in accordance with Section 3.10 of the General Conditions. The Construction Schedule shall be incorporated into the Project Schedule.

§ 3.3.2.3 Monthly Report

The Construction Manager shall record the progress of the Project. On a monthly basis, or otherwise as agreed to by the Owner, the Construction Manager shall submit written progress reports to the Owner and Architect, showing percentages of completion and other information required by the Owner. Such reports shall also compare actual progress of the Work with the progress required under the Construction Schedule and shall describe any material deviations from the Construction Schedule or projected future deviations and the causes therefor and, where applicable, note corrective measures taken or proposed to be taken.

§ 3.3.2.4 Daily Logs

The Construction Manager shall keep, and make available to the Owner and Architect, a daily log containing a record for each day of weather, portions of the Work in progress, number of workers on site, identification of equipment on site, problems that might affect progress of the work, accidents, injuries, and other information required by the Owner.

§ 3.3.2.5 Cost Control

The Construction Manager shall develop a system of cost control for the Work, including regular monitoring of actual costs for activities in progress and estimates for uncompleted tasks and proposed changes. The Construction Manager shall identify variances between actual and estimated costs and report the variances to the Owner and Architect, and shall provide this information in its monthly reports to the Owner and Architect, in accordance with Section 3.3.2.3 above.

ARTICLE 4 OWNER'S RESPONSIBILITIES

§ 4.1 Information and Services Required of the Owner

§ 4.1.1 The Owner shall provide information with reasonable promptness, regarding requirements for and limitations on the Project, including a written program which shall set forth the Owner's objectives, constraints, and criteria, including schedule, space requirements and relationships, flexibility and expandability, special equipment, systems, sustainability and site requirements.

§ 4.1.2 Prior to the execution of the Guaranteed Maximum Price Amendment, the Construction Manager may request in writing that the Owner provide reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract. The owner shall furnish such evidence prior to the commencement of the Work.

§ 4.1.3 The Owner shall establish and periodically update the Owner's budget for the Project, including (1) the budget for the Cost of the Work as defined in Article 7, (2) the Owner's other costs, and (3) reasonable contingencies related to all of these costs. If the Owner significantly increases or decreases the Owner's budget for the Cost of the Work, the Owner shall notify the Construction Manager and Architect. The Owner and the Architect, in consultation with the Construction Manager, shall thereafter agree to an appropriate corresponding change in the Project's scope as desired by the Owner and/or necessary to accommodate such changes in the budget.

§ 4.1.4 **Structural and Environmental Tests, Surveys and Reports.** During the Preconstruction Phase, the Owner shall furnish the following information or services with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control to the extent relevant to and necessary for the Construction Manager's performance of the Work with reasonable promptness after receiving the Construction Manager's written request for such information or services. The Construction Manager shall, except to the extent otherwise advised by the Owner in writing at the time of the furnishing of the applicable information and/or services, be entitled to rely on the accuracy of such information and services furnished by the Owner but in all events the Construction Manager shall exercise proper precautions relating to the safe performance of the Work.

§ 4.1.4.1 The Owner shall furnish tests, inspections, and reports, required by law and as otherwise agreed to by the parties, such as structural, mechanical, and chemical tests, tests for air and water pollution, and tests for hazardous materials.

§ 4.1.4.2 The Owner shall furnish surveys describing physical characteristics, legal limitations and utility locations for the site of the Project, and a written legal description of the site. The surveys and legal information shall include, as applicable, grades and lines of streets, alleys, pavements and adjoining property and structures; designated wetlands; adjacent drainage; rights-of-way, restrictions, easements, encroachments, zoning, deed restrictions, boundaries and contours of the site; locations, dimensions and other necessary data with respect to existing buildings, other improvements and trees; and information concerning available utility services and lines, both public and private, above and below grade, including inverts and depths. All the information on the survey shall be referenced to a Project benchmark.

§ 4.1.4.3 The Owner, when such services are required for the completion of the Project, shall furnish services of geotechnical engineers, which may include test borings, test pits, determinations of soil bearing values, percolation tests, evaluations of hazardous materials, seismic evaluation, ground corrosion tests and resistivity tests, including necessary operations for anticipating subsoil conditions, with written reports and appropriate recommendations.

§ 4.1.5 During the Construction Phase, the Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and required for the Construction Manager's performance of the Work with reasonable promptness after receiving the Construction Manager's written request for such information or services.

§ 4.1.6 If the Owner identified a Sustainable Objective in Article 1, the Owner shall fulfill its responsibilities as required in AIA Document E234™–2019, Sustainable Projects Exhibit, Construction Manager as Constructor Edition, attached to this Agreement.

§ 4.2 Owner's Designated Representative

The Owner shall identify a representative authorized to act on behalf of the Owner with respect to the Project. The Owner's representative shall render decisions promptly and furnish information expeditiously, so as to avoid unreasonable delay in the services or Work of the Construction Manager. Except as otherwise provided in Section 4.2.1 of the General Conditions, the Architect does not have such authority. The term "Owner" means the Owner or the Owner's authorized representative, including the Owner's representative identified in Section 1.1.9 where the context so requires.

§ 4.2.1 Legal Requirements. The Owner shall furnish all legal, insurance and accounting services, including auditing services, that the Owner deems necessary at any time for the Project to meet the Owner's needs and interests.

§ 4.3 Architect

The Owner shall retain an Architect to provide services, duties and responsibilities as described in the owner's agreement with the Architect including any additional services requested by the Construction Manager and that the Owner reasonably deems necessary for the Preconstruction and Construction Phase services under this Agreement. The Owner shall provide the Construction Manager with a copy of the scope of services in the executed agreement between the Owner and the Architect, and any further modifications to the Architect's scope of services in the agreement.

ARTICLE 5 COMPENSATION AND PAYMENTS FOR PRECONSTRUCTION PHASE SERVICES

§ 5.1 Compensation

§ 5.1.1 For the Construction Manager's Preconstruction Phase services described in Sections 3.1 and 3.2, the Owner shall compensate the Construction Manager as follows:

(Insert amount of, or basis for, compensation and include a list of reimbursable cost items, as applicable.)

The lump sum amount of . to be allocated as follows:

(1) For Pre-Construction services prior to Schematic Design Phase:
(2) For Schematic Design Estimate Phase:
(3) For Design Development Estimate Phase:
(4) For Construction Documents Estimate Phase:

§ 5.1.2 The hourly billing rates for Preconstruction Phase services of the Construction Manager and the Construction Manager's Consultants and Subcontractors, if any, are set forth below.

(If applicable, attach an exhibit of hourly billing rates or insert them below.)

TBD

Individual or Position	Rate

§ 5.1.2.1 Hourly billing rates for Preconstruction Phase services include all costs to be paid or incurred by the Construction Manager, as required by law or collective bargaining agreements, for taxes, insurance, contributions, assessments and benefits and, for personnel not covered by collective bargaining agreements, customary benefits such as sick leave, medical and health benefits, holidays, vacations and pensions, and shall remain unchanged unless the parties execute a Modification.

§ 5.1.3 Intentionally Omitted.

§ 5.2 Payments

§ 5.2.1 Unless otherwise agreed, payments for services shall be made monthly in proportion to services performed.

§ 5.2.2 Payments

(Paragraphs deleted)

for Preconstruction Phase Services are due and payable within forty-five days (45) after the presentation of the Construction Manager's invoice to the Architect and the certification by the Architect of amounts properly due. Amounts properly due and remaining unpaid beyond such forty-five (45) day period shall bear interest only to the extent required by Connecticut law and, if so required, at the minimum required rate.

ARTICLE 6 COMPENSATION FOR CONSTRUCTION PHASE SERVICES

§ 6.1 Contract Sum

§ 6.1.1 The Owner shall pay the Construction Manager the Contract Sum in current funds for the Construction Manager's performance of the Contract after execution of the Guaranteed Maximum Price Amendment. The Contract Sum is the Cost of the Work as defined in Article 7 plus the Construction Manager's Fee.

§ 6.1.2 The Construction Manager's Fee:
(State a lump sum, percentage of Cost of the Work or other provision for determining the Construction Manager's Fee.)

§ 6.1.3 The method of adjustment of the Construction Manager's Fee for changes in the Work:

§ 6.1.4 Limitations, if any, on a Subcontractor's overhead and profit for increases in the cost of its portion of the Work:

As described in Section 6.3.6 below.

§ 6.1.5 Intentionally Omitted

§ 6.1.6 Liquidated damages, if any:
(Insert terms and conditions for liquidated damages, if any.)

See Section 3.2.13.2 above.

§ 6.1.7 Other:
(Insert provisions for bonus, cost savings or other incentives, if any, that might result in a change to the Contract Sum.)

§ 6.2 Guaranteed Maximum Price

The Construction Manager guarantees that the Contract Sum shall not exceed the Guaranteed Maximum Price set forth in the Guaranteed Maximum Price Amendment, subject to additions and deductions by Change Order as provided in the Contract Documents. Costs which would cause the Guaranteed Maximum Price to be exceeded shall be paid by the Construction Manager without reimbursement by the Owner. Should the final Contract Sum be less than the Guaranteed Maximum Price, all savings shall be allocated to the Owner.

§ 6.3 Changes in the Work and Overhead and Profit Limitations

§ 6.3.1 The Owner may, without invalidating the Contract, and in consultation with the Architect, order changes in the Work within the general scope of the Contract consisting of additions, deletions or other revisions. The Owner shall issue such changes in writing. The Construction Manager may be entitled to an equitable adjustment in the Contract Time as a result of changes in the Work.

§ 6.3.1.1 The Architect may order minor changes in the Work as provided in Article 7 of the General Conditions.

§ 6.3.2 Adjustments to the Guaranteed Maximum Price on account of changes in the Work subsequent to the execution of the Guaranteed Maximum Price Amendment may be determined by any of the methods listed in Article 7 of the General Conditions.

§ 6.3.3 Adjustments to subcontracts awarded on the basis of a stipulated sum shall be determined in accordance with Article 7 of the General Conditions, as they refer to "cost" and "fee," and not by Articles 6 and 7 of this Agreement. Adjustments to subcontracts awarded with the Owner's prior written consent on the basis of cost plus a fee shall be calculated in accordance with the terms of those subcontracts.

§ 6.3.4 In calculating adjustments to the Guaranteed Maximum Price. the terms "cost" and "costs" as used in Article 7 of the General Conditions shall mean the Cost of the Work as defined in Article 7 of this Agreement and the term "fee" shall mean the Construction Manager's Fee as defined in Section 6.1.2 of this Agreement.

§ 6.3.5 Intentionally Omitted.

§ 6.3.6 Markups for profit and overhead for Work performed pursuant to Change Orders and Construction Change Directives shall be limited as follows:

(i) Markup by the Construction Manager for overhead and profit on Work performed pursuant to Change Orders and Construction Change Directives shall not exceed any adjustment in the Construction Manager's Fee permitted under Section 6.1.2 of this Agreement;

(ii) Markup by any first tier Subcontractor for overhead and profit on Work performed pursuant to Change Orders and Construction Change Directives shall not exceed Ten Percent (10%) of the sum of the actual direct costs for labor (including labor burden) and materials for such Work that is performed directly by such first tier Subcontractor;

(iii) Markup by any first tier Subcontractor for overhead and profit on Work performed by its Sub-subcontractor pursuant to Change Orders and Construction Change Directives shall not exceed Five Percent (5%) of the Sub-subcontractor's contract price for such Work that is performed directly by the Sub-subcontractor: and

(iv) Markup by any Sub-subcontractor for overhead and profit on Work performed pursuant to Change Orders and Construction Change Directives shall not exceed Ten Percent (10%) of the sum of direct cost for labor (including labor burden) and materials for Work performed directly by such Sub-subcontractor.

For change order Work that is the subject of Unit Prices under this Agreement, there will be no markup permitted on the applicable Unit Prices.

The Construction Manager shall include the markup limitations set forth in this Section 6.3.6 in all Subcontracts and require in all Subcontracts that the Subcontractors include such limitations in all lower tier Subcontracts.

The Contractor shall provide in a form satisfactory to the Owner and the Agencies, as applicable. itemized statements of the costs associated with change order work including, without limitation. certified payrolls and copies of invoices and other Supporting Documentation.

ARTICLE 7 COST OF THE WORK FOR CONSTRUCTION PHASE

§ 7.1 Costs to Be Reimbursed

§ 7.1.1 The term Cost of the Work shall mean costs necessarily incurred by the Construction Manager in the proper performance of the Work. The Cost of the Work shall include only the items set forth in Sections 7.1 through 7.7.

§ 7.1.2 Where. pursuant to the Contract Documents, any cost is subject to the Owner's prior approval, the Construction Manager shall obtain such approval in writing prior to incurring the cost. The parties shall endeavor to identify any such costs prior to executing Guaranteed Maximum Price Amendment.

§ 7.1.3 Costs shall be at rates not higher than the standard rates paid at the place of the Project. except with prior approval of the Owner.

§ 7.2 Labor Costs

§ 7.2.1 Intentionally Omitted.

§ 7.2.2 Wages or salaries of the Construction Manager's supervisory and administrative personnel when stationed at the site and performing Work. with the Owner's prior approval at the all-inclusive hourly rates shown on Schedule 1.

§ 7.2.2.1 Wages or salaries of the Construction Manager's supervisory and administrative personnel when performing Work and stationed at a location other than the site, but only for that portion of time required for the Work at the all-inclusive hourly rates shown on Schedule 1, and limited to the personnel and activities listed below:
(Identify the personnel, type of activity and, if applicable, any agreed upon percentage of time to be devoted to the Work.)

§ 7.2.3 Wages and salaries of the Construction Manager's supervisory or administrative personnel engaged at factories, workshops or while traveling, in expediting the production or transportation of materials or equipment required for the Work, but only for that portion of their time required for the Work, in numbers approved by the Owner and at the all-inclusive hourly rates shown on Schedule 1.

§ 7.2.4 Costs paid or incurred by the Construction Manager, as required by law or collective bargaining agreements, for taxes, insurance, contributions, assessments and benefits and, for personnel not covered by collective bargaining agreements, customary benefits such as sick leave, medical and health benefits, holidays, vacations and pensions, provided such costs are based on wages and salaries included in the Cost of the Work under Sections 7.2.1 through 7.2.3.

§ 7.2.5 If agreed rates for labor costs, in lieu of actual costs, are provided in this Agreement, the rates shall remain unchanged throughout the duration of this Agreement, unless the parties execute a Modification.

§ 7.3 Subcontract Costs
Payments made by the Construction Manager to Subcontractors and suppliers in accordance with the requirements of the subcontracts and supply agreements.

§ 7.4 Costs of Materials and Equipment Incorporated in the Completed Construction
§ 7.4.1 Costs, including transportation and storage at the site, of materials and equipment incorporated, or to be incorporated, in the completed construction are to be included in Subcontract Costs described in Section 7.3.

§ 7.4.2 Intentionally Omitted.

§ 7.5 Costs of Other Materials and Equipment, Temporary Facilities and Related Items
§ 7.5.1 Costs of transportation, storage, installation, dismantling, maintenance, and removal of materials, supplies, temporary facilities, machinery, equipment and hand tools are to be included in Subcontractor Costs described in Section 7.3.

§ 7.5.2 Intentionally Omitted.

§ 7.5.3 Costs of removal of debris from the site of the Work and its proper and legal disposal is a Cost of Work item performed by sub-trade and not a General Conditions item.

§ 7.5.4 Costs of the Construction Manager's site office, including general office equipment and supplies, to the extent not included in General Conditions.

§ 7.5.5 Costs of materials and equipment suitably stored off the site at a mutually acceptable location, subject to the Owner's prior approval.

§ 7.6 Miscellaneous Costs
§ 7.6.1 Premiums for that portion of insurance and bonds required by the Contract Documents that can be directly attributed to this Contract.

§ 7.6.1.1 Costs for self-insurance, for either full or partial amounts of the coverages required by the Contract Documents, with the Owner's prior approval.

§ 7.6.1.2 Costs for insurance through a captive insurer owned or controlled by the Construction Manager, with the Owner's prior approval. If the Construction Manager is self-insured to any extent or purchases insurance coverage

through any related party (as defined in Section 7.8.1), any such insurance arrangement must be disclosed to the Owner and approved by the Owner in writing in advance before any such insurance costs will be considered reimbursable under the terms of this Agreement. The Construction Manager's method for determining actual cost of such insurance coverage will be detailed to the Owner in writing in advance and will be subject to verification by the Owner of the representations made by the Construction Manager. Reimbursable insurance costs under any such self-insurance arrangements will be subject to agreed-upon maximums and not otherwise considered reimbursable unless advance written approval has been obtained. Actual reimbursable costs for such insurance coverage will be subject to audit verification of actual out-of-pocket insurance premium costs. The costs of such insurance premiums which are considered reimbursable will be limited to a maximum of rates not higher than normally paid to third-party insurance companies for similar coverage. Proper cost reduction consideration will be given to cost reductions available due to favorable experience modifiers, volume discounts, trade discounts, dividends, and the like.

§ 7.6.2 Sales, use, or similar taxes, imposed by a governmental authority, that are related to the Work and for which the Construction Manager is liable.

§ 7.6.3 Fees and assessments for the building permit, and for other permits, licenses, and inspections, for which the Construction Manager is required by the Contract Documents to pay.

§ 7.6.4 Fees of laboratories for tests required by the Contract Documents; except those related to defective or nonconforming Work for which reimbursement is excluded under Article 13 of the General Conditions or by other provisions of the Contract Documents, and which do not fall within the scope of Section 7.7.3.

§ 7.6.5 Royalties and license fees paid for the use of a particular design, process, or product, required by the Contract Documents.

§ 7.6.5.1 The cost of defending suits or claims for infringement of patent rights arising from requirements of the Contract Documents, payments made in accordance with legal judgments against the Construction Manager resulting from such suits or claims, and payments of settlements made with the Owner's consent, unless the Construction Manager had reason to believe that the required design, process, or product was an infringement of a copyright or a patent, and the Construction Manager failed to promptly furnish such information to the Architect as required by Article 3 of the General Conditions. The costs of legal defenses, judgments, and settlements shall not be included in the Cost of the Work used to calculate the Construction Manager's Fee or subject to the Guaranteed Maximum Price.

§ 7.6.6 Costs for communications services, electronic equipment, and software, directly related to the Work and located at the site, with the Owner's prior approval.

§ 7.6.7 Costs of document reproductions and delivery charges, to the extent not included in the General Conditions.

§ 7.6.8 Deposits lost for causes unrelated to the Construction Manager's negligence or failure to fulfill a specific responsibility in the Contract Documents.

§ 7.6.9 Legal, mediation and arbitration costs, including attorneys' fees, other than those arising from disputes between the Owner and Construction Manager, reasonably incurred by the Construction Manager after the execution of this Agreement in the performance of its responsibilities under the Contract Documents and with the Owner's prior approval, which shall not be unreasonably withheld.

§ 7.6.10 Intentionally Omitted.

§ 7.6.11 The expenses of the Construction Manager's supervisory or administrative personnel incurred while traveling in discharge of duties connected with the Work are included in the Construction Manager's Fee and shall not be reimbursable.

§ 7.7 Other Costs and Emergencies

§ 7.7.1 Other costs incurred in the performance of the Work, with the Owner's prior written approval.

§ 7.7.2 Costs incurred in taking action to prevent threatened damage, injury, or loss, in case of an emergency affecting the safety of persons and property, as provided in Article 10 of AIA Document A201–2017.

§ 7.7.3 Costs of repairing or correcting damaged or nonconforming Work executed by the Construction Manager, Subcontractors, or suppliers, or anyone else for whose work the Construction manager is liable under the Contract Documents, provided that such damaged or nonconforming Work was not caused by the negligence of any of the same, or failure to fulfill a specific responsibility by, the Construction Manager, and only to the extent that the cost of repair or correction is not recovered by the Construction Manager from insurance, sureties, Subcontractors, suppliers, or others.

§ 7.7.4 The costs described in Sections 7.1 through 7.7 shall be included in the Cost of the Work, notwithstanding any provision of the General Conditions or other Conditions of the Contract which may require the Construction Manager to pay such costs, unless such costs are excluded by the provisions of Section 7.9.

§ 7.8 Related Party Transactions

§ 7.8.1 For purposes of this Agreement, the term "related party" shall mean (1) a parent, subsidiary, affiliate, or other entity having common ownership of, or sharing common management with, the Construction Manager; (2) any entity in which any stockholder in, or management employee of, the Construction Manager holds an equity interest in excess of ten percent in the aggregate; (3) any entity which has the right to control the business or affairs of the Construction Manager; or (4) any person, or any member of the immediate family of any person, who has the right to control the business or affairs of the Construction Manager.

§ 7.8.2 If any of the costs to be reimbursed arise from a transaction between the Construction Manager and a related party, the Construction Manager shall notify the Owner of the specific nature of the contemplated transaction, including the identity of the related party and the anticipated cost to be incurred, before any such transaction is consummated or cost incurred. If the Owner, after such notification, authorizes the proposed transaction in writing, then the cost incurred shall be included as a cost to be reimbursed, and the Construction Manager shall procure the Work, equipment, goods, or service, from the related party, as a Subcontractor, according to the terms of Article 9. If the Owner fails to authorize the transaction in writing, the Construction Manager shall procure the Work, equipment, goods, or service from some person or entity other than a related party according to the terms of Article 9.

§ 7.9 Costs Not To Be Reimbursed

§ 7.9.1 The Cost of the Work shall not include the items listed below:

.1 Salaries and other compensation of the Construction Manager's personnel stationed at the Construction Manager's principal office or offices other than the site office, except as specifically provided in Section 7.2, or as may be provided in Article 14;

.2 Bonuses, profit sharing, incentive compensation, and any other discretionary payments, paid to anyone hired by the Construction Manager or paid to any Subcontractor or vendor, unless the Owner has provided prior approval;

.3 Expenses of the Construction Manager's principal office and offices other than the site office;

.4 Overhead and general expenses, except as may be expressly included in Sections 7.1 to 7.7;

.5 The Construction Manager's capital expenses, including interest on the Construction Manager's capital employed for the Work;

.6 Notwithstanding anything to the contrary provided in Section 7.7.3, costs due to the negligent act or omission of the Construction Manager, its Subcontractor or Supplier, or anyone else conducting the Work, or due to the failure of the Construction Manager to comply with the terms of the Contract Documents and all costs arising from any Work which the Construction Manager knew did not comply with the Contract Documents or Applicable Laws;

.7 Any cost not specifically and expressly described in Sections 7.1 to 7.7;

.8 Costs, other than costs included in Change Orders approved by the Owner, that would cause the Guaranteed Maximum Price to be exceeded;

.9 Costs for services incurred during the Preconstruction Phase.

.10 Amounts required to be paid by the Construction Manager for federal, state, or local income or franchise taxes;

.11 Labor, material, and equipment costs or any other costs incurred which are recoverable from Subcontractors or Suppliers or which is included in a contract with a Subcontractor or Supplier; and

.12 Losses resulting from lost, damaged or stolen tools and equipment (other than equipment to be incorporated into the Work to the extent covered by the Owner's property insurance).

ARTICLE 8 DISCOUNTS, REBATES, AND REFUNDS

§ 8.1 Cash discounts obtained on payments made by the Construction Manager shall accrue to the Owner if (1) before making the payment, the Construction Manager included the amount to be paid, less such discount, in an Application for Payment and received payment from the Owner, or (2) the Owner has deposited funds with the Construction Manager with which to make payments; otherwise, cash discounts shall accrue to the Construction Manager. Trade discounts, rebates, refunds, and amounts received from sales of surplus materials and equipment shall accrue to the Owner, and the Construction Manager shall make provisions so that they can be obtained. The Construction Manager shall promptly notify the Owner of potential cash discounts it is aware of to enable Owner to take advantage of same. The Construction Manager shall not obtain for its own benefit any discounts, rebates or refunds in connection with the Work prior to providing the Owner with seven (7) days prior written notice of the potential discount, rebate or refund and an opportunity to furnish funds necessary to obtain such discount, rebate or refund. The Owner's ability to take advantage of discounts, rebates or refunds is subject to the requirements and restrictions of Applicable Laws.

§ 8.2 Amounts that accrue to the Owner in accordance with the provisions of Section 8.1 shall be credited to the Owner as a deduction from the Cost of the Work.

ARTICLE 9 SUBCONTRACTS AND OTHER AGREEMENTS

§ 9.1 The Construction Manager's shall select and contract with Subcontractors and suppliers for all components of the Work in accordance with Section 3.1.11 of this Agreement. All such Subcontracts and agreements shall be between the Subcontractor or supplier and the Construction Manager in the Construction Manager's own name and not as an agent of the Owner. However, each Subcontract, supply agreement, vendor contract, purchase order, letter of intent or any similar agreement entered into by the Construction Manager in connection with the Work shall be assignable to the Owner upon demand by the Owner, subject to the provisions of Section 5.4 of the General Conditions. Each such Subcontract and agreement shall include language providing that the Owner shall be entitled, at the Owner's option, to take assignment of the Construction Manager's rights under such Subcontract or agreement, subject to Section 5.4 of the General Conditions of the Contract.

§ 9.1.1 If the Guaranteed Maximum Price has been established before the selection of all Subcontractors and suppliers pursuant to Section 3.1.11, and when, in such event, a specific bidder (1) is recommended to the Owner by the Construction Manager, (2) is qualified to perform that portion of the Work, and (3) has submitted a bid that conforms to the requirements of the Contract Documents and is consistent with the bid packet approved by the Owner pursuant to Section 3.1.11 without reservations or exceptions, and (4) award to such bidder would comply with the Contract Documents, but the Owner requires that another bid be accepted, then the Construction Manager may require that a Change Order be issued to adjust the Guaranteed Maximum Price by the difference between the bid of the person or entity recommended to the Owner by the Construction Manager and the amount of the subcontract or other agreement actually signed with the person or entity designated by the Owner.

§ 9.2 Subcontracts or other agreements shall conform to the applicable payment provisions of this Agreement, and shall not be awarded on the basis of cost plus a fee without the Owner's prior written approval. If a subcontract is awarded on the basis of cost plus a fee, the Construction Manager shall provide in the subcontract for the Owner to receive the same audit rights with regard to the Subcontractor as the Owner receives with regard to the Construction Manager in Article 10.

ARTICLE 10 ACCOUNTING RECORDS

§ 10.1 The Construction Manager shall keep full and detailed records and accounts related to the cost of the Work and exercise such controls as may be necessary for proper financial management under this Contract and to substantiate all costs incurred. The accounting and control systems shall be satisfactory to the Owner. The Owner and the Owner's auditors shall, during regular business hours and upon reasonable notice, be afforded access to, and shall be permitted to audit and copy, the Construction Manager's records and accounts, including complete documentation supporting accounting entries, books, correspondence, instructions, drawings, receipts, subcontracts, Subcontractor's proposals, purchase orders, vouchers, memoranda and other data relating to this Contract. The Construction Manager shall deliver such records to the Owner upon Substantial Completion (and update the same upon Final Completion) preserve these records for a period of three years after final payment, or for such longer period as may be required by Applicable Laws.

§ 10.2 Records to be available for audit shall include but not be limited to accounting records, written policies and procedures; contract and subcontract files (including proposals of successful and unsuccessful bidders, bid recaps, etc.); original estimates; estimating worksheets; correspondence invoices; change order files (including documentation covering negotiated settlements); back charge logs and supporting documentation; general ledger entries detailing cash

and trade discounts earned, insurance rebates and dividends; electronic or computer data and any other supporting evidence deemed necessary to substantiate charges. These records shall be open to inspection and subject to an audit and/or reproduction to the extent necessary to adequately permit evaluation and verification of the Cost of the Work, and any invoices, change orders, payments or claims submitted by the contractor or vendor to any of his payees pursuant to the execution of this Agreement

§ 10.3 The Construction Manager shall deliver to the Owner such items as are reasonably requested by the Owner to support costs billed to the Project and shall provide any further assistance requested by the Owner during an audit of the Project.

§ 10.4 The Construction Manager shall comply with all accounting procedures and record retention policies reasonably requested by the Owner.

§ 10.5 Upon request of the Owner or the Architect, the Contractor will, at no cost to the Owner, cooperate and assist the Owner and Architect, during any audit of the Project conducted by the Owner or an Agency at any time after Substantial Completion.

ARTICLE 11 PAYMENTS FOR CONSTRUCTION PHASE SERVICES

§ 11.1 Progress Payments

§ 11.1.1 Based upon Applications for Payment submitted to the Architect by the Construction Manager, and Certificates for Payment issued by the Architect, the Owner shall make progress payments on account of the Contract Sum, to the Construction Manager, as provided below and elsewhere in the Contract Documents.

§ 11.1.2 The period covered by each Application for Payment shall be one calendar month ending on the last day of the month, or as follows:

§ 11.1.3 Provided that an Application for Payment is received by the Architect not later than the first day of a month, the Owner shall make payment of the amount certified to the Construction Manager not later than the fifteenth day of the following month. If an Application for Payment is received by the Architect after the application date fixed above, payment of the amount certified shall be made by the Owner not later than forty-five (45) days after the Architect receives the Application for Payment.

§ 11.1.4 With each Application for Payment, the Construction Manager shall submit payrolls, petty cash accounts, receipted invoices or invoices with check vouchers attached, and any other evidence required by the Owner or Architect to demonstrate that payments already made by the Construction Manager on account of the Cost of the Work equal or exceed progress payments already received by the Construction Manager, plus payrolls for the period covered by the present Application for Payment, less that portion of the progress payments attributable to the Construction Manager's Fee. Commencing with the second Application for Payment and continuing with each Application for Payment submitted thereafter, the Construction Manager and each Subcontractor shall submit properly executed lien waivers for all portions of the Work included in previous Applications for Payment and for which payment was made by the Owner.

§ 11.1.5 Each Application for Payment shall be based on the most recent schedule of values submitted by the Construction Manager in accordance with the Contract Documents. The schedule of values shall allocate the entire Guaranteed Maximum Price among: (1) the various portions of the Work; (2) any contingency for costs that are included in the Guaranteed Maximum Price but not otherwise allocated to another line item or included in a Change Order; and (3) the Construction Manager's Fee.

§ 11.1.5.1 The schedule of values shall be prepared in such form and supported by such data to substantiate its accuracy as the Architect and/or the Owner may require. The schedule of values, unless objected to by the Architect and/or the Owner, shall be used as a basis for reviewing the Construction Manager's Applications for Payment.

§ 11.1.5.2 The allocation of the Guaranteed Maximum Price under this Section 11.1.5 shall not constitute a separate guaranteed maximum price for the Cost of the Work of each individual line item in the schedule of values.

§ 11.1.5.3 When the Construction Manager allocates costs from a contingency to another line item in the schedule of values, the Construction Manager shall submit supporting documentation to the Architect.

§ 11.1.6 Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment. The percentage of completion shall be the lesser of (1) the percentage of that portion of the Work which has actually been completed, or (2) the percentage obtained by dividing (a) the expense that has actually been incurred by the Construction Manager on account of that portion of the Work and for which the Construction Manager has made payment or intends to make payment prior to the next Application for Payment, by (b) the share of the Guaranteed Maximum Price allocated to that portion of the Work in the schedule of values.

§ 11.1.7 In accordance with the General Conditions and subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

§ 11.1.7.1 The amount of each progress payment shall first include:

.1 That portion of the Guaranteed Maximum Price (net of the Construction Manager's Fee) properly allocable to completed Work as determined by multiplying the percentage of completion of each portion of the Work by the share of the Guaranteed Maximum Price (net of the Construction Manager's Fee) allocated to that portion of the Work in the most recent schedule of values;

.2 That portion of the Guaranteed Maximum Price (net of the Construction Manager's Fee) properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction or, if approved in writing in advance by the Owner, suitably stored off the site at a location agreed upon in writing;

.3 That portion of Construction Change Directives that the Architect determines, in the Architect's professional judgment, to be reasonably justified; and

.4 The Construction Manager's Fee, computed upon the Cost of the Work described in the preceding Sections 11.1.7.1.1 and 11.1.7.1.2 at the rate stated in Section 6.1.2 or, if the Construction Manager's Fee is stated as a fixed sum in that Section, an amount that bears the same ratio to that fixed-sum fee as the Cost of the Work included in Sections 11.1.7.1.1 and 11.1.7.1.2 bears to a reasonable estimate of the probable Cost of the Work upon its completion.

§ 11.1.7.2 The amount of each progress payment shall then be reduced by:

.1 The aggregate of any amounts previously paid by the Owner;

.2 The amount, if any, for Work that remains uncorrected and for which the Architect has previously withheld a Certificate for Payment as provided in Article 9 of AIA Document A201–2017;

.3 Any amount for which the Construction Manager does not intend to pay a Subcontractor or material supplier, unless the Work has been performed by others the Construction Manager intends to pay;

.4 For Work performed or defects discovered since the last payment application, any amount for which the Architect may withhold payment, or nullify a Certificate of Payment in whole or in part, as provided in Article 9 of AIA Document A201–2017;

.5 The shortfall, if any, indicated by the Construction Manager in the documentation required by Section 11.1.4 to substantiate prior Applications for Payment, or resulting from errors subsequently discovered by the Owner's auditors in such documentation; and

.6 Retainage withheld pursuant to Section 11.1.8.

§ 11.1.8 Retainage

§ 11.1.8.1 For each progress payment made prior to Substantial Completion of the Work, the Owner may withhold the following amount, as retainage, from the payment otherwise due:

(Insert a percentage or amount to be withheld as retainage from each Application for Payment. The amount of retainage may be limited by governing law.)

Five percent (5%)

§ 11.1.8.1.1 The following items are not subject to retainage:

(Insert any items not subject to the withholding of retainage, such as general conditions, insurance, etc.)

AIA Document A133 – 2019. Copyright © 1991, 2003, 2009, and 2019. All rights reserved. § 11.1.8.2 Reduction or limitation of retainage, if any, shall be as follows:
(If the retainage established in Section 11.1.8.1 is to be modified prior to Substantial Completion of the entire Work, insert provisions for such modification.)

§ 11.1.8.3 Except as set forth in this Section 11.1.8.3, upon Substantial Completion of the Work, the Construction Manager may submit an Application for Payment that includes the retainage withheld from prior Applications for Payment pursuant to this Section 11.1.8. The Application for Payment submitted at Substantial Completion shall not include retainage as follows:
(Insert any other conditions for release of retainage, such as upon completion of the Owner's audit and reconciliation, upon Substantial Completion.)

Upon Substantial Completion, an amount equal to 200% of the cost reasonably agreed to by the Architect and Construction Manager as necessary to complete "punch list" items and achieve Final Completion of the Work, shall be subtracted from the payment made pursuant to Section 9.8.5 of the General Conditions. If the Construction Manager fails to complete the items on the "punch list," the Owner may use such retainage to complete such items, and the Construction Manager shall forfeit all rights to such retainage amounts as the Owner so uses.

§ 11.1.9 If final completion of the Work is materially delayed through no fault of the Construction Manager, the Owner shall pay the Construction Manager any additional amounts in accordance with Article 9 of the General Conditions.

§ 11.1.10 Except with the Owner's prior written approval, the Construction Manager shall not make advance payments to suppliers for materials or equipment which have not been delivered and suitably stored at the site.

§ 11.1.11 The Owner and the Construction Manager shall agree upon a mutually acceptable procedure for review and approval of payments to Subcontractors, and the percentage of retainage held on Subcontracts, and the Construction Manager shall execute subcontracts in accordance with those agreements.

§ 11.1.12 In taking action on the Construction Manager's Applications for Payment the Architect shall be entitled to rely on the accuracy and completeness of the information furnished by the Construction Manager, and such action shall not be deemed to be a representation that (1) the Architect has made a detailed examination, audit, or arithmetic verification, of the documentation submitted in accordance with Section 11.1.4 or other supporting data; (2) that the Architect has made exhaustive or continuous on-site inspections; or (3) that the Architect has made examinations to ascertain how or for what purposes the Construction Manager has used amounts previously paid on account of the Contract. Such examinations, audits, and verifications, if required by the Owner, will be performed by the Owner's auditors acting in the sole interest of the Owner.

§ 11.1.13 Notwithstanding anything to the contrary contained in the Contract Documents, issuance of a Certificate for Payment by the Architect is a recommendation only; payment to the Contractor of amounts certified in a Certificate for Payment is subject to the Owner's approval.

§ 11.2 Final Payment

§ 11.2.1 Final payment, constituting the entire unpaid balance of the Contract Sum, shall be made by the Owner to the Construction Manager when

.1 the Construction Manager has fully performed the Contract, except for the Construction Manager's responsibility to correct Work as provided in Article 12 of the General Conditions, and to satisfy other requirements, if any, which extend beyond final payment;

.2 the Construction Manager has submitted a final accounting for the Cost of the Work and a final Application for Payment; and

.3 a final Certificate for Payment has been issued by the Architect in accordance with Section 11.2.2.2.

§ 11.2.2 Within 30 days of the Owner's receipt of the Construction Manager's final accounting for the Cost of the Work, the Owner shall conduct an audit of the Cost of the Work or notify the Architect that it will not conduct an audit.

§ 11.2.2.1 If the Owner conducts an audit of the Cost of the Work, the Owner shall, within 10 days after completion of the audit, submit a written report based upon the auditors' findings to the Architect.

§ 11.2.2.2 Within seven days after receipt of the written report described in Section 11.2.2.1, or receipt of notice that the Owner will not conduct an audit, and provided that the other conditions of Section 11.2.1 have been met, the Architect will either issue to the Owner a final Certificate for Payment with a copy to the Construction Manager, or notify the Construction Manager and Owner in writing of the Architect's reasons for withholding a certificate as provided in Article 9 of the General Conditions. The time periods stated in this Section 11.2.2 supersede those stated in Article 9 of the General Conditions. The Architect is not responsible for verifying the accuracy of the Construction Manager's final accounting.

§ 11.2.2.3 If the Owner's auditors' report concludes that the Cost of the Work, as substantiated by the Construction Manager's final accounting, is less than claimed by the Construction Manager, the Construction Manager shall be entitled to request mediation of the disputed amount without seeking an initial decision pursuant to Article 15 of the General Conditions. A request for mediation shall be made by the Construction Manager within 30 days after the Construction Manager's receipt of a copy of the Architect's final Certificate for Payment. Failure to request mediation within this 30-day period shall result in the substantiated amount reported by the Owner's auditors becoming binding on the Construction Manager. Pending a final resolution of the disputed amount, the Owner shall pay the Construction Manager the amount certified in the Architect's final Certificate for Payment.

§ 11.2.3 The Owner's final payment to the Construction Manager shall be made no later than forty-five (45) days after the issuance of the Architect's final Certificate for Payment, or as follows:

§ 11.2.4 If, subsequent to final payment, and at the Owner's request, the Construction Manager incurs costs, described in Sections 7.1 through 7.7, and not excluded by Section 7.9, to correct defective or nonconforming Work, the Owner shall reimburse the Construction Manager for such costs, and the Construction Manager's Fee applicable thereto, on the same basis as if such costs had been incurred prior to final payment, but not in excess of the Guaranteed Maximum Price. If adjustments to the Contract Sum are provided for in Section 6.1.7, the amount of those adjustments shall be recalculated, taking into account any reimbursements made pursuant to this Section 11.2.4 in determining the net amount to be paid by the Owner to the Construction Manager.

§ 11.3 Interest

Payments due and unpaid under the Contract shall bear interest from the date payment is due at the rate stated below, or in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.
(Insert rate of interest agreed upon, if any.)

%

ARTICLE 12 DISPUTE RESOLUTION

§ 12.1 Initial Decision Maker

§ 12.1.1 Any Claim between the Owner and Construction Manager shall be resolved in accordance with the provisions set forth in this Article 12 and Article 15 of the General Conditions. However, for Claims arising from or relating to the Construction Manager's Preconstruction Phase services, no decision by the Initial Decision Maker shall be required as a condition precedent to mediation or binding dispute resolution, and Section 12.1.2 of this Agreement shall not apply.

§ 12.1.2 The Architect will serve as the Initial Decision Maker pursuant to Article 15 of the General Conditions for Claims arising from or relating to the Construction Manager's Construction Phase services, unless the parties appoint below another individual, not a party to the Agreement, to serve as the Initial Decision Maker.
(Paragraphs deleted)

§ 12.2 Binding Dispute Resolution

For any Claim subject to, but not resolved by mediation pursuant to Article 15 of AIA Document A201–2017, the method of binding dispute resolution shall be as follows:
(Check the appropriate box.)

[X] Arbitration pursuant to Article 15 of the General Conditions

[ ] Litigation in a court of competent jurisdiction

[ ] Other: *(Specify)*

§ 12.3 Liens

In the event that any Subcontractor, Supplier or other party for whom the Construction Manager is responsible establishes a lien against the Project and/or the Project site, the Construction Manager shall, upon request of the Owner and at no cost to the Owner, and provided that such lien does not arise from the Owner's failure to comply with its payment obligations under this Agreement, cause the lien to be discharged (by recording a lien discharge bond from a surety and in form acceptable to the Owner or otherwise) within thirty (30) days of the Construction Manager's receipt of the notice thereof. If the Construction Manager fails to cause such lien to be discharged within such thirty (30) day period, the Owner shall have the right to withhold the next progress payment until such lien is discharged to the satisfaction of the Owner. The Construction Manager agrees to indemnify and hold harmless the Owner from all costs and expenses incurred by the Owner in connection with such liens unless such liens result from the Owner's failure to comply with its payment obligations under the Agreement.

ARTICLE 13 TERMINATION OR SUSPENSION

§ 13.1 Termination Prior to Execution of the Guaranteed Maximum Price Amendment

§ 13.1.1 If the Owner and the Construction Manager do not reach an agreement on the Guaranteed Maximum Price, the Owner may terminate this Agreement upon not less than seven days' written notice to the Construction Manager, and the Construction Manager may terminate this Agreement, upon not less than seven days' written notice to the Owner.

§ 13.1.2 In the event of termination of this Agreement pursuant to Section 13.1.1, the Construction Manager shall be compensated for Preconstruction Phase services and Work performed prior to receipt of a notice of termination, in accordance with the terms of this Agreement. In no event shall the Construction Manager's compensation under this Section exceed the compensation set forth in Section 5.1.

§ 13.1.3 Prior to the execution of the Guaranteed Maximum Price Amendment, the Owner may terminate this Agreement upon not less than seven days' written notice to the Construction Manager for the Owner's convenience and without cause, and the Construction Manager may terminate this Agreement, upon not less than seven days' written notice to the Owner, for the reasons set forth in Article 14 of the General Conditions.

§ 13.1.4 In the event of termination of this Agreement pursuant to Section 13.1.3, the Construction Manager shall be equitably compensated for Preconstruction Phase services and Work performed prior to receipt of a notice of termination. In no event shall the Construction Manager's compensation under this Section exceed the compensation set forth in Section 5.1.

§ 13.1.5 If the Owner terminates the Contract pursuant to Section 13.1.3 after the commencement of the Construction Phase but prior to the execution of the Guaranteed Maximum Price Amendment, the Owner shall pay to the Construction Manager an amount calculated as follows, which amount shall be in addition to any compensation paid to the Construction Manager under Section 13.1.4:

.1 Take the Cost of the Work incurred by the Construction Manager to the date of termination;

.2 Add the Construction Manager's Fee computed upon the Cost of the Work to the date of termination at the rate stated in Section 6.1 or, if the Construction Manager's Fee is stated as a fixed sum in that Section, an amount that bears the same ratio to that fixed-sum Fee as the Cost of the Work at the time of termination bears to a reasonable estimate of the probable Cost of the Work upon its completion; and

.3 Subtract the aggregate of previous payments made by the Owner for Construction Phase services.

§ 13.1.6 The Owner shall also pay the Construction Manager fair compensation, either by purchase or rental at the election of the Owner, for any equipment owned by the Construction Manager that the Owner elects to retain and that is not otherwise included in the Cost of the Work under Section 13.1.5.1. To the extent that the Owner elects to take legal assignment of subcontracts and purchase orders (including rental agreements), the Construction Manager shall, as a condition of receiving the payments referred to in this Article 13, execute and deliver all such papers and take all such steps, including the legal assignment of such subcontracts and other contractual rights of the Construction Manager, as the

Owner may require for the purpose of fully vesting in the Owner the rights and benefits of the Construction Manager under such subcontracts or purchase orders. All Subcontracts, purchase orders and rental agreements entered into by the Construction Manager will contain provisions allowing for assignment to the Owner as described above.

§ 13.1.6.1 If the Owner accepts assignment of subcontracts, purchase orders or rental agreements as described above, the Owner will reimburse or indemnify the Construction Manager for all costs arising under the subcontract, purchase order or rental agreement, if those costs would have been reimbursable as Cost of the Work if the contract had not been terminated. If the Owner chooses not to accept assignment of any subcontract, purchase order or rental agreement that would have constituted a Cost of the Work had this agreement not been terminated, the Construction Manager will terminate the subcontract, purchase order or rental agreement and the Owner will pay the Construction Manager the documented costs necessarily incurred by the Construction Manager because of such termination.

§13.1.7 Upon payment by the Owner of the amounts required under this Section 13.1, the Owner's obligations to the Construction Manager shall be fully satisfied, and the Construction Manager shall be deemed to have fully released the Owner from any claims or liabilities.

§ 13.2 Termination or Suspension Following Execution of the Guaranteed Maximum Price Amendment
§ 13.2.1 Termination
The Contract may be terminated by the Owner or the Construction Manager as provided in Article 14 of the General Conditions.

§ 13.2.2 Termination by the Owner for Cause
§ 13.2.2.1 If the Owner terminates the Contract for
(Paragraphs deleted)
reasons other than the fault of the Construction Manager or its Subcontractors after execution of the Guaranteed Maximum Price Amendment, the amount payable to the Construction Manager pursuant to Sections 14.2 and 14.4 of the General Conditions shall not exceed the amount the Construction Manager would otherwise have received pursuant to Sections 13.1.2 and 13.1.5 of this Agreement. In the case of termination by the Owner for cause, the Owner's payment obligations to the Construction Manager shall be subject to the provisions of Section 14.2.4 of the General Conditions.

§ 13.2.2.2 The Owner shall also pay the Construction Manager fair compensation, either by purchase or rental at the election of the Owner, for any equipment owned by the Construction Manager that the Owner elects to retain and that is not otherwise included in the Cost of the Work under Section 13.2.2.1.1. To the extent that the Owner elects to take legal assignment of subcontracts and purchase orders (including rental agreements), the Construction Manager shall, as a condition of receiving the payments referred to in this Article 13, execute and deliver all such papers and take all such steps, including the legal assignment of such subcontracts and other contractual rights of the Construction Manager, as the Owner may require for the purpose of fully vesting in the Owner the rights and benefits of the Construction Manager under such subcontracts or purchase orders.

§ 13.2.3 Termination by the Owner for Convenience
If the Owner terminates the Contract for convenience in accordance with Article 14 of the General Conditions, then the Owner shall pay the Construction Manager
(Paragraphs deleted)
in accordance with the provisions of said Article 14.

§ 13.3 Suspension
The Work may be suspended by the Owner as provided in Article 14 of the General Conditions; in such case, the Guaranteed Maximum Price and Contract Time shall be increased as provided in Article 14 of the General Conditions, except that the term "profit" shall be understood to mean the Construction Manager's Fee as described in Sections 6.1 and 6.3.5 of this Agreement.

ARTICLE 14 MISCELLANEOUS PROVISIONS
§ 14.1 Unless otherwise expressly defined in this Agreement, the terms in this Agreement shall have the same meaning as those in the General Conditions. Where reference is made in this Agreement to a provision of the General Conditions or another Contract Document, the reference refers to that provision as amended or supplemented by other provisions of the Contract Documents.

§ 14.2 Successors and Assigns

§ 14.2.1 The Owner and Construction Manager, respectively, bind themselves, their partners, successors, assigns and legal representatives to covenants, agreements, and obligations contained in the Contract Documents. Except as provided in Section 14.2.2 of this Agreement, and in Section 13.2.2 of the General Conditions, neither party to the Contract shall assign the Contract as a whole without written consent of the other. If either party attempts to make an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

§ 14.2.2 The Owner may, without consent of the Construction Manager, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Construction Manager shall execute all consents reasonably required to facilitate the assignment.

§ 14.3 Insurance and Bonds

§ 14.3.1 Preconstruction Phase

As described in this Agreement, in Exhibit B (Insurance and Bonds) and elsewhere in the Contract Documents, the Construction Manager shall purchase and maintain the following insurance for the duration of the Preconstruction Services performed under this Agreement. If any of the requirements set forth below exceed the types and limits the Construction Manager normally maintains, the Owner shall reimburse the Construction Manager for any additional cost.

§ 14.3.1.1 Commercial General Liability with policy limits of not less than One Million Dollars ($ 1,000,000.00) for each occurrence and Two Million Dollars ($ 2,000,000.00) in the aggregate for bodily injury and property damage.

§ 14.3.1.2 Automobile Liability covering vehicles owned, and non-owned vehicles used, by the Construction Manager with policy limits of not less than One Million Dollars ($ 1,000,000.00) per accident for bodily injury, death of any person, and property damage arising out of the ownership, maintenance and use of those motor vehicles, along with any other statutorily required automobile coverage.

§ 14.3.1.3 The Construction Manager may achieve the required limits and coverage for Commercial General Liability and Automobile Liability through a combination of primary and excess or umbrella liability insurance, provided that such primary and excess or umbrella liability insurance policies result in the same or greater coverage as the coverages required under Sections 14.3.1.1 and 14.3.1.2, and in no event shall any excess or umbrella liability insurance provide narrower coverage than the primary policy. The excess policy shall not require the exhaustion of the underlying limits only through the actual payment by the underlying insurers.

§ 14.3.1.4 Workers' Compensation at statutory limits and Employers Liability with policy limits not less than Five Hundred Thousand Dollars ($ 500,000.00) each accident, Five Hundred Thousand Dollars ($ 500,000.00) each employee for disease, and Five Hundred Thousand Dollars ($ 500,000.00) policy limit coverage for disease.

§ 14.3.1.5 Professional Liability covering negligent acts, errors and omissions in the performance of professional services, with policy limits of not less than Five Million Dollars ($ 5,000,000.00) per claim and Five Million Dollars ($ 5,000,000.00) in the aggregate.

§ 14.3.1.6 Other Insurance

(List below any other insurance coverage to be provided by the Construction Manager and any applicable limits.)

Coverage	Limits
See Exhibit B (Insurance and Bonds)	

§ 14.3.1.7 Additional Insured Obligations. To the fullest extent permitted by law, the Construction Manager shall cause the primary and excess or umbrella polices for Commercial General Liability and Automobile Liability to include The Town of Greenwich, the Greenwich Board of Education, the Old Greenwich School Building Committee and the State of Connecticut as an additional insured for claims caused in whole or in part by the Construction Manager's negligent acts or omissions. The additional insured coverage shall be primary and non-contributory to any of the Owner's insurance policies and shall apply to both ongoing and completed operations.

§ 14.3.1.8 The Construction Manager shall provide certificates of insurance to the Owner that evidence compliance with the requirements in this Section 14.3.1.

§ 14.3.2 Construction Phase
After execution of the Guaranteed Maximum Price Amendment, the Owner and the Construction Manager shall purchase and maintain insurance as set forth in Exhibit B (Insurance and Bonds) to this Agreement and elsewhere in the Contract Documents.

§ 14.3.2.1 The Construction Manager shall provide Performance, Maintenance and Payment bonds as set forth in Exhibit B, and elsewhere in the Contract Documents.

§ 14.4 Notice in electronic format, pursuant to Article 1 of AIA Document A201–2017, may be given in accordance with AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, if completed, or as otherwise set forth below:
(If other than in accordance with AIA Document E203-2013, insert requirements for delivering notice in electronic format such as name, title, and email address of the recipient and whether and how the system will be required to generate a read receipt for the transmission.)

§ 14.5 Other provisions:

§ 14.5.1 The Construction Manager's representative is designated in Section 1.1.12 of this Agreement and shall have express authority to bind the Construction Manager with respect to all matters under the Contract Documents. The term "Construction Manager" means the Construction Manager or the Construction Manager's authorized representative. Such representative may only be changed with the consent of the Owner.

§ 14.6 Submission by the Owner of a final grant application to the applicable Agencies shall not constitute a waiver of any Claims by the Owner.

§ 14.7 STATUTORY PROVISIONS
§ 14.7.1 Out of State Contractors and Subcontractors
If the Construction Manager is an "unverified contractor," as each such term as defined in Section 12-430(7)(A) of the Connecticut General Statutes, as revised, the Construction Manager shall comply fully with the provisions of Section 12-430(7)(C) and, prior to commencing the Work, shall furnish the Owner with a copy of the requisite certificate of compliance set forth in subparagraph (B) of Section 12-430(7).

§ 14.7.2 Payment of Subcontractors. The following is required pursuant to Section 49-41a of the Connecticut General Statutes. Notwithstanding, if the payment requirements set forth in Section 5.5 of the General Conditions require prompter payment, the Construction Manager shall comply with such requirement.

§ 14.7.2.1 The Construction Manager shall pay any amounts due any Subcontractor, whether for labor performed or materials furnished, within thirty (30) days of the date the Owner pays the Construction Manager for such labor or materials.

§ 14.7.2.2 The Construction Manager shall require in its agreements with each Subcontractor that such Subcontractor shall pay any amounts due any Sub-subcontractor, whether for labor performed or materials furnished, within thirty (30) days of the date the Construction Manager pays the Subcontractor for such labor or materials.

§ 14.7.3 Prevailing Wage
To the extent required under Section 31-53 of the Connecticut General Statutes, the wages paid on a hourly basis to any mechanic, laborer or workman employed upon the work herein contracted to be done and the amount of payment or contribution paid or payable on behalf of each such employee to any employee welfare fund, as defined in subsection (h) of Section 31-53 of the General Statutes of Connecticut shall be at a rate equal to the rate customary or prevailing for the same work in the same trade or occupation in the town in which such public works project is being constructed. Any contractor who is not obligated by agreement to make such payment or contribution on behalf of such employees to any such employee welfare fund shall pay to each employee as part of their wages the amount of the payment of contribution for their classification on each pay day.

§ 14.7.4 Safety Training

To the extent required pursuant to Connecticut General Statute Section 31-53b, the Construction Manager shall furnish proof, and shall cause its Subcontractors to furnish proof, with the weekly certified payroll form for the first week each employee begins work on such project that any person performing the work of a mechanic, laborer or worker pursuant to the classifications of labor under section 31-53 on such public works project, pursuant to such contract, has completed a course of at least ten hours in duration in construction safety and health approved by the federal Occupational Safety and Health Administration or, has completed a new miner training program approved by the Federal Mine Safety and Health Administration in accordance with 30 CFR 48 or, in the case of telecommunications employees, has completed at least ten hours of training in accordance with 29 CFR 1910.268. If the date of this Agreement is on or after July 1, 2012, the Construction Manager shall also furnish proof, and shall cause its Subcontractors to furnish proof, that any plumber or electrician subject to the continuing education requirements of section 20-334d, who has completed a course of at least ten hours in duration in construction safety and health approved by the federal Occupational Safety and Health Administration five or more years prior to the date such electrician or plumber begins work on such public works project, has completed a supplemental refresher training course of at least four hours in duration in construction safety and health taught by a federal Occupational Safety and Health Administration authorized trainer.

§ 14.7.5 Local Labor

To the extent consistent with any provision regarding residence requirements contained in a collective bargaining agreement to which the Construction Manager is a party, in the employment of labor to perform the work specified herein, preference shall be given to citizens of the United States, who are, and continuously for at least three months prior to the date hereof have been, residents of the labor market area, as established by the Labor Commissioner, in which such work is to be done, and if no such qualified person is available, then to citizens who have continuously resided in the county in which the work is to be performed for at least three months prior to the date hereof, and then to citizens of the state who have continuously resided in the state at least three months prior to the date hereof. [CGS §31-52]

§ 14.7.6 Compliance with Law/School Safety

§ 14.7.6.1 Contractor shall comply with all applicable laws including, without limitation, Connecticut General Statutes Section 10-222c, as applicable.

§ 14.7.6.2 The scope of the Work does not, and will not under any circumstances, require any contact with students. The Construction Manager, its Subcontractors, and their respective employees, agents and representatives are hereby prohibited from making any verbal, physical, telephonic or electronic contact of any kind with any student or any other minor person on school property including, without limitation, the Project site, whether inside or outside of any school facility. The Construction Manager shall immediately remove any individual performing Work on the Project from school property and from the Project if it becomes known to the Construction Manager that such person may be a danger to the health or safety of the school community or its students, or at the request of the Owner, in its sole discretion. The Construction Manager shall include, and shall require its subcontractors to include, this section in all subcontracts for the Project.

§ 14.8 Background and Employment History Checks.

§ 14.8.1 To the extent permitted by law, the Contractor shall perform (or cause to be performed) as regards all of its employees, agents, and representatives (each, a "Contractor Employee"), and all of the employees, agents, and representatives of Subcontractors and Sub-subcontractors (each, a "Subcontractor Employee"), who will be physically present on the School Grounds in connection with the Project, appropriate background checks on all such Contractor Employees and Subcontractor Employees. Such background checks shall include, at a minimum and without limitation, a search of both the Connecticut Department of Emergency Services and Public Protection's sexual offender registry and the Abuse and Neglect Registry of the Connecticut Department of Children and Families. For those Contractor Employees and Subcontractor Employees who are to be physically present on the School Grounds in connection with the Project and whose current or most recent employment occurred out of state, the out-of-state equivalent of the Connecticut Department of Emergency Services and Public Protection's sexual offender registry and the Abuse and Neglect Registry of the Connecticut Department of Children and Families registry shall be checked. The Contractor shall complete (or cause to be completed) background checks as to each Contractor Employee and Subcontractor Employee prior to such Contractor Employee or Subcontractor Employee being permitted to be physically present on the School Grounds. If the Contractor receives any information indicating that any Contractor Employee or Subcontractor Employee may be registered as a sexual offender, may have a record of abuse or neglect, or is, in any other manner, unfit to perform services which could involve direct contact with minor children, or which may involve working in or near property on which minor children may be present, the Contractor shall immediately forward such information to the Owner, to the extent permitted by law, and shall immediately remove the individual from the School Grounds and from participation in the Project.

§ 14.8.2 Contractor represents and warrants that, in its best professional judgment, each Contractor Employee and each Subcontractor Employee maintains the appropriate qualifications and is fit to perform services which could involve direct contact with minor children, or which may involve working in or near property on which minor children may be present. The Contractor shall immediately remove any Contractor Employee or Subcontractor Employee from the School Grounds and from the Project if requested to do so by the Owner (which request shall be made in the Owner's sole discretion) or if it becomes known to the Contractor that such Contractor Employee or Subcontractor Employee may be a danger to the health, safety or well-being of the school community, its students, or any minor children.

§ 14.8.3 The Contractor shall include and shall require all Subcontractors to include this Section 14.8 in all subcontracts for the Project.

§ 14.8.4 By execution of the Contract, the Contractor represents and warrants that it has fully complied with the requirements of this Section 14.8. To the extent permitted by law, the Contractor agrees that upon the Owner's request, Contractor shall promptly provide the Owner with any documentation related to such compliance, including, without limitation, the results of the background and employment history checks required by this Section 14.9. Failure by the Contractor to comply with its obligations under this Section 14.8 shall constitute a material breach of the Contract.

§ 14.9 If any provision of this Agreement or any other contracts among the Contract Documents is found to be invalid or illegal by a court of competent jurisdiction, the remaining provisions shall remain in full force and effect and the parties agree to substitute for the invalid provision the provision within the bounds of the law which most clearly effectuates the legal and economic intent of the invalid provision.

ARTICLE 15 SCOPE OF THE AGREEMENT

§ 15.1 This Agreement represents the entire and integrated agreement between the Owner and the Construction Manager and supersedes all prior negotiations, representations or agreements, either written or oral. This Agreement may be amended only by written instrument signed by both Owner and Construction Manager.

§ 15.2 The following documents comprise the Agreement and each shall be included in the Contract Documents:

.1 AIA Document A133™–2019, Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee with a Guaranteed Maximum Price, as herein modified

.2 AIA Document A133™-2019, as may be modified, Exhibit A, Guaranteed Maximum Price Amendment, if executed

.3 AIA Document A133™–2019, Exhibit B, Insurance and Bonds, as modified

.4 AIA Document A201™–2017, General Conditions of the Contract for Construction, as modified

.5 Owner's Request for Proposal #2408-23 dated February 23, 2023, and Addenda (collectively, the "RFP")

.6 Construction Manager's Proposal dated March 23, 2023, in response to the RFP but only to the extent that such proposal is not inconsistent or in conflict with the terms and conditions of any other Contract Document.

.7 AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, dated as indicated below:
(Insert the date of the E203-2013 incorporated into this Agreement.)

TBD

.8 Other Exhibits:
(Check all boxes that apply.)

[ ] AIA Document E234™–2019, Sustainable Projects Exhibit, Construction Manager as Constructor Edition, dated as indicated below:
(Insert the date of the E234-2019 incorporated into this Agreement.)

ARTICLE 1 GENERAL PROVISIONS

§ 1.1 Basic Definitions

§ 1.1.1 The Contract Documents

The Contract Documents are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and consist of the Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, Addenda and consultant and investigative reports issued prior to execution of the Contract, other documents listed in the Agreement, and Modifications issued after execution of the Contract. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive, or (4) a written order for a minor change in the Work issued by the Architect. Unless specifically enumerated in the Agreement, the Contract Documents do not include the advertisement or invitation to bid, Instructions to Bidders, sample forms, other information furnished by the Owner in anticipation of receiving bids or proposals, the Contractor's bid or proposal, or portions of Addenda relating to bidding or proposal requirements.

§ 1.1.2 The Contract

The Contract Documents form the Contract for Construction. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Contractor and the Architect or the Architect's consultants, (2) between the Owner and a Subcontractor or a Sub-subcontractor, (3) between the Owner and the Architect or the Architect's consultants, or (4) between any persons or entities other than the Owner and the Contractor. The Architect shall, however, be entitled to performance and enforcement of obligations under the Contract intended to facilitate performance of the Architect's duties.

§ 1.1.3 The Work

The term "Work" means the construction and services required by, reasonably inferable from, and as necessary to produce the results intended by, the Contract Documents, whether performed on or off the site of the Project and whether completed or partially completed, and includes all other labor, materials, equipment, and services provided or to be provided by the Contractor, its Subcontractors, Sub-Subcontractors, material suppliers or any other entity for whom the Contractor is responsible, to fulfill the Contractor's obligations under or pursuant to the Contract Documents and, except to the extent inconsistent with the Contract Documents, such construction and services as are usually and customarily provided in conjunction with, or in furtherance of, such obligations. The Work may constitute the whole or a part of the Project.

§ 1.1.4 The Project

The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by the Owner and by Separate Contractors.

§ 1.1.5 The Drawings

The Drawings are the graphic and pictorial portions of the Contract Documents showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules, and diagrams.

§ 1.1.6 The Specifications

The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, systems, standards and workmanship for the Work, and performance of related services.

§ 1.1.7 Instruments of Service

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

§ 1.1.8 Initial Decision Maker

The Initial Decision Maker is the person identified in the Agreement to render initial decisions on Claims in accordance with Section 15.2. The Initial Decision Maker shall not show partiality to the Owner or Contractor and shall not be liable for results of interpretations or decisions rendered in good faith.

§1.1.9 CONTRACTOR

The term "Contractor" as used in these General Conditions shall mean the "Construction Manager" as defined in the Agreement.

§ 1.2 Correlation and Intent of the Contract Documents

§ 1.2.1 The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results. If the Contractor discovers any inconsistency within or between parts of the Contract Documents or between the Contract Documents and any of the Applicable Laws (as defined in Section 2.2.1.1 of the Agreement), the Contractor shall give notice to the Owner and the Architect of such inconsistency and shall, unless otherwise ordered in writing by the Architect or the Owner, provide work or materials of the better quality, greater quantity, or that otherwise complies with applicable standards, codes or ordinances.

§ 1.2.1.1 The invalidity of any provision of the Contract Documents shall not invalidate the Contract or its remaining provisions. If it is determined that any provision of the Contract Documents violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Contract Documents shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Contract.

§ 1.2.2 Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

§ 1.2.3 Unless otherwise stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

§ 1.2.4 Where no explicit quality or standards for materials or workmanship are established for any portion of the Work, the Contractor shall perform such Work in a good and workman like manner and in a manner of good quality for the intended use and consistent with the quality of the surrounding Work and of the construction of the Project generally.

§ 1.2.5 All manufactured articles, materials and equipment shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with the manufacturer's written or printed directions and instructions unless otherwise indicated in the Contract Documents. Directions, specifications and recommendations by manufacturers for installation, handling, storing, adjustment, and operation of their materials or equipment shall be complied with, but the Contractor shall nonetheless have the responsibility for determining whether such directions, specifications, and recommendations may safely and suitably be employed in the Work, and for notifying the Architect in advance in writing of any deviation or modification necessary for installation safety or proper operation of the item

§ 1.3 Capitalization

Terms capitalized in these General Conditions include those that are (1) specifically defined, (2) the titles of numbered articles, or (3) the titles of other documents published by the American Institute of Architects.

§ 1.4 Interpretation

In the interest of brevity the Contract Documents frequently omit modifying words such as "all" and "any" and articles such as "the" and "an," but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

§ 1.5 Ownership and Use of Drawings, Specifications, and Other Instruments of Service

§ 1.5.1 The Architect and the Architect's consultants shall, except to the extent otherwise provided in the agreement between the Owner and the Architect, be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and retain all common law, statutory, and other reserved rights in their Instruments of Service, including copyrights. The Contractor, Subcontractors, Sub-subcontractors, and suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of the reserved rights of the owner(s) of such Instruments of Service.

§ 1.5.2 The Contractor, Subcontractors, Sub-subcontractors, and suppliers are authorized to use and reproduce the Instruments of Service provided to them, subject to any protocols established pursuant to Sections 1.7 and 1.8, solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Contractor, Subcontractors, Sub-subcontractors, and suppliers may not use the Instruments of Service on other projects or for additions to the Project outside the scope of the Work without the specific written consent of the Owner, Architect, and the Architect's consultants.

§ 1.6 Notice

§ 1.6.1 Except as otherwise provided in Section 1.6.2, where the Contract Documents require one party to notify or give notice to the other party, such notice shall be provided in writing to the designated representative of the party to whom the notice is addressed and shall be deemed to have been duly served if delivered in person, by mail, by courier, or by electronic transmission if a method for electronic transmission is set forth in the Agreement.

§ 1.6.2 Notice of Claims as provided in Section 15.1.3 shall be provided in writing and shall be deemed to have been duly served only if delivered to the designated representative of the party to whom the notice is addressed by certified or registered mail, or by courier providing proof of delivery.

(Paragraphs deleted)

§ 1.6.3 Digital Data Use and Transmission

The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form. The parties may use AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

§ 1.7 CONTRACTOR'S STANDARD OF CARE

§ 1.7.1 The Contractor shall be responsible for the performance of the Work as an independent contractor and in a good and workmanlike manner (i) consistent with the Contract Documents; (ii) consistent with the instructions, guidance and direction of the Owner and Architect; (iii) consistent with the prevailing applicable professional or industry standards; (iv) consistent with sound practices; and (v) as expeditiously as is consistent with the foregoing (the standards of this Section 1.7.1 shall be referred to herein as the "Contractor's Standard of Care").

§ 1.7.2 The Contractor shall exercise the Contractor's Standard of Care in performing all aspects of the Work and its obligations under the Contract Documents. All references in the Contract Documents to the knowledge, inference, reliance, awareness, determination, belief, observation, recognition or discovery of the Contractor or reference to any similar term shall include the knowledge, inference, reliance, awareness, determination, belief, observation, recognition the Contractor would have obtained or achieved upon the exercise of the Contractor's Standard of Care

§ 1.8 Building Information Models Use and Reliance

Any use of, or reliance on, all or a portion of a building information model without agreement to protocols governing the use of, and reliance on, the information contained in the model and without having those protocols set forth in AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, and the requisite AIA Document G202™–2013, Project Building Information Modeling Protocol Form, shall be at the using or relying party's sole risk and without liability to the other party and its contractors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

ARTICLE 2 OWNER

§ 2.1 General

§ 2.1.1 The Owner is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Owner shall designate in writing a representative who shall have express authority to bind the Owner with respect to all matters requiring the Owner's approval or authorization. Except as otherwise provided in Section 4.2.1, the Architect does not have such authority.

§ 2.1.2 The Owner shall furnish to the Contractor, within fifteen days after receipt of a written request, information necessary and relevant for the Contractor to evaluate, give notice of, or enforce mechanic's lien rights. Such information shall include a correct statement of the record legal title to the property on which the Project is located, usually referred to as the site, and the Owner's interest therein.

§ 2.2 Evidence of the Owner's Financial Arrangements

§ 2.2.1 Intentionally Omitted.

§ 2.2.2 Intentionally Omitted.

§ 2.2.3 Intentionally Omitted

§ 2.2.4 Intentionally Omitted.

§ 2.3 Information and Services Required of the Owner

§ 2.3.1 Except for permits and related fees and filings that are the responsibility of the Contractor under the Contract Documents, including those required under Section 3.7.1, the Owner shall secure, file and pay for necessary approvals, easements, assessments and charges required for construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

§ 2.3.2 The Owner shall retain an architect lawfully licensed to practice architecture, or an entity lawfully practicing architecture, in the jurisdiction where the Project is located. That person or entity is identified as the Architect in the Agreement and is referred to throughout the Contract Documents as if singular in number.

§ 2.3.3 If the employment of the Architect terminates, the Owner may employ a successor and whose status under the Contract Documents shall be that of the Architect.

§ 2.3.4 The Owner shall furnish surveys describing physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site to the extent required by the Contract Documents. Unless otherwise instructed by the Owner, the Contractor shall be entitled to rely on the accuracy of information furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

(Paragraph deleted)

§ 2.3. Intentionally Omitted.

§ 2.3.6 Unless otherwise provided in the Contract Documents, the Owner shall furnish to the Contractor one copy of the Contract Documents for purposes of making reproductions pursuant to Section 1.5.2.

§ 2.4 Owner's Right to Stop the Work

If the Contractor fails to correct Work that is not in accordance with the requirements of the Contract Documents as required by Section 12.2 or repeatedly fails to carry out Work in accordance with the Contract Documents, the Owner may issue a written order to the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor, the Architect, or any other person or entity, except to the extent required by Section 6.1.3.

§ 2.5 Owner's Right to Carry Out the Work

If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a ten-day period after receipt of notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to other remedies the Owner may have, correct such default or neglect. The Architect may, pursuant to Section 9.5.1, withhold or nullify a Certificate for Payment in whole or in part, to the extent reasonably necessary to reimburse the Owner for the reasonable cost of correcting such deficiencies, including Owner's expenses and compensation for the Architect's additional services made necessary by such default, neglect, or failure. If current and future payments are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner at or prior to the date of Final Completion of the Work. The right of the Owner to so carry out such Work pursuant to this Section 2.5 shall not give rise to any duties on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity. If the Contractor disagrees with the actions of the Owner or the Architect, or the amounts claimed as costs to the Owner, the Contractor may file a Claim pursuant to Article 15.

§ 2.6.1 The rights stated in this Article 2 shall be in addition to and not in limitation of any other rights of the Owner provided in the Contract Documents, or as may be available to the Owner at law or in equity.

§ 2.6.2 Any data provided by the Owner to the Contractor concerning the physical characteristics or measurements of the components that comprise the Project site; access to the Project site or staging and storing at the Project site: present obstructions and conditions of structures on or near the Project site: locations and depths of sewers, conduits, pipes, and gas lines on or near the Project site; positions of sidewalks, curbs and pavements on or near the Project site and other data concerning the conditions of the Project site and its surroundings, have been obtained from sources the Owner believes to be reliable. Accuracy of such data, however, is not guaranteed and is furnished solely for accommodation of the Contractor. Use of such data is made at the Contractor's sole risk and Contractor releases and waives as against the Owner any claim for damages arising from any defect in or deficiency of the Contract Documents, including without limitation, the failure of the Contact Documents to comply with all Applicable Laws, it being understood and agreed that the Contractor's sole remedy will be to request a Change Order pursuant to the Contract.

ARTICLE 3 CONTRACTOR

§ 3.1 General

§ 3.1.1 The Contractor is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Contractor and Subcontractors of every tier shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all matters under this Contract. The term "Contractor" means the Contractor or the Contractor's authorized representative.

§ 3.1.2 The Contractor shall be responsible for performance of the Work in accordance with the Contract Documents. The Contractor shall be responsible to the Owner for the performance, and the acts or omissions, of the Subcontractors, Sub-subcontractors and material or equipment suppliers. Any reference in the Contract Documents to the Contractor's performance, act, or omission, or reference to a similar term, shall include the performance, act, or omission of the Subcontractors, Sub-subcontractors and material or equipment suppliers.

§ 3.1.3 The Contractor shall not be relieved of its obligations to perform the Work in accordance with the Contract Documents either by activities or duties of the Architect in the Architect's administration of the Contract, or by tests, inspections or approvals required or performed by persons or entities other than the Contractor.

§ 3.1.4 The Contractor shall comply with all Applicable Laws including, without limitation, those relating to equal opportunity, labor, wages and employment.

§ 3.1.5 The Contractor shall comply, and shall cause Subcontractors of every tier to comply, with all accounting procedures and record retention policies reasonably requested by the Owner

§ 3.2 Review of Contract Documents and Field Conditions by Contractor

§ 3.2.1 Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become generally familiar with local conditions under which the Work is to be performed, and correlated personal observations with requirements of the Contract Documents. The provisions of this Section 3.2.1 shall not be construed to limit the investigative and review responsibilities of the Contractor under any other provisions of the Contract Documents.

§ 3.2.2 Because the Contract Documents are complementary, the Contractor shall, before starting each portion of the Work, carefully study and compare the various Contract Documents relative to that portion of the Work, as well as the information furnished by the Owner pursuant to Section 2.3.4, shall take field measurements of any existing conditions related to that portion of the Work, and shall observe any conditions at the site affecting it. These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however, the Contractor shall promptly report to the Owner and the Architect any errors, inconsistencies or omissions discovered by or made known to the Contractor as a request for information in such form as the Architect may require. It is recognized that the Contractor's review is made in the Contractor's capacity as a contractor and not as a licensed design professional, unless otherwise specifically provided in the Contract Documents. The execution of the Contract shall constitute a representation by the Contractor that the Contractor has carefully reviewed the Contract Documents, and that the

Contract Documents are sufficiently detailed and complete to permit the Contractor, (i) to complete the Project for an amount not in excess of the Contact Sum, except for additional costs incurred due to changes in the Work approved by the Owner; (ii) complete the Work within the Contract Time and in accordance with the Contract Documents and all Applicable Laws. The Contractor is not required to ascertain that the Contract Documents are in accordance with all Applicable Laws, but the Contractor shall promptly report to the Owner and the Architect any nonconformity discovered by or made known to the Contractor as a request for information in such form as the Architect may require

§ 3.2.3 Execution by the Contractor of the Guaranteed Maximum Price Amendment, shall constitute a certification by the Contractor that it has taken all steps necessary to ascertain the nature and location of the Work, and the general and reasonably observable conditions which can or may affect the Work and/or the cost thereof. Failure by the Contractor to fully acquaint itself with conditions which may affect the Work and/or the cost thereof, including, but not limited to, conditions relating to transportation, handling, storage of materials, availability of labor, water, other known projects in the region, applicable provisions of law, and the character and availability of equipment and facilities needed preliminary to and during the prosecution the Work, shall not relieve the Contractor of its responsibilities under the Contract Documents and shall not constitute a basis for extension of time or any increase in the Contract Sum. Owner assumes no responsibility for any representations concerning conditions made by any of its officers, or employees or representatives, prior to the execution of the Contract, unless such representations are expressly stated in the Contract Documents. The Contractor shall not perform any construction activity it knows constitutes a recognized error, inconsistency or omission. If the Contractor performs any construction activity knowing it involves a recognized error, inconsistency or omission in the Contract Documents without reporting the error, inconsistency or omission to the Architect, the Contractor shall assume appropriate responsibility for such performance and shall bear an appropriate amount of the costs of correction.

§ 3.2.4 If the Contractor believes that additional cost or time is involved because of clarifications or instructions the Architect issues in response to the Contractor's notices or requests for information pursuant to this Article 3, the Contractor shall submit Claims as provided in Article 15. If the Contractor fails to perform the obligations of Sections 3.2.2 or 3.2.3, the Contractor shall pay such costs and damages to the Owner, subject to Section 15.1.7, as would have been avoided if the Contractor had performed such obligations. If the Contractor performs those obligations, the Contractor shall not be liable to the Owner or Architect for damages resulting from errors, inconsistencies or omissions in the Contract Documents, for differences between field measurements or conditions and the Contract Documents, or for nonconformities of the Contract Documents to Applicable Laws.

§ 3.2.5 If the Contractor fails to fulfill its obligations to report to the Architect or Owner under this Article 3, such failure shall preclude the Contractor from any subsequent Claim arising from or relating to the factors giving rise to the Contractor's obligation to make such report.

§ 3.2.6 The Contractor shall promptly inform the Owner and the Architect if the Contractor believes that a requirement of the Contract Documents is likely to have an adverse effect on the Project.

§ 3.2.7 The Owner assumes no contractual liability or responsibility for the physical condition or safety of the Project site or of any improvements thereon. Except as set forth in Section 10.3, the Contractor shall be solely responsible for providing safe conditions for the performance of the Work.

§ 3.3 Supervision and Construction Procedures

§ 3.3.1 The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention. The Contractor shall be solely responsible for, and have control over, construction means, methods, techniques, sequences, and procedures, and for coordinating all portions of the Work under the Contract. If the Contract Documents give specific instructions concerning construction means, methods, techniques, sequences, or procedures, the Contractor shall evaluate the jobsite safety thereof and shall be solely responsible for the jobsite safety of such means, methods, techniques, sequences, or procedures. If the Contractor determines that such means, methods, techniques, sequences or procedures may not be safe, the Contractor shall give timely notice to the Owner and Architect, and shall propose alternative means, methods, techniques, sequences, or procedures. The Architect shall evaluate the proposed alternative solely for conformance with the design intent for the completed construction. Unless the Architect objects to the Contractor's proposed alternative, the Contractor shall perform the Work using its alternative means, methods, techniques, sequences, or procedures.

§ 3.3.2 The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons or entities performing portions of the Work for, or on behalf of, the Contractor or any of its Subcontractors.

§ 3.3.3 The Contractor shall be responsible for inspection of portions of Work already performed to determine that such portions are in proper condition to receive subsequent Work.

§ 3.3.4 The Contractor shall schedule and perform the Work so as not to unreasonably interfere with any other related or unrelated work being performed by the Owner in or about the Project premises nor shall the Contractor unreasonably interfere with the Owner's school activities or operations on such premises. The Contractor shall coordinate its and its subcontractors' prosecution of the Work with the Owner and Owner's Designated Representative to minimize any such interference.

§ 3.3.5 The Contractor shall protect and prevent damage to all unfinished phases of the Work.

§ 3.4 Labor and Materials

§ 3.4.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

§ 3.4.2 Except in the case of minor changes in the Work approved by the Architect in accordance with Section 3.12.8 or ordered by the Architect in accordance with Section 7.4, the Contractor may make substitutions only with the consent of the Owner, after evaluation by the Architect and in accordance with a Change Order or Construction Change Directive.

§ 3.4.3 The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Work. The Contractor shall not permit employment of unfit persons or persons not properly skilled in tasks assigned to them. All labor shall be performed by workmen skilled in their respective trades, and workmanship shall be of good quality so that first class work in accordance with the standards of construction set forth in the Contract Documents and the Contractor's Standard of Care will result.

§ 3.4.4 Substitutions

§ 3.4.4.1 When two or more products are specified for an item of Work, any one thereof is acceptable and the choice is left to the Contractor, with prior written notice to the Architect and the Owner. When only one product is specified and the term "or equal" is used in connection with the product, the Contractor may, if it so desires, offer a substitute product, and by so doing, Contractor shall be deemed to represent that the substitute product will completely accomplish the purpose of the Contract Documents. Requests for substitutions of products, materials or processes other than those specified shall be accompanied by evidence showing whether or not the proposed substitution:

.1 is equal in quality and serviceability to the specified item;
.2 will not entail changes in detail and construction of related Work;
.3 will be acceptable in consideration of the required design and artistic effect; and
.4 will not provide a cost disadvantage to the Owner.

The Contractor shall furnish with its request such Drawings, Specifications, samples, performance data and other information as may be required of it to assist the Architect and the Owner in determining whether the proposed substitution is acceptable. The burden of proof of the facts above stated shall be upon the Contractor, and no substitution shall be authorized except upon the prior written approval of Owner and the Architect. Nothing in this Section 3.4.4 shall limit the provisions of Sections 3.4.4.2 or 3.4.4.3.

§ 3.4.4.2 By making requests for substitutions based on Sections 3.4.2 and 3.4.4, the Contractor:

.1 represents that the Contractor has personally investigated the proposed substitute product and determines that it is equal or superior in all respects to that specified;
.2 represents that the Contractor will provide the same warranty for the substitution that the Contractor would for that specified;

.3 certifies that the cost data presented is complete and includes all related costs under this Contract except the Architect's redesign costs, and waives all claims for additional costs related to substitution which subsequently become apparent; and

.4 shall coordinate the installation of the accepted substitution, making such changes as may be required for the Work to be complete in all respects.

§ 3.4.4.3 Approval by the Owner or Architect of any such substitution shall not relieve the Contractor of responsibility for any additional costs incurred by other trades for changes made necessary to accommodate the substituted item.

§ 3.5 Warranties

§ 3.5.1 The Contractor warrants to the Owner and Architect that materials and equipment furnished under the Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Contractor further warrants that the Work will conform to the requirements of the Contract Documents and will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Contractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Contractor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage. If required by the Architect, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment. In the event the Work is performed in multiple phases, warranties required by the Contract documents shall commence at the completion of each such phase.

§ 3.5.2 All material, equipment, or other special warranties required by the Contract Documents shall be issued in the name of the Owner, or shall be transferable to the Owner, and shall commence in accordance with Section 9.8.4.

§ 3.5.3 The Contractor shall procure and assign to the Owner at the time of Substantial Completion of the Work any and all Subcontractor, manufacturer or supplier warranties relating to any materials and labor used in the Work. Such warranties shall supplement the warranties provided by the Contractor in Section 3.5.1.

§ 3.5.4 Substitutions not properly approved and authorized and work, materials or equipment which fail to perform under the proper use and normal wear for intended purposes shall be considered defective. If required by the Architect or the Owner, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment to be incorporated in the Work.

§ 3.5.6 The warranties under this Section 3.5 shall be in addition to, and not a substitute for, any other rights of the Owner under the Contract Documents or existing in law or equity.

§3.5.6 The warranties set forth in this Section 3.5 shall survive final payment and termination of this Contract.

§ 3.6 Taxes

The Owner is a tax-exempt entity. The Contractor shall be familiar with the current regulations of the Connecticut Department of Revenue Services and the sales or use tax on materials or supplies exempted by such regulations shall not be included as part of the bid or the Contract Sum. A sales tax certificate is available upon written request.

§ 3.7 Permits, Fees, Notices and Compliance with Laws

§ 3.7.1 Unless otherwise provided in the Contract Documents, the Contractor shall secure and pay for the building permit as well as for other permits, fees, licenses, certifications and inspections by government agencies necessary for proper execution and completion of the Work that are customarily secured after execution of the Contract and required by Applicable Laws. The Contractor shall provide the Owner and Architect with reproductions of all permits, licenses, permissions, certifications and receipts for payments and, upon final completion, shall deliver all originals of such documents to the Owner with copies to the Architect.

§ 3.7.2 The Contractor shall comply with and give notices required by Applicable Laws.

§ 3.7.3 If the Contractor performs Work knowing it to be contrary to Applicable Laws, the Contractor shall assume appropriate responsibility for such Work and shall bear the costs attributable to correction.

§ 3.7.4 Concealed or Unknown Conditions

If the Contractor encounters conditions at the site that are (1) subsurface or otherwise concealed physical conditions that differ materially from those indicated in the Contract Documents or (2) unknown physical conditions of an unusual nature that differ materially from those ordinarily found to exist and generally recognized as inherent in construction activities of the character provided for in the Contract Documents, the Contractor shall promptly provide notice to the Owner and the Architect before conditions are disturbed and in no event later than seven (7) days after first observance of the conditions. The Architect will promptly investigate such conditions and, if the Architect determines that they differ materially and cause an increase or decrease in the Contractor's cost of, or time required for, performance of any part of the Work, may recommend that an equitable adjustment be made in the Contract Sum or Contract Time, or both. If the Architect determines that the conditions at the site are not materially different from those indicated in the Contract Documents and that no change in the terms of the Contract is justified, the Architect shall promptly notify the Owner and Contractor, stating the reasons. If either party disputes the Architect's determination or recommendation, that party may submit a Claim as provided in Article 15.

§ 3.7.5 If, in the course of the Work, the Contractor encounters human remains or recognizes the existence of burial markers, archaeological sites or wetlands or other conditions that would warrant a suspicion that such matters are being encountered during the performance of the Work although they are not indicated in the Contract Documents, the Contractor shall immediately suspend any operations that would affect them and shall notify the Owner and Architect. Upon receipt of such notice, the Owner shall promptly take any action necessary to obtain governmental authorization required to resume the operations. The Contractor shall continue to suspend such operations until otherwise instructed by the Owner but shall continue with all other operations that do not affect those remains or features. Requests for adjustments in the Contract Sum and Contract Time arising from the existence of such remains or features may be made as provided in Article 15.

§ 3.8 Allowances

§ 3.8.1 The Contractor shall include in the Contract Sum all allowances stated in the Contract Documents. Items covered by allowances shall be supplied for such amounts and by such persons or entities as the Owner may direct, but the Contractor shall not be required to employ persons or entities to whom the Contractor has reasonable objection. In the event any allowance is exceeded, such excess shall be paid from the Construction Contingency.

§ 3.8.2 Unless otherwise provided in the Contract Documents,

.1 allowances shall cover the cost to the Contractor of materials and equipment delivered at the site and all required taxes, less applicable trade discounts;

.2 Contractor's costs for unloading and handling at the site, labor, installation costs, overhead, profit, and other expenses contemplated for stated allowance amounts shall, unless otherwise stated in the Contract Documents, be included in the Contract Sum but not in the allowances; and

.3 whenever costs are more than or less than allowances, the Contract Sum shall be adjusted accordingly by Change Order. The amount of the Change Order shall reflect (1) the difference between actual costs and the allowances under Section 3.8.2.1 and (2) changes in Contractor's costs under Section 3.8.2.2.

§ 3.8.3 Materials and equipment under an allowance shall be selected by the Owner with reasonable promptness.

§ 3.9 Superintendent

§ 3.9.1 The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site during performance of the Work. The superintendent shall represent the Contractor, and communications given to the superintendent shall be as binding as if given to the Contractor.

§ 3.9.2 The Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the name and qualifications of a proposed superintendent. Within 14 days of receipt of the information, the Architect may notify the Contractor, stating whether the Owner or the Architect (1) has reasonable objection to the proposed superintendent or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

§ 3.9.3 The Contractor shall not employ a proposed superintendent to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not change the superintendent without the Owner's prior written consent, which shall not unreasonably be withheld or delayed. The list of all supervisory personnel, including the project manager and superintendent that the Contractor intends to use on the Project and an organizational chart

reflecting the chain of command among such personnel, shall be submitted to the Owner for approval prior to the commencement of the Work. The Contractor shall not engage supervisory personnel other than as approved by Owner in writing and shall not change such personnel without the prior written approval of the Owner.

§ 3.10 Contractor's Construction and Submittal Schedules

§ 3.10.1 The Contractor shall, as required pursuant to the Agreement, prepare and submit for the Owner's and Architect's approval a construction schedule for the Work (as approved by the Owner and the Architect, the "Construction Schedule"). The Construction Schedule (i) shall comply with all of the applicable requirements of, the Contract Documents; (ii) shall be revised (which revisions shall be subject to the approval of the Owner and the Architect) at appropriate intervals as determined by the Contractor and as required by the conditions of the Work and the Project; (iii) shall be related to the entire Project to the extent required by the Contract Documents, and (iv) shall provide for expeditious and practicable execution of the Work.

§ 3.10.2 The Contractor, promptly after being awarded the Contract and thereafter as necessary to maintain a current submittal schedule, shall submit a submittal schedule for the Architect's approval. The Architect's approval shall not be unreasonably delayed or withheld. The submittal schedule shall (1) be coordinated with the Contractor's construction schedule, and (2) allow the Architect reasonable time to review submittals. If the Contractor fails to submit a submittal schedule or fails to provide submittals in accordance with the approved submittal schedule, the Contractor shall not be entitled to any increase in Contract Sum or extension of Contract Time based on the time required for review of submittals.

§ 3.10.3 The Contractor shall perform the Work in general accordance with the most recent schedules submitted to, and approved by, the Owner and Architect.

§ 3.10.4 The Construction Schedule shall be in such detail and include such content as required by the Owner. If the Owner requires a precedence-style critical path method (CPM), the Construction Schedule shall: (i) provide a graphic representation of all activities and events that will occur during performance of the Work: (ii) identify each phase of construction and occupancy (if applicable); and (iii) set forth dates that are critical in ensuring the timely and orderly completion of the Work (hereinafter referred to as "Milestone Dates"). Upon review and acceptance by the Owner of the Milestone Dates, the Construction Schedule shall be attached to the Agreement as Schedule __TBD__. If not accepted, the Construction Schedule shall be promptly revised by the Contractor in accordance with the recommendations of the Owner and the Architect and resubmitted for acceptance. The Contractor shall monitor the progress of the Work for conformance with the requirements of the Construction Schedule and shall promptly advise the Owner of any delays or potential delays. The accepted Construction Schedule shall be updated to reflect actual conditions ("Progress Reports") as set forth in Section 3.10.1 above or as otherwise requested by the Owner. In the event any Progress Report indicates any delays, the Contractor shall propose an affirmative plan to correct the delay, including overtime and/or additional labor, if necessary. In no event shall any Progress Report constitute an adjustment in the Contract Time, any Milestone Date or the Contract Sum unless any such adjustment is agreed to by the Owner and authorized pursuant to Change Order.

§ 3.10.5 In the event the Owner determines that the performance of the Work as of a Milestone Date has not progressed or reached the level of completion required by the Contract Documents, the Owner shall have the right, but not the obligation, to order the Contractor to take corrective measures necessary to expedite the progress of construction, including, without limitation, (1) working additional shifts or overtime, (2) supplying additional manpower, equipment, and facilities, and (3) other similar measures (hereinafter referred to collectively as "Extraordinary Measures"). Such Extraordinary Measures shall continue until the progress of the Work complies with the stage of completion required by the Contract Documents. The Owner's right to require Extraordinary Measures is solely for the purposes of ensuring the Contractor's compliance with the Construction Schedule as adjusted for time extensions granted pursuant to Section 8.3. Except as provided in Section 8.3, the Contractor shall not be entitled to an adjustment in the Contract Sum in connection with Extraordinary Measures required by the Owner pursuant to this Section 3.10.5. The Owner may exercise the rights furnished the Owner under or pursuant to this Section 3.10.5 as frequently as the Owner deems necessary to ensure that that Contractor's performance of the Work will comply with any Milestone Date or the Substantial Completion Date, as the same may be extended by Change Order.

§ 3.10.6 The Owner shall have the right to direct a postponement or rescheduling of any date or time for the performance of any part of the Work that may interfere with the Owner's operations. Any postponement, rescheduling or performance of the Work under this Section 3.10.6 may be grounds for an extension of the Contract Time, if

permitted under Section 8.3 and an equitable adjustment in the Contract Sum if: (1) the performance of the Work was properly scheduled by the Contractor in compliance with the requirements of the Contract Documents and (2) such rescheduling or postponement is requested by or required for the convenience of the Owner. Without limiting the foregoing, the Contractor will not be entitled to an extension of the Contract Time or an adjustment of the Contract Sum to the extent the interfering Work so interferes as a result of the negligent act or omission of the Contractor or its subcontractors of any tier or the failure of any of the same to perform the Work in a manner consistent with the Contract Documents, including Section 3.10.3 hereof.

§ 3.11 Documents and Samples at the Site

The Contractor shall make available, at the Project site, the Contract Documents, including Change Orders, Construction Change Directives, and other Modifications, in good order and marked currently to indicate field changes and selections made during construction, and the approved Shop Drawings, Product Data, Samples, and similar required submittals. These shall be in electronic form or paper copy, available to the Architect and Owner, and delivered to the Architect for submittal to the Owner upon completion of the Work as a record of the Work as constructed. The Contractor shall coordinate and cooperate with the Architect in the Architect's preparation of the "as constructed" electronic file for the Project.

§ 3.12 Shop Drawings, Product Data and Samples

§ 3.12.1 Shop Drawings are drawings, diagrams, schedules, and other data specially prepared for the Work by the Contractor or a Subcontractor, Sub-subcontractor, manufacturer, supplier, or distributor to illustrate some portion of the Work.

§ 3.12.2 Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams, and other information furnished by the Contractor to illustrate materials or equipment for some portion of the Work.

§ 3.12.3 Samples are physical examples that illustrate materials, equipment, or workmanship, and establish standards by which the Work will be judged.

§ 3.12.4 Shop Drawings, Product Data, Samples, and similar submittals are not Contract Documents. Their purpose is to demonstrate how the Contractor proposes to conform to the information given and the design concept expressed in the Contract Documents for those portions of the Work for which the Contract Documents require submittals. Review by the Architect is subject to the limitations of Section 4.2.7. Informational submittals upon which the Architect is not expected to take responsive action may be so identified in the Contract Documents. Submittals that are not required by the Contract Documents may be returned by the Architect without action.

§ 3.12.5 The Contractor shall review for compliance with the Contract Documents, approve, and submit to the Architect, Shop Drawings, Product Data, Samples, and similar submittals required by the Contract Documents, in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Owner or of Separate Contractors. The Contractor shall be responsible for the Owner's costs associated with the Architect's time for submittal review if any submittal must be reviewed by the Architect more than two (2) times due to the fault of the Contractor.

§ 3.12.6 By submitting Shop Drawings, Product Data, Samples, and similar submittals, the Contractor represents to the Owner and Architect that the Contractor has (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so, and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents. The Contractor shall be responsible for the Owner's costs associated with the Architect's time for submittal review if any submittal must be reviewed by the Architect more than two (2) times due to the fault of the Contractor.

§ 3.12.7 The Contractor shall perform no portion of the Work for which the Contract Documents require submittal and review of Shop Drawings, Product Data, Samples, or similar submittals, until the respective submittal has been approved by the Architect.

§ 3.12.8 The Work shall be in accordance with approved submittals except that the Contractor shall not be relieved of responsibility for deviations from the requirements of the Contract Documents by the Architect's approval of Shop

Drawings, Product Data, Samples, or similar submittals, unless the Contractor has specifically notified the Architect of such deviation at the time of submittal and (1) the Architect has given written approval to the specific deviation as a minor change in the Work, or (2) a Change Order or Construction Change Directive has been issued authorizing the deviation. The Contractor shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples, or similar submittals, by the Architect's approval thereof.

§ 3.12.9 The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data, Samples, or similar submittals, to revisions other than those requested by the Architect on previous submittals. In the absence of such notice, the Architect's approval of a resubmission shall not apply to such revisions.

§ 3.12.10 The Contractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Contract Documents for a portion of the Work or unless the Contractor needs to provide such services in order to carry out the Contractor's responsibilities for construction means, methods, techniques, sequences, and procedures. The Contractor shall not be required to provide professional services in violation of Applicable Laws.

§ 3.12.10.1 If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of the Contractor by the Contract Documents, the Owner and the Architect will specify all performance and design criteria that such services must satisfy. The Contractor shall be entitled to rely upon the adequacy and accuracy of the performance and design criteria provided in the Contract Documents. The Contractor shall cause such services or certifications to be provided by an appropriately licensed design professional that has been approved by the Owner and that carries such professional liability insurance as required by the Owner, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop Drawings, and other submittals prepared by such professional. Shop Drawings, and other submittals related to the Work, designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to the Architect. The Owner and the Architect shall be entitled to rely upon the adequacy and accuracy of the services, certifications, and approvals performed or provided by such design professionals, provided the Owner and Architect have specified to the Contractor the performance and design criteria that such services must satisfy. Pursuant to this Section 3.12.10, the Architect will review and approve or take other appropriate action on submittals only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents.

§ 3.12.10.2 If the Contract Documents require the Contractor's design professional to certify that the Work has been performed in accordance with the design criteria, the Contractor shall furnish such certifications to the Architect at the time and in the form specified by the Architect.

§ 3.13 Use of Site

The Contractor shall confine operations at the site to areas permitted by Applicable Laws and the Contract Documents and shall not unreasonably encumber the site with materials or equipment.

§ 3.14 Cutting and Patching

§ 3.14.1 The Contractor shall be responsible for cutting, fitting, or patching required to complete the Work or to make its parts fit together properly. All areas requiring cutting, fitting, or patching shall be restored to the condition existing prior to the cutting, fitting, or patching, unless otherwise required by the Contract Documents.

§ 3.14.2 The Contractor shall not damage or endanger a portion of the Work or fully or partially completed construction of the Owner or Separate Contractors by cutting, patching, or otherwise altering such construction, or by excavation. The Contractor shall not cut or otherwise alter construction by the Owner or a Separate Contractor except with written consent of the Owner and of the Separate Contractor. Consent shall not be unreasonably withheld. The Contractor shall not unreasonably withhold from the Owner or a Separate Contractor, its consent to cutting or otherwise altering the Work.

§ 3.15 Cleaning Up

§ 3.15.1 The Contractor shall keep the premises and surrounding area free from accumulation of waste materials and rubbish caused by operations under the Contract. At completion of the Work, the Contractor shall remove waste materials, rubbish, the Contractor's tools, construction equipment, machinery, and surplus materials from and about the Project and shall clean and/or remove all stains, spots, marks, blemishes, foreign matter and dirt from surfaces of

the Work and from other surfaces not a part of the Work but where such condition resulted from the Contractor's operations.

§ 3.15.2 If the Contractor fails to clean up as provided in the Contract Documents, the Owner may do so and the Owner shall be entitled to reimbursement from the Contractor for the full cost of such clean up.

§ 3.16 Access to Work

The Contractor shall provide the Owner and Architect with access to the Work in preparation and progress wherever located.

§ 3.17 Royalties, Patents and Copyrights

The Contractor shall pay all royalties and license fees. The Contractor shall defend suits or claims for infringement of copyrights and patent rights, or failure to pay such royalty and license fees, and shall hold the Owner and Architect harmless from loss on account thereof, but shall not be responsible for defense or loss when a particular design, process, or product of a particular manufacturer or manufacturers is required by the Contract Documents, or where the copyright violations are contained in Drawings, Specifications, or other documents prepared by the Owner or Architect. However, if an infringement of a copyright or patent is discovered by, or made known to, the Contractor, the Contractor shall be responsible for such losses to the Owner unless the Contractor had furnished such information to the Owner and the Architect promptly upon obtaining such knowledge.

§ 3.18 Indemnification

§ 3.18.1 To the fullest extent permitted by law, the Contractor shall indemnify, defend and hold harmless the Owner, the Owner's Designated Representative, Architect, Architect's consultants, and the directors, officers, owners, agents and employees of any of them as well as the Building Committee appointed by the Owner for the Project, from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), but only to the extent caused by the negligent acts or omissions of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, provided however that such indemnity obligations shall not include liability for damage arising out of bodily injury to person or damage to property caused by or resulting from the negligence of the indemnitee, such indemnitee's agents or employees. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity that would otherwise exist as to a party or person described in this Section 3.18.

§ 3.18.2 In claims against any person or entity indemnified under this Section 3.18 by an employee of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, the indemnification obligation under Section 3.18.1 shall not be limited by a limitation on amount or type of damages, compensation, or benefits payable by or for the Contractor or a Subcontractor under workers' compensation acts, disability benefit acts, or other employee benefit acts.

§ 3.19 MEETINGS

§ 3.19.1 A qualified representative of the Contractor shall attend periodic progress meetings held at such time and as such place as the Architect or the Owner shall designate.

§ 3.19.2 The Contractor shall schedule and conduct progress meetings at the site on a bi-weekly basis (or interval appropriate for the level of jobsite activity). Attendance is required of each Subcontractor, supplier or other entity whose portion of the Work is currently the subject of concern or discussion or planning of future construction activities. Owner and Architect shall be provided with forty-eight (48) hour prior notice of each such progress meetings and be permitted to attend and participate in the meetings.

ARTICLE 4 ARCHITECT

§ 4.1 General

§ 4.1.1 The Architect is the person or entity retained by the Owner pursuant to Section 2.3.2 and identified as such in the Agreement.

§ 4.1.2 Duties, responsibilities, and limitations of authority of the Architect as set forth in the Contract Documents shall not be restricted, modified, or extended without written consent of the Owner, Contractor, and Architect. Consent shall not be unreasonably withheld.

§ 4.2 Administration of the Contract

§ 4.2.1 The Architect will provide administration of the Contract as described in the Contract Documents and will be an Owner's representative (i) during construction; (ii) until the date that final payment under the Contract is due and payable; and (iii) with the concurrence of the Owner, during the one-year period described in Section 12.2. The Architect will have authority to act on behalf of the Owner only to the extent provided in the Contract Documents.

§ 4.2.2 The Architect will visit the site at intervals appropriate to the stage of construction, or as otherwise agreed with the Owner, to become familiar with the progress and quality of the portion of the Work completed, and to determine in general if the Work observed is being performed in a manner indicating that such portion of the Work is, and when the Work is fully completed, the entirety of the Work, will be in accordance with the Contract Documents. However, the Architect will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. The Architect will not have control over, charge of, or responsibility for the construction means, methods, techniques, sequences or procedures, or for the safety precautions and programs in connection with the Work, since these are solely the Contractor's rights and responsibilities under the Contract Documents.

§ 4.2.3 On the basis of the site visits, the Architect will keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and promptly report to the Owner (1) known deviations from the Contract Documents, (2) known deviations from the most recent construction schedule submitted by the Contractor, and (3) defects and deficiencies observed in the Work. The Architect will not be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect will not have control over or charge of and will not be responsible for acts or omissions of, the Contractor, Subcontractors, or their agents or employees, or any other persons or entities performing portions of the Work.

§ 4.2.4 Communications

The Owner and Contractor shall include the Architect in all communications that relate to or affect the Architect's services or professional responsibilities. The Owner shall promptly notify the Architect of the substance of any direct communications between the Owner and the Contractor otherwise relating to the Project. Communications by the Contractor with the Architect's consultants shall be through the Architect. Communications by the Architect with Subcontractors and suppliers shall be through the Contractor. Communications by and with Separate Contractors shall be through the Owner. The Contract Documents may specify other communication protocols.

§ 4.2.5 Based on the Architect's evaluations of the Contractor's Applications for Payment, the Architect will review and certify the amounts due the Contractor and will issue Certificates for Payment in such amounts.

§ 4.2.6 The Architect has authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect will have authority to require inspection or testing of the Work in accordance with Sections 13.4.1, 13.4.2 and 13.4.3, whether or not the Work is fabricated, installed or completed. However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Contractor, Subcontractors, suppliers, their agents or employees, or other persons or entities performing portions of the Work.

§ 4.2.7 The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data, and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect's action will be taken in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review. Review of such submittals is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which remain the responsibility of the Contractor as required by the Contract Documents. The Architect's review of the Contractor's submittals shall not relieve the Contractor of the obligations under Sections 3.3, 3.5, and 3.12. The Architect's review shall not constitute approval of safety precautions or of any construction means, methods, techniques, sequences, or procedures that are not specified by the

Architect or in the Contract Documents. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

§ 4.2.8 The Architect will prepare Change Orders and Construction Change Directives and may order minor changes in the Work as provided in Section 7.4. The Architect will investigate and make determinations and recommendations regarding concealed and unknown conditions as provided in Section 3.7.4.

§ 4.2.9 The Architect will conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion pursuant to Section 9.8; receive and forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract Documents and assembled by the Contractor pursuant to Section 9.10; and issue a final Certificate for Payment pursuant to Section 9.10.

§ 4.2.10 If the Owner and Architect agree, the Architect will provide one or more Project representatives to assist in carrying out the Architect's responsibilities at the site. The Owner shall notify the Contractor of any change in the duties, responsibilities and limitations of authority of the Project representatives.

§ 4.2.11 The Architect will interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

§ 4.2.12 Interpretations and decisions of the Architect will be consistent with the intent of, and reasonably inferable from, the Contract Documents and will be in writing or in the form of drawings. When making such interpretations and decisions, the Architect will endeavor to secure faithful performance by both Owner and Contractor, will not show partiality to either, and will not be liable for results of interpretations or decisions rendered in good faith.

§ 4.2.13 The Architect's decisions on matters relating to aesthetic effect will be final if consistent with the intent expressed in the Contract Documents.

§ 4.2.14 The Architect will review and respond to requests for information about the Contract Documents. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness. If appropriate, the Architect will prepare and issue supplemental Drawings and Specifications in response to the requests for information.

ARTICLE 5 SUBCONTRACTORS

§ 5.1 Definitions

§ 5.1.1 A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the Work at the site. The term "Subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Subcontractor or an authorized representative of the Subcontractor. The term "Subcontractor" does not include a Separate Contractor or the subcontractors of a Separate Contractor.

§ 5.1.2 A Sub-subcontractor is a person or entity who has a direct or indirect contract with a Subcontractor to perform a portion of the Work at the site. The term "Sub-subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Sub-subcontractor or an authorized representative of the Sub-subcontractor.

§ 5.2 Award of Subcontracts and Other Contracts for Portions of the Work

§ 5.2.1 Unless otherwise stated in the Contract Documents, the Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the persons or entities proposed for each principal portion of the Work, including those who are to furnish materials or equipment fabricated to a special design. Within 14 days of receipt of the information, the Architect may notify the Contractor whether the Owner or the Architect (1) has reasonable objection to the identity or fee proposal of any such proposed person or entity or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

§ 5.2.1.1 To facilitate and expedite the investigations of such proposed persons or entities, the Contractor shall, upon the Owner's request, provide to the Owner and Architect a list of the names and addresses of all prospective subcontractors and such other information as may be reasonably requested by the Owner.

§ 5.2.2 The Contractor shall not contract with a proposed person or entity to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not be required to contract with anyone to whom the Contractor has made reasonable objection.

§ 5.2.3 If the Owner or Architect has reasonable objection to a person or entity proposed by the Contractor, the Contractor shall propose another to whom the Owner or Architect has no reasonable objection. If the proposed but rejected Subcontractor was reasonably capable of performing the Work, the Contract Sum and Contract Time shall be increased or decreased by the difference, if any, occasioned by such change, and an appropriate Change Order shall be issued before commencement of the substitute Subcontractor's Work. However, no increase in the Contract Sum or Contract Time shall be allowed for such change unless the Contractor has acted promptly and responsively in submitting names as required.

§ 5.2.4 The Contractor shall not substitute a Subcontractor, person, or entity for one previously selected if the Owner or Architect makes reasonable objection to such substitution. If the Contractor wishes to substitute a different person or entity for a person or entity previously selected and approved as a Subcontractor pursuant to this Section 5.2, the procedure set forth in Section 5.2.1 shall be followed.

§ 5.3 Subcontractual Relations

§ 5.3.1 Any part of the Work performed by a Subcontractor shall be pursuant to a written Subcontract between the Contractor and Subcontractor, which form of Subcontract shall be reasonably satisfactory to the Owner in all respects. Copies of all Subcontractor bids or proposals shall, upon request of Owner, be submitted to the Owner and Architect.

§ 5.3.2 By appropriate agreement, written where legally required for validity, the Contractor shall require each Subcontractor, to the extent of the Work to be performed by the Subcontractor, to be bound to the Contractor by terms of the Contract Documents, and to assume toward the Contractor all the obligations and responsibilities, including the responsibility for safety of the Subcontractor's Work, which the Contractor, by these Documents, assumes toward the Owner and Architect. Each subcontract agreement shall preserve and protect the rights of the Owner and Architect under the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights, and shall allow to the Subcontractor, unless specifically provided otherwise in the subcontract agreement, the benefit of all rights, remedies and redress against the Contractor that the Contractor, by the Contract Documents, has against the Owner. Where appropriate, the Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. The Contractor shall make available to each proposed Subcontractor, prior to the execution of the subcontract agreement, copies of the Contract Documents to which the Subcontractor will be bound, and, upon written request of the Subcontractor, identify to the Subcontractor terms and conditions of the proposed subcontract agreement that may be at variance with the Contract Documents. Subcontractors will similarly make copies of applicable portions of such documents available to their respective proposed Sub-subcontractors.

§ 5.3.3 The Contractor shall be fully responsible for coordinating and expediting the work of all Subcontractors, and shall employ the necessary and qualified personnel to produce the required quality of labor and materials and to prevent delays in the progress of the Project. The Contractor shall afford each trade with all reasonable opportunities for the installation of its work and for the storage and handling of its materials.

§ 5.4 Contingent Assignment of Subcontracts

§ 5.4.1 Each subcontract agreement for a portion of the Work is assigned by the Contractor to the Owner, provided that

.1 assignment is effective only after termination of the Contract by the Owner for cause pursuant to, and in accordance with, Section 14.2 and only for those subcontract agreements that the Owner accepts by notifying the Subcontractor and Contractor; and

.2 assignment is subject to the prior rights of the surety, if any, obligated under bond relating to the Contract.

When the Owner accepts the assignment of a subcontract agreement, the Owner assumes the Contractor's rights and obligations under the subcontract.

§ 5.4.2 Upon such assignment, if the Work has been suspended for more than 30 days, the Subcontractor's compensation shall be equitably adjusted for increases in cost resulting from the suspension.

§ 5.4.3 Upon assignment to the Owner under this Section 5.4, the Owner may further assign the subcontract to a successor contractor or other entity.

§ 5.5 Payment of Subcontractors

§ 5.5.1 After payment to Contractor by the Owner, the Contractor shall pay any amounts due any Subcontractor, whether for labor performed or materials furnished, when such labor or material has been included in a requisition submitted by such Contractor and paid by Owner. Such payments shall be made within ten (10) days after the Contractor receives payment from the Owner. The Contractor shall promptly give notice to the Owner of any claim or demand by a Subcontractor claiming that any amount is due to such Subcontractor or claiming any default by the Contractor in any of the Contractor's obligations to such Subcontractor.

§ 5.5.2 The Contractor shall include in each of the subcontracts a provision requiring each Subcontractor to pay any amounts due to any Sub-Subcontractors, whether for labor performed or materials furnished, within ten (10) days after such Subcontractor receives a payment from the Contractor which encompasses labor or materials furnished by such Sub-subcontractor and a provision requiring each Subcontractor to promptly give notice to the Contractor of any claim or demand by a Sub-subcontractor claiming that any amount is due to such Sub-Subcontractor or claiming any default by such Subcontractor in any of its obligations to such Sub-subcontractor which notice the Contractor shall promptly relay to the Owner.

ARTICLE 6 CONSTRUCTION BY OWNER OR BY SEPARATE CONTRACTORS

§ 6.1 Owner's Right to Perform Construction and to Award Separate Contracts

§ 6.1.1 The term "Separate Contractor(s)" shall mean other contractors retained by the Owner under separate agreements. The Owner reserves the right to perform construction or operations related to the Project with the Owner's own forces, and with Separate Contractors retained under Conditions of the Contract substantially similar to those of this Contract, including those provisions of the Conditions of the Contract related to insurance and waiver of subrogation.

§ 6.1.2 When separate contracts are awarded for different portions of the Project or other construction or operations on the site, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner-Contractor Agreement.

§ 6.1.3 The Owner shall provide for coordination of the activities of the Owner's own forces and of each Separate Contractor with the Work of the Contractor, who shall cooperate with them. The Contractor shall participate with any Separate Contractors and the Owner in reviewing their construction schedules. The Contractor shall make any revisions to its construction schedule deemed necessary after a joint review and mutual agreement. The construction schedules shall then constitute the schedules to be used by the Contractor, Separate Contractors, and the Owner until subsequently revised.

§ 6.1.4 Intentionally Omitted.

§ 6.2 Mutual Responsibility

§ 6.2.1 The Contractor shall afford the Owner and Separate Contractors reasonable opportunity for introduction and storage of their materials and equipment and performance of their activities and shall connect and coordinate the Contractor's construction and operations with theirs as required by the Contract Documents.

§ 6.2.2 If part of the Contractor's Work depends for proper execution or results upon construction or operations by the Owner or a Separate Contractor, the Contractor shall, prior to proceeding with that portion of the Work, promptly notify the Architect of apparent discrepancies or defects in the construction or operations by the Owner or Separate Contractor that would render it unsuitable for proper execution and results of the Contractor's Work. Failure of the Contractor to notify the Architect of apparent discrepancies or defects prior to proceeding with the Work shall constitute an acknowledgment that the Owner's or Separate Contractor's completed or partially completed construction is fit and proper to receive the Contractor's Work. The Contractor shall not be responsible for discrepancies or defects in the construction or operations by the Owner or Separate Contractor that are not apparent.

§ 6.2.3 The Contractor shall reimburse the Owner for costs the Owner incurs that are payable to a Separate Contractor because of the Contractor's delays, disruptions to the work of such Separate Contractor, improperly timed activities or defective construction. The Owner shall be responsible to the Contractor for costs the Contractor incurs because of a Separate Contractor's delays, disruptions to the Work, improperly timed activities, damage to the Work or defective construction.

§ 6.2.4 The Contractor shall promptly remedy damage that the Contractor wrongfully causes to completed or partially completed construction or to property of the Owner or Separate Contractor as provided in Section 10.2.5.

§ 6.2.5 The Owner and each Separate Contractor shall have the same responsibilities for cutting and patching as are described for the Contractor in Section 3.14.

§ 6.2.6 Upon the Owner's request, the Contractor shall defend any proceedings brought against the Owner by any separate contractor on account of any damage alleged to have been caused by the Contractor which arises from the Contractor's failure to comply with the terms and conditions of this Section 6.2.

§ 6.3 Owner's Right to Clean Up

If a dispute arises among the Contractor, Separate Contractors, and the Owner as to the responsibility under their respective contracts for maintaining the premises and surrounding area free from waste materials and rubbish, the Owner may clean up and the Architect will allocate the cost among those responsible.

ARTICLE 7 CHANGES IN THE WORK

§ 7.1 General

§ 7.1.1 Changes in the Work may be accomplished after execution of the Contract, and without invalidating the Contract, by Change Order, Construction Change Directive or order for a minor change in the Work, subject to the limitations stated in this Article 7 and elsewhere in the Contract Documents.

§ 7.1.2 A Change Order shall be based upon agreement among the Owner, Contractor, and Architect. A Construction Change Directive requires agreement by the Owner and Architect and may or may not be agreed to by the Contractor. An order for a minor change in the Work may be issued by the Architect alone.

§ 7.1.3 Changes in the Work shall be performed under applicable provisions of the Contract Documents. The Contractor shall proceed promptly with changes in the Work, unless otherwise provided in the Change Order, Construction Change Directive, or order for a minor change in the Work.

§ 7.2 Change Orders

§ 7.2.1 A Change Order is a written instrument prepared by the Architect and signed by the Owner, Contractor, and Architect stating their agreement upon all of the following:

.1 The change in the Work;
.2 The amount of the adjustment, if any, in the Contract Sum; and
.3 The extent of the adjustment, if any, in the Contract Time.

§ 7.2.2 A Change Order executed by the Owner and the Contractor shall constitute a final settlement of all matters relating to the subject matter of the Change Order including, without limitation, compensation to be paid in connection with any change in the Work required by the Change Order (provided that the Work that is the subject of such change is performed in a manner consistent with the provisions of the Contract Documents and the applicable Change Order), including but not limited to all direct and indirect costs, profit, overhead, extended overhead, loss of productivity and general conditions associated with such change, and any and all adjustments to the Contract Sum and to the Contract Time. In the event a Change Order affects an increase in the Contract Sum, Contractor shall include the work covered by such the Change Order in Applications for Payment for such work as if the work were originally part of the Work as set forth in the Contract Documents.

§ 7.2.3 Notwithstanding anything to the contrary set forth in these General Conditions, if the Agreement sets forth the methodology for calculating adjustments in the Contract Sum associated with a change in the Work, and if, under the terms of the Contract Documents, an adjustment in the Contract Sum would be required, then the adjustment will be

based on such methodology unless otherwise mutually agreed by the parties. This paragraph shall be applicable in the case of a change in the Work effected by a Change Order as well as a Construction Change Directive.

§ 7.2.4 Unless otherwise instructed by the Owner, Change Orders shall be prepared on the form AIA G-701.

§ 7.3 Construction Change Directives

§ 7.3.1 A Construction Change Directive is a written order prepared by the Architect and signed by the Owner and Architect, directing a change in the Work prior to agreement on adjustment, if any, in the Contract Sum or Contract Time, or both. The Owner may by Construction Change Directive, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions, or other revisions, the Contract Sum and Contract Time being adjusted accordingly.

§ 7.3.2 A Construction Change Directive shall be used in the absence of total agreement on the terms of a Change Order.

§ 7.3.3 If the Construction Change Directive provides for an adjustment to the Contract Sum, the adjustment shall be based on one of the following methods as selected by the Architect and approved by the Owner:

.1 Mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation;

.2 Unit prices stated in the Contract Documents or subsequently agreed upon;

.3 Cost to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage fee; or

.4 As provided in Section 7.3.4.

§ 7.3.4 If the Contractor does not respond promptly or disagrees with the method for adjustment in the Contract Sum, the Architect shall determine the adjustment on the basis of reasonable expenditures and savings of those performing the Work attributable to the change, including, in case of an increase in the Contract Sum, an amount for overhead and profit as set forth in the Agreement, or if no such amount is set forth in the Agreement, a reasonable amount. In such case, and also under Section 7.3.3.3, the Contractor shall keep and present, in such form as the Architect may prescribe, an itemized accounting together with appropriate supporting data. Unless otherwise provided in the Contract Documents, costs for the purposes of this Section 7.3.4 shall be limited to the following:

.1 Costs of labor, including applicable payroll taxes, fringe benefits required by agreement or custom, workers' compensation insurance, and other employee costs approved by the Architect;

.2 Costs of materials, supplies, and equipment, including cost of transportation, whether incorporated or consumed;

.3 Rental costs of machinery and equipment, exclusive of hand tools, whether rented from the Contractor or others provided, if rented from the Contractor, such rental and the rental rates have been approved by the Owner;

.4 Costs of premiums for all bonds and insurance, permit fees, and sales, use, or similar taxes, directly related to the change; and

.5 Costs of supervision and field office personnel directly attributable to the change.

The costs described in Section 7.3.4.1 through and including 7.3.4.5 shall not include any of the following:

.1 Salaries and other compensation of the Contractor's personnel stationed at the Contractor's principal office or offices other than the site office, except as specifically approved by the Owner;

.2 Expenses of the Contractor's principal office and offices other than the site office;

.3 Overhead and general expenses, except as may be expressly included in Section 7.3.4;

.4 The Contractor's capital expenses, including interest on the Contractor's capital employed for the Work;

.5 Costs due to the negligence or failure of the Contractor, Subcontractors , material or equipment suppliers or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable to fulfill a specific responsibility of the Contract Documents; or

.6 Any cost not described in Section 7.3.4.

§ 7.3.5 If the Contractor disagrees with the adjustment in the Contract Time, the Contractor may make a Claim in accordance with applicable provisions of Article 15.

§ 7.3.6 Upon receipt of a Construction Change Directive, the Contractor shall promptly proceed with the change in the Work involved and advise the Architect of the Contractor's agreement or disagreement with the method, if any, provided in the Construction Change Directive for determining the proposed adjustment in the Contract Sum or Contract Time.

§ 7.3.7 A Construction Change Directive signed by the Contractor indicates the Contractor's agreement therewith, including adjustment in Contract Sum and Contract Time or the method for determining them. Such agreement shall be effective immediately and shall be recorded as a Change Order.

§ 7.3.8 The amount of credit to be allowed by the Contractor to the Owner for a deletion or change that results in a net decrease in the Contract Sum shall be actual net cost as confirmed by the Architect. When both additions and credits covering related Work or substitutions are involved in a change, the allowance for overhead and profit shall be figured on the basis of net increase, if any, with respect to that change.

§ 7.3.9 Pending final determination of the total cost of a Construction Change Directive to the Owner, the Contractor may request payment for Work completed under the Construction Change Directive in Applications for Payment. The Architect will make an interim determination for purposes of monthly certification for payment for those costs and certify for payment the actual costs incurred by the Contractor as a result of such Construction Change Directive; provided, however, to the extent such Construction Change Directive is made necessary by the act or omission of the Contractor or of anyone for whom the Contractor is responsible, the Architect shall certify for payment the amount, if any, that the Architect determines, in the Architect's professional judgment, to be necessary for the Contractor to continue the Work. The Architect's interim determination of cost shall adjust the Contract Sum on the same basis as a Change Order, subject to the right of either party to disagree and assert a Claim in accordance with Article 15.

§ 7.3.10 When the Owner and Contractor agree with a determination made by the Architect concerning the adjustments in the Contract Sum and Contract Time, or otherwise reach agreement upon the adjustments, such agreement shall be effective immediately and the Architect will prepare a Change Order. Change Orders may be issued for all or any part of a Construction Change Directive.

§ 7.4 Minor Changes in the Work

The Architect may order minor changes in the Work that are consistent with the intent of the Contract Documents and do not involve an adjustment in the Contract Sum or an extension of the Contract Time. The Architect's order for minor changes shall be in writing. If the Contractor believes that the proposed minor change in the Work will affect the Contract Sum or Contract Time, the Contractor shall notify the Architect and shall not proceed to implement the change in the Work. If the Contractor performs the Work set forth in the Architect's order for a minor change without prior notice to the Architect that such change will affect the Contract Sum or Contract Time, the Contractor waives any adjustment to the Contract Sum or extension of the Contract Time.

ARTICLE 8 TIME

§ 8.1 Definitions

§ 8.1.1 Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work.

§ 8.1.2 The date of commencement of the Work is the date established in the Agreement.

§ 8.1.3 The date of Substantial Completion is the date Substantial Completion is achieved in accordance with Section 9.8.

§ 8.1.4 The term "day" as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.

§ 8.2 Progress and Completion

§ 8.2.1 Time limits stated in the Contract Documents are of the essence of the Contract. By executing the Agreement, the Contractor confirms that the Contract Time is a reasonable period for performing the Work.

§ 8.2.2 The Contractor shall not knowingly, except by agreement or instruction of the Owner in writing, commence the Work prior to the effective date of insurance required to be furnished by the Contractor and Owner.

§ 8.2.3 The Contractor shall proceed expeditiously with adequate forces and shall achieve Substantial Completion within the Contract Time.

§ 8.3 Delays and Extensions of Time

§ 8.3.1 If the Contractor is delayed at any time in the commencement or progress of the Work by (1) an act or neglect of the Owner or Architect, of an employee of either, or of a Separate Contractor; (2) by changes ordered in the Work; (3) by labor disputes, fire, unusual delay in deliveries, unavoidable casualties, adverse weather conditions documented in accordance with Section 15.1.6.2, or other causes beyond the Contractor's control; (4) by delay authorized by the Owner pending mediation and binding dispute resolution; or (5) by other causes that the Contractor asserts, and the Architect determines, justify delay, then the Contract Time shall be extended for such reasonable time as the Architect may determine, provided that (i) the Contractor notifies the Owner and Architect in writing of the alleged cause of such delay within ten (10) days after the Contractor became aware of the delay-precipitating event, and (ii) the Contractor demonstrates by a detailed and substantiated analysis the effects of the delay, if any, upon the construction schedule and Contract Time.

§ 8.3.2 Claims relating to time shall be made in accordance with applicable provisions of Article 15.

§ 8.3.3 This Section 8.3 does not preclude recovery of damages for delay by either party under other provisions of the Contract Documents.

ARTICLE 9 PAYMENTS AND COMPLETION

§ 9.1 Contract Sum

§ 9.1.1 The Contract Sum is stated in the Agreement and, including authorized adjustments, is the total amount payable by the Owner to the Contractor for performance of the Work under the Contract Documents.

§ 9.1.2 If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are materially changed so that application of such unit prices to the actual quantities causes substantial inequity to the Owner or Contractor, the applicable unit prices shall be equitably adjusted.

§ 9.2 Schedule of Values

Where the Contract is based on a stipulated sum or Guaranteed Maximum Price, the Contractor shall submit a schedule of values to the Architect before the first Application for Payment, allocating the entire Contract Sum to the various portions of the Work. The schedule of values shall be prepared in the form, and supported by the data to substantiate its accuracy, required by the Architect. This schedule, upon the approval of the Owner and the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment. Any changes to the schedule of values shall be submitted to the Architect and supported by such data to substantiate its accuracy as the Architect may require, and unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's subsequent Applications for Payment.

§ 9.3 Applications for Payment

§ 9.3.1 At least ten days before the date established for each progress payment, the Contractor shall submit to the Architect an itemized Application for Payment prepared in accordance with the Contract Documents and the schedule of values, if required under Section 9.2, for completed portions of the Work. The application shall be notarized, if required, and supported by all data substantiating the Contractor's right to payment that the Owner, the Architect, or any person or entity providing funding for the Project, may require, such as copies of requisitions, and releases and waivers of liens from Subcontractors and suppliers, and shall reflect retainage if provided for in the Contract Documents. All Applications for Payment shall be in the form, and contain the information and supporting documentation, as required in this Section 9.3 and such additional information and documentation and as may be reasonably requested by the Owner.

§ 9.3.1.1 As provided in Section 7.3.9, such applications may include requests for payment on account of changes in the Work that have been properly authorized by Construction Change Directives, or by interim determinations of the Architect, but not yet included in Change Orders.

§ 9.3.1.2 Applications for Payment shall not include requests for payment for portions of the Work for which the Contractor does not intend to pay a Subcontractor or supplier, unless such Work has been performed by others whom the Contractor intends to pay.

§ 9.3.2 Unless otherwise provided in the Contract Documents or prohibited by any person or entity providing funding for the Project, payments shall be made on account of materials and equipment delivered and suitably stored at the site for subsequent incorporation in the Work. If approved in advance by the Owner and not prohibited by any person or entity providing funding for the Project, payment may similarly be made for materials and equipment suitably stored off the site at a location agreed upon in writing. Payment for materials and equipment stored on or off the site shall be conditioned upon compliance by the Contractor with procedures satisfactory to the Owner to establish the Owner's title to such materials and equipment or otherwise protect the Owner's interest, and shall include the costs of applicable insurance, storage, and transportation to the site, for such materials and equipment stored off the site.

§ 9.3.3 The Contractor warrants that title to all Work covered by an Application for Payment will pass to the Owner no later than the time of payment. The Contractor further warrants that upon submittal of an Application for Payment all Work for which Certificates for Payment have been previously issued and payments received from the Owner shall, to the best of the Contractor's knowledge, information, and belief, be free and clear of liens, claims, security interests, or encumbrances, in favor of the Contractor, Subcontractors, suppliers, or other persons or entities that provided labor, materials, and equipment relating to the Work.

§ 9.3.3.1 The Contractor further expressly undertakes to defend the Owner, at the Contractor's sole cost and expense, against any actions, lawsuits, or proceedings brought against Owner as a result of liens filed against the Work, the Project site and any improvements thereon (referred to collectively as "Liens" in this Section 9.3.3), by the Contractor, any Subcontractor, Sub-subcontractor or anyone claiming by, through or under them. The Contractor hereby agrees to indemnify and hold Owner harmless against any such Liens or claims of Liens and agrees to pay any judgment or Lien resulting from any such actions, lawsuits or proceedings. The Contractor's obligations under this Section 9.3.3 are conditioned upon Owner having fulfilled its payment obligations to the Contractor with respect to the Work that is the subject of the Lien or claim and for which indemnification is sought.

§ 9.3.3.2 Commencing with the second Application for Payment, and continuing with each Application for Payment submitted thereafter, the Contractor shall furnish to the Owner a properly executed release and waiver of mechanics liens from the Contractor and each Subcontractor and material supplier whose Work was included on the previous Application for Payment for which payment by Owner was made to the Contractor.

§ 9.3.3 Applications for Payment, and invoices in support of the same, shall clearly distinguish between amounts charged for labor and amounts charged for materials.

§ 9.3.4 Unless otherwise required by the Owner, Applications for Payment shall be on AIA documents G702 and G703.

§ 9.4 Certificates for Payment

§ 9.4.1 The Architect will, within seven days after receipt of the Contractor's Application for Payment, either (1) issue to the Owner a Certificate for Payment in the full amount of the Application for Payment, with a copy to the Contractor; or (2) issue to the Owner a Certificate for Payment for such amount as the Architect determines is properly due, and notify the Contractor and Owner of the Architect's reasons for withholding certification in part as provided in Section 9.5.1; or (3) withhold certification of the entire Application for Payment, and notify the Contractor and Owner of the Architect's reason for withholding certification in whole as provided in Section 9.5.1.

§ 9.4.2 The issuance of a Certificate for Payment will constitute a representation by the Architect to the Owner, based on the Architect's evaluation of the Work and the data in the Application for Payment, that, to the best of the Architect's knowledge, information, and belief, the Work has progressed to the point indicated, the quality of the Work is in accordance with the Contract Documents, and, as a representation made by the Architect solely to the Owner, that the Contractor is entitled to payment in the amount certified. The foregoing representations are subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to results of subsequent tests and inspections, to correction of minor deviations from the Contract Documents prior to completion, and to specific qualifications expressed by the Architect. However, the issuance of a Certificate for Payment will not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or

quantity of the Work; (2) reviewed construction means, methods, techniques, sequences, or procedures; (3) reviewed copies of requisitions received from Subcontractors and suppliers and other data requested by the Owner to substantiate the Contractor's right to payment; or (4) made examination to ascertain how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

§ 9.4.3 Notwithstanding anything to the contrary, issuance of a Certificate for Payment by the Architect is a recommendation only and payment to the Contractor of amounts certified in a Certificate for Payment is subject to the Owner's approval.

§ 9.4.4 Certificates for Payment shall be on AIA documents G702 and G703.

§ 9.5 Decisions to Withhold Certification

§ 9.5.1 The Architect may withhold a Certificate for Payment in whole or in part, to the extent reasonably necessary to protect the Owner, if in the Architect's opinion the representations to the Owner required by Section 9.4.2 cannot be made. If the Architect is unable to certify payment in the amount of the Application, the Architect will notify the Contractor and Owner as provided in Section 9.4.1. If the Contractor and Architect cannot agree on a revised amount, the Architect will promptly issue a Certificate for Payment for the amount for which the Architect is able to make such representations to the Owner. The Architect may also withhold a Certificate for Payment or, because of subsequently discovered evidence, may nullify the whole or a part of a Certificate for Payment previously issued, to such extent as may be necessary in the Architect's opinion to protect the Owner from loss for which the Contractor is responsible, including loss resulting from acts and omissions described in Section 3.3.2, because of

.1 defective Work not remedied;
.2 third party claims filed or reasonable evidence indicating probable filing of such claims, unless security acceptable to the Owner is provided by the Contractor;
.3 failure of the Contractor to make payments properly to Subcontractors or suppliers for labor, materials or equipment;
.4 reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Sum;
.5 damage to the Owner or a Separate Contractor;
.6 reasonable evidence that the Work will not be completed within the Contract Time, and that the unpaid balance would not be adequate to cover actual or liquidated damages for the anticipated delay; or
.7 repeated failure to carry out the Work in accordance with the Contract Documents.

§ 9.5.2 When either party disputes the Architect's decision regarding a Certificate for Payment under Section 9.5.1, in whole or in part, that party may submit a Claim in accordance with Article 15.

§ 9.5.3 When the reasons for withholding a Certificate for Payment are removed, the Certificate for Payment will be issued as regards amounts previously withheld. The Owner shall not be deemed to be in default by reason of withholding payment while any of the above grounds remained uncured, nor shall any interest accrue or be payable with respect to any payments so withheld.

§ 9.5.4 If the Architect withholds certification for payment under Section 9.5.1.3, the Owner may, at its sole option, issue joint checks to the Contractor and to any Subcontractor or supplier to whom the Contractor failed to make payment for Work properly performed or material or equipment suitably delivered. If the Owner makes payments by joint check, the Owner shall notify the Architect and the Contractor shall reflect such payment on its next Application for Payment.

§ 9.6 Progress Payments

§ 9.6.1 After the Architect has issued a Certificate for Payment, the Owner shall make payment in the manner and within the time provided in the Contract Documents and shall so notify the Architect.

§ 9.6.2 The Contractor shall pay each Subcontractor, no later than seven days after receipt of payment from the Owner, the amount to which the Subcontractor is entitled, reflecting percentages actually retained from payments to the Contractor on account of the Subcontractor's portion of the Work. The Contractor shall, by appropriate agreement with each Subcontractor, require each Subcontractor to make payments to Sub-subcontractors in a similar manner.

§ 9.6.3 The Architect will, on request, furnish to a Subcontractor, if practicable, information regarding percentages of completion or amounts applied for by the Contractor and action taken thereon by the Architect and Owner on account of portions of the Work done by such Subcontractor.

§ 9.6.4 The Owner has the right to request written evidence from the Contractor that the Contractor has properly paid Subcontractors and suppliers amounts paid by the Owner to the Contractor for subcontracted Work. If the Contractor fails to furnish such evidence within seven days, the Owner shall have the right to contact Subcontractors and suppliers to ascertain whether they have been properly paid. Neither the Owner nor Architect shall have an obligation to pay, or to see to the payment of money to, a Subcontractor or supplier, except as may otherwise be required by law.

§ 9.6.5 The Contractor's payments to suppliers shall be treated in a manner similar to that provided in Sections 9.6.2, 9.6.3 and 9.6.4.

§ 9.6.6 A Certificate for Payment, a progress payment, or partial or entire use or occupancy of the Project by the Owner shall not constitute acceptance of Work not in accordance with the Contract Documents.

§ 9.6.7 Unless the Contractor provides the Owner with a payment bond in the full penal sum of the Contract Sum, payments received by the Contractor for Work properly performed by Subcontractors or provided by suppliers shall be held by the Contractor for those Subcontractors or suppliers who performed Work or furnished materials, or both, under contract with the Contractor for which payment was made by the Owner. Nothing contained herein shall require money to be placed in a separate account and not commingled with money of the Contractor, create any fiduciary liability or tort liability on the part of the Contractor for breach of trust, or entitle any person or entity to an award of punitive damages against the Contractor for breach of the requirements of this provision.

§ 9.6.8 Provided the Owner has fulfilled its payment obligations under the Contract Documents, the Contractor shall defend and indemnify the Owner from all loss, liability, damage or expense, including reasonable attorney's fees and litigation expenses, arising out of any lien claim or other claim for payment by any Subcontractor or supplier of any tier. Upon receipt of notice of a lien claim or other claim for payment, the Owner shall notify the Contractor. If approved by the applicable court, when required, the Contractor may substitute a surety bond for the property against which the lien or other claim for payment has been asserted.

§ 9.6.9 Any provision in the Contract Documents to the contrary notwithstanding, the Owner shall not be obligated to make payment to the Contractor hereunder to the extent that the Contractor has not performed the Work or supplied the materials, for which payment is requested, in accordance with the Contract Documents.

§ 9.7 Failure of Payment

If the Architect does not issue a Certificate for Payment as required by the Contract Documents,, through no fault of the Contractor, within ten (10) days after receipt of the Contractor's Application for Payment, or if the Owner does not pay the Contractor within seven days after the date established in the Contract Documents, the amount certified by the Architect or awarded by binding dispute resolution, then the Contractor may, upon ten (10) additional days' notice to the Owner and Architect, stop the Work until payment of the amount owing has been received. The Contract Time shall be extended appropriately, and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shutdown, delay and start-up, plus interest as provided for in the Contract Documents.

§ 9.8 Substantial Completion

§ 9.8.1 Substantial Completion is the stage in the progress of the Work when the Work or designated portion thereof is sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work for its intended use. Substantial Completion shall not occur until: (i) the Owner's receipt of certification by the Architect that the Work is Substantially Complete in the form of a Certificate of Substantial Completion; and (ii) the Owner's receipt of a final and unconditional Certificate of Occupancy from the governmental authorities having jurisdiction that the Work has been completed in accordance with Applicable Laws.

§ 9.8.2 When the Contractor considers that the Work, or a portion thereof which the Owner agrees to accept separately, is substantially complete, the Contractor shall prepare and submit to the Architect a comprehensive list of items to be completed or corrected prior to final payment. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

AIA Document A201 – 2017 Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. User Notes: (1514484071)

DocuSign Envelope ID: 805EBA63-4B76-4B24-802B-56440E960352

§ 9.8.3 Upon receipt of the Contractor's list, the Architect will make an inspection to determine whether the Work or designated portion thereof is substantially complete. If the Architect's inspection discloses any item, whether or not included on the Contractor's list, which is not sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work or designated portion thereof for its intended use, the Contractor shall, before issuance of the Certificate of Substantial Completion, complete or correct such item upon notification by the Architect. In such case, the Contractor shall then submit a request for another inspection by the Architect to determine Substantial Completion.

§ 9.8.4 When the Work or designated portion thereof is substantially complete, the Architect will prepare a Certificate of Substantial Completion that shall establish the date of Substantial Completion; establish responsibilities of the Owner and Contractor for security, maintenance, heat, utilities, damage to the Work and insurance; and fix the time within which the Contractor shall finish all items on the list accompanying the Certificate. Warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or designated portion thereof unless otherwise provided in the Certificate of Substantial Completion.

§ 9.8.5 The Certificate of Substantial Completion shall be submitted to the Owner and Contractor for their written acceptance of responsibilities assigned to them in the Certificate. Upon such acceptance, and consent of surety if any, the Owner shall make payment of retainage applying to the Work or designated portion thereof. Such payment shall be adjusted for Work that is incomplete or not in accordance with the requirements of the Contract Documents.

§ 9.9 Partial Occupancy or Use

§ 9.9.1 The Owner may occupy or use any completed or partially completed portion of the Work at any stage when such portion is designated by separate agreement with the Contractor, provided such occupancy or use is consented to by the insurer and authorized by public authorities having jurisdiction over the Project. Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner and Contractor have accepted in writing the responsibilities assigned to each of them for payments, retainage, if any, security, maintenance, heat, utilities, damage to the Work and insurance, and have agreed in writing concerning the period for correction of the Work and commencement of warranties required by the Contract Documents. When the Contractor considers a portion substantially complete, the Contractor shall prepare and submit a list to the Architect as provided under Section 9.8.2. Consent of the Contractor to partial occupancy or use shall not be unreasonably withheld. The stage of the progress of the Work shall be determined by written agreement between the Owner and Contractor or, if no agreement is reached, by decision of the Architect.

§ 9.9.2 Immediately prior to such partial occupancy or use, the Owner, Contractor, and Architect shall jointly inspect the area to be occupied or portion of the Work to be used in order to determine and record the condition of the Work.

§ 9.9.3 Unless otherwise agreed upon, partial occupancy or use of a portion or portions of the Work shall not constitute acceptance of Work not complying with the requirements of the Contract Documents.

§ 9.10 Final Completion and Final Payment

§ 9.10.1 Upon receipt of the Contractor's notice that the Work is ready for final inspection and acceptance and upon receipt of a final Application for Payment, the Architect will promptly make such inspection. When the Architect finds the Work acceptable under the Contract Documents and the Contract fully performed, the Architect will promptly issue a final Certificate for Payment stating that to the best of the Architect's knowledge, information and belief, and on the basis of the Architect's on-site visits and inspections, the Work has been completed in accordance with the Contract Documents and that the entire balance found to be due the Contractor and noted in the final Certificate is due and payable. The Architect's final Certificate for Payment will constitute a further representation that conditions listed in Section 9.10.2 as precedent to the Contractor's being entitled to final payment have been fulfilled. All warranties and guarantees required under or pursuant to the Contract Documents not previously delivered shall be assembled and delivered by the Contractor to the Owner and Architect as part of the final Application for Payment. The final Certificate for Payment will not be issued by the Architect until all warranties and guarantees and all other close-out deliverables (including those set forth in Section 9.10.2 below) have been received and accepted by the Owner.

§ 9.10.2 Neither final payment nor any remaining retained percentage shall become due until the Contractor submits to the Architect (1) an affidavit that payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner) have been paid or otherwise satisfied, (2) a certificate evidencing that insurance required by the Contract

Documents to remain in force after final payment is currently in effect, (3) a written statement that the Contractor knows of no reason that the insurance will not be renewable to cover the period required by the Contract Documents, (4) consent of surety, if any, to final payment, (5) documentation of any special warranties, such as manufacturers' warranties or specific Subcontractor warranties, and (6) if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts and releases and waivers of mechanic's liens, claims, security interests, or other encumbrances arising out of the Contract, to the extent and in such form as may be designated by the Owner. If a Subcontractor refuses to furnish a release or waiver required by the Owner, the Contractor shall furnish a bond satisfactory to the Owner to indemnify the Owner against such lien, claim, security interest, or encumbrance. If no such bond is provided, the Owner may, without limiting its remedies under law, in equity, or under the Contract Documents, withhold the portion of final payment claimed to be due by the relevant Subcontractor or supplier until such lien is no longer a viable encumbrance. The Contractor shall refund to the Owner all money that the Owner may be compelled to pay in discharging the lien, claim, security interest, or encumbrance, including all costs and reasonable attorneys' fees.

§ 9.10.3 If, after Substantial Completion of the Work, final completion thereof is materially delayed through no fault of the Contractor or by issuance of Change Orders affecting final completion, and the Architect so confirms, the Owner shall, upon application by the Contractor and certification by the Architect, and without terminating the Contract, make payment of the balance due for that portion of the Work fully completed, corrected, and accepted. If the remaining balance for Work not fully completed or corrected is less than retainage stipulated in the Contract Documents, and if bonds have been furnished, the written consent of the surety to payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by the Contractor to the Architect prior to certification of such payment. Such payment shall be made under terms and conditions governing final payment, except that it shall not constitute a waiver of Claims.

§ 9.10.4
(Paragraphs deleted)
Intentionally Omitted.

§ 9.10.5 Acceptance of final payment by the Contractor, a Subcontractor, or a supplier, shall constitute a waiver of claims by that payee except those previously made in writing and identified by that payee as unsettled at the time of final Application for Payment.

ARTICLE 10 PROTECTION OF PERSONS AND PROPERTY

§ 10.1 Safety Precautions and Programs

The Contractor shall be responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the performance of the Contract.

§ 10.2 Safety of Persons and Property

§ 10.2.1 The Contractor shall take reasonable precautions for safety of, and shall provide reasonable protection to prevent damage, injury, or loss to

.1 employees on the Work and other persons who may be affected thereby;

.2 the Work and materials and equipment to be incorporated therein, whether in storage on or off the site, under care, custody, or control of the Contractor, a Subcontractor, or a Sub-subcontractor; and

.3 other property at the site or adjacent thereto, such as trees, shrubs, lawns, walks, pavements, roadways, structures, and utilities not designated for removal, relocation, or replacement in the course of construction.

§ 10.2.2 The Contractor shall comply with, and give notices required by, Applicable Laws bearing on safety of persons or property or their protection from damage, injury, or loss.

§ 10.2.3 The Contractor shall implement, erect, and maintain, as required by existing conditions and performance of the Contract, reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards; promulgating safety regulations; and notifying the owners and users of adjacent sites and utilities of the safeguards. The Contractor shall also be responsible for all measures necessary to protect any property adjacent to the Project and improvements thereon. Any damage to such property or improvements shall be promptly repaired by the Contractor at its cost and expense.

§ 10.2.4 When use or storage of explosives or other hazardous materials or equipment, or unusual methods are necessary for execution of the Work, the Contractor shall exercise utmost care and carry on such activities under supervision of properly qualified personnel.

§ 10.2.4.1 When there are indications that the use of explosives or other hazardous materials, equipment or unusual methods is necessary for execution of the Work, the Contractor shall give the Owner and Architect reasonable advance notice of the conditions.

§ 10.2.4.2 The Contractor shall be solely responsible for the handling, storage and use of explosive or other hazardous materials when their use is permitted.

§ 10.2.4.3 The Contractor shall not bring explosives onto the Project site or use such in the Work without the prior written permission of the Architect and the Owner. For such use, the Contractor shall obtain necessary permits with copies to the Architect and the Owner. The Contractor shall furnish the Owner and Architect with certificates indicating proper and adequate insurance.

§ 10.2.5 The Contractor shall promptly remedy damage and loss (other than damage or loss insured under property insurance required by the Contract Documents) to property referred to in Sections 10.2.1.2 and 10.2.1.3 caused in whole or in part by the Contractor, a Subcontractor, a Sub-subcontractor, or anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable and for which the Contractor is responsible under Sections 10.2.1.2 and 10.2.1.3. The Contractor may make a Claim for the cost to remedy the damage or loss to the extent such damage or loss is attributable to acts or omissions of the Owner or Architect or anyone directly or indirectly employed by either of them, or by anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Contractor. The foregoing obligations of the Contractor are separate from, in addition to, and are not to be construed as included as a part of the Contractor's obligations under Section 3.18.

§ 10.2.6 The Contractor shall designate a responsible member of the Contractor's organization at the site whose duty shall be the prevention of accidents. This person shall be the Contractor's superintendent unless otherwise designated by the Contractor in writing to the Owner and Architect.

§ 10.2.7 The Contractor shall not permit any part of the construction or site to be loaded so as to cause damage or create an unsafe condition.

§ 10.2.8 Injury or Damage to Person or Property

If either party suffers injury or damage to person or property because of an act or omission of the other party, or of others for whose acts such party is legally responsible, notice of the injury or damage, whether or not insured, shall be given to the other party within a reasonable time not exceeding 21 days after discovery. The notice shall provide sufficient detail to enable the other party to investigate the matter.

§ 10.2.9 In the event the Contractor identifies activities or conditions during performance of the Work or at the Project, which, in the Contractor's good faith opinion, pose an unreasonable risk of bodily injury or property damage, whether immediate or in the future, the Contractor shall have the right to immediately take steps to protect its personnel and Subcontractors and stop Work and remove its personnel from the affected area.

§ 10.2.10 The Contractor shall at all times provide protection against weather (rain, wind, storms or heat) so as to maintain all Work, materials, apparatus and fixtures free from damage. At the end of the day's work, all new Work likely to be damaged shall be reasonably protected against such weather.

§ 10.2.11 The Contractor shall provide adequate fire protection for all operations associated with the Work, and such protection must meet all applicable federal (including OSHA), State and municipal regulations.

§ 10.2.12 The Contractor shall remove and replace with new work, at the Contractor's own expense, any Work damaged by failure to provide protection pursuant to Sections 10.2.10 and 10.2.11.

§ 10.2.13 The Contractor shall be responsible, to the extent not covered by insurance, for damage, loss or liability due to theft or vandalism to the Work and stored materials when work is not in progress at night, on weekends or holidays.

§ 10.2.14 The Contractor shall protect and prevent damage to all unfinished phases of the Work.

§ 10.2.15 Securing the Site

The Contractor is responsible for securing, and preventing access by unauthorized individuals to, the Project site from such date as the Contractor, it subcontractors, consultants, or agents commence the Work until the date of Final Completion, unless the Owner and Contractor agree in writing to an earlier date.

§ 10.3 Hazardous Materials and Substances

§ 10.3.1 The Contractor is responsible for compliance with any requirements included in the Contract Documents regarding any material, substance, chemical, waste, product, derivative, compound, mixture, solid, liquid, mineral or gas, whether naturally occurring or manmade, that is hazardous, toxic, or words of similar import or regulatory effect, and any petroleum or petroleum-derived products, radon, radioactive materials or wastes, asbestos in any form, lead or lead-containing materials, urea formaldehyde foam insulation, and polychlorinated biphenyls (collectively, "Hazardous Materials"). If the Contractor believes its Work will disturb or otherwise implicate any actual or suspected Hazardous Material or encounters a Hazardous Material not addressed in the Contract Documents, the Contractor shall not disturb any such Hazardous Material, immediately report the condition to the Owner and the Architect in writing and take all necessary precautions to prevent release of and exposure to the Hazardous Materials and the Contractor shall immediately report the condition to the Owner and the Architect in writing and take all necessary precautions to prevent release of and exposure to the Hazardous Materials and foreseeable bodily injury or death to persons resulting from such Hazardous Material. If such reasonable precautions will be inadequate to prevent release of and exposure to Hazardous Materials, or foreseeable bodily injury and death, the Contractor shall, upon recognizing the condition, immediately stop Work in the affected area and notify the Owner and Architect of the condition.

§ 10.3.2 Upon receipt of the Contractor's notice pursuant to Section 10.3.1of the existence of actual or suspect Hazardous Materials not addressed in the Contract Documents, the Owner shall obtain the services of a licensed laboratory to verify the presence or absence of the Hazardous Material reported by the Contractor and, in the event such Hazardous Material is found to be present, to cause it to be rendered harmless or otherwise abated. Unless otherwise required by the Contract Documents, the Owner shall furnish in writing to the Contractor and Architect the names and qualifications of persons or entities who are to perform tests verifying the presence or absence of the material or substance or who are to perform the task of removal or safe containment of the material or substance. The Contractor and the Architect will promptly reply to the Owner in writing stating whether or not either has reasonable objection to the persons or entities proposed by the Owner. If either the Contractor or Architect has an objection to a person or entity proposed by the Owner, the Owner shall propose another to whom the Contractor and the Architect have no reasonable objection. When the Hazardous Material has been rendered harmless and/or otherwise abated in accordance with Applicable Laws, Work in the affected area shall resume upon written agreement of the Owner and Contractor. By Change Order, the Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable additional costs of shutdown, delay, and start-up, except to the extent that the Hazardous Material was first encountered due to the negligence, willful or intentional misconduct, or breach of contract of the Contractor.

§ 10.3.3 To the fullest extent permitted by law, the Owner shall indemnify and hold harmless the Contractor, Subcontractors, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area related to the presence or absence of any actual or suspected Hazardous Materials if in fact such Hazardous Material presents the risk of bodily injury or death as described in Section 10.3.1 and has not been rendered harmless or otherwise abated, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), except to the extent that such damage, loss, or expense was caused by, or resulted from the negligence of, or the intentional or willful misconduct or breach of contract by the party seeking indemnity, or the negligence of, or intentional or willful misconduct or breach of contract by such party's agents (including Subcontractors) or employees.

§ 10.3.4 The Owner shall not be responsible under this Section 10.3 for hazardous materials or substances the Contractor, any Subcontractor or any materialman or supplier, or any entity for whom any of them is responsible, brings to the site unless such materials or substances are required by the Contract Documents. The Owner shall be responsible for hazardous materials or substances required by the Contract Documents, except to the extent of the Contractor's fault or negligence in the use and handling of such materials or substances or its failure to comply with

the Contract Documents. The Contractor agrees not to use any fill or other materials to be incorporated into the Work which are hazardous, toxic or comprised of any items that are hazardous or toxic except to the extent required by the Contract Documents.

§ 10.3.5 To the fullest extent permitted by law, the Contractor shall indemnify, defend and hold harmless the Owner, the Owner's Designated Representative, Architect, Architect's consultants, and the directors, officers, owners, agents and employees of any of them, as well as the Building Committee appointed by the Owner for the Project, and the fee owner of the Project site (if other than the Owner) against claims, damages, losses and expenses, including but not limited to reasonable attorney's fees, resulting from an actual or suspect Hazardous Material or which the Contractor or its agents (including Subcontractors) or employees brings to the site and improperly handles, or from the Contractor's failure to perform its obligations under Section 10.3.1, except to the extent that such damage, loss or expense was caused by, or resulting from the negligence of the indemnitee.

§ 10.3.6 If, without negligence or fault on the part of the Contractor or any party for whose acts the Contractor is responsible, the Contractor is held liable by a government agency for the cost of remediation of a hazardous material or substance solely by reason of properly performing Work as required by the Contract Documents, the Owner shall reimburse the Contractor for all cost and expense thereby incurred.

§ 10.3.7 The Contractor shall perform all required procedures necessary to insure that there will be no actual or threatened release, discharge, spillage, uncontrolled loss, seepage or filtration (each a "Release") of any Hazardous Material on the site caused by its operations. The Contractor is responsible for any and all costs and liabilities associated with the investigation and remediation of any such Release, or as required by regulating authorities having jurisdiction under any of the Applicable Laws, and holds the Owner, its employees and agents, and the fee owner of the Project site (if other than the Owner), harmless against any current or future liabilities resulting from such incidents.

§ 10.3.8 All material and equipment furnished under the Contract Documents shall be free of asbestos, lead based paint, and PCBs. Unless otherwise specified in the Contract Documents, any material or equipment containing these, and any other Hazardous Materials shall be considered defective and shall be removed by the Contractor at the Contractor's sole expense.

§ 10.3.9 The Contractor, when it will be providing, using, storing, delivering or disposing of any toxic, hazardous or potentially dangerous materials, shall advise in writing, and receive the written approval of, the Owner of the use of such hazardous materials in advance of conducting any such Work and the Contractor is responsible for protecting its own employees, those of the Owner, and all of its employees and agents from the hazards associated with such materials. The Contractor shall furnish written directions, precautions or training, provided or made available from the supplier of the materials, or other acceptable source, for use by all persons who may be subjected to the hazard. The Contractor shall comply with all Applicable Laws. The Contractor shall dispose of any hazardous or toxic substances in accordance with all Applicable Laws. The Contractor shall perform all required procedures necessary to insure that there will be no discharge, spillage, uncontrolled loss, seepage or filtration of any hazardous or toxic waste on the site caused by its operations. The Contractor is responsible for any and all costs and liabilities associated with the clean-up of any such spillage, etc., or as required by regulating authorities having jurisdiction, and holds the Owner and its employees and agents harmless against any current or future liabilities resulting from such incidents.

§ 10.4 Emergencies

In an emergency affecting safety of persons or property, during which it is not feasible for the Contractor to consult with the Owner and/or the Architect, the Contractor shall act, at the Contractor's discretion, to prevent threatened damage, injury, or loss. Additional compensation or extension of time claimed by the Contractor on account of an emergency shall be determined as provided in Article 15 and Article 7. The Contractor shall promptly notify insurers as applicable, and the Architect and the Owner of the nature of the emergency. Immediately thereafter, the Contractor shall submit to the Architect and the Owner a written report including description of circumstances of the emergency and details of actions taken.

ARTICLE 11 INSURANCE AND BONDS

§ 11.1 Contractor's Insurance and Bonds

§ 11.1.1 The Contractor shall purchase and maintain insurance of the types and limits of liability, containing the endorsements, and subject to the terms and conditions, as described in the Agreement, in Exhibit B (Insurance and

DocuSign Envelope ID: 805EBA63-4B76-4B24-802B-56440E960352

Bonds) or elsewhere in the Contract Documents. The Contractor shall purchase and maintain the required insurance from an insurance company or insurance companies lawfully authorized to issue insurance in the jurisdiction where the Project is located. The Owner, Architect, and Architect's consultants shall be named as additional insureds under the Contractor's commercial general liability policy or as otherwise described in the Contract Documents.

§ 11.1.2 The Contractor shall provide surety bonds of the types, for such penal sums, and subject to such terms and conditions as required by the Contract Documents. The Contractor shall purchase and maintain the required bonds from a company or companies lawfully authorized to issue surety bonds in the jurisdiction where the Project is located.

§ 11.1.3 Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

§ 11.1.4 Notice of Cancellation or Expiration of Contractor's Required Insurance. Within three (3) business days of the date the Contractor becomes aware of an impending or actual cancellation or expiration of any insurance required by the Contract Documents, the Contractor shall provide notice to the Owner of such impending or actual cancellation or expiration. Upon receipt of notice from the Contractor, the Owner shall, unless the lapse in coverage arises from an act or omission of the Owner, have the right to stop the Work until the lapse in coverage has been cured by the procurement of replacement coverage by the Contractor. The furnishing of notice by the Contractor shall not relieve the Contractor of any contractual obligation to provide any required coverage.

§ 11.2 Owner's Insurance

§ 11.2.1 The Owner shall purchase and maintain insurance of the types and limits of liability, containing the endorsements, and subject to the terms and conditions, as described in the Agreement or elsewhere in the Contract Documents. The Owner shall purchase and maintain the required insurance from an insurance company or insurance companies lawfully authorized to issue insurance in the jurisdiction where the Project is located.

§ 11.2.2 Failure to Purchase Required Property Insurance. If the Owner fails to purchase and maintain the required property insurance, with all of the coverages and in the amounts described in the Agreement or elsewhere in the Contract Documents, the Owner shall inform the Contractor in writing prior to commencement of the Work. Upon receipt of notice from the Owner, the Contractor may delay commencement of the Work and may obtain insurance that will protect the interests of the Contractor, Subcontractors, and Sub-Subcontractors in the Work. When the failure to provide coverage has been cured or resolved, the Contract Sum and Contract Time shall be equitably adjusted. In the event the Owner fails to procure coverage, the Owner waives all rights against the Contractor, Subcontractors, and Sub-subcontractors to the extent the loss to the Owner would have been covered by the insurance to have been procured by the Owner. The cost of the insurance shall be charged to the Owner by a Change Order. If the Owner does not provide written notice, and the Contractor is damaged by the failure or neglect of the Owner to purchase or maintain the required insurance, the Owner shall reimburse the Contractor for all reasonable costs and damages attributable thereto.

§ 11.2.3 Notice of Cancellation or Expiration of Owner's Required Property Insurance. Within three (3) business days of the date the Owner becomes aware of an impending or actual cancellation or expiration of any property insurance required by the Contract Documents, the Owner shall provide notice to the Contractor of such impending or actual cancellation or expiration. Unless the lapse in coverage arises from an act or omission of the Contractor: (1) the Contractor, upon receipt of notice from the Owner, shall have the right to stop the Work until the lapse in coverage has been cured by the procurement of replacement coverage by either the Owner or the Contractor; (2) the Contract Time and Contract Sum shall be equitably adjusted; and (3) the Owner waives all rights against the Contractor, Subcontractors, and Sub-subcontractors to the extent any loss to the Owner would have been covered by the insurance had it not expired or been cancelled. If the Contractor purchases replacement coverage, the cost of the insurance shall be charged to the Owner by an appropriate Change Order. The furnishing of notice by the Owner shall not relieve the Owner of any contractual obligation to provide required insurance.

§ 11.3 Waivers of Subrogation

§ 11.3.1 The Owner and Contractor waive all rights against (1) each other and any of their subcontractors, sub-subcontractors, agents, and employees, each of the other; (2) the Architect and Architect's consultants; and (3) Separate Contractors, if any, and any of their subcontractors, sub-subcontractors, agents, and employees, for damages caused by fire, or other causes of loss, to the extent those losses are covered by property insurance required by the

AIA Document A201 – 2017 Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. Agreement or other property insurance applicable to the Project, except such rights as they have to proceeds of such insurance. The Owner or Contractor, as appropriate, shall require similar written waivers in favor of the individuals and entities identified above from the Architect, Architect's consultants, Separate Contractors, subcontractors, and sub-subcontractors. The policies of insurance purchased and maintained by each person or entity agreeing to waive claims pursuant to this section 11.3.1 shall not prohibit this waiver of subrogation. This waiver of subrogation shall be effective as to a person or entity (1) even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, (2) even though that person or entity did not pay the insurance premium directly or indirectly, or (3) whether or not the person or entity had an insurable interest in the damaged property.

§ 11.3.2 If during the Project construction period the Owner insures properties, real or personal or both, at or adjacent to the site by property insurance under policies separate from those insuring the Project, or if after final payment property insurance is to be provided on the completed Project through a policy or policies other than those insuring the Project during the construction period, to the extent permissible by such policies, the Owner waives all rights in accordance with the terms of Section 11.3.1 for damages caused by fire or other causes of loss covered by this separate property insurance.

§ 11.4 Loss of Use, Business Interruption, and Delay in Completion Insurance

The Owner, at the Owner's option, may purchase and maintain insurance that will protect the Owner against loss of use of the Owner's property, or the inability to conduct normal operations, due to fire or other causes of loss.

§ 11.5 Adjustment and Settlement of Insured Loss

§ 11.5.1 A loss insured under the property insurance required by the Agreement may be adjusted by the Owner as fiduciary and made payable to the Owner as fiduciary for the insureds, as their interests may appear, subject to requirements of any applicable mortgagee clause and of Section 11.5.2. The Owner shall pay the Architect and Contractor their just shares of insurance proceeds received by the Owner, and by appropriate agreements the Architect and Contractor shall make payments to their consultants and Subcontractors in similar manner.

§ 11.5.2 Prior to settlement of an insured loss, the Owner shall notify the Contractor of the terms of the proposed settlement as well as the proposed allocation of the insurance proceeds. The Contractor shall have 14 days from receipt of notice to object to the proposed settlement or allocation of the proceeds. If the Contractor does not object, the Owner shall settle the loss and the Contractor shall be bound by the settlement and allocation. Upon receipt, the Owner shall deposit the insurance proceeds in a separate account and make the appropriate distributions. Thereafter, if no other agreement is made or the Owner does not terminate the Contract for convenience, the Owner and Contractor shall execute a Change Order for reconstruction of the damaged or destroyed Work in the amount allocated for that purpose. If the Contractor timely objects to either the terms of the proposed settlement or the allocation of the proceeds, the Owner may proceed to settle the insured loss, and any dispute between the Owner and Contractor arising out of the settlement or allocation of the proceeds shall be resolved pursuant to Article 15. Pending resolution of any dispute, the Owner may issue a Construction Change Directive for the reconstruction of the damaged or destroyed Work.

ARTICLE 12 UNCOVERING AND CORRECTION OF WORK

§ 12.1 Uncovering of Work

§ 12.1.1 If a portion of the Work is covered contrary to the Architect's request or to requirements specifically expressed in the Contract Documents, it must, if requested in writing by the Architect, be uncovered for the Architect's examination and be replaced at the Contractor's expense without change in the Contract Time.

§ 12.1.2 If a portion of the Work has been covered that the Architect has not specifically requested to examine prior to its being covered, the Architect may request to see such Work and it shall be uncovered by the Contractor. If such Work is in accordance with the Contract Documents, the Contractor shall be entitled to an equitable adjustment to the Contract Sum and Contract Time as may be appropriate. If such Work is not in accordance with the Contract Documents, the costs of uncovering the Work, and the cost of correction, shall be at the Contractor's expense.

§ 12.2 Correction of Work

§ 12.2.1 Before Substantial Completion

The Contractor shall promptly correct Work rejected by the Architect or failing to conform to the requirements of the Contract Documents, discovered before Substantial Completion and whether or not fabricated, installed or completed. Costs of correcting such rejected Work, including additional testing and inspections, the cost of uncovering and

replacement, and compensation for the Architect's services and expenses made necessary thereby, shall be at the Contractor's expense.

§ 12.2.2 After Substantial Completion

§ 12.2.2.1 In addition to the Contractor's obligations under Section 3.5, if, within one year after the date of Substantial Completion of the Work or designated portion thereof or after the date for commencement of warranties established under Section 9.9.1, or by terms of any applicable special warranty required by the Contract Documents, any of the Work is found to be not in accordance with the requirements of the Contract Documents, the Contractor shall correct it promptly after receipt of notice from the Owner to do so, unless the Owner has previously given the Contractor a written acceptance of such condition. The Owner shall give such notice promptly after discovery of the condition. During the one-year period for correction of Work, if the Owner fails to notify the Contractor and give the Contractor an opportunity to make the correction, the Owner waives the rights to require correction by the Contractor and to make a claim for breach of warranty. If the Contractor fails to correct nonconforming Work within a reasonable time during that period after receipt of notice from the Owner or Architect, the Owner may correct it in accordance with Section 2.5.

§ 12.2.2.2 The one-year period for correction of Work shall be extended with respect to portions of Work first performed after Substantial Completion by the period of time between Substantial Completion and the actual completion of that portion of the Work.

§ 12.2.2.3 The one-year period for correction of Work shall not be extended by corrective Work performed by the Contractor pursuant to this Section 12.2.

§ 12.2.3 The Contractor shall remove from the site portions of the Work that are not in accordance with the requirements of the Contract Documents and are neither corrected by the Contractor nor accepted by the Owner.

§ 12.2.4 The Contractor shall bear the cost of correcting destroyed or damaged construction of the Owner or Separate Contractors, whether completed or partially completed, caused by the Contractor's correction or removal of Work that is not in accordance with the requirements of the Contract Documents.

§ 12.2.5 Nothing contained in this Section 12.2 shall be construed to establish a period of limitation with respect to other obligations the Contractor has under the Contract Documents. Establishment of the one-year period for correction of Work as described in Section 12.2.2 relates only to the specific obligation of the Contractor to correct the Work, and has no relationship to the time within which the obligation to comply with the Contract Documents may be sought to be enforced, nor to the time within which proceedings may be commenced to establish the Contractor's liability with respect to the Contractor's obligations other than specifically to correct the Work.

§ 12.2.6 Audits

Upon request of the Owner, the Contractor will cooperate, and secure the cooperation of all Subcontractors and Sub-subcontractors and assist the Owner during any audit of the Project conducted by the Owner or one or more Agencies (as defined in Section 2.2.1.2 of the Agreement) at any time after Substantial Completion. Such cooperation shall include providing the Owner with access to all records related to the Project.

§ 12.3 Acceptance of Nonconforming Work

If the Owner prefers to accept Work that is not in accordance with the requirements of the Contract Documents, the Owner may do so instead of requiring its removal and correction, in which case the Contract Sum will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

ARTICLE 13 MISCELLANEOUS PROVISIONS

§ 13.1 Governing Law

The Contract shall be governed by the law of the State of Connecticut.

§ 13.2 Successors and Assigns

§ 13.2.1 The Owner and Contractor respectively bind themselves, their partners, successors, assigns, and legal representatives to covenants, agreements, and obligations contained in the Contract Documents. Except as provided in Section 13.2.2, neither party to the Contract shall assign the Contract as a whole without written consent of the other.

If either party attempts to make an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

§ 13.2.2 The Owner may, without consent of the Contractor, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Contractor shall execute all consents reasonably required to facilitate the assignment.

§ 13.3 Rights and Remedies

§ 13.3.1 Duties and obligations imposed by the Contract Documents and rights and remedies available thereunder shall be in addition to and not a limitation of duties, obligations, rights, and remedies otherwise imposed or available by law or in equity.

(Paragraph deleted)

§ 13.3.2 No action or failure to act by the Owner, Architect, or Contractor shall constitute a waiver of a right or duty afforded them under the Contract, nor shall such action or failure to act constitute approval of or acquiescence in a breach thereunder, except as may be specifically agreed upon in writing.

§ 13.3.3 The invalidity of any part or provision of the Contract Documents shall not impair or affect in any manner the validity, enforceability or effect of the remaining parts and provisions of the Contract Documents and the parties agree to substitute for the invalid provision the provision within the bounds of the law which most clearly effectuates the legal and economic intent of the invalid provision.

§ 13.3.4 No provision contained in the Contract Documents shall create or give to third parties any claim or right against the Owner.

§ 13.4 Tests and Inspections

§ 13.4.1 Tests, inspections, and approvals of portions of the Work shall be made as required by the Contract Documents and by Applicable Laws. Unless otherwise provided, the Contractor shall make arrangements for such tests, inspections, and approvals with an independent testing laboratory or entity acceptable to the Owner, or with the appropriate public authority, and shall bear all related costs of tests, inspections, and approvals. The Contractor shall give the Architect timely notice of when and where tests and inspections are to be made so that the Architect may be present for such procedures. The Owner shall bear costs of tests, inspections, or approvals that do not become requirements until after bids are received or negotiations concluded. The Owner shall directly arrange and pay for tests, inspections, or approvals where building codes or Applicable Laws so require.

§ 13.4.2 If the Architect, Owner, or public authorities having jurisdiction determine that portions of the Work require additional testing, inspection, or approval not included under Section 13.4.1, the Architect will, upon written authorization from the Owner, instruct the Contractor to make arrangements for such additional testing, inspection, or approval, by an entity acceptable to the Owner, and the Contractor shall give timely notice to the Architect of when and where tests and inspections are to be made so that the Architect may be present for such procedures. Such costs, except as provided in Section 13.4.3, shall be at the Owner's expense. If the inspections and tests conducted under Section 13.4.1 or this Section 13.4.2 reveal failure in a portion of the Work, the Owner may order the inspection and testing at the Contractor's expense of any and all portions of the Work that are identical or similar to the failing portion.

§ 13.4.3 If procedures for testing, inspection, or approval under Sections 13.4.1 and 13.4.2 reveal failure of the portions of the Work to comply with requirements established by the Contract Documents, all costs made necessary by such failure, including those of repeated procedures and compensation for the Architect's services and expenses, shall be at the Contractor's expense.

§ 13.4.4 Required certificates of testing, inspection, or approval shall, unless otherwise required by the Contract Documents, be secured by the Contractor and promptly delivered to the Architect.

§ 13.4.5 If the Architect is to observe tests, inspections, or approvals required by the Contract Documents, the Architect will do so promptly and, where practicable, at the normal place of testing.

§ 13.4.6 Tests or inspections conducted pursuant to the Contract Documents shall be made promptly to avoid unreasonable delay in the Work.

§ 13.5 Interest

Payments due and unpaid under the Contract Documents shall bear interest as provided in the Agreement.

ARTICLE 14 TERMINATION OR SUSPENSION OF THE CONTRACT

§ 14.1 Termination by the Contractor

§ 14.1.1 The Contractor may terminate the Contract if the Work is stopped for a period of sixty (60) consecutive days through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, or any of their respective agents or employees, or any other persons or entities performing portions of the Work, for any of the following reasons:

.1 Issuance of an order of a court or other public authority having jurisdiction that requires all Work to be stopped;

.2 An act of government, such as a declaration of national emergency, that requires all Work to be stopped; or

.3 Because the Architect has not issued a Certificate for Payment and has not notified the Contractor of the reason for withholding certification as provided in Section 9.4.1, or because the Owner has not made payment on a Certificate for Payment within the time stated in the Contract Documents and has not notified the Contractor of the reason for withholding payment.

§ 14.1.2 The Contractor may terminate the Contract if, through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, or any their respective agents or employees, or any other persons or entities performing portions of the Work, repeated suspensions, delays, or interruptions of the entire Work by the Owner as described in Section 14.3, constitute in the aggregate more than 100 percent of the total number of days scheduled for completion, or 120 days in any 365-day period, whichever is less.

§ 14.1.3 If one of the reasons described in Section 14.1.1 or 14.1.2 exists, the Contractor may, upon fourteen (14) days' notice to the Owner and Architect, terminate the Contract and recover from the Owner payment for Work executed in accordance with the Contract Documents and direct costs incurred by reason of such termination.

§ 14.1.4 If the Work is stopped for a period of ninety (90) consecutive days through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, or any of their respective agents or employees or any other persons or entities performing portions of the Work because the Owner has repeatedly failed to fulfill the Owner's obligations under the Contract Documents with respect to matters material to the progress of the Work, the Contractor may, upon fourteen (14) additional days' notice to the Owner and the Architect, terminate the Contract and recover from the Owner as provided in Section 14.1.3.

§ 14.1.5 The notice of termination delivered pursuant to Section 14.1.3 or 14.1.4 must state with specificity the means by which the Owner may cure its nonperformance, and the Contractor shall not terminate this Contract if, within the applicable fourteen (14) day period, the Owner substantially takes such curative measures.

§ 14.2 Termination by the Owner for Cause

§ 14.2.1 The Owner may, without prejudice to any other rights or remedies available to the Owner under the Contract Documents or at law or in equity, terminate the Contract if the Contractor

.1 repeatedly refuses or fails to supply enough properly skilled workers or proper materials;

.2 fails to make payment to Subcontractors or suppliers in accordance with the respective agreements between the Contractor and the Subcontractors or suppliers;

.3 repeatedly disregards Applicable Laws;

.4 otherwise is guilty of substantial breach of a provision of the Contract Documents;

.5 institutes proceedings or consent to proceedings requesting relief or arrangement under the Federal Bankruptcy Act or similar or applicable federal or state law, or a petition under any federal or state bankruptcy or insolvency law is filed against the Contractor and such petition is not dismissed within sixty (60) days from the date of said filing, or the Contractor admits in writing its inability to pay its debts as they become due, or it makes a general assignment for the benefit of its creditors, or a receiver, liquidator, trustee, or assignee is appointed, or a receiver of all or any substantial portion of the Contractor's properties is appointed;

.6 abandons the Work;

.7 submits an Application for Payment, sworn statement, waiver of lien, affidavit or document of any nature whatsoever which is intentionally falsified;

.8 fails to make prompt payment to Subcontractors or for materials or labor in accordance with the respective subcontracts or otherwise breaches its obligations under any subcontract with a Subcontractor; or

.9 if a mechanics or materialman's lien or notice of lien is filed against any part of the Work or the Project site and not promptly bonded or insured over by the Contractor, provided the Owner has paid the Contractor for the Work which is the subject of the lien.

§ 14.2.2 When any of the reasons described in Section 14.2.1 exist, and upon certification by the Architect that sufficient cause exists to justify such action, the Owner may, without prejudice to any other rights or remedies of the Owner and after giving the Contractor and the Contractor's surety, if any, seven days' notice, terminate employment of the Contractor and may, subject to any prior rights of the surety:

.1 Exclude the Contractor from the site and take possession of all materials, equipment, tools, and construction equipment and machinery thereon owned by the Contractor;

.2 Accept assignment of subcontracts pursuant to Section 5.4; and

.3 Finish the Work by whatever reasonable method the Owner may deem expedient. Upon written request of the Contractor, the Owner shall furnish to the Contractor a detailed accounting of the costs incurred by the Owner in finishing the Work.

§ 14.2.3 When the Owner terminates the Contract for one of the reasons stated in Section 14.2.1, the Contractor shall not be entitled to receive further payment until the Work is finished.

§ 14.2.4 If the unpaid balance of the Contract Sum exceeds costs of finishing the Work, including compensation for the Architect's services and expenses made necessary thereby, and other damages incurred by the Owner and not expressly waived, such excess shall be paid to the Contractor. If such costs and damages exceed the unpaid balance of the Guaranteed Maximum Price, the Contractor shall pay the difference to the Owner. The amount to be paid to the Contractor or Owner, as the case may be, shall be certified by the Initial Decision Maker, upon application, and this obligation for payment shall survive termination of the Contract.

§ 14.3 Suspension by the Owner for Convenience

§ 14.3.1 The Owner may, without cause, order the Contractor in writing to suspend, delay or interrupt the Work, in whole or in part for such period of time as the Owner may determine.

§ 14.3.2 The Contract Sum and Contract Time shall be adjusted for increases in the cost and time caused by suspension, delay, or interruption under Section 14.3.1. Adjustment of the Contract Sum shall include profit (or, as applicable, the Contractor's Fee). No adjustment shall be made to the extent

.1 that performance is, was, or would have been, so suspended, delayed, or interrupted, by another cause for which the Contractor is responsible; or

.2 that an equitable adjustment is made or denied under another provision of the Contract.

§ 14.4 Termination by the Owner for Convenience

§ 14.4.1 The Owner may, at any time, without prejudice and without waiving any other right or remedy available to the Owner under the Contract Documents or at law or in equity, terminate the Contract for the Owner's convenience and without cause.

§ 14.4.2 Upon receipt of notice from the Owner of such termination for the Owner's convenience, the Contractor shall

.1 cease operations as directed by the Owner in the notice;

.2 take actions necessary, or that the Owner may direct, for the protection and preservation of the Work; and

.3 except for Work directed to be performed prior to the effective date of termination stated in the notice, terminate all existing subcontracts and purchase orders and enter into no further subcontracts and purchase orders.

§ 14.4.3 In case of such termination for the Owner's convenience, the Owner shall pay the Contractor for Work properly executed in accordance with the Contract Documents, and reasonably and satisfactorily documented direct costs; costs incurred by reason of the termination, including costs attributable to termination of Subcontracts.

§ 14.5 Payment upon Termination

§ 14.5.1 Except for claims for such payments as the Owner is explicitly required to make upon termination pursuant to this Article 14, the Contractor hereby waives and forfeits all claims for payment and damages, including without limitation, anticipated profits.

§ 14.5.2 When making any payment upon termination required under this Article 14, the Owner shall be credited for (1) payment previously made to the Contractor for the terminated portion of the Work, (2) valid claims which the Owner has against the Contractor under the Contract Documents, and (3) the value of the materials, supplies, equipment or other items that are to be disposed of by the Contractor that are included in the Contract Sum.

ARTICLE 15 CLAIMS AND DISPUTES

§ 15.1 Claims

§ 15.1.1 Definition

A Claim is a demand or assertion by one of the parties seeking, as a matter of right, payment of money, a change in the Contract Time, or other relief with respect to the terms of the Contract. The term "Claim" also includes other disputes and matters in question between the Owner and Contractor arising out of or relating to the Contract. The responsibility to substantiate Claims shall rest with the party making the Claim. This Section 15.1.1 does not require the Owner to file a Claim in order to impose liquidated damages in accordance with the Contract Documents.

§ 15.1.2 Time Limits on Claims

The Owner and Contractor shall commence all Claims and causes of action against the other and arising out of or related to the Contract, whether in contract, tort, breach of warranty or otherwise, in accordance with the requirements of the binding dispute resolution method selected in the Agreement and within the period specified by Applicable Laws.

§ 15.1.3 Notice of Claims

§ 15.1.3.1 Claims by either the Owner or Contractor, where the condition giving rise to the Claim is first discovered prior to expiration of the period for correction of the Work set forth in Section 12.2.2, shall be initiated by notice to the other party and to the Initial Decision Maker with a copy sent to the Architect, if the Architect is not serving as the Initial Decision Maker. Claims by either party under this Section 15.1.3.1 shall be initiated within 21 days after occurrence of the event giving rise to such Claim or within 21 days after the claimant first recognizes the condition giving rise to the Claim, whichever is later.

§ 15.1.3.2 Claims by either the Owner or Contractor, where the condition giving rise to the Claim is first discovered after expiration of the period for correction of the Work set forth in Section 12.2.2, shall be initiated by notice to the other party. In such event, no decision by the Initial Decision Maker is required.

§ 15.1.4 Continuing Contract Performance

§ 15.1.4.1 Pending final resolution of a Claim, except as otherwise agreed in writing or as provided in Section 9.7 and Article 14, the Contractor shall proceed diligently with the performance of its obligations under the Contract Documents and the Owner shall continue to make payments in accordance with the Contract Documents.

§ 15.1.4.2 The Contract Sum and Contract Time shall be adjusted in accordance with the Initial Decision Maker's decision, subject to the right of either party to proceed in accordance with this Article 15. The Architect will issue Certificates for Payment in accordance with the decision of the Initial Decision Maker.

§ 15.1.5 Claims for Additional Cost

If the Contractor wishes to make a Claim for an increase in the Contract Sum, notice as provided in Section 15.1.3 shall be given before proceeding to execute the portion of the Work that is the subject of the Claim. Prior notice is not required for Claims relating to an emergency endangering life or property arising under Section 10.4.

§ 15.1.6 Claims for Additional Time

§ 15.1.6.1 If the Contractor wishes to make a Claim for an increase in the Contract Time, notice as provided in Section 15.1.3 shall be given. The Contractor's Claim shall include an estimate of cost and of probable effect of delay on progress of the Work. In the case of a continuing delay, only one Claim is necessary.

§ 15.1.6.2 If adverse weather conditions are the basis for a Claim for additional time, such Claim shall be documented by data substantiating that weather conditions were abnormal for the period of time, could not have been reasonably anticipated, and had an adverse effect on the scheduled construction.

§ 15.1.7 Waiver of Claims for Consequential Damages

The Contractor and Owner waive Claims against each other for consequential damages arising out of or relating to this Contract. This mutual waiver includes

.1 damages incurred by the Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons; and

.2 damages incurred by the Contractor for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, and for loss of profit, except anticipated profit arising directly from the Work.

This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination in accordance with Article 14. Nothing contained in this Section 15.1.7 shall be deemed to preclude assessment of liquidated damages, when applicable, in accordance with the requirements of the Contract Documents. Notwithstanding anything to the contrary herein or in the Contract Documents, neither the Contract Sum nor the Contract Time shall be adjusted if the increased costs or delay underlying the Contractor's claim for adjustment stems from the negligent act or omission of the Contractor, its subcontractors of any tier, or of anyone for whose performance the Contractor is responsible to the Owner, or as a result of the error of any of the same or of the failure of any of the same to comply with, and fulfill their responsibilities under, the Contract Documents.

§ 15.2 Initial Decision

§ 15.2.1 Claims, excluding those where the condition giving rise to the Claim is first discovered after expiration of the period for correction of the Work set forth in Section 12.2.2 or arising under Sections 10.3, 10.4, and 11.5, shall be referred to the Initial Decision Maker for initial decision. The Architect will serve as the Initial Decision Maker, unless otherwise indicated in the Agreement. Except for those Claims excluded by this Section 15.2.1, an initial decision shall be required as a condition precedent to mediation of any Claim. If an initial decision has not been rendered within 30 days after the Claim has been referred to the Initial Decision Maker, the party asserting the Claim may demand mediation and binding dispute resolution without a decision having been rendered. Unless the Initial Decision Maker and all affected parties agree, the Initial Decision Maker will not decide disputes between the Contractor and persons or entities other than the Owner.

§ 15.2.2 The Initial Decision Maker will review Claims and within ten days of the receipt of a Claim take one or more of the following actions: (1) request additional supporting data from the claimant or a response with supporting data from the other party, (2) reject the Claim in whole or in part, (3) approve the Claim, (4) suggest a compromise, or (5) advise the parties that the Initial Decision Maker is unable to resolve the Claim if the Initial Decision Maker lacks sufficient information to evaluate the merits of the Claim or if the Initial Decision Maker concludes that, in the Initial Decision Maker's sole discretion, it would be inappropriate for the Initial Decision Maker to resolve the Claim.

§ 15.2.3 In evaluating Claims, the Initial Decision Maker may, but shall not be obligated to, consult with or seek information from either party or from persons with special knowledge or expertise who may assist the Initial Decision Maker in rendering a decision. The Initial Decision Maker may request the Owner to authorize retention of such persons at the Owner's expense.

§ 15.2.4 If the Initial Decision Maker requests a party to provide a response to a Claim or to furnish additional supporting data, such party shall respond, within ten days after receipt of the request, and shall either (1) provide a response on the requested supporting data, (2) advise the Initial Decision Maker when the response or supporting data will be furnished, or (3) advise the Initial Decision Maker that no supporting data will be furnished. Upon receipt of the response or supporting data, if any, the Initial Decision Maker will either reject or approve the Claim in whole or in part.

§ 15.2.5 The Initial Decision Maker will render an initial decision approving or rejecting the Claim, or indicating that the Initial Decision Maker is unable to resolve the Claim. This initial decision shall (1) be in writing; (2) state the reasons therefor; and (3) notify the parties and the Architect, if the Architect is not serving as the Initial Decision Maker, of any change in the Contract Sum or Contract Time or both. The initial decision shall be final and binding on

the parties but subject to mediation and, if the parties fail to resolve their dispute through mediation, to binding dispute resolution.

§ 15.2.6 Either party may file for mediation of an initial decision at any time, subject to the terms of Section 15.2.6.1.

§ 15.2.6.1 Either party may, within 30 days from the date of receipt of an initial decision, demand in writing that the other party file for mediation. If such a demand is made and the party receiving the demand fails to file for mediation within 30 days after receipt thereof, then both parties waive their rights to mediate or pursue binding dispute resolution proceedings with respect to the initial decision.

§ 15.2.7 In the event of a Claim against the Contractor, the Owner may, but is not obligated to, notify the surety, if any, of the nature and amount of the Claim. If the Claim relates to a possibility of a Contractor's default, the Owner may, but is not obligated to, notify the surety and request the surety's assistance in resolving the controversy.

§ 15.2.8 If a Claim relates to or is the subject of a mechanic's lien, the party asserting such Claim may proceed in accordance with Applicable Laws to comply with the lien notice or filing deadlines.

§ 15.3 Mediation

§ 15.3.1 Claims, disputes, or other matters in controversy arising out of or related to the Contract, except those waived as provided for the Contract Documents, shall be subject to mediation as a condition precedent to binding dispute resolution.

§ 15.3.2 The parties shall endeavor to resolve their Claims by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order

§ 15.3.3 Either party may, within 30 days from the date that mediation has been concluded without resolution of the dispute or 60 days after mediation has been demanded without resolution of the dispute, demand in writing that the other party file for binding dispute resolution. If such a demand is made and the party receiving the demand fails to file for binding dispute resolution within 60 days after receipt thereof, then both parties waive their rights to binding dispute resolution proceedings with respect to the initial decision.

§ 15.3.4 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 15.4 Arbitration

§ 15.4.1 If the parties have selected arbitration as the method for binding dispute resolution in the Agreement, any Claim subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of the Agreement. The Arbitration shall be conducted in the place where the Project is located, unless another location is mutually agreed upon. A demand for arbitration shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the arbitration. The party filing a notice of demand for arbitration must assert in the demand all Claims then known to that party on which arbitration is permitted to be demanded.

§ 15.4.1.1 A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation, but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the Claim would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the Claim.

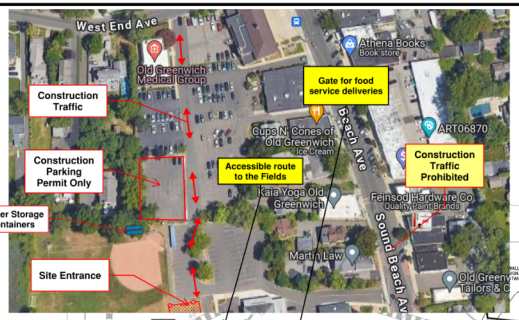
§ 15.4.2 The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

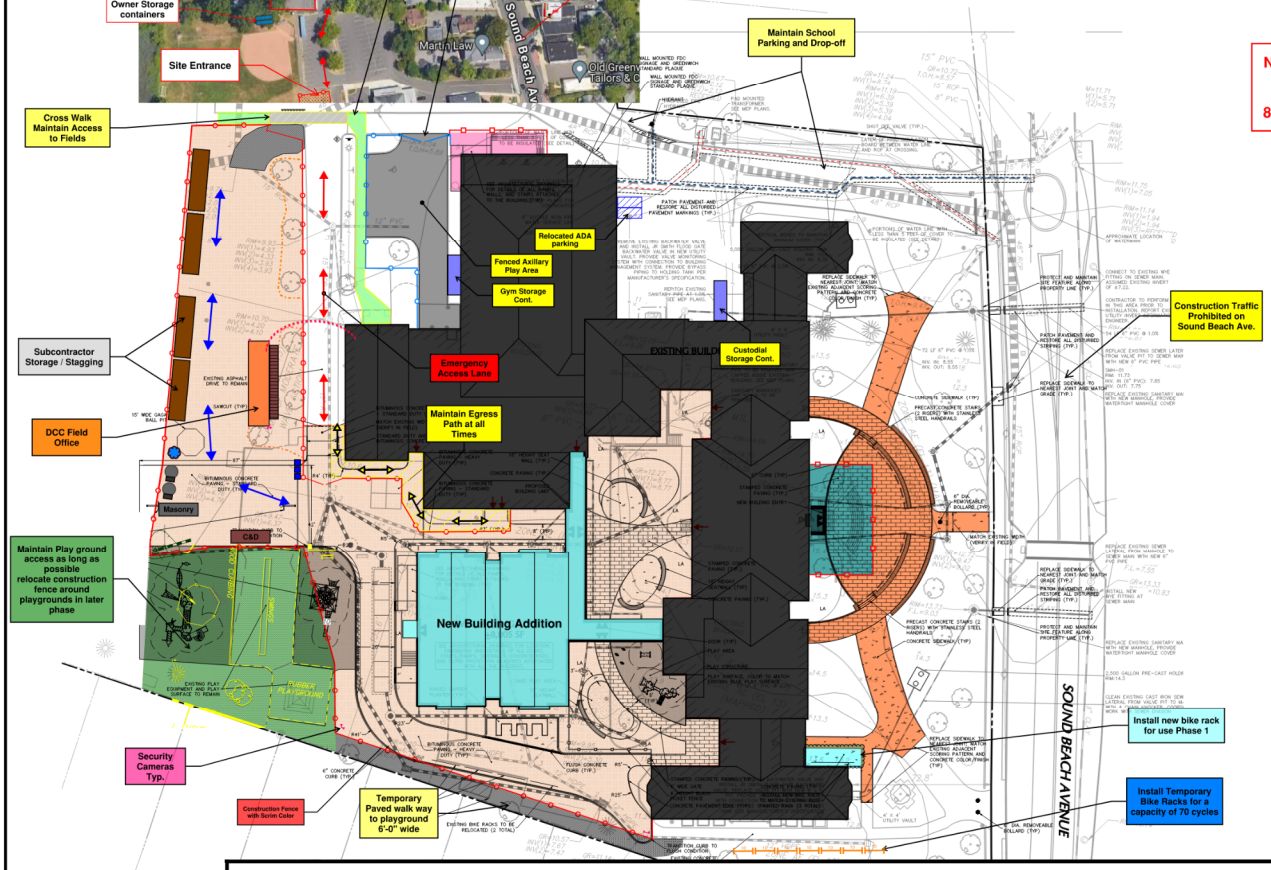
§ 15.4.3 The foregoing agreement to arbitrate and other agreements to arbitrate with an additional person or entity duly consented to by parties to the Agreement, shall be specifically enforceable under applicable law in any court having jurisdiction thereof.

§ 15.4.4 Consolidation or Joinder

§ 15.4.4.1 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may consolidate an arbitration conducted under this Contract with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation, (2) the arbitrations to be consolidated substantially involve common questions of law or fact, and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).



§ 15.4.4.2 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an additional person or entity shall not constitute consent to arbitration of any claim, dispute or other matter in question not described in the written consent.



§ 15.4.4.3 The Owner and Contractor grant to any person or entity made a party to an arbitration conducted under this Section 15.4, whether by joinder or consolidation, the same rights of joinder and consolidation as those of the Owner and Contractor under this Contract.

COMMISSION ON HUMAN RIGHTS AND OPPORTUNITIES
CONTRACT COMPLIANCE REGULATIONS
NOTIFICATION TO BIDDERS
(Revised 09/3/15)

The contract to be awarded is subject to contract compliance requirements mandated by Sections 4a-60 and 4a-60a of the Connecticut General Statutes; and, when the awarding agency is the State, Sections 46a-71(d) and 46a-81i(d) of the Connecticut General Statutes. There are Contract Compliance Regulations codified at Section 46a-68j-21 through 43 of the Regulations of Connecticut State Agencies, which establish a procedure for awarding all contracts covered by Sections 4a-60 and 46a-71(d) of the Connecticut General Statutes.

According to Section 46a-68j-30(9) of the Contract Compliance Regulations, every agency awarding a contract subject to the contract compliance requirements has an obligation to "aggressively solicit the participation of legitimate minority business enterprises as bidders, contractors, subcontractors and suppliers of materials." "Minority business enterprise" is defined in Section 4a-60 of the Connecticut General Statutes as a business wherein fifty-one percent or more of the capital stock, or assets belong to a person or persons: "(1) Who are active in daily affairs of the enterprise; (2) who have the power to direct the management and policies of the enterprise; and (3) who are members of a minority, as such term is defined in subsection (a) of Section 32-9n." "Minority" groups are defined in Section 32-9n of the Connecticut General Statutes as "(1) Black Americans . . . (2) Hispanic Americans . . . (3) persons who have origins in the Iberian Peninsula . . . (4)Women . . . (5) Asian Pacific Americans and Pacific Islanders; (6) American Indians . . ." An individual with a disability is also a minority business enterprise as provided by Section 4a-60g of the Connecticut General Statutes. The above definitions apply to the contract compliance requirements by virtue of Section 46a-68j-21(11) of the Contract Compliance Regulations.

The awarding agency will consider the following factors when reviewing the bidder's qualifications under the contract compliance requirements:

(a) the bidder's success in implementing an affirmative action plan;
(b) the bidder's success in developing an apprenticeship program complying with Sections 46a-68-1 to 46a-68-17 of the Administrative Regulations of Connecticut State Agencies, inclusive;
(c) the bidder's promise to develop and implement a successful affirmative action plan;
(d) the bidder's submission of employment statistics contained in the "Employment Information Form", indicating that the composition of its workforce is at or near parity when compared to the racial and sexual composition of the workforce in the relevant labor market area; and
(e) the bidder's promise to set aside a portion of the contract for legitimate minority business enterprises. See Section 46a-68j-30(10)(E) of the Contract Compliance Regulations.

INSTRUCTIONS AND OTHER INFORMATION

The following BIDDER CONTRACT COMPLIANCE MONITORING REPORT must be completed in full, signed, and submitted with the bid for this contract. The contract awarding agency and the Commission on Human Rights and Opportunities will use the information contained thereon to determine the bidders compliance to Sections 4a-60 and 4a-60a CONN. GEN. STAT., and Sections 46a-68j-23 of the Regulations of Connecticut State Agencies regarding equal employment opportunity, and the bidder's good faith efforts to include minority business enterprises as subcontractors and suppliers for the work of the contract.

1) Definition of Small Contractor

Section 4a-60g CONN. GEN. STAT. defines a small contractor as a company that has been doing business under the same management and control and has maintained its principal place of business in Connecticut for a one year period immediately prior to its application for certification under this section, had gross revenues not exceeding fifteen million dollars in the most recently completed fiscal year, and at least fifty-one percent of the ownership of which is held by a person or persons who are active in the daily affairs of the company, and have the power to direct the management and policies of the company, except that a nonprofit corporation shall be construed to be a small contractor if such nonprofit corporation meets the requirements of subparagraphs (A) and (B) of subdivision 4a-60g CONN. GEN. STAT.

MANAGEMENT: Managers plan, organize, direct, and control the major functions of an organization through subordinates who are at the managerial or supervisory level. They make policy decisions and set objectives for the company or departments. They are not usually directly involved in production or providing services. Examples include top executives, public relations managers, managers of operations specialties (such as financial, human resources, or purchasing managers), and construction and engineering managers.

BUSINESS AND FINANCIAL OPERATIONS: These occupations include managers and professionals who work with the financial aspects of the business. These occupations include accountants and auditors, purchasing agents, management analysts, labor relations specialists, and budget, credit, and financial analysts.

MARKETING AND SALES: Occupations related to the act or process of buying and selling products and/or services such as sales engineer, retail sales workers and sales representatives including wholesale.

LEGAL OCCUPATIONS: In-House Counsel who is charged with providing legal advice and services in regards to legal issues that may arise during the course of standard business practices. This category also includes assistive legal occupations such as paralegals, legal assistants.

COMPUTER SPECIALISTS: Professionals responsible for the computer operations within a company are grouped in this category. Examples of job titles in this category include computer programmers, software engineers, database administrators, computer scientists, systems analysts, and computer support specialists

ARCHITECTURE AND ENGINEERING: Occupations related to architecture, surveying, engineering, and drafting are included in this category. Some of the job titles in this category include electrical and electronic engineers, surveyors, architects, drafters, mechanical engineers, materials engineers, mapping technicians, and civil engineers.

OFFICE AND ADMINISTRATIVE SUPPORT: All clerical-type work is included in this category. These jobs involve the preparing, transcribing, and preserving o f written communications and records; collecting accounts; gathering and distributing information; operating office machines and electronic data processing equipment; and distributing mail. Job titles listed in this category include telephone operators, bill and account collectors, customer service representatives, dispatchers, secretaries and administrative assistants, computer operators and clerks (such as payroll, shipping, stock, mail and file).

BUILDING AND GROUNDS CLEANING AND MAINTENANCE: This category includes occupations involving landscaping, housekeeping, and janitorial services. Job titles found in this category include supervisors of landscaping or housekeeping, janitors, maids, grounds maintenance workers, and pest control workers.

CONSTRUCTION AND EXTRACTION: This category includes construction trades and related occupations. Job titles found in this category include boilermakers, masons (all types), carpenters, construction laborers, electricians, plumbers (and related trades), roofers, sheet metal workers, elevator installers, hazardous materials removal workers, paperhangers, and painters. Paving, surfacing, and tamping equipment operators; drywall and ceiling tile installers; and carpet, floor and tile installers and finishers are also included in this category. First line supervisors, foremen, and helpers in these trades are also grouped in this category.

INSTALLATION, MAINTENANCE AND REPAIR: Occupations involving the installation, maintenance, and repair of equipment are included in this group. Examples of job titles found here are heating, ac, and refrigeration mechanics and installers; telecommunication line installers and repairers; heavy vehicle and mobile equipment service technicians and mechanics; small engine mechanics; security and fire alarm systems installers; electric/electronic repair, industrial, utility and transportation equipment; millwrights; riggers; and manufactured building and mobile home installers. First line supervisors, foremen, and helpers for these jobs are also included in the category.

MATERIAL MOVING WORKERS: The job titles included in this group are Crane and tower operators; dredge, excavating, and lading machine operators; hoist and winch operators; industrial truck and tractor operators; cleaners of vehicles and equipment; laborers and freight, stock, and material movers, hand; machine feeders and offbearers; packers and packagers, hand; pumping station operators; refuse and recyclable material collectors; and miscellaneous material moving workers.

PRODUCTION WORKERS: The job titles included in this category are chemical production machine setters, operators and tenders; crushing/grinding workers; cutting workers; inspectors, testers sorters, samplers, weighers; precious stone/metal workers; painting workers; cementing/gluing machine operators and tenders; etchers/engravers; molders, shapers and casters except for metal and plastic; and production workers.

White (not of Hispanic Origin)-All persons having origins in any of the original peoples of Europe, North Africa, or the Middle East. Black (not of Hispanic Origin)-All persons having origins in any of the Black racial groups of Africa. Hispanic- All persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.	Asian or Pacific Islander- All persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes China, India, Japan, Korea, the Philippine Islands, and Samoa. American Indian or Alaskan Native- All persons having origins in any of the original peoples of North America, and who maintain cultural identification through tribal affiliation or community recognition.

BIDDER CONTRACT COMPLIANCE MONITORING REPORT

PART 1 – Bidder Information

Company Name: Street Address: City & State: Chief Executive:	Bidder Federal Employer Identification Number: Or Social Security Number:
Major Business Activity: (brief description)	Bidder Identification (response optional/definitions on page 1) -Bidder is a small contractor? Yes ☐ No ☐ -Bidder is a minority business enterprise? Yes ☐ No ☐ (If yes, check ownership category) Black ☐ Hispanic ☐ Asian American ☐ American Indian/Alaskan Native ☐ Iberian Peninsula ☐ Individual(s) with a Physical Disability ☐ Female ☐ -Bidder is certified as above by State of CT? Yes ☐ No ☐
Bidder Parent Company: (If any)	
Other Locations in CT: (If any)	

PART II - Bidder Nondiscrimination Policies and Procedures

1. Does your company have a written Affirmative Action/Equal Employment Opportunity statement posted on company bulletin boards? Yes ☐ No ☐	7. Do all of your company contracts and purchase orders contain non-discrimination statements as required by Sections 4a-60 & 4a-60a Conn. Gen. Stat.? Yes ☐ No ☐
2. Does your company have the state-mandated sexual harassment prevention in the workplace policy posted on company bulletin boards? Yes ☐ No ☐	8. Do you, upon request, provide reasonable accommodation to employees, or applicants for employment, who have physical or mental disability? Yes ☐ No ☐
3. Do you notify all recruitment sources in writing of your company's Affirmative Action/Equal Employment Opportunity employment policy? Yes ☐ No ☐	9. Does your company have a mandatory retirement age for all employees? Yes ☐ No ☐
4. Do your company advertisements contain a written statement that you are an Affirmative Action/Equal Opportunity Employer? Yes ☐ No ☐	10. If your company has 50 or more employees, have you provided at least two (2) hours of sexual harassment training to all of your supervisors? Yes ☐ No ☐ N/A ☐
5. Do you notify the Ct. State Employment Service of all employment openings with your company? Yes ☐ No ☐	11. If your company has apprenticeship programs, do they meet the Affirmative Action/Equal Employment Opportunity requirements of the apprenticeship standards of the Ct. Dept. of Labor? Yes ☐ No ☐ N/A ☐
6. Does your company have a collective bargaining agreement with workers? Yes ☐ No ☐ 6a. If yes, do the collective bargaining agreements contain non-discrimination clauses covering all workers? Yes ☐ No ☐ 6b. Have you notified each union in writing of your commitments under the nondiscrimination requirements of contracts with the state of CT? Yes ☐ No ☐	12. Does your company have a written affirmative action Plan? Yes ☐ No ☐ If no, please explain. 13. Is there a person in your company who is responsible for equal employment opportunity? Yes ☐ No ☐ If yes, give name and phone number:

1. Will the work of this contract include subcontractors or suppliers? Yes ☐ No ☐

1a. If yes, please list all subcontractors and suppliers and report if they are a small contractor and/or a minority business enterprise. (defined on page 1 / use additional sheet if necessary)

1b. Will the work of this contract require additional subcontractors or suppliers other than those identified in 1a. above? Yes ☐ No ☐

Notice of Temporary Policy Regarding Retainage

Effective January 1, 2015, the Commission on Human Rights and Opportunities ("CHRO") put in place a new temporary policy to address the 2% retainage on Public Works projects. All requests must be sent to Jim Murray by the "Requestor," i.e., the Awarding Agency, Municipality, or Construction Manager at Risk ("CMR"). For projects considered a "$20 Million Project" or Construction Management project, the CMR is the Requestor. For projects over $50,000, but not considered a "$20 Million Project" or Construction Management project, the Awarding Agency or Municipality is the Requestor.

Dear Awarding Agencies, Municipalities, and CMRs:

A temporary policy and practice related to the 2% retainage on Public Works projects has been put into place while the CHRO works diligently to eliminate its backlog. If an Affirmative Action Plan or Set-Aside Plan ("Plan") has been timely submitted and the CHRO has not had an opportunity to fully review and approve, disapprove, or conditionally approve the Plan within 120 days, the following procedures will be utilized until further notice by the CHRO:

The Requestor must email james.murray@ct.gov the following:

1. Statement that the Plan for *XYZ Company* ("the Contractor") was received by the CHRO more than 120 calendar days ago,
2. Confirmation that all contractual obligations have been met by the Contractor,
3. Request to release the 2% retainage for the Contractor, and
4. Letter from the Contractor that
    a. Is on company letterhead,
    b. Is addressed to the CHRO,
    c. Is signed by the head of the company, and
    d. Explicitly affirms that "By accepting the release of the 2% retainage, *XYZ Company* agrees to comply with all the requests for documentation (including the curing of any deficiencies on the Plan to the best of our ability, close-out documents, reporting, etc.) through the close-out of this file at the CHRO for this project."

*Copy the Contractor on this email.

Once all of the above-described items have been received, and provided that all criteria have been met, the CHRO will notify the Requestor that the 2% retainage can be released.

NOTE: It is expected that once the 2% retainage is released, the Contractor will also release the 2% retainage on all subcontractors that have completed their portion of the project, if applicable.

NOTE: The CHRO will not close out the project file until all close-out documents, reporting, etc. have been received by the CHRO.

State of Connecticut
COMMISSION ON HUMAN RIGHTS AND OPPORTUNITIES
Contract Compliance Unit – 450 Columbus Blvd., Suite 2, Hartford, CT 06103
Promoting Equality and Justice for all People

Notice of Policy Change Regarding Failure to Submit CHRO Forms and Closure Documents

Effective June 1, 2017, if a company fails to submit the required reporting forms (e.g., Forms cc-257, cc-257a, cc-257b, cc-258a, and cc-259) after the Commission on Human Rights and Opportunities ("CHRO") has sent a second request, the company's project file will be referred to the CHRO's Legal Division to consider initiating a CHRO complaint of discrimination and/or noncompliance against the contractor or subcontractor.

Effective June 1, 2017, if a company fails to submit the required file closure documents (e.g., cover letter, Final cc-258a, Final Attachment III, lien waivers, certificate of substantial completion) after the CHRO has sent a second request, the company's project file will be referred to the CHRO's Legal Division to consider initiating a CHRO complaint of discrimination and/or noncompliance against the contractor or subcontractor.

For your information, when a noncompliance complaint or discrimination complaint against a contractor is initiated by the CHRO through its attorneys, the complaint is sent directly to the CHRO's Office of Public Hearings (an administrative law tribunal) to commence a public hearing proceeding. Through this proceeding, a human rights referee (an administrative law judge) will be assigned to the case. The case will then proceed through the public hearing process, which includes, but is not limited to, discovery of documents, motion practice, witness interviews, and a public hearing/trial (an administrative law trial).

After the trial is conducted and evidence is presented, the presiding human rights referee will determine whether there is noncompliance and/or unlawful discrimination. If the human rights referee decides that a contractor has engaged in unlawful discrimination and/or noncompliance, then the human rights referee is authorized to issue orders for various forms of penalties, fines, and other ordered actions. These include, but not limited to, the State's retaining two percent of the total value of the contract, debarment of the contractor from participating in State-funded contracting for two years, and other actions. *See* Conn. Gen. Stat. § 46a-56(c) and (d) and § 46a-86 as applicable.

If you have other State-funded contracts in progress or anticipate bidding on another State-funded contract, we urge you (as well as the individual responsible for the preparation of your company's Plan and/or closeout documentation) to attend to a CHRO Technical Assistance (TA) Session. Please let us know if you have questions so we can address them. TA sessions are held online, via the Microsoft Teams platform. You and your representative are urged to attend a TA session prior to your next Plan submission. To attend a contract compliance training, please use the above link to register.

Good Faith Efforts

How does the CHRO analyze a contractor's good faith efforts to solicit Small Business Enterprises ("SBE") and/or Minority Business Enterprises ("MBE")?

Remember: the goal is to use Department of Administrative Services ("DAS")-certified SBEs for at least 25% of the work and to use DAS-certified MBEs (ethnic minority-owned businesses), WBEs (women-owned businesses), and DisBEs (businesses owned by persons with disabilities) for at least 6.25% of the work.

Here are the factors the CHRO looks at to determine whether a contractor has made its best good faith effort to provide opportunities for DAS-certified S/M/W/DisBEs to work on state funded projects.

Has the contractor actually achieved its goal? What good faith efforts has the contractor made to achieve those goals?

Evidence of taking reasonable steps to achieve the goals would include, but not be limited to, following the CHRO's best suggested practices such as:

- Consulting with varied resources, including the State of Connecticut DAS Supplier Diversity Program to locate M/W/DisBEs,;
- Allowing minority and small businesses to competitively bid against each other by soliciting for the trades-related work, materials, and non-trades-related services, or provide an explanation as to why the trades-related work, material, or non-trades-related service was not solicited to S/M/W/DisBEs;
- Using concise responses for bid results (avoid vague responses such as "did not bid" or "no response"; use responses to show follow-up);
- Soliciting bids only from those subcontractors and/or vendors who can provide the trades-related work, material, or non-trades-related service;
- Including all trades-related work, materials, and non-trades-related services within the company's bidding process or provide an explanation with reference as to why the trades-related work, materials, and non-trades-related services were not solicited to S/M/W/DisBEs; and
- Breaking larger jobs into smaller packages.

The CHRO will also look for "red flags" that might show lack of good faith. These will be looked at on a case-by-case basis. These include, but are not limited to, the following:

- Incomplete submissions;
- Inaccurate submissions;
- Submissions lack required specificity;
- Soliciting but not awarding any companies for a specific package of trades-related work, materials, or non-trades-related services;
- Soliciting from contractors that do not actually provide the good or service needed;
- Soliciting from contractors that are geographically too far away from the project, making them unlikely to bid;
- Failing to solicit for necessary trades-related work, materials, and non-trades-related services;
- Alleging solicitations to companies that were not actually solicited;
- Awarding a contractor that was not solicited;
- Unaccounted for contract money; and
- False submissions.

SELF-PERFORMING MBEs MUST DEMONSTRATE GOOD FAITH EFFORTS TO EMPLOY OTHER MBEs AS SUBCONTRACTORS AND SUPPLIERS OF MATERIALS.

Several features of contracting practices law point toward expecting self-performing minority business enterprises (MBE)[1] to follow the same rules that apply to other contractors. In the case of a minority contractor who self-performs, simply being an MBE would often be enough to comply with the law. All the contractor would need to do would be to "perform not less than thirty per cent of the work with the workforces of such contractor" and make sure "that not less than fifty per cent of the work be performed by contractors or subcontractors eligible for awards under" CONN. GEN. STAT. § 4a-60g(e).

Normally when goals are met we don't look behind that and address good faith efforts. By meeting goals we assume the contractor's efforts were good enough--that goal attainment speaks for itself. There are exceptions to this rule of course. We will consider good faith efforts despite goal attainment where we suspect a contractor was deceiving us, such as the company used was a sham or a contractor was not actually soliciting the entities it claimed to have solicited. A situation where an MBE self-performs presents another special circumstance where an inquiry into good faith efforts can be made. While no statute directly says as much, language in several statutes indirectly leads to this conclusion.

As an administrative agency, the CHRO doesn't make law. We apply or enforce the law we're given by the legislature. "In areas where the legislature has spoken...the primary responsibility for formulating public policy must remain with the legislature". (Citation and internal quotation marks omitted.) Mayer v. Historic District Commission,

[1] References to MBE include ethnic minority-owned businesses, women owned businesses and businesses owned by individuals with disabilities.

325 Conn. 765, 780 (2017). That policy resides in statutes. Thibodeau v. Design Group One Architects, LLC, 260 Conn. 691, 720 (2002).

In CONN. GEN. STAT. § 4a-60g(b) the legislature included an explanation for the set-aside program:

> It is found and determined that there is a serious need to help small contractors, minority business enterprises, nonprofit organizations and individuals with disabilities to be considered for and awarded state contracts for the purchase of goods and services, public works contracts, municipal public works contracts and contracts for quasi-public agency projects. Accordingly, the necessity of awarding such contracts in compliance with the provisions of this section, sections 4a-60h to 4a-60j, inclusive, and sections 32-9i to 32-9p, inclusive, for advancement of the public benefit and good, is declared as a matter of legislative determination.

The legislature intended the set-aside program to have a broad reach. It considered the lack of MBE participation to be "serious", and made compliance a "necessity" that would lead to a "public benefit and good". One way to achieve that purpose is to help as many MBEs as possible and not to confine the program's benefits to a few beneficiaries.

Some of this philosophy carries over into CONN. GEN. STAT. § 4a-60. CONN. GEN. STAT. § 4a-60(b) requires contractors to "make good faith efforts to employ minority business enterprises as subcontractors and suppliers of materials on such public works or quasi-public agency project." Good faith efforts are not optional; the contractor "agrees and warrants" to make these efforts. Nothing here or elsewhere excludes MBEs, WBEs or DisBEs from the good faith requirement, and the CHRO can't read in an exception that the legislature did not think right to provide by word or implication. Caulkins v. Petrillo, 200 Conn. 713, 719 (1986).

Further, as a remedial statute, any exception would have to be read narrowly. Fairchild Heights, Inc. v. Dickal, 305 Conn. 488, 502 (2012). Statutes under the CHRO's

jurisdiction are remedial. Thames Talent, Ltd. v. CHRO, 265 Conn. 127, 138 (2003); CHRO v. Sullivan Associates, 250 Conn. 763, 782 (1999) (CT's housing statute). "The principles of statutory construction direct us to construe remedial statutes 'liberally in order to effectuate the legislature's intent.'" (Citations omitted.) Id.

Among other things, CONN. GEN. STAT. § 4a-60(f) defines "good faith efforts" to include the "contractor's employment and subcontracting policies, patterns and practices". Although the subsection (f) indicia of good faith are not exclusive, it would be anomalous to find a self-performing contractor satisfied its statutory responsibility to "make good faith efforts to employ minority business enterprises as subcontractors and suppliers of materials" when the contractor has in fact made no such efforts. Statutes are interpreted to produce a sensible result. Curry v. Alan S. Goodman, Inc., 286 Conn. 390, 412-13 (2008).

In the absence of clear statutory language, the best interpretation here is that CONN. GEN. STAT. § 4a-60 holds every contractor to the same obligation to employ MBEs as subcontractors and suppliers of materials and that the CHRO, in evaluating a contractor's good faith efforts, will consider a contractor's subcontracting policies, patterns and practices regardless of the contractor's MBE status. The lack of an exemption for MBEs and the legislature's expansive notions about the scope of the set-aside program both point in this direction.

Notice Regarding Record Retention

The CHRO is authorized to audit your company records regarding contract compliance at any time during or after the performance of this project. You must develop and maintain detailed records of your solicitation of and responses from each company in the event that the CHRO requests documentation. *See* Conn. Gen. Stat. §§ 4a-60(a)(5) and 4a-60g(g). If you solicit in writing, you must keep those written documents (e.g., letters, facsimiles, emails). If you solicit by phone, you must keep written notes about those solicitations. The CHRO may seek phone or any manner of other records. Records are subject to the CHRO's verification with any or all contractors, subcontractors, and/or suppliers of materials solicited. Records must be retained for at least two years after the CHRO issues, to your company, a Notice of File Closure letter.

SECTION 1

Affirmative Action/Equal Opportunity Employment (AA/EOE) Policy Statement

Point of Statutory and/or Regulatory Reference: Connecticut General Statutes ("C.G.S.") §§ 4a-60(a)(1), 4a-60a(a)(1), 46a-68c, and 46a-68d; Public Acts 2007, No. 07-142; and the Regulations of Connecticut State Agencies ("R.C.S.A.") § 46a-68j-27(1).

Contractors shall create a policy statement that includes, but is not limited to, the following information:

A. Identify the individual assigned affirmative action responsibilities;

B. Affirm the Contractor's commitment to achieve Equal Opportunity Employment through affirmative action for certain defined protected classes of persons;

C. Pledge the Contractor's best good faith efforts to attain the objectives of the plan.

INSTRUCTIONS:

On the next page is an EXAMPLE of an *Affirmative Action/Equal Opportunity Employment (AA/EOE) Policy Statement* that illustrates what may be included in your company's *AA/EOE Policy Statement*.

NOTE: If your company's *AA/EOE Policy Statement* lists the protected classes or if it lists each basis that, under Connecticut law, an employer cannot discriminate then your lists must be inclusive. (For an up-to-date listing of prohibited forms of employment discrimination, please refer to the *Discrimination Is Illegal* notice.)

This policy statement must be signed and dated by the head of the company. The signature must be original.

SAMPLE

AFFIRMATIVE ACTION/EQUAL OPPORTUNITY
EMPLOYMENT POLICY STATEMENT

XYZ Company will not discriminate or permit discrimination against any person or group of persons on the basis of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, sexual orientation, status as a veteran, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless such disability, even with reasonable accommodation, prevents the applicant from being able to perform the work involved, or in any manner prohibited by the laws of the United States or of the State of Connecticut. Further, **XYZ Company** will not retaliate against or condone retaliation against any person or group of persons who oppose actions, treatment, or conduct that they believe to be discriminatory.

As an Equal Opportunity Employer, it is the policy and practice of **XYZ Company** to assure that no person will be discriminated against, or be denied the benefit of any activity, program or employment process, in areas including but not limited to recruiting, advertising, hiring, upgrading, promotion, transfer, demotion, lay off, termination, rehiring, employment, rates of pay and/or other compensation or any other terms and conditions of employment on the basis of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, sexual orientation, status as a veteran, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless such disability prevents performance of the work involved.

XYZ Company shall take affirmative action to ensure that applicants with job-related qualifications are employed and to ensure that employees are treated when employed without regard to their race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, sexual orientation, status as a veteran, intellectual disability, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by such contractor that such disability prevents performance of the work involved. If an individual has a disability for which a reasonable accommodation is requested, **XYZ Company** will engage in an interactive process with the individual/representative to determine the individual's needs and accommodation.

(If XYZ Company is a union contractor) **XYZ Company** assures that each labor union or representative of its workers has been provided with a copy of this statement and has been informed that **XYZ Company** is an Affirmative Action/Equal Opportunity Employer and has been informed of **XYZ Company**'s obligations to comply with state and federal law.

XYZ Company also assures that each of its subcontractors, vendors, and manufacturers has been informed that **XYZ Company** is an Affirmative Action/Equal Opportunity Employer and of **XYZ Company**'s obligations to comply with state and federal law.

XYZ Company will implement, monitor, and enforce this *Affirmative Action/Equal Opportunity Employment Policy Statement* and program in conjunction with all applicable federal and state

laws, regulations and executive orders. In order to implement our Affirmative Action/Equal Opportunity Employment Program, **XYZ Company** will develop written strategies and plans designated to correct any deficiencies identified. Furthermore, this policy statement, as well as the posters regarding labor, sexual harassment, and discrimination laws, shall be posted and otherwise made known to all workers in the company's home office, each satellite office, and at each job site.

Management and supervisory staff will be advised of their responsibilities to ensure the success of this program. Ultimate responsibility for this Affirmative Action/Equal Opportunity Employment Program will be with the **Insert Head of Company's Name and Official Title**. The day-to-day duties for the plan will be coordinated by **Insert the name of the company's Affirmative Action/Equal Opportunity Employment Officer**, who is hereby designated the Affirmative Action/Equal Opportunity Employment Officer for **XYZ Company**.

I have expressly advised **Insert the name of the company's Affirmative Action/Equal Opportunity Employment Officer** of their legal responsibilities as **XYZ Company**'s Affirmative Action/Equal Opportunity Employment Officer pursuant to the Regulations of Connecticut State Agencies Section 46a-68j-27(4).

This Affirmative Action Plan has my total support and **XYZ Company** pledges it best good faith efforts to achieve the objectives of this Affirmative Action Plan. I expect each manager, supervisor, and employee of this Company to aid in the implementation of this program and be accountable for complying with the objectives of this Affirmative Action Plan.

Date	Signature of Head of Company
	Printed Name and Title of Head of Company

SECTION 2
Internal Communications
Information Provided to Employees/Work Force

Point of Statutory and/or Regulatory Reference: General Statutes § 4a-60(a)(3); Regs., Conn. State Agencies § 46a-68j-27(2).

The policy statement and a summary of the objectives of the plan shall be posted and otherwise made known to all workers. The plan shall indicate what steps the contractor undertook to make information on the plan available to its workforce. [R.C.S.A. § 46a-68j-27(2)]

An employer, employment agency or labor organization is required to post notices regarding statutory provisions, as the commission shall provide. [C.G.S. § 46a-54(13)]

An employer with three or more employees is required to post in a prominent and accessible location a notice concerning the illegality of sexual harassment and the remedies available to victims of sexual harassment. [C.G.S. § 46a-54(15)]

INSTRUCTIONS:

1. Describe the specific actions your company takes to communicate its Affirmative Action/Equal Opportunity Employment (AA/EOE) Policy Statement (see Section 1) and its AA/EOE hiring commitment to its workers. For example, do you distribute your AA/EOE Policy Statement (found in Section 1) to your new hires during orientation? Do you include a copy of your AA/EOE Policy Statement to all your employees with their paycheck every month? Do you post your AA/EOE Policy Statement in prominent and accessible locations? Please describe the locations.

2. Demonstrate that your company complies with posting requirements prohibiting discrimination by describing in detail where in your business office, and on project sites your company posts the *Discrimination Is Illegal* notice. Please attach a copy of the notice your company posts.

3. Demonstrate that your company complies with posting requirements prohibiting sexual harassment by describing in detail where in your business office, and on project sites your company posts the *Sexual Harassment Is Illegal* notice. Please attach a copy of the notice your company.

NOTE: Please be sure the notices posted by your company are current. Updated notices can be obtained at the CHRO website: https://portal.ct.gov/CHRO/Commission/Publications/CHRO-Publications.

SECTION 3
External Communications
Information Provided to the Public

Point of Statutory and/or Regulatory Reference: Connecticut General Statutes §§ 4a-60(a)(2), 4a-60(a)(3), and 4a-60a(a)(2); Regulations of Connecticut State Agencies §§ 46a-68j-23(9) and 46a-68j27(3)

The contractor shall, in all advertisements and business with the public, indicate that it is an affirmative action/equal opportunity employer. The plan shall include information on what steps the contractor undertook to advise the public concerning its affirmative action requirements. [R.C.S.A. § 46a-68j-27(3)]

INSTRUCTIONS:

1. In this section of the AAP, contractors should include a statement indicating that in all advertisements **and** business with the public, it will hold itself out as an

   "Affirmative Action/Equal Opportunity Employer or AA/EOE."

2. To demonstrate your company's commitment to its statement, please attach examples of three different forms of external communication (e.g., letterhead, letters of transmittal, bid notification, purchase order, fax cover sheet) sent out by your company indicating that you are an AA/EOE.

NOTE: If your company's forms of external communication do not currently indicate your company is an AA/EOE, and your company's forms of external communication are not created in-house, please include a statement ensuring that upon reordering such forms; your company's external communication will indicate it is an AA/EOE. Please include samples of how your revised forms of external communication will appear. **Statements that have been made to such for more than one (1) year are unacceptable.**

SECTION 4

Assignment of Responsibility
Duties of Designated Equal Opportunity/Affirmative Action Officer

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies § 46a-68j-27(4).

The contractor shall designate affirmative action responsibilities to an affirmative action/equal opportunity employment officer. In addition to his/her other duties, the affirmative action officer shall:

A. Develop, implement, and monitor progress on the contractor's affirmative action plan;

B. Acquaint workers with their specific responsibilities under the plan;
Initiate and maintain contact with unions, recruiting sources, and organizations serving members of protected groups concerning the achievement of affirmative action requirements;

C. Conduct meetings and orientation sessions, as necessary, to advise workers and management of the goals of the plan.

INSTRUCTIONS:

This section of the AAP should identify who within the company has the day-to-day responsibilities to implement the company's AA/EOE Program. This section should also list the AA/EOE Officer's specific duties as outlined in A–D above.

The individual named in this section as the company's AA/EOE Officer should be the same person named in Section 1 as the company's AA/EOE Officer.

The individual assigned to be the company's AA/EOE Officer should have sufficient authority within the company to carry out these tasks, and thus must be formally appointed to the position by written directive of the head of the company, and report directly to the head of the agency.

The head of the company's signature must therefore appear at the end of the written directive, as well as the signature of the company AA/EOE Officer. Both signatures must be original and dated.

X _____ _____

(Signature) Date

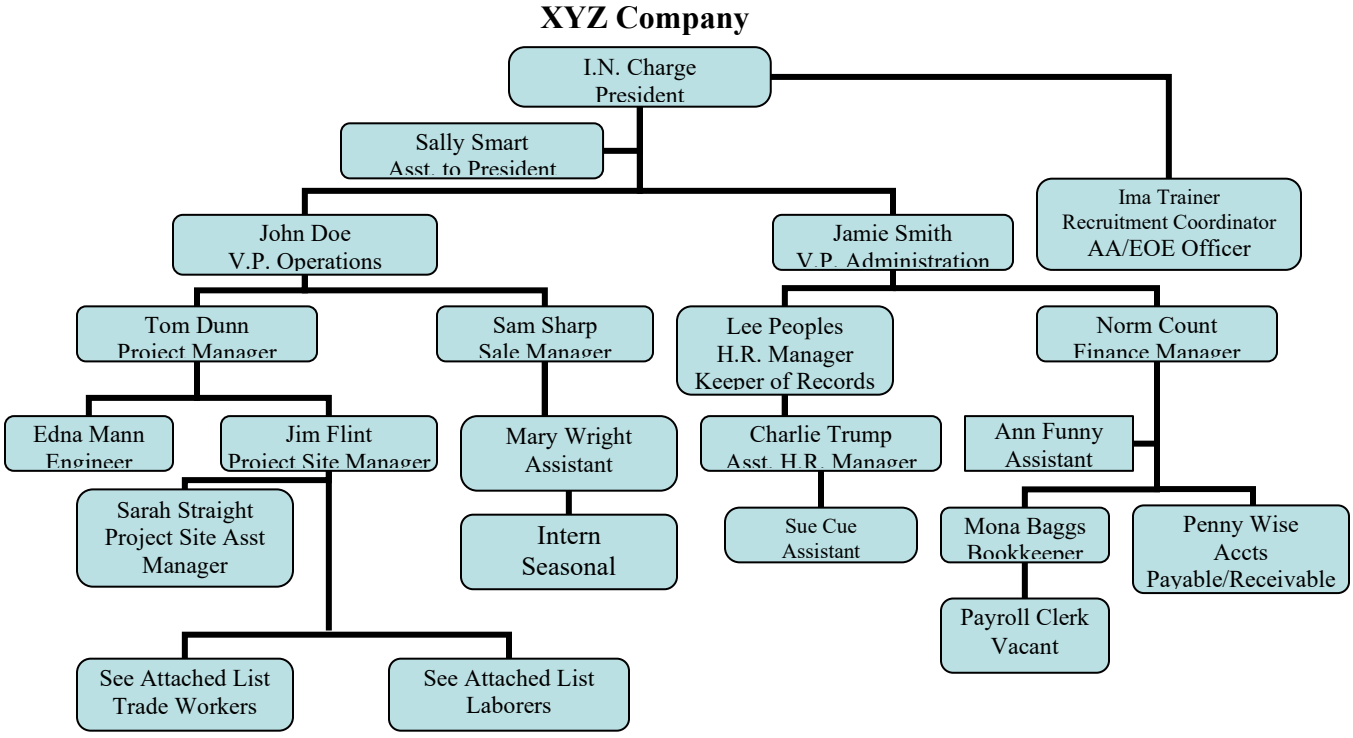
Name, Head of Company's Title

X _____ _____

(Signature) Date

Name, AA/EOE Officer

SECTION 5
Organizational Analysis



Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies § 46a-68j-27(5).

The Contractor shall list each job title as it appears in collective bargaining agreements, job specifications or payroll records, ranked from the lowest to the highest paid. Job titles shall be listed by department or other organizational unit. For lines of progression, the plan shall indicate the order of jobs through which a worker may advance. Job titles without a line of progression shall be listed separately.

INSTRUCTIONS:

Please create an organizational chart for those employees on your day-to-day payroll. Each box should contain a job title and the name of each employee who holds that job title. Please do not attempt to fit more than four names into a box. Instead, attach a list of names for the people who hold the same job title.

On the organizational chart, please be sure to show that your company employs an AA/EOE Officer who reports directly to the head of the company.

NOTE: Please do not list a name more than once on the organizational chart. If an employee performs various jobs, only use one box to list that employee's name and that employee's job titles.

SECTION 6
Workforce Analysis

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies § 46a-68j-27(6).

For each job title identified in the organizational analysis, the plan shall report:

A) the total number of incumbents (employees);
B) the total number of male and female incumbents;
C) the total number of male and female incumbents in each of the following groups:
    i. whites;
    ii. blacks;
    iii. Hispanics;
    iv. Others.

INSTRUCTIONS:

Please fill out the attached Workforce Analysis Form in its entirety. Pages 13 and 14 of the CHRO's format are for informational purposes only and should not be included in the plan submission.

Use the job titles listed in Section 5's Organizational Analysis to complete the Job Title Column (first column).

To calculate the *% of Females*, divide the number of females in that job title by the total number of employees (add up both male and female) in that job title and multiply by 100.

To calculate *Subtotal Minority Males*, add up the number of males listed under Black, Hispanic, or Other Races for that job title.

To calculate *% of Minority Males*, divide the subtotal minority males in that job title by the total number of employees (add up both male and female) in that job title and multiply by 100.

NOTE: The job titles in this section must be identical to the job titles listed on the O*rganizational Analysis*. Similarly, the number of names provided in the *Organizational Analysis* must be identical to total number of employees listed in this section.

SECTION 7
Availability and Utilization Analysis

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies §§ 46a-68j-27(7) through 46a-68j-27(9).

INSTRUCTIONS:

PART A:
On this page of the CHRO's format, you will find three columns. In the first column labeled *Job Titles*, you must list the job titles, from Sections 5 and 6 (i.e., employees on your regular day-to-day payroll), you will have working at the project site.

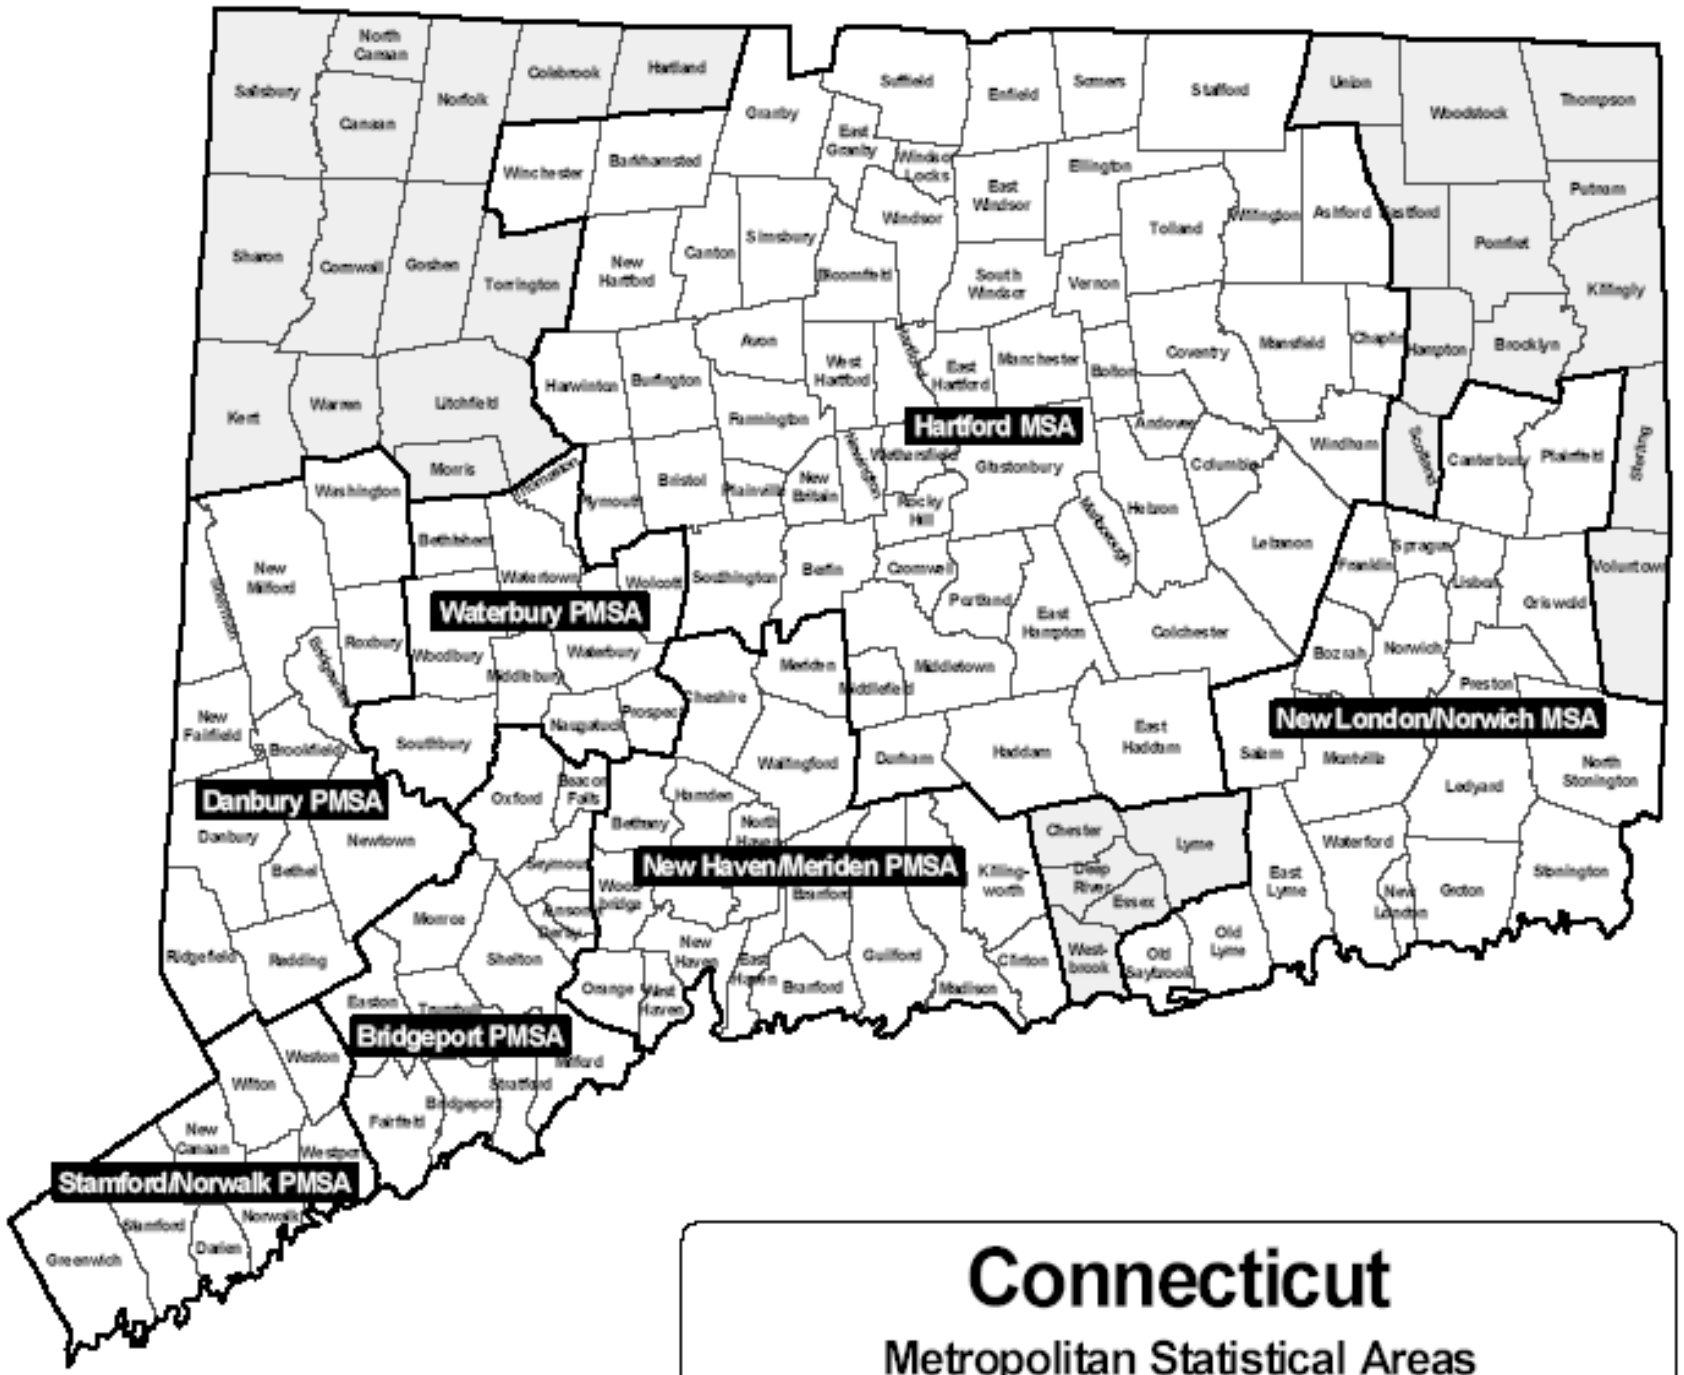
In the second column (labeled *Number of Employee*), list the number of company employees (on the day-to-day payroll and accounted for in Section 5 and Section 6) who will be on the project site. Include the job titles of the employees.

In the third column (labeled *Job Category*), consult the *Description of Job Categories* provided on page 18 of the CHRO's format. For each of the job titles listed in the first column, determine the category in which that job title belongs.

The job categories (not job titles) listed in the third column and the number of employees listed on this page must correspond to the numbers listed on the next page's *Availability Worksheet*. This serves to convert job titles into job categories.

It is imperative that the CHRO sees this progression of job titles and number of employees from Section 5 carry over into Section 6 and Section 7.

CONVERSION CHART



Job Title	Number of Employees	Job Category

NOTE: To complete Section 7, the Contractor should submit this page and the *Availability Worksheet*, which is on page 20 of the CHRO's format. Pages 16–19 of the CHRO's format are for instructional purposes only.

BUSINESS AND FINANCIAL OPERATIONS: These occupations include managers and professionals who work with the financial aspects of the business. These occupations include accountants and auditors, purchasing agents, cost estimators, management analysts, labor relations specialists, and budget, credit, and financial analysts.

COMPUTER SPECIALISTS: Professionals responsible for the computer operations within a company are grouped in this category. Examples of job titles in this category include computer programmers, software engineers, database administrators, computer scientists, systems analysts, and computer support specialists.

ARCHITECTURE AND ENGINEERING: Occupations related to architecture, surveying, engineering, and drafting are included in this category. Some of the job titles in this category include electrical and electronic engineers, surveyors, architects, drafters, mechanical engineers, materials engineers, mapping technicians, and civil engineers.

BUILDING AND GROUNDS CLEANING AND MAINTENANCE: This category includes occupations involving landscaping, housekeeping, and janitorial services. Job titles found in this category include supervisors of landscaping or housekeeping, janitors, maids, grounds maintenance workers, and pest control workers.

OFFICE AND ADMINISTRATIVE SUPPORT: All clerical-type work is included in this category. These jobs involve the preparing, transcribing, and preserving of written communications and records; collecting accounts; gathering and distributing information; operating office machines and electronic data processing equipment; and distributing mail. Job titles listed in this category include telephone operators, payroll clerks, bill and account collectors, customer service representatives, files clerks, dispatchers, shipping clerks, secretaries and administrative assistants, computer operators, mail clerks, and stock clerks.

CONSTRUCTION AND EXTRACTION: This category includes construction trades and related occupations. Job titles found in this category include boilermakers, masons (all types), carpenters, construction laborers, electricians, plumbers (and related trades), roofers, sheet metal workers, elevator installers, hazardous materials removal workers, paperhangers, and painters. Paving, surfacing, and tamping equipment operators; drywall and ceiling tile installers; and carpet, floor and tile installers and finishers are also included in this category. First line supervisors, foremen, and helpers in these trades are also grouped in this category.

INSTALLATION, MAINTENANCE AND REPAIR: Occupations involving the installation, maintenance, and repair of equipment are included in this group. Examples of job titles found here are heating, ac, and refrigeration mechanics and installers; telecommunication line installers and repairers; heavy vehicle and mobile equipment service technicians and mechanics; small engine mechanics; security and fire alarm systems installers; electric/electronic repair, industrial, utility and transportation equipment; millwrights; riggers; and manufactured building and mobile home installers. First line supervisors, foremen, and helpers for these jobs are also included in the category.

MATERIAL MOVING WORKERS: The job titles included in this group are crane and tower operators; dredge, excavating, and lading machine operators; hoist and winch operators; industrial truck and tractor operators; cleaners of vehicles and equipment; laborers and freight, stock, and material movers, hand; machine feeders and off bearers; packers and packagers, hand; pumping station operators; refuse and recyclable material collectors; and miscellaneous material moving workers.

PART B:

To Complete Part B: Contractors should provide the following information on the *Availability Worksheet*, which is located on page 20 of the CHRO's format.

1. In column 1, list each job category (not job title) from the Conversion Chart, located on page 15 of the CHRO's format.
2. In column 2, determine how many employees within the job category will be at the project site.
3. In column 3, determine how many employees within the job category are minority males.
4. In column 4, determine the % of minority males. To do so, first divide the total minority males in that job category by the total number of employees (in column 2) within the job title. Then, multiply by 100.
5. In column 5, determine how many female employees within the job category will be at the project site.
6. In column 6, determine the % of females. To do so, divide the total minority females in that job category by the total number of employees (in column 2) within the job title. Then, multiply by 100.
7. In columns 7 and 8, insert the PMSA/MSA minority male and female percentages. These figures are listed on pages 21–22 for each job category.

NOTE: Pages 21–23 of the CHRO's format are included for instructional purposes only. Your company's plan submission should not include these pages.

AVAILABILITY WORKSHEET

STATE PROJECT NUMBER: _____

Circle the project location identified in Part A:

Bridgeport PMSA	New London/Norwich CT-RI MSA
Danbury PMSA	Stamford/Norwalk PMSA
New Haven/Meriden PMSA	Waterbury PMSA
Hartford MSA	Balance of State of Connecticut

JOB CATEGORIES	**PROJECT STATISTICS (employees on site)**					**CT SITE STATISTICS (Insert PMSA/MSA)**	
	Total # of Employees	Total # of Minority Males	% of Minority Males	Total # of Females	% of Females	% of Minority Males*	% of Females*
1	**2**	**3**	**4**	**5**	**6**	**7**	**8**

NOTE: By comparing the % from columns 4 & 6 with the % from columns 7 & 8 within each Job Category, your company can determine whether (a) the workforce is at parity; (b) there is underutilization (i.e., the company's % are lower than the area %); or (c) there is an overutilization (the company's % are higher than the area %).

If your company has fewer than 25 employees who are on the day-to-day payroll and who will work at the project site, your company need not discuss the differences.

When (a) your company employs 25 or more employees who are working at the project site and (b) the above % shows underutilization, your company must attach a signed statement. This statement must contain a pledge from your company that it will extend its best good faith efforts to meet or surpass the Connecticut site statistics, if the need to hire more employees for the purposes of this project arises.

Where there is a significant difference, your company's statement should also discuss action that the company may take to move toward greater parity within its workforce. The statement must bear the signatures of the head of the company and AA/EOE Officer. These signatures must be original and dated.

SECTION 8
Project Description, Timeline, and Trades Involved

INSTRUCTIONS:

This section of the AAP must detail everything that will be needed to perform the work of this specific project. "N/A" is an acceptable response.

1. In 1–3 sentences, briefly describe the project and the work involved.

2. Estimate (mm/dd/yyyy) when construction will commence. If the project has already begun, provide the actual project mobilization date (mm/dd/yyyy). Specify whether the date provided is actual or estimated.

3. Estimate (mm/dd/yyyy) when construction will be completed. If the project is complete, provide the project end date (mm/dd/yyyy). Specify whether the date provided is actual or estimated.

4. List all of the types of trades-related for which your company will be hiring a subcontractor(s). Do not provide the name of the subcontractor(s). Only identify the specific work, not the type of worker. Attach a copy of the applicable section of the agency bid document (for example: project manual, ITB, etc.), that specifies all the trades-related work required for your company's work this project. Only include the portions necessary to verify your company's responses.

5. List all specific types of materials to be used for this project that your company will be purchasing. Do not provide the name of the vendor(s). Attach a copy of the applicable section of the agency bid document (for example: project manual, ITB, etc.), that specifies all the materials required for your company's work on this project.

6. List all specific types of non-trades-related services to be used for this project that your company will hire a service company to provide. Do not provide the name of the company. Attach a copy of the applicable section of the agency bid document (for example: project manual, ITB, etc.), that specifies all non-trades-related services needed for this project.
   Ex: Portable Toilets
   Trucking Driver Only – No Labor Involved

7. List all trades-related services that will be self-performed by your company's employees. Only identify the specific work, not the type of worker.

8. List all supplies that will be manufactured by your company for use on this project.

SECTION 9
Employment Analysis

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies §§ 46a-68j-28(1) and 46a-68j-28(4); Connecticut General Statutes § 46a-54(15).

Employment Analysis: The contractor shall undertake a comprehensive review of its company's employment process and day-to day operations for the purposes of identifying policies and practices that build in or perpetuate barriers to Equal Opportunity Employment. Where applicable, the following factors shall be addressed:

job qualifications;
job specifications;
recruitment practices;
personnel policies;
training and apprenticeship programs;
subcontracting practices;
layoff and termination policies;
job structuring;

The plan shall report what activities were undertaken to identify barriers to Equal Opportunity Employment. [R.C.S.A. § 46a-68j-28(1)]

Program Goals and Timetables: Where the employment analysis has identified barriers to Equal Opportunity Employment, the contractor shall design specific corrective measures in the form of program goals to eliminate the barriers. Goals shall be accompanied by timetables designed to achieve compliance with affirmative action objectives within the shortest reasonable limits possible. The plan shall describe all actions taken to identify problems areas and realize program goals. [R.C.S.A. § 46a-68j-28(4)]

Sexual Harassment: An employer having three (3) or more employees must also provide two hours of sexual harassment prevention training and education to all employees within six months of their start date. An employer with fewer than three employees must provide two hours of training and education to all new supervisory employees within six months. [C.G.S. § 46a-54(15)]

INSTRUCTIONS:

PART A: After a comprehensive review of your company's employment process, the Contractor should identify examples for each of the practices listed below for both union and nonunion personnel, as well as office and field staff.

NOTE: If any of the following company policies or practices, subtitled 1-8 in this section, are administered by the union(s) your company utilizes, then please provide a statement signed and dated by the head of your company and by your company's AA/EOE Officer declaring the company will not knowingly do business with any union(s) that discriminates in the administration of its employment practices and/or day-to-day operations. The signatures on the statement must be original and dated.

For Questions 1 and 2 below, identify the job/position title with the most incumbent employees, and then provide the following information for this job/position title.

1. **Job Qualifications** – Identify the job/position incumbent's required skills, experience, job/position-related certifications, and/or educational degrees. Also identify position specific requirements such as special license(s) (for example: a craft license, E2, OSHA 30, commercial driver's license), and/or physical requirements of the job/position (for example: the ability to lift 30 pounds and the ability to bend and reach), and any and all other requirements related to this job/position.

2. **Job Specifications** – Include a brief summary of the job/position. Identify this job/position's duties and responsibilities. Identify the position the incumbent reports to. If this job/position includes supervisory or managerial duties and responsibilities, identify the names of the job/position title(s) that report to this position.

3. **Recruitment Practices** –
    a. How do you recruit new employees?
    b. Explain in brief detail what resources your company utilizes to recruit new employees (not subcontractors/vendors). Where does your company post its vacancies to ensure a diverse group of candidates applies for the vacancy posted?
        i. Provide a complete list of comprehensive and diverse recruitment resources such as newspapers, unions, technical schools, organizations, professional recruiters and other types of recruitment resources your company utilizes or will utilize in the future to post its job vacancies targeted toward the protected classes per C.G.S. §§ 46a-58, 46a-59, 46a-60, 46a-81c, and 32-9n. Each recruitment resource listed must include its name, address, contact person, contact number, and website.
        NOTE: The Connecticut Department of Labor's American Job Centers and CTHires.com must be on this list.

    c. All recruiting notices posted by your company must state "Affirmative Action/Equal Opportunity Employer" or "AA/EOE." Please confirm that your company is in compliance by attaching copies of your company's most recent job postings. Please be sure the attached posting shows the name of the resource and the date of the posting. If you do not have any recent job postings indicating that your company is both an AA ***and*** an EOE, then please attach a statement ensuring your company will indicate such in all of its future job postings.

4. **Personnel Policies** – Please attach copies of 3–4 of your company's personnel policies from your Employee Handbook. If your company does not have an Employee Handbook then please briefly, describe 3–4 of your personnel policies, specifically compensation (e.g., salaried or hourly wages); benefits (e.g., vacations or holidays); and work environment (e.g., hours of work).

5. **Job Structuring** – does the company have jobs that require the tasks be performed in a specific way? For example, a material handler must grasp material by the right hand and arm, balance it on the right shoulder, and use the left hand/arm to balance the material.

6. **Training and Apprenticeship Programs** –
    a. Does your company offer on-the-job training or participate in apprenticeship and other training programs with unions, technical schools, or other work force training programs?
    b. Companies with three employee or more must provide two hours of sexual harassment training and education to all personnel. To verify compliance with this training requirement:
        1) For all employees that have completed the training, fill out Table A.
        2) For all employees who have not completed the training, fill out Table B.

    Attach additional sheets, if necessary.

    NOTE: If training was not provided via the CHRO's online training, please make sure to state the details of the (1) place of training, (2) qualifications of presenters, and (3) the agenda.

    NOTE: Additional information regarding these statutory requirements can be found on the CHRO's website: https://portal.ct.gov/CHRO/Sexual-Harassment-Prevention-Training/Pages/Sexual-Harassment-Prevention-Resources.

    NOTE: The CHRO's free, online sexual harassment prevention training is found at the following link: https://forms.office.com/Pages/ResponsePage.aspx?id=-nyLEd2juUiwJjH_abtzi1ho4uKVVftOpzDtEVu7P7lUMk5JTTY2WlZSWDFOTElXMk9OUjYwRFFNOS4u.

TABLE A –
All employees who have been trained

If the training was not provided by CHRO, please provide the details of (1) the place of training, (2) the qualifications of presenters, and (3) the agenda.

Name	Date training completed	Online training by CHRO?

TABLE B – **Employees who have not yet received training**		
Name	Date of Hire	Date training to be completed

7. **Subcontracting Practices** – Please briefly explain when and how your company solicits S/M/W/DisBEs to utilize for subcontracting/vending. Provide a complete list of comprehensive and diverse subcontracting/vending sources such as newspapers, unions, technical schools, organizations, professional recruiters and other media that help members of the protected classes (per General Statutes §§ 46a-58, 46a-59, 46a-60, 46a-81c, and 32-9n) find work as a subcontractor/vendor. Each resource listed must include its name, address, contact person, contact number, and website if applicable.

   NOTE: The Department of Administrative Services (DAS) Supplier Diversity Program must be included on your list.

8. **Layoff and Termination Policies** – Please attach a copy of your company's layoff and termination policies from your Employee Handbook. If you do not have an Employee Handbook please briefly describe what criteria is used by your company to determine how and who is laid off and terminated? For example, does your company use the "last in, first out" approach to layoffs?

***PART B*:** If any barrier(s) to protected classes are found in any of your company's preceding employment practices and policies and/or day-to-day operations, then please indicate:

1. If any barriers were found within your company's employment and business practices.

2. If so, how the barrier(s) will be eliminated, and

3. The estimated time needed to eliminate the barrier(s) and establish a new policy or practice.

SECTION 10
Special Provision-Apprenticeship Training Program

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies § 46a-68-5.

FOR STATE CONTRACTS VALUED IN EXCESS OF $10.0 MILLION
AND A PROJECTED DURATION
OF EIGHTEEN (18) MONTHS OR MORE

INSTRUCTIONS:

A Contractor to be awarded a state contract valued in excess of $10.0 million and with projected duration of eighteen (18) months or more must report in the AAP:

1. Whether the Company has, or is a signatory to, a collective bargaining agreement that sponsors a state registered apprenticeship program; and,

2. What "good faith effort" the Company will make to include registered apprentices in its direct workforce and/or in the workforce of project subcontractors during the course of the project.

SECTION 11
Subcontractor Availability Analysis

Point of Statutory and/or Regulatory Reference: Connecticut General Statutes §§ 4a-60 and 4a-60g (Rev. to 2015), as amended by Public Acts, Spec. Sess., June, 2015, No. 15-5; Regulations of Connecticut State Agencies § 46a-68j-28(2):

Applicable portions of Connecticut General Statutes § 4a-60, as amended, state:

(a) Except as provided in section 10a-151i, every contract to which an awarding agency is a party, every contract for a quasi-public agency project and every municipal public works contract shall contain the following provisions:

(4) The contractor agrees to comply with each provision of this section and sections 46a-68e and 46a-68f and with each regulation or relevant order issued by said commission pursuant to sections 46a-56, 46a-68e, 46a-68f and 46a-86; and

(5) The contractor agrees to provide the Commission on Human Rights and Opportunities with such information requested by the commission, and permit access to pertinent books, records and accounts, concerning the employment practices and procedures of the contractor as relate to the provisions of this section and section 46a-56.

(b) If the contract is a public works contract, municipal public works contract or contract for a quasi-public agency project, the contractor agrees and warrants that he or she will make good faith efforts to employ minority business enterprises as subcontractors and suppliers of materials on such public works or quasi-public agency project.

(f) Determination of the contractor's good faith efforts shall include, but shall not be limited to, the following factors: The contractor's employment and subcontracting policies, patterns and practices; affirmative advertising, recruitment and training; technical assistance activities and such other reasonable activities or efforts as the Commission on Human Rights and Opportunities may prescribe that are designed to ensure the participation of minority business enterprises in public works projects.

(g) The contractor shall develop and maintain adequate documentation, in a manner prescribed by the Commission on Human Rights and Opportunities, of its good faith efforts.

Regulations of Connecticut State Agencies § 46a-68j-28(2) states the following:

Sec. 46a-68j-28. Elements of plans required by Section 46a-68d of the Connecticut General Statutes as amended by Section 4 of Public Act 89-253.

In addition to the elements in Section 46a-68j-27, plans subject to the requirements of Section 46a-68d of the Connecticut General Statutes as amended shall contain the following elements as described below:

2. *Subcontractor Availability Analysis.* When a contractor intends to subcontract all or part of the work to be performed under a State contract to one or more subcontractors, the contractor shall consult the listing of minority business enterprises maintained by the Department of Administrative Services, the practical experience of other contractors, contacts developed by the contractor itself, trade publications and similar sources to develop a base from which the contractor might reasonably be expected to draw minority business enterprises from. The plan shall indicate what sources were consulted and whether the enterprise was ready and able to perform the required work or supply necessary materials;

See also General Statutes §§ 4a-60g, 46a-68b, 46a-68c, 46a-68d, and 46a-68e.

When a contractor intends to subcontract all or part of the work to be performed under a state contract to one or more subcontractors, the contractor shall consult the listing of minority business enterprises maintained by the Department of Administrative Services, the practical experience of other contractors, contacts developed by the contractor itself, trade publications and similar sources to develop a base from which the contractor might reasonably be expected to draw minority business enterprises. The plan shall indicate what sources were consulted and whether the enterprise was ready and able to perform the required work or supply necessary materials. [R.C.S.A. § 46a-68j-28(2)]

INSTRUCTIONS: Use DisBE for a business owned by a person(s) with a disability, WBE for a woman-owned business that is not a DisBE, MBE for an ethnic minority-owned business that is neither a DisBE nor a WBE, and SBE for a certified small business that is not one of the aforementioned.

It is within your company's discretion to combine the responses to Parts B and C, so long as all required information is included.

Design-Build Projects: When projects are design-build (or similar as in multi-phase contracts) where subcontractors/vendors are solicited for bids at different stages of the project, contractors must continuously file this section at each stage of the bidding process, until the contractor has provided evidence of its good faith efforts to achieve the set-aside goals at each stage.

PART A: Please list the DAS Supplier Diversity Website as the source used to find S/M/W/DisBE subcontractors and/or vendors:

https://www.biznet.ct.gov/SDSearch/SDSearch.aspx

PART B: List every SBE/MBE/WBE/DisBE subcontractor and/or vendor that your company solicited to bid on ***this*** contract, as shown in the example below.

For each subcontractor, indicate the trades-related work for which it was solicited. For each vendor, indicate the non-trades-related work or the materials for which it was solicited.

For example:

ABC Construction	SBE	Rough Carpentry
Carpenter's LLC	DisBE	Rough Carpentry
Hard Knocks Woodwork	MBE	Rough Carpentry
Rumor Mill	MBE	Mill Work
The Mill Worm	MBE	Mill Work
Piece Mill	WBE	Mill Work
XYZ Material Suppliers	WBE	Hardwood Supplier
Best Floor Co.	DisBE	Hardwood Supplier
Got 2 Go	SBE	Portable Toilets
Number 1	MBE	Portable Toilets
When Nature Call	SBE	Portable Toilets

PART C: Indicate the bid outcome for each company listed in Part B. Your company must be able to explain and to document to the CHRO the reason(s) why your company did not award a subcontract to each of the companies solicited in Part B. An overly vague response, such as "Bid Received," "Called/Left Message," "Said Will Bid" etc., is insufficient. For those companies that you will utilize for this project, use "Awarded" as the bid result.

For example:

ABC Construction	Rough Carpentry	Bid Incomplete
Carpenter's LLC	Rough Carpentry	Bid Too High
Hard Knocks Woodwork	Rough Carpentry	Bid Too High
Rumor Mill	Mill Work	Awarded
The Mill Worm	Mill Work	Bid Too High
Piece Mill	Mill Work	Bid Not Accepted – Received Late
XYZ Material Suppliers	Hardwood Supplier	Bid Too High
Best Floor Co.	Hardwood Supplier	Declined To Bid
Got 2 Go	Portable Toilets	Declined To Bid
Number 1	Portable Toilets	Bid Too High
When Nature Call	Portable Toilets	Scheduling Conflict

PART D: List all non-S/M/W/DisBE companies (i.e., companies not already accounted for in Part B & Part C) that your company will use on this project. This list must inform CHRO of all trade-related work, materials, and/or non-trades-related services that the companies listed will provide. Any company performing a specialized trade or supplying specialized materials/services must be indicated and accompanied by a letter attesting to such from (i.e., signed) by the awarding agency. See the example below.

Ex:

Color Coded Painting, LLC	Rough Carpentry
Pristine Port-a-lets	Portable Toilets
Boltz, Inc.	High and Low Voltage Installation*

*The electrical portion of this project is specialized and can only be performed by Boltz, Inc. Please see the attached letter verifying such, in detail, from the project manager at the awarding agency.

****** *RECORDS RETENTION NOTICE* ******

The CHRO is authorized to audit your company records regarding contract compliance at any time during or after the performance of this project. You must develop and maintain detailed records of your solicitation of and responses from each company in the event that the CHRO requests documentation.* See *Conn. Gen. Stat. §§ 4a-60(a)(5) and 4a-60g(g). If you solicit in writing, you must keep those written documents (e.g., letters, facsimiles, emails). If you solicit by phone, you must keep written notes about those solicitations. The CHRO may seek phone or any manner of other records. Records are subject to the CHRO's verification with any or all contractors, subcontractors, and/or suppliers of materials solicited. Records must be retained for at least two years after the CHRO issues, to your company, a Notice of File Closure letter.

SECTION 12
Minority Business Enterprise Goals and Timetables.

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies § 46a-68j-28(3)

Based upon the availability of minority business enterprises calculated in the Regulations of Connecticut State Agencies Sec. 46a-68j-28(2), the contractor shall set goals for awarding all or a reasonable portion of the contract to qualified minority business enterprises. The Plan shall detail what steps it took to make such opportunities available.

Design-Build Projects: When projects are design-build (or similar as in multi-phase contracts) where subcontractors are solicited for bids at different stages of the project, contractors must file Attachment IIIa by week, month, or quarter (as determined by the CHRO) and list all S/M/W/DisBEs subcontractors/vendors with whom contracts have been signed up to then.

INSTRUCTIONS:

On Attachment III:

- Provide all the information requested in the Attachment III.
- List all the MBEs, WBEs, and DisBEs you designated in Section 11–Part C as "Awarded" in the top portion ("A") of Attachment III.
- List all the SBEs you designated in Section 11–Part C as "Awarded" in the bottom portion ("B") of Attachment III.
- Input all percentages requested in the Attachment III.

Once your company's Plan is approved, your company may not add or delete any of the companies nor alter any of the contract values as listed on the Attachment III of your company's approved Plan, except as follows. After your company's Plan is approved, Attachment III may be altered only if your company submits the following items:

I) A cover letter that
   A) Requests acknowledgement of the change and
   B) Details the reason(s) why the CHRO should grant the change.

II) Documentation that verifies the reason(s) for removal or addition
   A) For removal: confirmation that the business is closed, a change order from the owner that eliminates a subcontractor's portion of the project, etc.
   B) For addition: a copy of the company's current DAS S/M/W/DisBE certification;

II) A Revised Attachment III listing the date of the revision (in mm/dd/yyyy format) and incorporating the requested change.

NOTE: Upon a project's completion, only those companies that are listed on the latest approved Attachment III and who have maintained a valid DAS Supplier Diversity Program certification throughout the duration of the project, will be utilized in the CHRO's final calculations of actual goal achievement upon the project's completion.

Attachment III
Small Contractor and Minority Business Enterprise Goals and/or "Good Faith Effort"

Total state-funded contract value $ _____. Project has SBE requirement of _____ %, which include MBE requirement of _____%; OR, Project requires only "good faith effort" for MBE contractors _____.

A. Please identify MBE/WBE/DisBE subcontractors/vendors who will participate on the project.

Company Name	Address	DAS Certification Type (MBE/WBE/DisBE)	DAS Certification Expiration Date	Contract Value
			Total amount of MBE, WBE, & DisBE contract values: $_____	(Total amount of MBE, WBE, & DisBE contract values ÷ project value **x** 100) = _____%

B. Please identify SBE contractors/vendors who will participate on the project.

Company Name	Address	DAS Certification Type (SBE)	DAS Certification Expiration Date	Contract Value
			Total amount of SBE contract values: $_____	Total amount of SBE contract values ÷ project value **x** 100= _____%
Total amount of all contract values listed in A & B =				Total amount of all contract values listed in A & B ÷ project value **x** 100 = _____%

Please use additional sheets if necessary

*******The CHRO encourages your company to not just meet its set-aside goals, but to surpass them in order to ensure project circumstances (e.g., delays, change orders, decrease between estimate amount and contract amount) do not cause your company to fall below its set-aside goals achieved in its approved Affirmative Action Plan.*******

A current copy of the DAS certificate must be attached to this section for each subcontractor/vendor listed on Attachment III. ***Without a current copy of each company's current DAS certification, the value of the contract will not be taken into account for the determination of whether your company has met its set-aside goals.***

Attachment IIIa

For Design-Build (multi-phase contract) Only

Small Contractor and Minority Business Enterprise Goals and/or "Good Faith Effort"

Date Submitted: _____ Project Number: _____ Project Name: _____

Project Start Date: _____ Estimated Project Completion Date: _____

Total state-funded contract value $ _____. Project has SBE requirement of _____ %, which include M/W/DisBE requirement of _____%; OR, Project requires only "good faith effort" for MBE contractors _____.

The head of the company has read this Attachment IIIa and confirms that its information is true and correct to the best of his or her knowledge and belief. The company pledges its best good faith efforts to achieve the set-aside goals outlined in this Attachment IIIa. Furthermore, the company is aware of its continuing obligation to remain vigilant in filing an Attachment IIIa on a **monthly bases**, unless new developments require an additional filing of an amended Attachment IIIa prior to the monthly filing due date.

Signature of the Head of the Company/Title Date

Signature of the AA/EOE Officer Date

A. Please identify MBE/WBE/DisBE subcontractors/vendors who will participate on the project.

Company Name	Address	DAS Certification Type (MBE/WBE/DisBE)	DAS Certification Expiration Date	Contract Value
		Total amount of MBE, WBE, & DisBE contract values = $_____		(Total amount of MBE, WBE, & DisBE contract values ÷ project value **x** 100) = _____%

B. Please identify SBE contractors/vendors who will participate on the project.

Company Name	Address	DAS Certification Type (SBE)	DAS Certification Expiration Date	Contract Value
		Total amount of SBE contract values = $ _____		Total amount of SBE contract values ÷ project value **x** 100= _____%
Total amount of all contract values listed in A & B = $_____				Total amount of all contract values listed in A & B ÷ project value **x** 100 = _____%

Please use additional sheets if necessary

SECTION 13
Minority Business Enterprise Assistance and Innovative Programs

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies §§ 46a-68j-21(17), 46a-68j-21(22), and 46a-68j-28(5)

Consistent with Sec. 46a-68j-21(17) and Sec. 46a-68j-21(22), the contractor shall develop programs to assist minority business enterprises in entering the economic mainstream. The plan shall detail what programs the contractor has created to accomplish this endeavor. [R.C.S.A. § 46a-68j-28(5)]

INSTRUCTIONS:

Contractors should discuss any actions taken to help small and minority owned businesses. This can be a formal program or it can be an informal policy, such as helping MBE and WBE complete paperwork related to state contracts or certification from DAS. Other possibilities include co-signing for rental of equipment for the project or allowing small contractors to order supplies with your discount rate.

SECTION 14
Project Reporting and Monitoring Procedures

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies §§ 46a-68j-23(6) and 46a-68j-23(8); Connecticut General Statutes §§ 4a-60(a)(5) and 46a-68e

Each contractor shall file, and shall cause each of his subcontractors to file, with the commission such compliance reports at such times as the commission may direct. Compliance reports shall contain such information as to the practices, policies, programs, and employment policies, employment programs, and employment statistics of the contractor and each subcontractor and be in such form as the commission may prescribe. [C.G.S. § 46a-68e]

INSTRUCTIONS:

Please provide a statement that your company will file all monthly reports as directed by the CHRO and will require its subcontractors and/or vendors to do likewise. This statement should also indicate that your company will forward the original reports to the CHRO and that copies will be sent to the awarding agency.

While required, the following monthly forms need not be included in the contractor's Affirmative Action Plan submission.

- Forms are due each month of the project's duration with filing to commence thirty (30) days after the project's start date.
- Forms must contain original signatures, printed names & titles of persons signing.
- A copy must be kept at the General Contractor, Subcontractor, Supplier, or Service Provider's office for reference when filing Form 257b.
- A copy of all reports must be sent to the awarding agency.

I. General Contractor:

- Form cc-257 (Monthly Employment Utilization Report)
    - Fill out every month from the date that the project started.
    - For the months employee(s) did not work on the project site, fill out one form for each month & check the box marked "Did not perform work on this project for this month" which is located at the bottom of the form.
    - If employee(s) then returned to the project site and began working after the months they were not working at the project site, fill out a Form cc-257, one for each month.

        Example:

        If employee(s) did not work in Jan. fill out a Form cc-257 for the month of Jan. & check the "Did not perform work on this project for this month" box.

If employee(s) worked Feb & Mar fill out a Form cc-257, one for each month, indicating the hours these employees worked during those months.

- The last month any of the employee(s) worked on the job (i.e., the month the company walked off the project site) fill out a Form cc-257 & write at the bottom of the form in BIG BOLD letters **"FINAL".**

- Form cc-257a (Monthly Employment Utilization Report)
  - Fill out every month from the date that the project started only if "On Site Personnel (Other than Trade Workers)" worked on the job.
  - Follow instructions above for Form cc-257 when a non-trade worker employee is on the site.
  - If no non-trade worker employee(s) are on the site, do not submit Form cc-257a.

- Form cc-257b (Cumulative Employment Utilization Report)
  - The last month any of the employee(s) worked at the project site, the fill out a Form cc-257b (as well as the FINAL Form cc-257 mentioned above) & write at the bottom of the form in BIG BOLD letters **"FINAL".**
  - Form cc-257b is a total of all the work hours the employees have worked on the project. Therefore, if you add up all of the hours from each of the Form cc-257's that have been filed for this project, that number should correspond with the number of total work hours reported on the Form cc-257b.

- Punch List Items or Other Events
  - If an employee returns to the job to do punch list items or other events after filling out **FINAL** filings a Revised FINAL Form cc-257 for the months that they worked on the punch list items, as well as a Revised FINAL Form cc-257b must be filed.
  - These revised reports should be marked in BIG BOLD letters "REVISED MM/DD/YYYY."

- Form cc-258a (Monthly Payment Status Reports)
  - Fill out Form cc-258a every month from the date that the project started.
  - If you are filing out a Form cc-258a for the last month of the project write at the bottom of the form in BIG BOLD letters **"FINAL".**

- ~~Form cc-258 (Quarterly Payment Status Report)~~ [NO LONGER REQUIRED]
  - ~~If the project's anticipated duration is in excess of 12 month, fill out Form cc-258 every project quarter month from the date the project started.~~
  - ~~The Form cc-258 filed for the last quarter of the project's duration must indicate ***"FINAL"*** in BIG BOLD letters.~~

The General Contractor sends the following reports to CHRO:

- Form cc-258a (Monthly Small Contractor and Minority Business Enterprise Payment Status Report).
- ~~Form cc-258 (Quarterly Small Contractor and Minority Business Enterprise Payment Status Report).~~ [NO LONGER REQUIRED]
- Form cc-257 & Form cc-257a (Monthly Employment Utilization Report) from subcontractors.
- Form cc-257 & Form cc-257a (Monthly Employment Utilization Report) from the General Contractor.
- Form cc-257b (Cumulative Employment Utilization Report) from subcontractors & the General Contractor.
- Form cc-259 (Monthly Materials Consumption Report) from Material Suppliers & Service Providers.

II. Material Suppliers & Service Providers:

- Form cc-259 (Monthly Materials Consumption Report)
    - Material Supplier/Service Supplier submits every month from the date that the project started. The officer of the company signs in the box that corresponds as to whether they "Did Supply Materials" that month or they "Did Not Supply Materials" that month.
    - At the end of the last month in which the material/servicer provider provided material or service for this project, the officer of the company must write at the bottom of the form in BIG BOLD letters "**FINAL".**

III. Subcontractors:

- Form cc-257 (Monthly Employment Utilization Report)
    - Sub submits every month from the date that the project started and not from the date that specific sub began.
    - For the months in which the sub did not work on the project site, the sub still fills out one Form cc-257 for each month & checks the box marked "Did not perform work on this project for this month" which is located at the bottom of the form.
    - For whatever months the sub does work on the project site, the sub fills out a Form cc-257, one for each month indicated the hours its employee(s) worked on the project for the month specified on the Form cc-257.

        Example:

        If the sub did not work in Jan. they fill out Form cc-257 & check the "Did not perform work on this project for this month" box. If the sub worked Feb. & March they fill out the hours on Form cc-257, one for each month.

        If the sub finishes its work in April they fill out Form cc-257 & write at the bottom of the form in BIG BOLD letters **"FINAL".**

- Form cc-257a (Monthly Employment Utilization Report)
    - Sub submits every month from the date that the project started only if "On Site Personnel (Other than Trade Workers)" worked on the job.
    - Follow instructions above for Form cc-257 when a non-trade worker employee is on site.
    - If no non-trade worker employees are on the site, then the sub need not submit Form cc-257a.

- Form cc-257b (Cumulative Employment Utilization Report)
    - The last month the sub finishes its work on the project site, that sub must fill out Form cc-257b (as well as a **FINAL** Form cc-257 mentioned above) & write at the bottom of the form in BIG BOLD letters **"FINAL".**
    - Form cc-257b is a total of all the work hours the trade personnel have worked on the project. Therefore, if you add up all of the hours for each of the Forms cc-257 that have been filed for this project, that number should correspond with the number of total work hours reported on the Form cc-257b.

- Punch List Items or Other Events
    - If a sub returns to the job to do punch list items or other events after filling out **FINAL** filings, a Revised Final Form cc-257 for the months that they worked on the punch list items, as well as a Revised Form cc-257b must be filed.
    - These revised reports should be marked in BIG BOLD letters "REVISED MM/DD/YYYY."

Additional copies of the CHRO forms and further instructions can be obtained at https://portal.ct.gov/CHRO/Contract-Compliance/Contract-Compliance/Contract-Compliance-Forms-and-Reports.

SECTION 15
Concluding Statement

Point of Statutory and/or Regulatory Reference: Regulations of Connecticut State Agencies § 46a-68j-27(10)

Affirmative Action Plans shall contain a concluding provision signed and dated by the contractor stating that the contractor:

A) has read the plan and that the contents of the plan are true and correct to the best of his or her knowledge and belief;

B) pledges his or her best good faith efforts to achieve the objectives of the plan within established timetables.

INSTRUCTIONS:

The *Concluding Statement* must be signed and dated by the head of the company and by the AA/EOE Officer. The signatures must be original.

SAMPLE

CONCLUDING STATEMENT

I have read and pledge my full support to all sections of this Affirmative Action Plan, and the commitments therein, are true and correct to the best of my knowledge and I pledge my "best good faith efforts" to achieve the objectives of the Plan within the established time frames.

The implementation of the goals in this Plan will be evidence that XYZ Company is willing to cooperate with the Commission on Human Rights and Opportunities in its effort to promote Equal Opportunity Employment and affirmative action in the State of Connecticut. I will continue my commitment and total support to the principles of a strong Affirmative Action Plan for this Company.

Subject: Affirmative Action Plan Requirements

Dear

Your company has been identified as the bidder of choice for the above referenced project. The work for this project falls under the provisions of CONN. GEN. STAT. Sections 46a-68c and 46a-68d which requires that prior to the award of this contract by this agency, you must have your company affirmative action plan approved by the Commission on Human Rights and Opportunities. Enclosed for your convenience is the suggested format for an affirmative action plan to assist in the preparation of your company plan. Should you have any questions regarding the preparation of your plan, you may contact the Contract Compliance Unit at the Commission on Human Rights and Opportunities at (860) 541-4709.

A copy of your plan must be submitted to the Commission on Human Rights and Opportunities within 30 days of your receipt of this letter. The Commission will review your affirmative action plan as required by Sections 46a68j-25 through 29 of the Administrative Regulations of Connecticut State Agencies within 60 days of submission. When the plan is approved, the

Commission will notify you and this agency so the contract can be awarded. Please send your affirmative action plan to:

Commission on Human Rights and Opportunities
25 Sigourney Street Hartford, CT 06106 Attn:
Contract Compliance Unit

Optional: You are also instructed to send a copy of the letter transmitting your plan to the Commission on Human Rights and Opportunities to:

Contract Awarding Agency Name
(address etc.)

If you have any other questions concerning this matter, please contact the undersigned at (860) (phone #)

Sincerely,

agency official

Instructions for Filing CHRO Reporting Forms

Please note, all reports filed with CHRO must have the original signature (blue ink preferred) and official title of the company's authorized agent. A copy must be sent to the Awarding Agency/CMR and a copy should be kept for your records.

Form 257	Monthly Employment Utilization Report • To be completed every month from the date that the project started. • For the months employee(s) did not work on the project site, fill out one form for each month & check the box located at the bottom of the form marked, "Did not perform work on this project for this month." • The last month the employee(s) worked on the job (i.e. the month the company walked off the project site) please fill out a Form 257 & write at the bottom of the form in BIG BOLD letters "**FINAL**".
Form 257a	Monthly Employment Utilization Report for non-trade workers on site (i.e. Bookkeeper, Project Manager, Receptionist) • To be completed every month from the date that the project started **only if** "On Site Personnel (Other than Trade Workers)" worked on the job. • Follow instructions above for Form 257 when a non-trade worker employee is on the site. If there are no non-trade worker employee(s) on the site, do not submit Form 257a.
Form 257b	Cumulative Employment Utilization Report • The last month the employee(s) worked at the project site, please fill out a Form 257b (as well as the FINAL Form 257 mentioned above) & write at the bottom of the form in BIG BOLD letters **"FINAL".** • Form 257b is a total of all the work hours the employees have worked on the project. Therefore, if you add up all of the hours from each of the Form 257's that have been filed for this project, that number should correspond with the number of total work hours reported on the Form 257b.
Revised Forms 257 & 257b	Punch List Items or Other Events • If a sub returns to the job to do punch list items or other events after filling out FINAL filings, a Revised Final Form 257 for the months that they worked on the punch list items, as well as a Revised Form 257b must be filed. • These revised reports should be marked in BIG BOLD letters "**REVISED MM/DD/YYYY**."
Form 258	Quarterly Payment Status Report (project > 12 months) • If the project's anticipated duration is in excess of 12 months, please fill out a Form 258 every project quarter month (every three (3) months) from the date the project started until all subcontractors and/or vendors are paid in full. • The Form 258 filed for the last quarter of the project's duration must indicate "**FINAL.**"
Form 258a	Monthly Payment Status Report (project < 12 months) • If the project's anticipated duration is 12 months or less, fill out Form 258a every month from the date that the project started **except** for the project's quarter months, then a Form 258 is submitted (i.e. month 258a, month 258a, quarter 258) • If you are filling out a Form 258a for the last month of the project, write at the bottom of the form in BIG BOLD letters "**FINAL**".
Form 259	Monthly Materials Consumption Report • Material/Service Supplier submits every month from the date that the project started until the final delivery of material/service. • The officer of the company signs in the box that corresponds as to whether they "Did Supply Materials" that month or they "Did Not Supply Materials" that month. • At the end of the last month in which the material/service provider provided material or service for this project, write at the bottom of the form in BIG BOLD letters "**FINAL**".

Copies of CHRO reports can be obtained by logging onto www.ct.gov/chro and go to "*Forms*" and select the required form under the second heading "*Forms and Reports for Construction Workers*."

COMMISSION ON HUMAN RIGHTS AND OPPORTUNITIES
CONTRACT COMPLIANCE REGULATIONS
NOTIFICATION TO BIDDERS

(Revised 09/3/15)

The contract to be awarded is subject to contract compliance requirements mandated by Sections 4a-60 and 4a-60a of the Connecticut General Statutes; and, when the awarding agency is the State, Sections 46a-71(d) and 46a-81i(d) of the Connecticut General Statutes. There are Contract Compliance Regulations codified at Section 46a-68j-21 through 43 of the Regulations of Connecticut State Agencies, which establish a procedure for awarding all contracts covered by Sections 4a-60 and 46a-71(d) of the Connecticut General Statutes.

According to Section 46a-68j-30(9) of the Contract Compliance Regulations, every agency awarding a contract subject to the contract compliance requirements has an obligation to "aggressively solicit the participation of legitimate minority business enterprises as bidders, contractors, subcontractors and suppliers of materials." "Minority business enterprise" is defined in Section 4a-60 of the Connecticut General Statutes as a business wherein fifty-one percent or more of the capital stock, or assets belong to a person or persons: "(1) Who are active in daily affairs of the enterprise; (2) who have the power to direct the management and policies of the enterprise; and (3) who are members of a minority, as such term is defined in subsection (a) of Section 32-9n." "Minority" groups are defined in Section 32-9n of the Connecticut General Statutes as "(1) Black Americans . . . (2) Hispanic Americans . . . (3) persons who have origins in the Iberian Peninsula . . . (4)Women . . . (5) Asian Pacific Americans and Pacific Islanders; (6) American Indians . . ." An individual with a disability is also a minority business enterprise as provided by Section 4a-60g of the Connecticut General Statutes. The above definitions apply to the contract compliance requirements by virtue of Section 46a-68j-21(11) of the Contract Compliance Regulations.

The awarding agency will consider the following factors when reviewing the bidder's qualifications under the contract compliance requirements:

(a) the bidder's success in implementing an affirmative action plan;
(b) the bidder's success in developing an apprenticeship program complying with Sections 46a-68-1 to 46a-68-17 of the Administrative Regulations of Connecticut State Agencies, inclusive;
(c) the bidder's promise to develop and implement a successful affirmative action plan;
(d) the bidder's submission of employment statistics contained in the "Employment Information Form", indicating that the composition of its workforce is at or near parity when compared to the racial and sexual composition of the workforce in the relevant labor market area; and
(e) the bidder's promise to set aside a portion of the contract for legitimate minority business enterprises. See Section 46a-68j-30(10)(E) of the Contract Compliance Regulations.

INSTRUCTIONS AND OTHER INFORMATION

The following BIDDER CONTRACT COMPLIANCE MONITORING REPORT must be completed in full, signed, and submitted with the bid for this contract. The contract awarding agency and the Commission on Human Rights and Opportunities will use the information contained thereon to determine the bidders compliance to Sections 4a-60 and 4a-60a CONN. GEN. STAT., and Sections 46a-68j-23 of the Regulations of Connecticut State Agencies regarding equal employment opportunity, and the bidder's good faith efforts to include minority business enterprises as subcontractors and suppliers for the work of the contract.

1) Definition of Small Contractor

Section 4a-60g CONN. GEN. STAT. defines a small contractor as a company that has been doing business under the same management and control and has maintained its principal place of business in Connecticut for a one year period immediately prior to its application for certification under this section, had gross revenues not exceeding fifteen million dollars in the most recently completed fiscal year, and at least fifty-one percent of the ownership of which is held by a person or persons who are active in the daily affairs of the company, and have the power to direct the management and policies of the company, except that a nonprofit corporation shall be construed to be a small contractor if such nonprofit corporation meets the requirements of subparagraphs (A) and (B) of subdivision 4a-60g CONN. GEN. STAT.

MANAGEMENT: Managers plan, organize, direct, and control the major functions of an organization through subordinates who are at the managerial or supervisory level. They make policy decisions and set objectives for the company or departments. They are not usually directly involved in production or providing services. Examples include top executives, public relations managers, managers of operations specialties (such as financial, human resources, or purchasing managers), and construction and engineering managers.

BUSINESS AND FINANCIAL OPERATIONS: These occupations include managers and professionals who work with the financial aspects of the business. These occupations include accountants and auditors, purchasing agents, management analysts, labor relations specialists, and budget, credit, and financial analysts.

MARKETING AND SALES: Occupations related to the act or process of buying and selling products and/or services such as sales engineer, retail sales workers and sales representatives including wholesale.

LEGAL OCCUPATIONS: In-House Counsel who is charged with providing legal advice and services in regards to legal issues that may arise during the course of standard business practices. This category also includes assistive legal occupations such as paralegals, legal assistants.

COMPUTER SPECIALISTS: Professionals responsible for the computer operations within a company are grouped in this category. PARTIAL LIEN WAIVER AND RELEASE

The Undersigned, _____("Releasing Party"), having performed or furnished, or having caused to be performed or furnished, labor, services or materials for the benefit of **Downes Construction Company LLC** ("General Contractor") in the construction, alteration or improvement of that property of The City of Bristol (collectively, the "Owner") described as: Bristol City Hall Reno/ Addition (the "Project"), hereby certifies that the Releasing Party has been paid all the monies due it for all labor, materials or services performed on or furnished by it to the Project as of the date _____ hereof (referred to hereinafter as the "Release Date").

("Surety") has furnished a payment bond, identified as Bond No. ("Payment Bond") for the Project, for the benefit of those providing services and materials to the Project for the benefit of the General Contractor.

1. For and in consideration of payment received on this date in the amount of $_____ and inclusive of the payment made contemporaneous herewith, the Releasing Party has been paid a total of $_____for the Project, to date. The Releasing Party does hereby remise, release and forever discharge, for itself and its successors, parent companies and affiliates, the General Contractor, Surety, and Owner and their respective parent companies, subsidiaries, sureties, affiliates, agents, successors, assigns, members, owners and employees, of and from all manner of actions and
actions, cause and causes of actions, suits, liens, debts, dues, sums of money, accounts, reckonings, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, trespasses, damages, judgments, extents, executions, claims and demands whatsoever in law, or in equity which the Releasing Party ever had, now has, or which it or its successors, hereafter can, shall or may have from the beginning of the world to the Release Date in connection with any and all claims of any nature whatsoever arising out of or relating to the Project.
2. Further, the Releasing Party certifies, under oath, and in accordance with all applicable statutes, laws and regulations, that all its laborers, subcontractors or materialmen, have been paid in full up to the extent of prior payments received through the Release Date for all materials, equipment, fees, licenses, insurances and taxes of every description and that there are no liens, causes for liens or claims against the Releasing Party for such items, and that all laborers, subcontractors or materialmen will be paid in full within seven days hereof for all remaining sums due them out of the additional funds received as of this date. Releasing Party shall indemnify, hold harmless, protect and defend the Owner from any and all claims, liens, demands or causes of action that may be asserted against the Owner or the Project property by any of the Releasing Party's laborers, subcontractors, materialmen, employees or suppliers, including claims, liens, demands or causes of action that may be disputed by the Releasing Party.
3. Further, the Releasing Party for value received does hereby release and discharge the Project, and the General Contractor, Surety and Owner from any and all mechanic's liens or other liens and claims of liens, equitable or legal, or claims against them, or against the Payment Bond, which the undersigned has or may have against the Project property for labor, services or materials through the Release Date.

Further, the Releasing Party warrants that no assignment of claims for payments relating to the Project has been made, and that the undersigned has the authority to execute this Release and Waiver and has performed the labor and services supplied and the materials required of the Releasing Party to the state of completion of said improvements for which payment is being applied. The undersigned has personal knowledge that the statements made herein are true and correct.

For and in consideration of payment received on this date in the amount of **$**_____, as well as for prior payments received for work performed through the Release Date, the Releasing Party does hereby remise, release and forever discharge, for itself and its successors, parent companies and affiliates, the General Contractor, Surety, and Owner and their respective parent companies, subsidiaries, sureties, affiliates, agents, successors, assigns, members, owners and employees, of and from all manner of actions and actions, cause and causes of actions, suits, liens, debts, dues, sums of money, accounts, reckonings, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, trespasses, damages, judgments, extents, executions, claims and demands whatsoever in law, or in equity which the Releasing Party ever had, now has, or which it or its successors, hereafter can, shall or may have from the beginning of the world to the Release Date in connection with any and all claims of any nature whatsoever arising out of or relating to the Project.

2. Further, the Releasing Party certifies, under oath, and in accordance with all applicable statutes, laws and regulations, that all its laborers, subcontractors or materialmen, have been paid in full up to the extent of prior payments received through the Release Date for all materials, equipment, fees, licenses, insurances and taxes of every description and that there are no liens, causes for liens or claims against the Releasing Party for such items, and that all laborers, subcontractors or materialmen will be paid in full within seven days hereof for all remaining sums due them out of the additional funds received as of this date. Releasing Party shall indemnify, hold harmless, protect and defend the Owner from any and all claims, liens, demands or causes of action that may be asserted against the Owner or the Project property by any of the Releasing Party's laborers, subcontractors, materialmen, employees or suppliers, including claims, liens, demands or causes of action that may be disputed by the Releasing Party.

3. Further, the Releasing Party for value received does hereby release and discharge the

Project, and the General Contractor, Surety and Owner from any and all mechanic's liens or other liens and claims of liens, equitable or legal, or claims against them, or against the Payment Bond, which the undersigned has or may have against the Project property for labor, services or materials through the Release Date.

Further, the Releasing Party warrants that no assignment of claims for payments relating to the Project has been made, and that the undersigned has the authority to execute this Final Release and Waiver and has performed the labor and services supplied and the materials required of the Releasing Party to the state of completion of said improvements for which payment is being applied. The undersigned has personal knowledge that the statements made herein are true and correct.

BACKGROUND CHECK COMPLIANCE AGREEMENT

OLD GREENWICH SCHOOOL - ADDITIONS AND ALTERATIONS
285 SOUND BEACH AVENUE
OLD GREENWICH, CT 06870

As a condition under the Standard Form of Agreement between Hartford School Bldg.Committee and Downes Construction Company, LLC, Subcontractors are to comply with "Background Investigations" for this project. As defined in the Invitation to Bid and Instructions to Subcontractors.

PURPOSE

The Background Check compliance agreement is intended to ensure that subcontractors, assigned to this project, have or will hire qualified employees/staff to provide and maintain a safe and secure environment.

POLICY

Subcontractors shall comply with maintaining a policy and procedure in place for a background check and performing background checks, in accordance with any State and Federal laws, for any person deployed to the Betances Learning Lab Magnet School

DEFINITION OF A BACKGROUND CHECK

A background check is a process in which the specifics of an individual's past history are verified for the purposes of determining qualifications for employment/work, and it's conducted in addition to a reference check. The type of background check conducted is dependent upon a position's responsibilities and required qualifications by the contract. When conducting background checks, it is the Subcontractors responsibility to comply with any state and federal laws.

COMPLIANCE AGREEMENT

The Subcontractor hereby agrees that deployed personnel on this project have been administered a background check. To the best of the Subcontractors knowledge, the employee has a satisfactory background check in accordance and in compliance with the any State and Federal laws. The Subcontractor and its employees release Downes Construction Company, LLC, its officers and its employees from any and all liability arising out of or related in any way to such testing.

STATE OF CONNECTICUT
Contractor Verification
(in accordance with Public Act 16-67)

Directions to Contractor: Connecticut law requires that any contractor applying or bidding for a contract (including individuals who are independent contractors) with a local or regional board of education, a governing council of a state or local charter school, or interdistrict magnet school operator require any employee with the contractor who would be in a position involving direct student contact to supply the contractor with the information provided in this form. Information may be collected either through a written communication or telephonically.

In addition, pursuant to Connecticut General Statutes (C.G.S.) § 10-222c, the contractor is required to contact – either telephonically or through written communication – any current or former employer of an employee if such employer was a local or regional board of education, a governing council of a state or local charter school, or interdistrict magnet school operator or if the employment caused the employee to have contact with children, to request any information concerning whether there was a finding of abuse or neglect or sexual misconduct against the employee. If the contractor receives any information indicating such a finding, or otherwise has knowledge of such a condition, the contractor must immediately forward such information to any local or regional board of education with which the contractor is under contract.

Directions to Employee of Contractor: Pursuant to Connecticut state law, employees of a contractor who would be in a position involving direct student contact must supply all of the information provided in Section 2 of this form.

Section 1 – To be completed by Contractor

Name	
Street address	
City, State, Zip Code	
Contact person	
Telephone number/email address	

Section 2 – To be completed by Employee of Contractor

Part A. On a separate sheet of paper, please list the name, address and telephone number of each current or former employer, if such current or former employer was a local or regional board of education, a governing council of a state or local charter school, or interdistrict magnet school operator, or if such employment otherwise caused you to have contact with children.

Part B. Please complete the questions below in their entirety.

Have you ever:

Y ☐ N ☐ Been the subject of an abuse or neglect or sexual misconduct investigation by any employer, state agency or municipal police department (answer "no" if the investigation resulted in a finding that all allegations were unsubstantiated)?

Y ☐ N ☐ Been disciplined or asked to resign from employment or resigned from or otherwise separated from any employment while an allegation of abuse or neglect was pending or under investigation by the Department of Children and Families (the "department"), or an allegation of sexual misconduct was pending or under investigation or due to an allegation substantiated pursuant to section 17a-101g of abuse or neglect, or of sexual misconduct or a conviction for abuse or neglect or sexual misconduct?

Y ☐ N ☐ Had a professional or occupational license or certificate suspended or revoked or ever surrendered such a license or certificate while an allegation of abuse or neglect was pending or under investigation by the department or an investigation of sexual misconduct was pending or under investigation, or due to an allegation substantiated by the department of abuse or neglect or of sexual misconduct or a conviction for abuse or neglect or sexual misconduct?

Part C – Written Consent and Disclosure Authorization. I hereby authorize the entities I have listed in Section 2 of this form to release to the entity listed in Section 1 of this form the information required to be released by my previous employer pursuant to (C.G.S.) § 10-222c along with any related records. I hereby consent to and authorize disclosure by the State Department of Education of the information requested pursuant to C.G.S. § 10-222c, as amended by Public Act 16-67, and I hereby authorize the release by the State Department of Education of any related records. I further hereby release the above-named employer(s) and the State Department of Education from any and all liability of any kind that may arise from the disclosure or release of records requested pursuant to C.G.S. § 10-222c, as amended by Public Act 16-67.

_____ _____

Signature of Applicant Date

NOTES:

The terms provided below are currently defined in state law as follows. Please note that statutes may be amended from time to time.

Sexual Misconduct means – "any verbal, nonverbal, written or electronic communication, or any other act directed toward or with a student that is designed to establish a sexual relationship with the student, including a sexual invitation, dating or soliciting a date, engaging in sexual dialog, making sexually suggestive comments, self-disclosure or physical exposure of a sexual or erotic nature and any other sexual, indecent or erotic contact with a student." Connecticut General Statutes § 10-222c(k).

Abuse or neglect means – "abuse or neglect as described in Section 46b-120, and includes any violation of Sections 53a-70, 53a-70a, 53a-71, 53a-72a, 53a-72b or 53a-73a." Connecticut General Statutes § 10-222c(k).

The Connecticut State Department of Education is an affirmative action/equal opportunity employer and does not discriminate on the basis of race, color, religion, sex, gender identity or expression, sexual orientation, marital status, national origin, ancestry, age, criminal record, political beliefs, genetic information, intellectual disability, past or present history of mental disability, learning disability, or physical disability, including, but not limited to, blindness or any other basis prohibited by Connecticut state and/or federal nondiscrimination laws.

I. About Downes' CT High Performance Building Management Plan

With the worldwide trend toward sustainable design, Downes is keeping pace. We are current members of the U.S. Green Building Council and several of our staff are certified as *LEED® Green Associates* and *Accredited Professionals*. Downes is committed to following the ideals of CTHPB and we will continue to update our knowledge and procedures as the technologies advance.

Downes has successfully completed many Connecticut High Performance Building Standard Projects. We have created and implemented custom management plans to help our clients in achieving sustainable building initiatives. The Downes CTHPB Management Plan created for the Old Greenwich School outlines environmentally responsible work practices for the following areas:

- **Construction Waste Management**
- **Indoor Air Quality Management**
- **Storm Water Pollution Control**
- **Materials and Resources**

This management plan is an outline of the prerequisite and credit requirements for the construction phase and should not be considered comprehensive of all CTHPB responsibilities for the Old Greenwich School project. Subcontractors are expected to have a thorough understanding of their responsibilities by referencing the construction documents in their entirety as there are many synergies across CTHPB credit categories. Bidders are required to utilize the RFI process if they require further clarification of these policies.

II. Construction Waste Management Plan

Downes is committed to improving the environment and promoting environmentally responsible work practices. That being said, we have developed and are implementing this Construction Waste Management Plan for the addition and alterations to Old Greenwich School project. Downes will lead our subcontractors in an effort to divert the maximum amount of waste produced on this project from entering landfills. As a team collaborating together we have an opportunity to set the highest standard for waste management stewardship.

It is our objective to train personnel, implement, and enforce the management plan, as well as document all of the waste generated on this site in order to achieve the minimum diversion rate of 75%. Together with our subcontractors, it is the intent of Downes to surpass this minimum requirement.

To obtain these goals we have identified ways to limit the amount of construction waste generated by requiring subcontractors and suppliers to limit the quantities of packaging to only what is absolutely necessary. Consolidating deliveries and managing excess packaging material are only two of the objectives of this plan. In turn, all effort will be made to collect, process, and responsibly dispose of all construction waste on this project.

Downes shall oversee the implementation of this waste management plan specific to bid packages. It is the responsibility of these subcontractors to conform to the requirements of CTHPS MRc2 for their individual scopes of work and provide all documentation to be incorporated in the overall project goal of 75% diversion.

All workers on-site shall coordinate efforts to process construction waste on-site per Sec.01-7421. This will be achieved through individual worker training and orientation. Workers will be provided identification stickers to indicate they have received training in sustainable building practices for the Old Greenwich School project. Downes will assign an on-site *Waste Management Coordinator* to oversee the proper collection and efficient processing of construction waste on a daily basis. Downes shall encourage on-site reuse whenever possible.
All subcontractors are encouraged to create opportunities for innovation in diversion of construction waste, salvage material and post-consumer waste.

Hard hat stickers are provided to all workers who have received training in sustainable building practices for the Old Greenwich School.

Downes will be responsible for the coordination and placement of the recycle containers for Phase #2 use by all trades. Downes shall designate an area on each level of the building for the collection and separation of materials. Project labor shall separate and transport waste from each level to the appropriate container at ground level. Labor shall maintain the ground level containers and ensure that they are not contaminated. Labor shall maintain signage for each container (C&D, paper/cardboard, metals, wood/lumber, drywall, masonry/concrete) in the compound. Any worker or visitor to the site who observes a violation of the plan should notify Downes immediately. Downes will take the necessary action to investigate, retrain, and/or back charge a subcontractor for willful disregard for the waste management policies. Downes will also take immediate action to ensure the violation is corrected. **Subcontractors who are recognized for exemplary effort or provide opportunity for innovation credit will be properly acknowledged by the Owner/Design Team.**

Prior to the start of work each **subcontractor is responsible** for submitting a list of all construction debris that they will generate. The subcontractor is required to confirm their best practice method for sorting and separation of the material generated by their scope of work. All subcontractors are also required to provide labor for this purpose and maintain the cleanliness of the work site in real time/daily. Subcontractors will have a designated common eating area and should maintain the cleanliness of this area at all times. Food waste must be disposed of in a separate trash container and not left in the building. Food waste will not be allowed to contaminate recycle containers.

Downes shall contract with a competent waste hauler who will become a partner in the implementation of this management plan. The waste hauler will research and suggest opportunities to reprocess and distribute salvage and recycle materials, as well as provide an estimated hauling cycle plan. The waste hauler will also be responsible to track the materials and provide documentation (i.e. pick-up tickets, trucking manifests, tipping weight tickets, monthly reporting of TTL % hauled vs. TTL % Differed from landfills). Subcontractor Monthly reporting shall include a value of real savings to illustrate the effective difference between sustainable practice and Non-CTHPS project rates. Copies of the monthly report will be posted on-site.

Old Greenwich School project shall achieve **CTHPBS Certification** we are committed to achieving this goal. All subcontractors will be clearly notified of their contractual responsibility with regard to this Waste Management Plan and its successful implementation.

Reference Work Sheets in Appendix A, A.1,&B.

Summary of Materials

Concrete, Brick, Masonry and Clean Plasters: Debris will be collected in a dedicated 15cuyd container to be hauled to an off-site for crushing and resold as gravel base or fill material.

Stone and Granite Curbing: Stone and curbing shall be salvaged and stored by the subcontractors for reuse on-site. Excess material shall be hauled to and off site processor for resale.

Metals: Scrap metals shall be separated and secured in a closed container. **ALL** material shall be accounted for and sent to an appropriate metal processor for recycling.

Drywall: Debris shall be stored in a closed dry container and hauled off-site for processing. All effort shall be taken to ensure this material is not place in a landfill. Subcontractor shall verify the final destination of this material.

Wood and Lumber: Salvage material shall be cleaned of all embedded fasteners, stacked and stored for reuse as form material, security protection, or other purpose. Unsuitable material shall be stored in a dedicated container and hauled to a processor for recycling.

Plastics: Plastics shall be separated and hauled/processed for recycling. This material will require diligent effort to ensure diversion from land fill or incineration.

Carpet: All carpet removed shall be separated and diverted to an appropriate reclaim manufacturer for incorporation into new products.

Paper Goods: Subcontractors are instructed to utilize the office refuse container for office waste.

Aluminum Cans: All on-site subcontractors are encouraged to utilize the on-site can recycling containers for the collection and redemption of cans and bottles. Containers shall be stationed at the office trailer compound, at the designated eating area, and stationed on each floor level.

Land Clearing Debris: All site waste shall be ground or chipped for use as soil stabilization, erosion control material. Excess material shall be hauled off-site for similar use to be documented.

Roof Material: Demolished roofing material can be processed for reuse as road base or alternate fuel blending.

Existing Furnishings: To be salvaged for donation to various charitable agencies or sold to private organizations.

Computers and Electronics: All remaining electronics shall be separated and stored in trailers to be hauled to a local recycling center. Please see Attachment A within the Appendix for the Construction Waste Summary Matrix.

III. Indoor Air Quality Management Plan

Downes is committed to improving the health and well-being of construction

Trade workers and post construction occupants of this project. Downes has developed this Indoor Air Quality Management Plan (IAQMP) to outline the potential contaminates, define levels of contamination, procedures for remediation, preventative actions to be taken, training of workers, and enforcement of these policies. Air quality issues arising from construction activities and products have the ability to affect the health of on-site workers, occupants, as well as the end users. Through collaboration with the Owner, and Design Team, we will lead the effort to educate workers to effectively employ these policies in order to achieve our goals to provide a clean and healthy environment for the construction staff, students and faculty of Old Greenwich School project. It is our intent to ensure the achievement of IEQc3.1 Mandatory requirements and applicable points. Per Sec. 01-81-13 (16a-38k-3(e))

It is important for trade subcontractors to realize that considerable effort has been taken in the design phase of the project. Therefore, it is imperative that materials be supplied and installed consistent with the sustainable design requirements specified in sec. 018113. Old Greenwich School project has been designed to high performance standards for schools as required by CTHPBS. Mechanical trades are obligated to maintain the design intent and collaborate with the Design Team to ensure that the integrity of these systems is not compromised by substituted products or changes in the field. **Team members are encouraged to be innovative and make suggestions to improve and surpass minimum requirements. All suggestions will be given thoughtful consideration for the betterment of the project.**

Downes will be the administrator of this management plan; we will oversee the training, implementation, enforcement and testing procedures outlined. All subcontractors shall share these responsibilities and are expected to promote good air quality practices with their employees. All subcontractors have a fiduciary responsibility to abide by the requirements of this plan and the sustainable design specifications contained in the contract documents. Failure to abide by these procedures shall result in costs of remediation and retraining to be passed on to the non-compliant subcontractor.

Documentation of compliance shall consist of:

A. Photographs taken monthly and submitted to the CTHPB Coordinator.

B. Subcontractors shall submit photos demonstrating compliance with monthly requisitions (e.g. SMACNA approach employed, storage and protection of materials).

C. All workers shall receive orientation on IAQ Best Management Practices (BMP's) upon arrival at the site. Each worker will be issued a I.D. hard hat sticker indicating they have completed training in sustainable building practices for Old Greenwich School project.

D. Products submitted must comply with Specification 018113 sustainability requirements.

E. Approved products shall be supplied and installed on-site. Downes, the Owner and Design Team will make periodic inspections to verify products installed are consistent with approved submittals. Compliance reports will be submitted to Downes and forwarded to the CTHPB Coordinator for record.

F. IAQ compliance will be reviewed weekly and documented in the minutes of the subcontractor progress meeting, as well as the foreman's meetings.

G. Housekeeping activities shall be reviewed and documented in the minutes of the subcontractor and foreman's progress meetings.

H. Environmental Air Testing must be scheduled as milestone dates on the master construction schedule. Preconstruction, post construction and pre-occupancy testing shall be documented and submitted to the CTHPB Coordinator.

I. This project will require the use of existing or newly installed HVAC systems during the phases of construction. The Mechanical/HVAC Contractor, in conjunction with the Design Team shall draft a sequence of operation for the start-up, protection and maintenance of these systems to ensure cleanliness and longevity of the equipment. This procedure will be reviewed and approved by the Design Team and Owner. A log of filter changes and service reports will be submitted to the CTHPB Coordinator for documentation.

J. Daily monitoring and servicing of filters will be the responsibility of the Mechanical/HVAC Contractor. The Mechanical/HVAC Contractor shall document via work orders and inspection logs and submitted to Downes on a weekly basis.

K. The overall project and production schedules shall be drafted with consideration of IAQ tasks (i.e. testing, building flush out, and commissioning).

L. Subcontractors will provide all CTHPB specific close-out documents prior to the release of retainage payments.

Source Control:

Old Greenwich School is an addition and renovations project to existing structures. Potential environmental contamination from asbestos, PCB, lead, mold and other contaminates should be considered in the planning of daily tasks. Subcontractors shall make themselves familiar with the Pre-Renovation Investigation Survey for Hazardous Materials included in the contract Documents.

A. Construction activities that involve; cutting, drilling, sawing, grinding, or sanding, will re- quire a job hazard analysis that details a risk of exposure and preventative measures to be taken to contain, diminish or eliminate the creation of dust.

B. Construction activities that employ the use of equipment for cutting, welding, soldering or brazing; shall require a job hazard analysis to determine how to eliminate or mitigate combustion exhaust.

C. Construction activities that require the use of chemicals that produce odor or off-gassing exposed to the indoor atmosphere, shall require a job hazard analysis to identify BMP's to ventilate the area and protect form long lasting impacts that could affect the post construction environment.

D. Trade workers will be advised that there is **NO smoking** or use of smokeless tobacco products and Vapor Devices on-site in compliance with IAQ (3i).

E. Trade workers shall utilize designated areas for eating and keep these areas clean of food debris at all times. Food and drinks (other than water) will not be allowed outside of these designated areas.

F. Trade workers will utilize the temporary sanitary facilities for the project. The use of permanently installed fixtures will not be permitted.

Classifications of IAQ conditions are separated into three classes in order to evaluate control measures. Reference: SMACNA IAQ Guidelines for Occupied Buildings Under Construction 1995 Chapter 5.2.

- **Class 1:** Air pollutants that have a nuisance impact to occupant or worker (i.e. light duty short duration work that contains no concern for asbestos or lead contamination such as sweeping). This classification affects sensitive individuals who are predisposed for reaction due to allergy or other ailment.
- **Class 2:** Air pollutants that cause moderate, but temporary health impacts on the occupant or worker (i.e. activities that produce odor or dust that affect a larger area (demolition of walls, floor or ceiling, that have no concern for asbestos or lead contamination however may contain mold). This classification would affect generally healthy individuals.
- **Class 3:** Pollutants that could cause severe, acute, or chronic illness (i.e. exposure to asbestos or lead, roof tar, application of enamel paints, epoxy resins, unventilated operation of diesel or gas powered equipment). This classification would affect all persons exposed, with a high risk of injury.

Pathway Interruption:

Downes shall require all on-site subcontractors to employ the following control and prevention measures. Additional BMP's may be required to suit specific job conditions that may be encountered at a later date. Reference SMACNA IAQ Guidelines for Occupied Buildings Under Construction 1995, Chapter 3 and US EPA IAQ Design Tools for Schools Construction and Moisture Control.

A. Keep building materials dry. Reject materials delivered that show previous exposure or have mold growth. Cover and protect new materials from exposure.

B. Dry exposed material within 24 hours. Discard material that has been damp or wet for more than 72 hours.

C. Clean spills immediately to prevent absorption into porous surfaces.

D. Seal all openings in walls floors and ceilings to prevent transfer of contaminates between spaces, condensation, mold and rodents etc.

E. Temporary seal duct work from construction dust and contaminates during installation.

F. Mechanical/HVAC contractor shall be responsible for daily monitoring of humidity levels within the building to ensure that the permanently installed HVAC systems maintain design R.H. or less which should be a maximum of 60% or less.

G. Ventilate as needed; exchange air to dissipate volatile organic compound (VOC) or wet conditions. Determination of means to ventilate and control odor will be made by the installing contractor.

H. Provide spot ventilation for concentrate installation areas for VOC emitting products (duration 72 hours) Determination of means to ventilate and control odor will be made by the installing contractor.

I. Require workers to wear respirators while installing VOC emitting products.

J. Reduce construction dust. Utilize vacuum assisted drywall sanding and vacuums instead of broom sweeping whenever possible.

K. Dry sanding of gypsum; sequence activity so that it does not contaminate other finishes, provide a thorough job hazard analysis and provide worker protection.

L. Avoid the use of internal combustion engines indoors.

M. Store liquids outdoors. Subcontractors shall provide containers to contain toxic liquids out- side of the building to mitigate spills and odors.

N. Utilize non-toxic cleaning chemicals.

P. Interrupt pathways, by erecting barriers, dust curtains, or plastic sheets to prevent unwanted air flow.

Q. Each construction entrance shall utilize clean gravel or walk off mats to limit foot traffic dirt from migrating through the building.

R. Do not store construction products and materials in mechanical rooms. S.

Utilize low VOC products. Do not store materials in a concentrated area.

T. Protect materials not in use by covering or relocating them to a clean area. U.

Maintain the building envelope from weather exposure at all times.

V. Remove accumulated water as soon as possible. Do not install material that has a high moisture content or has visible signs of mold or moisture.

W. Store materials on pallets or dunnage to promote good air flow to keep the material dry.

X. Suppress dust by wetting or sweeping compounds. Utilize a wet mop or vacuum with a high efficiency filter whenever possible.

Downes shall draft the production schedule with respect for sequencing tasks that require significant time to dissipate emissions from finishes. Whenever possible odor-emitting finishes will be applied prior to the installation of porous or absorptive materials such as ceiling tile and carpet. The project schedule will provide sufficient time for building flush out, and environmental testing and certification prior to occupancy.

Indoor Air Quality Testing Prior to Occupancy will be conducted (only if necessary) by an independent agency. The testing agent will perform a complete hygienic test of indoor air quality to satisfy the maxi- mum allowable levels outlined in Sec.01-8113.23 3.4. (for CO2, TVOC, formaldehyde, 4-phenylcycohexane, and particulates.). Flushing shall be conducted in coordination with building commissioning EAp1/EAc3.
An action plan for corrective action for correction of unfavorable readings will be to verify the source of the contamination, correct or eliminate the source; re-ventilation of the area and per- form testing at the expense of the contractor responsible for the installation or introduction of the source of the failed testing.

In conclusion, it is the responsibility of all team members of Old Greenwich School to endorse and promote sustainable Indoor Air Quality practices. It is through education and diligent implementation that we will achieve the goals of this program. Subcontractors shall be reminded of their contractual obligations with regard to the Indoor Air Quality Management Plan and its successful implementation. Any costs of investigation and remediation of foreign substances shall become the responsibility of the offending contractor.

See Attachments A, C, and D within the Appendix for the schedule of potential sources of odor and dust (Source Control Matrix) and the Material Delivery Verification Form.

IV. Storm Water Pollution Control Plan

Downes in accordance with Specification 312319 the Storm water Pollution Control Plan (SWPCP) will be a delegated design by the Sitework Subcontractor. This plan is to be drafted in accordance with the general permit for the discharge of storm water and dewatering waste waters associated with construction activities, per the State of Connecticut's Department of Environmental Projection issuance Date April 9, 2010. CTHPB (SSp1)

Downes will implement erosion and sedimentation control inspection and maintenance practices as applicable to all construction activities conducted at Old Greenwich School. All subcontractors/employees employed on-site shall be oriented in the Best Management Practices (BMP's), as well as enforcement and documentation policies of this program. All workers will receive an orientation prior to their first day of work on-site to ensure they are aware and acknowledge their personal responsibility to eliminate storm water pollution discharges from the site.

Downes will conduct weekly inspections and document compliance as required by the SWPCP maintenance plan. More frequent inspections shall be made as required by weather events or exceptional construction activities that require added protective measures. Downes will designate an agent of the site contractor to implement and maintain all BMP's for the duration of the project. They will share the responsibility for inspection and compliance to this plan.

V. Material and Resources

As detailed by the project requirements and our on-going commitment to sustainable building Practices, Downes will collaborate with the Design Team to develop accurate and achievable goals for inclusion into bid documents. Through our process of scope confirmation; we will ensure that subcontractors have a clear understanding of their responsibilities to provide detailed submittals and supporting documents to make certain of compliance with Specification Sec 018113. Downes shall implement work practices, and encourage exemplary performance from all subcontractors to achieve **Material and Resource Credits MRc2-7**. We will continue to lead subcontractors through the submission process and continue on-site education of workers to ensure proper verification of installed materials. Success is achieved by diligent record keeping and verification of materials delivered to the site and can only be accomplished by leadership and commitment to these goals both in the office and the field.

Construction Waste Management Credit MRc2:

Reference Section II. of this plan.

Recycled Content MRc4:

All subcontractors are required to supply materials in accordance with the requirements of MRc4&5. All products supplied to the Old Greenwich School shall have recycle content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 20% of the total value of materials in the project Subcontractors shall submit clear and unequivocal documentation for calculations to achieve this credit via the attached Product Compliance Worksheet (see Attachment E within the Appendix). All subcontractors shall submit follow-up documentation as the project progresses for material deliveries and installations, via the attached Material Verification Sheet. (See Attachment D within the Appendix)

Regional Materials MRc5:

All subcontractors are required to supply materials in accordance with the requirements of RM Credit d10. All products supplied to Old Greenwich School shall be extracted, harvested, or recovered and manufactured within 500 miles from the project site. Subcontractors shall submit clear and unequivocal documentation for calculations to achieve 20% of all products supplied to the site meets this credit's requirements (see Attachment F within the Appendix).

Certified Wood MRc7:

All subcontractors are required to supply materials in accordance with the requirements of MRc7. All wood products supplied to the Old Greenwich School shall meet the requirements of the Forest Stewardship Council's (FSC) Principles and criteria for wood components. These components shall include structural framing and dimensional framing, flooring, subflooring, wood doors, millwork, and finishes, etc. Subcontractors shall submit clear and unequivocal documentation of calculations to achieve a minimum of 50% of all products supplied to the site, via the attached Product Compliance Worksheet (see Attachment G within the Appendix). All subcontractors shall submit follow-up documentation as the project progresses of material deliveries and installations, via the attached Material Verification sheet (see Attachment C within the Appendix). Refer to MR Credit 7 Requirements LEED for Schools 2009.

See attachments as applicable to these credit categories as well as the LEED for Schools reference Guide as a resource for compliance.

Downes will compile subcontractor information as part of the submittal process. Follow-up documentation will be a requirement of the monthly requisition process. All subcontractor information shall be included in the project master worksheet for submission at the conclusion of the construction phase. Subcontractors shall be reminded of their fiduciary responsibility to provide this information timely as part of our weekly subcontractor progress meetings.

DOWNES
CONSTRUCTION

Contractor Certification Statement
Additions and Renovations to:
Old Greenwich School
285 South Beach Ave, Old Greenwich, CT 06870

The General Contractor and or Subcontractor(s) that will implement the pollution control measures described in the SWPCP must be identified below. Each must sign a statement certifying that they understand the General Permit authorizing storm water discharges during construction these statements will be maintained in the SWPCP file on site.

Contractor implementing the SWPCP:

_____
Business Name

_____
_____
Business Address

_____
Business Telephone #

Certification: [note requirements in DEEP-WPED-GP-015, sec.5-b-viii(b)]

"I certify under penalty of law that I have read and understand the terms and conditions of the General Permit for discharge of Stormwater and Dewatering Wastewaters from Construction Activities. I understand that as a contractor or subcontractor at the site, I am authorized by this general permit, and must comply with the terms and conditions of this general permit, including, but not limited to, the requirements of the Stormwater Pollution Control Plan prepared for the site. Drawing Title: DRAWING LIST

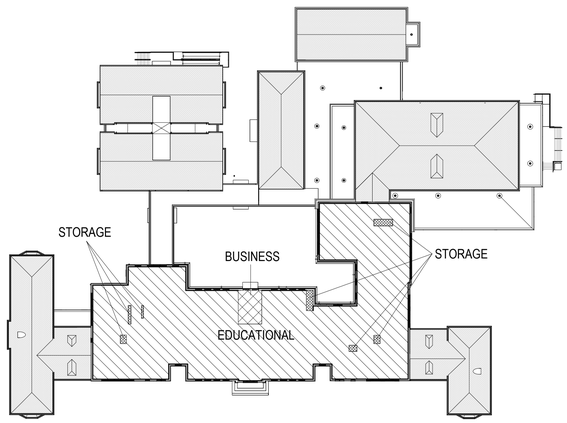
Project Phase: ISSUED FOR BID 03/19/2025

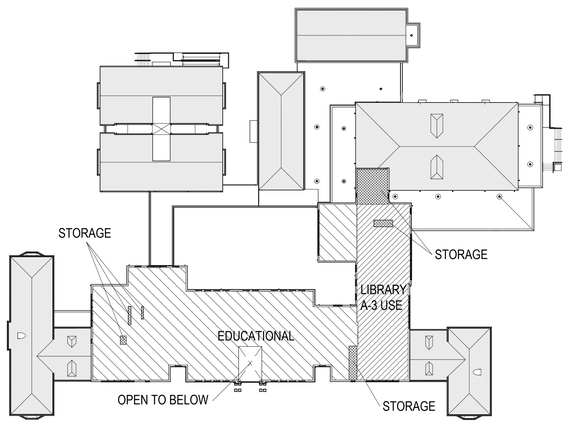
State Project Number: STATE PROJECT #057-0115 EA/RR/CV

Date: 11/22/2024



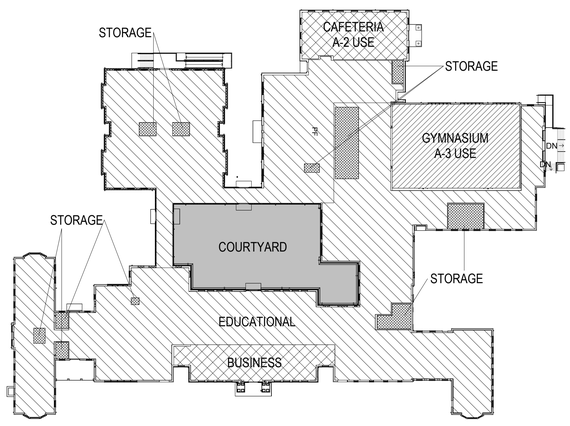
Scale: 12" = 1'-0"

Drawn By: JM



Project Number: 22-382

Drawing Number: G000



3/19/2025 3:48:59 PM

3 3rd FLOOR - OCCUPANCY TYPE PLAN
1" = 40'-0"

2 2nd FLOOR - OCCUPANCY TYPE PLAN
1" = 40'-0"

1 1st FLOOR - OCCUPANCY TYPE PLAN
1" = 40'-0"

CODE INFORMATION - BUILDING "A" (PROPOSED - SPRINKLERED)

(Applicable to entire facility):

DATE OF ORIGINAL CONSTRUCTION	1902
DATE OF ADDITIONS	1949,1957,1980,1995
DATE OF PROPOSED ALTERATIONS	2025

1. GROUP CLASSIFICATION (Chapter 3)

(First Floor)	E / B / S / A3
(Second Floor)	E / B / S
(Third Floor)	E / B / S

2. CONSTRUCTION TYPE (Chapter 6)

Existing Type

*Type **IIC** equivalent to Type **IIB**

IIIB, unprotected non-combustible, combustile (**"IIC**, "**IIC**), unprotected non-combustible

3. BUILDING HEIGHT (Chapter 5)

Allowable Height (story/feet)	3 / 75'-0"
Actual Height (story/feet)	3 / 45'-6"
(Stories Above Grade)	3

4. BUILDING AREA (Chapter 5)

1) Building Area (first floor level)		
Existing construction	32,538.26	sq.ft.
New construction	0	sq.ft.
Total floor	32,538.26	sq.ft.
2) Building Area (2nd floor)		
Existing construction	16,302.08	sq.ft.
New construction	0	sq.ft.
Total floor	16,302.08	sq.ft.
3) Building Area (3rd floor)		
Existing construction	15,810.80	sq.ft.
New construction	0	sq.ft.
Total floor	15,810.80	sq.ft.
4) Building Area (all floors)		
Existing construction	64,651.14	sq.ft.
New construction	0	sq.ft.
Total floors	64,651.14	sq.ft.

5. AREA MODIFICATIONS TO TABLE 506.2

	W	N	S	E
Total Perimeter =	442 ft.	305 ft.	328 ft.	422 ft.
Open Perimeter =	235 ft.	259 ft.	125 ft.	377 ft.

Total Frontage (F) 1,497 ft. (building perimeter which fronts on a public way or open space having 20 feet open min.)

Open Perimeter (P) 996 ft. (perimeter of the entire building)

Width of open space (W) = >30'

Percentage of Open Perimeter (996 ft / 1,497 ft) x 100 = 66.5 % As per Table 506.3.3, allowable increase = .50

EDUCATIONAL:	ASSEMBLY: A-3
Aa = At + (SM x If)	Aa = At + (SM x If)
SM = 43,500	SM = 28,500
Aa = 43,500 + (43,500 x .50)	Aa = 28,500 + (28,500 x .50)
Aa = 65,250 sq. ft. (Max allowable area)	Aa = 42,750 sq. ft. (Max allowable area)
BUSINESS:	STORAGE:
Aa = At + (SM x If)	Aa = At + (SM x If)
SM = 57,000	SM = 52,500
Aa = 57,000 + (57,000 x .50)	Aa = 52,500 + (52,500 x .50)
Aa = 85,500 sq. ft. (Max allowable area)	Aa = 78,750 sq. ft. (Max allowable area)

6. CASE 1 - NONSEPARATED OCCUPANCIES (508.3) - NOT USED

7. CASE 2 - ALLOWABLE AREA FOR SEPARATE OCCUPANCIES (508.4.2)

FIRST FLOOR LEVEL

TOTAL FLOOR AREA	64,651.14 sq. ft.
E USE FLOOR AREA	21,900 sq. ft.
A-3 USE FLOOR AREA	4,500 sq. ft.
B USE FLOOR AREA	2,210 sq. ft.
S-1 USE FLOOR AREA	1,650 sq. ft.

E ACTUAL FLOOR AREA E ALLOWABLE FLOOR AREA	21,900 sq. ft./ 65,250 sq. ft. = 0.336
A-3 ACTUAL FLOOR AREA A-3 ALLOWABLE FLOOR AREA	4,500 sq. ft./ 42,750 sq. ft. = 0.105
B ACTUAL FLOOR AREA B ALLOWABLE FLOOR AREA	2,210 sq. ft./ 85,500 sq. ft. = 0.026
S-1 ACTUAL FLOOR AREA S-1 ALLOWABLE FLOOR AREA	1,650 sq. ft./ 78,750 sq. ft. = 0.021
0.336 + 0.105 + 0.026 + 0.021 = 0.48	0.48 < 1.00

8. FIRE-RESISTANCE RATED REQUIREMENTS FOR BUILDING ELEMENTS
(Table 601, See Code Plans for specific designations)

1 Structural frame: including columns, girders, trusses	0	Hr(s)
2 Bearing walls:		
Exterior (Table 602)	2	Hr(s)
Interior	0	Hr(s)
3 Nonbearing walls & partitions Exterior (Table 602)	0	Hr(s)
4 Nonbearing walls & partitions Interior	0	Hr(s)
5 Floor Construction (including supporting beams & joists)	0	Hr(s)
6 Roof Construction (including supporting beams & joists)	0	Hr(s)
7 Shafts - EXITS - 3 stores or less	1	Hr(s)
Shafts - EXITS - 4 stores or more	2	Hr(s)
Shafts - Other	1	Hr(s)

CODE INFORMATION - BUILDING "B" (PROPOSED - SPRINKLERED)

(Applicable to entire facility):

DATE OF ORIGINAL CONSTRUCTION	----
DATE OF ADDITIONS	1995
DATE OF PROPOSED ALTERATIONS	2025

1. GROUP CLASSIFICATION (Chapter 3)

(First Floor)	E / B / S / A2

2. CONSTRUCTION TYPE (Chapter 6)

Existing Type	IIB
New Addition Type	IIB

3. BUILDING HEIGHT (Chapter 5)

Allowable Height (story/feet)	3 / 75'-0"
Actual Height (story/feet)	1 / 22'-0"
(Stories Above Grade)	1

4. BUILDING AREA (Chapter 5)

1) Building Area (first floor level)		
Existing construction	7,690.51	sq.ft.
New construction	7,635.24	sq.ft.
Total floor	15,325.75	sq.ft.

5. AREA MODIFICATIONS TO TABLE 506.2

	W	N	S	E
Total Perimeter =	306 ft.	244 ft.	241 ft.	202 ft.
Open Perimeter =	284 ft.	60 ft.	167 ft.	36 ft.

Total Frontage (F) 993 ft. (building perimeter which fronts on a public way or open space having 20 feet open min.)

Open Perimeter (P) 547 ft. (perimeter of the entire building)

Width of open space (W) = >30'

Percentage of Open Perimeter (547 ft / 993 ft) x 100 = 55.1 % As per Table 506.3.3, allowable increase = .50

EDUCATIONAL:	ASSEMBLY: A-2
Aa = At + (S1 x If)	Aa = At + (S1 x If)
S1 = 58,000	S1 = 38,000
Aa = 58,000 + (58,000 x .50)	Aa = 38,000 + (38,00 x .50)
Aa = 87,000 sq. ft. (Max allowable area)	Aa = 57,000 sq. ft. (Max allowable area)
BUSINESS:	STORAGE:
NONE	Aa = At + (S1 x If)
	S1 = 70,000
	Aa = 70,000 + (70,000 x .50)
	Aa = 105,000 sq. ft. (Max allowable area)

6. CASE 1 - NONSEPARATED OCCUPANCIES (508.3) - NOT USED

7. CASE 2 - ALLOWABLE AREA FOR SEPARATE OCCUPANCIES (508.4.2)

FIRST FLOOR LEVEL

TOTAL FLOOR AREA	15,325.75 sq. ft.
E USE FLOOR AREA	10,430 sq. ft.
A-2 USE FLOOR AREA	2,090 sq. ft.
S-1 USE FLOOR AREA	1,070 sq. ft.

E ACTUAL FLOOR AREA E ALLOWABLE FLOOR AREA	10,430 sq. ft./ 87,000 sq. ft. = 0.120
A-2 ACTUAL FLOOR AREA A-2 ALLOWABLE FLOOR AREA	2,090 sq. ft./ 57,000 sq. ft. = 0.037
S-1 ACTUAL FLOOR AREA S-1 ALLOWABLE FLOOR AREA	1,070 sq. ft./ 105,000 sq. ft. = 0.010
0.120 + 0.037 + 0.010 = 0.167	0.167 < 1.00

8. FIRE-RESISTANCE RATED REQUIREMENTS FOR BUILDING ELEMENTS
(Table 601, See Code Plans for specific designations)

1 Structural frame: including columns, girders, trusses	0	Hr(s)
2 Bearing walls:		
Exterior (Table 602)	0	Hr(s)

11. ACCESSIBLE BUILDING

X	Designated
	Non Designated

4 CODE PLAN - BUILDINGS/PERIMETER
1" = 40'-0"

12. MINIMUM PLUMBING FIXTURE COUNT (I.P.C. Chapter 4)
For each type of occupancy per entire facility

EDUCATIONAL (E) Group occupancy:

TOTAL Occupancy Load (Use E): (Design Load = 1,300)

	Required
W/C Male	13.00
W/C Female	13.00
Lavs Male	13.00
Lavs Female	13.00
D/F	13.00
Service Sink	1

ASSEMBLY (A-3) Group occupancy: (Gymnasium)

TOTAL Occupancy Load (Use A-3): (Design Load = 989)

	Required
W/C Male	3.96
W/C Female	7.61
Lavs Male	2.47
Lavs Female	2.47
D/F	1.98
Service Sink	1

ASSEMBLY (A-2) Group occupancy: (Cafeteria)

TOTAL Occupancy Load (Use A-3): (Design Load = 206)

	Required
W/C Male	1.37
W/C Female	1.37
Lavs Male	.52
Lavs Female	.52
D/F	.41
Service Sink	1

BUSINESS (B) Group occupancy:

TOTAL Occupancy Load (Use B): (Design Load = 54)

	Required
W/C Male	1.08
W/C Female	1.08
Lavs Male	.68
Lavs Female	.68
D/F	.54
Service Sink	1

STORAGE (S-1) Group occupancy:

TOTAL Occupancy Load (Use S-1): (Design Load = 15)

	Required
W/C Male	.08
W/C Female	.08
Lavs Male	.08
Lavs Female	.08
D/F	.02
Service Sink	1

TOTAL REQUIRED AND PROVIDED QUANTITY OF PLUMBING FIXTURES:
Use of unisex toilets and lavs within classrooms towards male and female count as approved by modification request no. M-xxx

	Required	Provided
W/C Male	(19.48)= 20	28
W/C Female	(23.14)= 23	24
All-Gender	----------	52
Total W/C	(42.62) = 43	52
Lavs Male	(16.74) = 17	20
Lavs Female	(16.74) = 17	19
Lavs All-Gender	----------	39
Total Lavs	(33.48) = 34	39
D/F	(15.95) = 16	19
Service Sink	5	10

MAXIMUM LENGTH OF EXIT TRAVEL
1. I.B.C. TABLE 1017.2 250 feet & 300 feet (B Use)

16. BUILDING AREAS FOR GRANT CALCULATION (ENTIRE FACILITY)
Per State Building Code Definition "Area, Building"
(to interior face of exterior walls, including openings and areas under projections)

Existing construction prior to this project	71,932.65	sq.ft.
Existing being demolished and removed	0	sq.ft.
New construction (Security vestibule and elevator)	7,635.24	sq.ft.
Total Building Area of entire facility	79,567.89	sq.ft.

Total Building Area (to interior face of exterior walls)

ENTIRE FACILITY:

	Existing	Demo	New	Total	Not in this phase	
						sq.ft.
1st Floor Level	39,819.77	0	7,635.24	47,455.01		sq.ft.
2nd Floor Level	16,302.08	0	0	16,302.08		sq.ft.
3rd Floor Level	15,810.80	0	0	15,810.80		sq.ft.
Total area (all floors)	71,932.65	0	0	79,567.89		sq.ft.

Total net area (reduced by spaces not in this phase) 0 sq.ft.

Areas of exterior canopies which are not included in the building areas:

Existing Canopy to be demolished	155.85	sq.ft.
New Canopies	191.35	sq.ft.

Total constructed building area (to exterior face of exterior walls - "contractor area")

ENTIRE FACILITY:

ENTIRE FACILITY:

	Existing	Demo	New	Total	Not in this phase	
						sq.ft.
1st Floor Level	39,819.77	0	7,635.24	47,455.01		sq.ft.
2nd Floor Level	16,302.08	0	0	16,302.08		sq.ft.
3rd Floor Level	15,810.80	0	0	15,810.80		sq.ft.
Total area (all floors)	71,932.65	0	0	79,567.89		sq.ft.

Total net area (reduced by spaces not in this phase) 0 sq.ft.

ROOF NOTE:
AS PER 2021 IECC, TABLE C402.1.3, CONTINUOUS INSULATION ON ROOF DECKS OVER ENCLOSED SPACES SHALL BE R-30 MINIMUM.

PROVIDE POLYISOCYANURATE RIGID INSULATION, 5" THICK BASE AND TAPERED STARTING AT 1/2" MIN. THICKNESS AT TOP. MINIMUM TOTAL THICKNESS SHALL BE 5 1/2" = R- ± 31.5

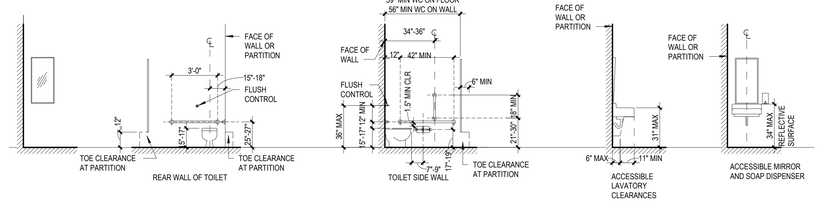
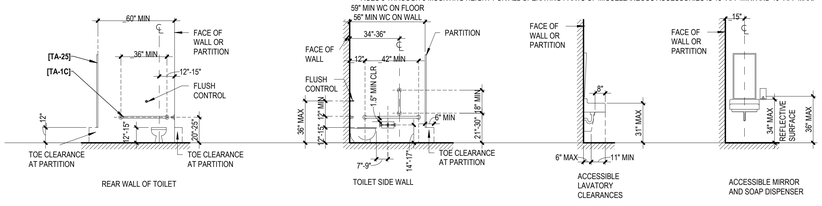
ADA - BUILDING BLOCKS FOR ACCESSIBLE CLEARANCES



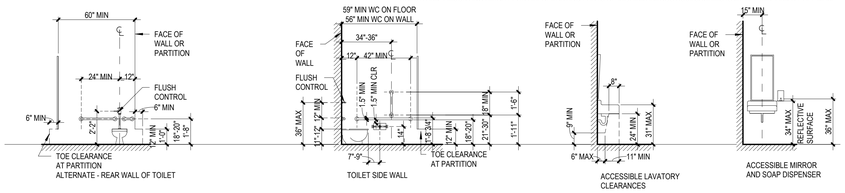
TYPICAL H.C. MANEUVERING CLEARANCES AT DOORS

A117.1-2017 REQUIRES 52 MIN. FOR NEW BUILDINGS



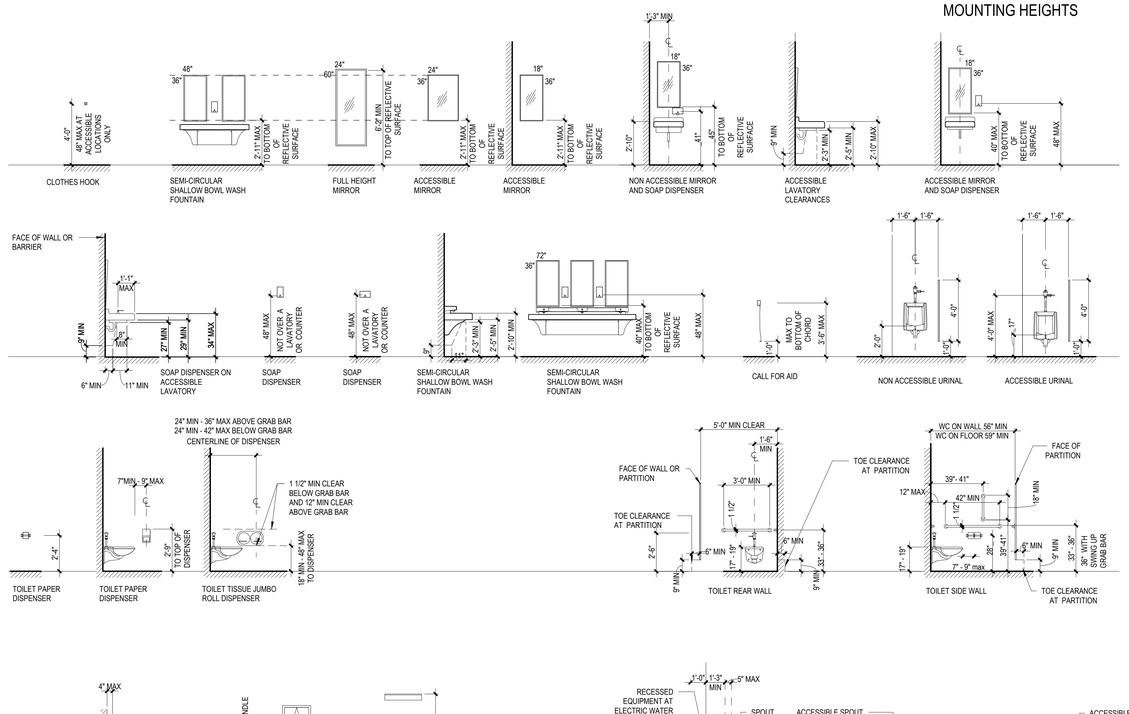
ADA - CHILDREN MOUNTING HEIGHTS AGES 9-12

AGES 9 THROUGH 12 MOUNTING HEIGHT FOR ALL OPERATING PARTS OF MISCELLANEOUS ACCESSORIES IS 16" AFF MIN. AND 44" AFF MAX.



ADA - KINDERGARTEN MOUNTING HEIGHTS AGES 5-8

AGES 5 THROUGH 8 MOUNTING HEIGHT FOR ALL OPERATING PARTS OF MISCELLANEOUS ACCESSORIES IS 18" AFF MIN. AND 40" AFF MAX.



ADA - PRE-K MOUNTING HEIGHTS AGES 3-4

AGES 3 AND 4 MOUNTING HEIGHT FOR ALL OPERATING PARTS OF MISCELLANEOUS ACCESSORIES IS 20" AFF MIN. AND 36" AFF MAX.

MOUNTING HEIGHTS

NOTES

1. WASTE AND HOT WATER PIPING TO BE INSULATED AT ACCESSIBLE LAVATORIES AND SINKS
2. ADULT FLUSH CONTROLS FOR WATER CLOSETS AND URINALS SHALL BE MOUNTED ON THE OPEN / WIDE SIDE OF THE WATER CLOSET.
3. ADULT MOUNTING HEIGHT FOR ALL OPERATING PARTS OF MISCELLANEOUS ADULT ACCESSORIES IS 15" AFF MIN. AND 48" AFF MAX. (FIRE ALARMS, SECURITY, THERMOSTATS, ETC.)
4. PROVIDE CONCEALED SOLID BLOCKING IN STUD WALLS FOR ACCESSORY MOUNTING.
5. REFER TO PLANS AND ELEVATIONS FOR REQUIRED ACCESSORIES.
6. ALL "MIN" DIMENSIONS FOR ACCESSORY MOUNTING HEIGHTS ARE TO BE CONSIDERED CLEAR DIMENSIONS TO FINISH SURFACE, UNLESS INDICATED OTHERWISE
7. ALL DIMENSIONS SHOWN ON THIS SHEET ARE TYPICAL UNLESS OTHERWISE NOTED ELSEWHERE IN THIS DOCUMENT SET
8. ALL DIMENSIONS TO HORIZONTAL GRAB BARS ARE TO THE TOP OF THE GRIPPING SURFACE FROM THE FINISHED FLOOR.

State Project Number: STATE PROJECT #057-0115 EA/RR/CV

Date: 11/22/2024
Scale: 1/16" = 1'-0"
Drawn By: JM
Project Number: 22-382

Drawing Number: G015

3/19/2025 12:38:55 PM

CODE REFERENCE PLAN LEGEND

OFFICE 2345C	ROOM NAME & NUMBER
	ROOM OCCUPANCY LOAD
875 / 20 = 43P	AREA IN SQUARE FEET / OCCUPANCY LOAD FACTOR = ROOM OCCUPANCY LOAD (PEOPLE)
B | 200 — 20,000SF/150	USE GROUP | ALLOWABLE OCCUPANT LOAD — AREA IN SQUARE FEET/ LOAD FACTOR IN SQUARE FEET
	EXIT CAPACITY
1P / 165P	ACTUAL EGRESS OCCUPANCY OF DOOR / STAIR — MAX. ALLOWABLE EGRESS OCCUPANCY OF DOOR OR STAIR OR RAMP
150 → 200 / 50 →	DIRECTION OF TRAVEL WITH ACCUMULATED OCCUPANCY LOAD
200' T.D.	MAXIMUM TRAVEL DISTANCE (T.D.) FROM FURTHEST POINT
	ACCESSIBLE AREA OR EXIT
	FLUSH CONDITION - 1/2" MAXIMUM ELEVATION CHANGE
	1 HOUR FIRE RATED WALL TIGHT TO DECK ABOVE (SMOKE TIGHT)
	2 HOUR FIRE RATED WALL TIGHT TO DECK ABOVE (SMOKE TIGHT)
	SMOKE TIGHT TO DECK ABOVE. SEAL AROUND ALL PENETRATIONS TO ACHIEVE SMOKE TIGHT CONSTRUCTION
F.E.(C)	FIRE EXTINGUISHER (CABINET)
AOR	AREA OF REFUGE
R	REQUIRED EXTERIOR EXIT

DOOR CLEAR EGRESS WIDTHS

0P / 165P	3'-0" DOOR (33" CLR.)
0P / 195P	3'-6" DOOR (39" CLR.)
0P / 225P	4'-0" DOOR (45" CLR.)
0P / 337P	6'-0" DOOR (68" CLR.)
0P / 330P	6'-0" DOOR WITH 2" REMOVABLE MULLION (66" CLR.)
0P / 396P	7'-0" DOOR (80" CLR.)
0P / 386P	7'-0" DOOR WITH 2" REMOVABLE MULLION (78" CLR.)

TRAVEL DISTANCE + COMMON PATH

EDUCATION (E) AND ASSEMBLY (A) WITH SPRINKLER SYSTEM
- COMMON PATH OF EGRESS TRAVEL = 75'-0"
- TRAVEL DISTANCE = 250'-0"

BUSINESS (B) WITH SPRINKLER SYSTEM
- COMMON PATH OF EGRESS TRAVEL = 100'-0"
- TRAVEL DISTANCE = 300'-0"

STORAGE (S) WITH SPRINKLER SYSTEM
- COMMON PATH OF EGRESS TRAVEL = 100'-0"
- TRAVEL DISTANCE = 400'-0"

MAXIMUM FLOOR AREA PER OCCUPANT

1 1st FLOOR HAZARDOUS BUILDING MATERIALS ABATEMENT PLAN - PART "A"

GENERAL NOTES:

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR THE VERIFICATION OF ALL EXISTING CONDITIONS, QUANTITIES, AND FOR NOTIFYING THE CONSULTANT OF ANY DISCREPANCIES PRIOR TO FINALIZING BID.
2. ABATEMENT AND REMEDIATION IN ALL AREAS WILL START WITH SELECTIVE DEMOLITION AND REMOVING MATERIALS AT THE CEILING LEVEL AND END WITH THE MATERIALS AT THE FLOORING LEVEL. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL COORDINATE AND PERFORM ENOUGH SELECTIVE DEMOLITION/DEMOLITION TO IDENTIFY/LOCATE AND ACCESS ALL MATERIALS TO BE REMOVED/ABATED/REMEDIATED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL OPEN UP WALLS, AND CEILINGS TO CHECK FOR HIDDEN PIPING, DUCT, ETC. AS WELL AS DEMOLISHING MILLWORK, CABINETRY, NON-MOVEABLE OBJECTS, LAYER(S) OF FLOORING, WALLS, MATERIALS ATTACHED TO WALLS, ETC. TO LOCATE KNOWN AND POTENTIAL ASBESTOS AND ASSUMED PCB CONTAINING MATERIALS. INTERIOR AND EXTERIOR SELECTIVE DEMOLITION/DEMOLITION AND PROBING MUST OCCUR THROUGHOUT THE WORK AREAS BEFORE CONTAINMENT CONSTRUCTION AND ABATEMENT CAN START. ASSUME THE ABATEMENT WORK WILL INCLUDE FULL CONTAINMENTS THROUGHOUT THE ENTIRE INTERIOR OF THE BUILDING EXCEPT THE 1995 ADDITION. EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER IS/ARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOILS/ASPHALT/CONCRETE/ETC. AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS)

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

1 1st FLOOR HAZARDOUS BUILDING MATERIALS ABATEMENT PLAN - PART "B"

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS):

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR/WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

GENERAL NOTES:

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR THE VERIFICATION OF ALL EXISTING CONDITIONS, QUANTITIES, AND FOR NOTIFYING THE CONSULTANT OF ANY DISCREPANCIES PRIOR TO FINALIZING BID.
2. ABATEMENT AND REMEDIATION IN ALL AREAS WILL START WITH SELECTIVE DEMOLITION AND REMOVING MATERIALS AT THE CEILING LEVEL AND END WITH THE MATERIALS AT THE FLOORING LEVEL. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL COORDINATE AND PERFORM ENOUGH SELECTIVE DEMOLITION/DEMOLITION TO IDENTIFY/LOCATE AND ACCESS ALL MATERIALS TO BE REMOVED/ABATED/REMEDIATED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL OPEN UP WALLS, AND CEILINGS TO CHECK FOR HIDDEN PIPING, DUCT, ETC. AS WELL AS DEMOLISHING MILLWORK, CABINETRY, NON-MOVEABLE OBJECTS, LAYER(S) OF FLOORING, WALLS, MATERIALS ATTACHED TO WALLS, ETC. TO LOCATE KNOWN AND POTENTIAL ASBESTOS AND ASSUMED PCB CONTAINING MATERIALS. INTERIOR AND EXTERIOR SELECTIVE DEMOLITION/DEMOLITION AND PROBING MUST OCCUR THROUGHOUT THE WORK AREAS BEFORE CONTAINMENT CONSTRUCTION AND ABATEMENT CAN START. ASSUME THE ABATEMENT WORK WILL INCLUDE FULL CONTAINMENTS THROUGHOUT THE ENTIRE INTERIOR OF THE BUILDING EXCEPT THE 1995 ADDITION. EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER IS/ARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOIL/ASPHALT/CONCRETE/ETC. AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

TO LOCATE KNOWN AND POTENTIAL ASBESTOS AND ASSUMED PCB CONTAINING MATERIALS. INTERIOR AND EXTERIOR SELECTIVE DEMOLITION/DEMOLITION AND PROBING MUST OCCUR THROUGHOUT THE WORK AREAS BEFORE CONTAINMENT CONSTRUCTION AND ABATEMENT CAN START. ASSUME THE ABATEMENT WORK WILL INCLUDE FULL CONTAINMENTS THROUGHOUT THE ENTIRE INTERIOR OF THE BUILDING EXCEPT THE 1995 ADDITION. EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER IS/ARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOIL/ASPHALT/CONCRETE/ETC, AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS)

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER ISIARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOILS/ASPHALT/CONCRETE/ETC. AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS)

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

GENERAL NOTES:

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR THE VERIFICATION OF ALL EXISTING CONDITIONS, QUANTITIES, AND FOR NOTIFYING THE CONSULTANT OF ANY DISCREPANCIES PRIOR TO FINALIZING BID.
2. ABATEMENT AND REMEDIATION IN ALL AREAS WILL START WITH SELECTIVE DEMOLITION AND REMOVING MATERIALS AT THE CEILING LEVEL AND END WITH THE MATERIALS AT THE FLOORING LEVEL. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL COORDINATE AND PERFORM ENOUGH SELECTIVE DEMOLITION/DEMOLITION TO IDENTIFY/LOCATE AND ACCESS ALL MATERIALS TO BE REMOVED/ABATED/REMEDIATED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL OPEN UP WALLS, AND CEILINGS TO CHECK FOR HIDDEN PIPING, DUCT, ETC. AS WELL AS DEMOLISHING MILLWORK, CABINETRY, NON-MOVEABLE OBJECTS, LAYER(S) OF FLOORING, WALLS, MATERIALS ATTACHED TO WALLS, ETC. TO LOCATE KNOWN AND POTENTIAL ASBESTOS AND ASSUMED PCB CONTAINING MATERIALS. INTERIOR AND EXTERIOR SELECTIVE DEMOLITION/DEMOLITION AND PROBING MUST OCCUR THROUGHOUT THE WORK AREAS BEFORE CONTAINMENT CONSTRUCTION AND ABATEMENT CAN START. ASSUME THE ABATEMENT WORK WILL INCLUDE FULL CONTAINMENTS THROUGHOUT THE ENTIRE INTERIOR OF THE BUILDING EXCEPT THE 1995 ADDITION. EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER IS/ARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOIL/ASPHALT/CONCRETE/ETC. AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS)

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

TO LOCATE KNOWN AND POTENTIAL ASBESTOS AND ASSUMED PCB CONTAINING MATERIALS. INTERIOR AND EXTERIOR SELECTIVE DEMOLITION/DEMOLITION AND PROBING MUST OCCUR THROUGHOUT THE WORK AREAS BEFORE CONTAINMENT CONSTRUCTION AND ABATEMENT CAN START. ASSUME THE ABATEMENT WORK WILL INCLUDE FULL CONTAINMENTS THROUGHOUT THE ENTIRE INTERIOR OF THE BUILDING EXCEPT THE 1995 ADDITION. EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER (S)ARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOIL/ASPHALT/CONCRETE/ETC. AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS)

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

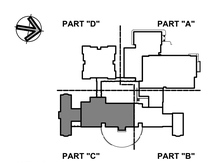
Drawing Title: THIRD FLOOR HAZARDOUS BUILDING MATERIALS ABATEMENT PLAN - PART "B"
Date: 11/22/2024
Scale: N.T.S.
Drawn By: HHG/MM
Project Phase: ISSUED FOR BID 03/19/2025
State Project Number: STATE PROJECT #057-0115 EA/RR/CV
Project Number: 22-382
Drawing Number: HBM-06

12/29/2023 11:23:24 PM

Filename: \\langan.com\data\NH\data8\140285802\Project Data\Specifications\CAD\Third Floor HBMAP.dwg Date: 3/18/2025 Time: 17:05 User: hgriesbach Style Table: Langan.stb Layout: HBM-06



GENERAL NOTES:

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR THE VERIFICATION OF ALL EXISTING CONDITIONS, QUANTITIES, AND FOR NOTIFYING THE CONSULTANT OF ANY DISCREPANCIES PRIOR TO FINALIZING BID.
2. ABATEMENT AND REMEDIATION IN ALL AREAS WILL START WITH SELECTIVE DEMOLITION AND REMOVING MATERIALS AT THE CEILING LEVEL AND END WITH THE MATERIALS AT THE FLOORING LEVEL. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL COORDINATE AND PERFORM ENOUGH SELECTIVE DEMOLITION/DEMOLITION TO IDENTIFY/LOCATE AND ACCESS ALL MATERIALS TO BE REMOVED/ABATED/REMEDIATED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL OPEN UP WALLS, AND CEILINGS TO CHECK FOR HIDDEN PIPING, DUCT, ETC. AS WELL AS DEMOLISHING MILLWORK, CABINETRY, NON-MOVEABLE OBJECTS, LAYER(S) OF FLOORING, WALLS, MATERIALS ATTACHED TO WALLS, ETC. TO LOCATE KNOWN AND POTENTIAL ASBESTOS AND ASSUMED PCB CONTAINING MATERIALS. INTERIOR AND EXTERIOR SELECTIVE DEMOLITION/DEMOLITION AND PROBING MUST OCCUR THROUGHOUT THE WORK AREAS BEFORE CONTAINMENT CONSTRUCTION AND ABATEMENT CAN START. ASSUME THE ABATEMENT WORK WILL INCLUDE FULL CONTAINMENTS THROUGHOUT THE ENTIRE INTERIOR OF THE BUILDING EXCEPT THE 1995 ADDITION. EXTERIOR ABATEMENT/REMEDIATION WILL BE EITHER PERFORMED IN CONTAINMENT (INTERIOR) OR THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL INSTALL POLYETHYLENE SHEETING ON THE INTERIOR OF THE BUILDING AND REMOVE MATERIALS FROM THE EXTERIOR. ALL GROUND AND ROOF SURFACES MUST ALSO BE PROTECTED WITH TARPS, PLYWOOD AND TWO LAYERS OF 10-MIL REINFORCED POLYETHYLENE SHEETING. THIS GROUND PROTECTION MUST EXTEND AT LEAST 20 FEET AWAY FROM THE BUILDING FOUNDATION (OR FARTHER - ENOUGH TO PREVENT BUILDING MATERIALS FROM TOUCHING UNPROTECTED GROUND AND FLOOR SURFACES). THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY FOR ALL CONTAMINATION/REMEDIATION/ABATEMENT OF INTERIOR AND EXTERIOR SURFACES, INCLUDING GROUND SURFACES IF LANGAN DEEMS THEY HAVE CONTAMINATED THESE SURFACES. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL SUPPLY LIFTS, SCAFFOLDING, STAGING, ETC. TO LANGAN IN AREAS OF REMEDIATION/ABATEMENT UNTIL ALL VISUAL INSPECTIONS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PROVIDE TEMPORARY SHORING IN AREAS THAT REQUIRE IT.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/DEMOLITION CONTRACTOR SHALL ONLY USE HEAVY EQUIPMENT OPERATORS THAT HAVE PROPER ASBESTOS AND/OR HAZWOPER TRAINING WHEN DISTURBING/REMOVING/MOVING AND LOADING ASBESTOS, LEAD, AND PCB CONTAINING MATERIALS. ACCEPTABLE TRAINING FOR ASBESTOS CAN BE 32 OR 40 HOUR ASBESTOS WORKER/SUPERVISOR WITH ANNUAL REFRESHER TRAINING. 40 HOUR HAZWOPER TRAINING AND ANNUAL REFRESHER TRAINING IS REQUIRED FOR OPERATORS HANDLING LEAD AND/OR PCB CONTAINING/CONTAMINATED MATERIALS. ALL OPERATORS MUST ALSO HAVE CURRENT MEDICAL, FIT TEST DATA, AND WEAR RESPIRATORS DURING WORK. ALL CONTRACTORS MUST COMPLY WITH ALL APPLICABLE OSHA LEAD REGULATIONS AND THIS WORK (AND ALL CORRESPONDING OSHA REGULATION COMPLIANCE) IS INCLUDED IN THE BASE BID.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS MUST SUBMIT LANDFILL INFORMATION TO LANGAN AND THE OWNER PRIOR TO THE SHIPMENT OF ANY WASTE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S)/HAULER(S) CANNOT SHIP WASTE UNTIL LANGAN AND THE OWNER HAVE APPROVED THE LANDFILL THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR/HAULER IS/ARE PROPOSING TO SHIP THE WASTE TO. ALL PCB TCLP SAMPLING OF THE WASTE MUST BE PERFORMED BY THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR (IF TESTING IS APPROVED BY LANGAN AND THE OWNER) WITH LANGAN PRESENT AND THE RESULTS MADE AVAILABLE TO LANGAN AND THE OWNER PRIOR TO WASTE SHIPMENT. LANGAN MAY PERFORM ADDITIONAL TCLP SAMPLING TO CONFIRM THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESULTS. LANGAN WILL PERFORM THE LEAD TCLP SAMPLING FOR CLASSIFICATION OF THE DEMOLITION AND ABATEMENT WASTE. PLEASE SEE THE ASBESTOS, PCB, AND LEAD-BASED PAINT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS AND CONTRACTORS LIABILITY.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR, THEIR SUBCONTRACTORS, WASTE TRANSPORTERS AND/OR LANDFILL(S) DO NOT HAVE PERMISSION TO TAKE/ANALYZE BUILDING MATERIALS FOR PCB CONTENT/ CONCENTRATIONS WITHOUT WRITTEN PERMISSION FROM THE BUILDING OWNER PRIOR TO SUCH SAMPLING. SHOULD THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR OR OTHER PARTIES LISTED ABOVE TAKE/ANALYZE PCB SAMPLES WITHOUT THE OWNER'S PERMISSION AND PCB'S ARE FOUND TO BE >1 PPM, THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE ABATEMENT/ REMEDIATION/REPLACEMENT OF ALL THE INTERIOR/EXTERIOR BUILDING MATERIALS AND ADJACENT SURFACES, INCLUDING SOIL/ASPHALT/CONCRETE/ETC. AS WELL AS ALL COSTS ASSOCIATED WITH PROJECT DELAYS, ATTORNEY FEES FOR ALL PARTIES AFFECTED AND ALL COSTS RESULTING FROM CT DEEP/EPA REQUIREMENTS THAT MAY OCCUR AS A RESULT.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL BE RESPONSIBLE FOR HIRING AN ENGINEER AND OTHER APPROPRIATE PERSONNEL TO ENSURE THAT ALL REQUIRED SELECTIVE DEMOLITION AND DEMOLITION ACTIVITIES ARE SAFE TO PERFORM FOR ALL PERSONNEL ON SITE. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR(S) WILL BE FINANCIALLY RESPONSIBLE FOR ANY DAMAGE THAT MAY OCCUR TO THE SITE, ON-SITE PERSONNEL, FINES, PENALTIES, ETC. THEY WILL ALSO BE RESPONSIBLE FOR PAYING/REIMBURSING ALL LEGAL FEES/COSTS FOR ALL PARTIES INVOLVED WITH THE PROJECT SHOULD SELECTIVE DEMOLITION OR DEMOLITION ACTIVITIES CAUSE INJURY OR DEATH TO ANY PERSONS ON SITE.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS RESPONSIBLE FOR PROVIDING TEMPORARY WATER, POWER, AND HEAT AS NEEDED AT THE SITE (24 HOURS A DAY). TEMPORARY LIGHTING WITHIN THE WORK AREAS MUST BE CONNECTED TO GROUND FAULT CIRCUIT INTERRUPTER (GFCI) POWER PANELS INSTALLED BY A STATE OF CONNECTICUT LICENSED ELECTRICIAN AND LOCATED OUTSIDE OF THE WORK AREAS. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL BE RESPONSIBLE FOR PAYING FOR THE USE OF POWER AND WATER UNLESS THE OWNER AGREES IN WRITING TO PAY FOR THESE UTILITIES. IT SHALL ALSO BE THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR'S RESPONSIBILITY TO PROVIDE ALL FIXED AND TEMPORARY CONNECTIONS AND HOOK-UPS AS WELL AS OBTAINING PERMITS AND PAYING ALL FEES FOR MAKING SUCH SERVICES AVAILABLE FOR HIS WORK AS IS NECESSARY. ALL POWER AND WATER MUST BE SUPPLIED 24 HOURS A DAY THROUGHOUT THE ABATEMENT PROJECT. CT DPH WILL BE NOTIFIED IMMEDIATELY IF ACTIVE CONTAINMENTS DO NOT HAVE SUFFICIENT NEGATIVE PRESSURE THROUGHOUT THE ABATEMENT PROCESS UNTIL ACCEPTABLE REOCCUPANCY AIR RESULTS ARE RECEIVED. THE USE OF PORTABLE GENERATORS WILL REQUIRE 24 HOURS A DAY, 7 DAYS A WEEK CONTINUOUS OPERATION IF NEGATIVE AIR MACHINES IN CONTAINMENTS ARE POWERED BY THEM. THIS CONTINUOUS OPERATION MUST REMAIN IN PLACE FROM THE TIME THE PRE-ABATEMENT VISUAL IS COMPLETED UP UNTIL CLEARANCE RE-OCCUPANCY SAMPLING RESULTS HAVE PASSED. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR WILL PAY THE OWNER A $2,500 PENALTY SHOULD THE POWER BE FOUND TO NOT BE RUNNING THE NEGATIVE AIR MACHINES IN ACTIVE ABATEMENT CONTAINMENTS. THIS PENALTY WILL APPLY DAILY AND THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR IS ALSO RESPONSIBLE FOR PAYING ALL CT DPH FINES THAT MAY BE IMPOSED ON THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR AND OWNER.

HAZARDOUS BUILDING MATERIALS ABATEMENT NOTES (SEE ASBESTOS ABATEMENT SPECIFICATION AND PCB REMEDIATION SPECIFICATIONS FOR ADDITIONAL INFORMATION NOT INCLUDED ON DRAWINGS)

1. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING FLOOR TILES AND/OR BLACK MASTIC AS ACM.
2. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING PIPE, PIPE FITTING, PIPE HANGER AND ROOF DRAIN INSULATION AS ACM.
3. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING DUCT INSULATION AS ACM.
4. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CEILING AND WALL PLASTER AS ACM. PLEASE REFER TO SPECIFICATION 028213, PAGE 6 FOR ADDITIONAL INFORMATION.
5. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING SINK UNDERCOATING AND SINK COUNTERTOP CAULKING COMPOUNDS AS ACM. CAULKING COMPOUNDS MUST BE DISPOSED OF AS ASSUMED >50 PPM PCB BULK PRODUCT WASTE ALSO.
6. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING BULLETIN BOARD, "CHALK" BOARD, MIRROR AND OTHER WALL ADHESIVES/GLUE DAUBS AS ACM.
7. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING CERAMIC WALL TILE ADHESIVE AS ACM.
8. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING WALL BLACK DAMP-PROOFING MATERIALS AS ACM.
9. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS CONTAINING EXTERIOR FOUNDATION DAMP-PROOFING TAR/MATERIALS AS ACM.
10. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING INTERIOR DOOR CAULKING COMPOUNDS, DOOR WINDOW GLAZING COMPOUNDS, WINDOW CAULKING AND GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
11. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR WINDOW CAULKING/GLAZING/LINTEL CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
12. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR/INTERIOR DOOR AND DOOR/WINDOW CAULKING COMPOUNDS (GLAZING COMPOUNDS ALSO AT MAIN FRONT ENTRY AND GYM ENTRY), DOOR WINDOW GLAZING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.
13. THE HAZARDOUS BUILDING MATERIALS ABATEMENT CONTRACTOR SHALL REMOVE AND DISPOSE OF ASBESTOS AND ASSUMED PCB >50 PPM CONTAINING EXTERIOR VENT CAULKING COMPOUNDS AS ACM AND PCB BULK PRODUCT WASTE.

GENERAL NOTES

1. BOUNDARY AND TOPOGRAPHIC INFORMATION OBTAINED FROM A PLAN TITLED "BOUNDARY & TOPOGRAPHIC SURVEY" PREPARED BY LANGAN, DATED 1 MAY 2023.
2. THE SITE IS LOCATED IN ZONE AE, A REGULATORY FLOODWAY AREA PER FIRM MAP 09001C0514G, EFFECTIVE JULY 8, 2013.
3. PROPOSED BUILDING FOOTPRINT RECEIVED ELECTRONICALLY FROM SILVER PETRUCELLI + ASSOCIATES IN NOVEMBER 2024.

CONTRACTOR NOTES

1. THE WORK TO BE PERFORMED IS AS SHOWN ON THE DRAWINGS. THE CONTRACTOR IS RESPONSIBLE FOR MEANS AND METHODS OF CONSTRUCTION; AS SUCH, THESE PLANS MAY NOT COMPLETELY REPRESENT ALL SPECIFIC DETAILS OF INSTALLATION REQUIRED FOR CONSTRUCTION. CONTRACTOR IS RESPONSIBLE TO PROVIDE ALL IMPROVEMENTS REQUIRED TO ACHIEVE CONSTRUCTION DEPICTED ON THESE PLANS.
2. THE CONTRACTOR SHALL PROVIDE WRITTEN REQUESTS FOR INFORMATION TO THE OWNER AND OWNER'S ENGINEER PRIOR TO THE CONSTRUCTION OF ANY SPECIFIC SITEWORK ITEM IF ANY SITEWORK ITEM DEPICTED ON THE PLANS WARRANTS ADDITIONAL ENGINEERING INFORMATION REQUIRED FOR CONSTRUCTION AND IS NOT RELATED TO MEANS AND METHODS OF CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SITEWORK ITEMS INSTALLED DIFFERENTLY THAN INTENDED AS DEPICTED ON THE PLANS IN THE ABSENCE OF SUBMITTING AND RECEIVING REVIEWS AND/OR DIRECTION ON WRITTEN REQUESTS FOR INFORMATION.
3. THE CONTRACTOR SHALL ACCEPT THE SITE AS IS. THE CONTRACTOR SHALL MAKE AND SHALL BE DEEMED TO HAVE MADE A THOROUGH SITE INSPECTION IN ORDER TO FIELD CHECK EXISTING SITE CONDITIONS, CORRELATE CONDITIONS WITH THE DRAWINGS AND RESOLVE ANY POSSIBLE CONSTRUCTION CONFLICTS WITH THE OWNER AND OWNER'S ENGINEER PRIOR TO COMMENCEMENT OF WORK. THIS INCLUDES A TOPOGRAPHIC SURVEY OF ANY AREAS THE CONTRACTOR REQUIRES ADDITIONAL TOPOGRAPHIC INFORMATION. ANY CONDITIONS THAT DIFFER FROM THE EXISTING CONDITIONS SHOWN ON THE DRAWINGS THAT ARE NOT BROUGHT TO THE ATTENTION OF THE OWNER AND OWNER'S ENGINEER PRIOR TO THE START OF WORK SHALL NOT BE CONSIDERED GROUNDS FOR A CHANGE ORDER.
4. IT IS SPECIFICALLY NOTED THAT INFORMATION RELATED TO ELEVATIONS AND PROPOSED UTILITIES (SUCH AS ROADWAY GRADES, INVERT ELEVATIONS, RIM ELEVATIONS, GRATE ELEVATIONS, BUILDING FINISHED FLOOR ELEVATIONS, ETC.) MAY BE FOUND IN MORE THAN ONE LOCATION ON THE DRAWINGS. CONTRACTOR SHALL REVIEW ALL PLANS, PROFILES AND ANY INFORMATION/DATA TABLES FOR CONSISTENCY PRIOR TO CONSTRUCTION. ANY INCONSISTENCIES OR DISCREPANCIES THAT ARE FOUND SHALL IMMEDIATELY BE BROUGHT TO THE ATTENTION OF THE OWNER'S ENGINEER IN WRITING REQUESTING CLARIFICATION PRIOR TO CONSTRUCTION.
5. CONTRACTOR SHALL NOTE THAT THERE ARE ADDITIONAL NOTES, SPECIFICATIONS AND REQUIREMENTS CONTAINED ON SHEETS THROUGHOUT THE PLAN SET AND AVAILABLE REFERENCES TO SPECIFICATIONS FROM APPLICABLE GOVERNING AUTHORITIES AND INDUSTRY STANDARDS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN, REVIEW AND ADHERE TO ALL APPLICABLE REQUIREMENTS.

DEMOLITION NOTES

1. THE CONTRACTOR SHALL INSPECT THE SITE THOROUGHLY AND FIELD-VERIFY THE LOCATION AND DEPTH OF ALL EXISTING UTILITIES. SOME UNDERGROUND UTILITIES MAY BE LOCATED DIFFERENTLY THAN SHOWN ON THIS PLAN. IN ADDITION, THERE MAY BE EXISTING UNDERGROUND UTILITIES PRESENT THAT ARE NOT SHOWN ON THIS PLAN. ALL CONTRACTORS USING THESE PLANS FOR DEMOLITION OR CONSTRUCTION SHALL CONFIRM ALL UTILITIES IN THE FIELD TO ESTABLISH LOCATIONS, SIZES, MATERIALS, AND ELEVATIONS. ANY DISCREPANCIES SHALL IMMEDIATELY BE BROUGHT TO THE ATTENTION OF THE ENGINEER AND THE CONSTRUCTION MANAGER.
2. THE CONTRACTOR IS RESPONSIBLE FOR CONTACTING "CALL BEFORE YOU DIG," EXCAVATING THE HOLES, AND PERFORMING ANY ADDITIONAL RESEARCH OR INVESTIGATIONS REQUIRED IN ORDER TO ENSURE THAT PROPOSED UTILITIES TO REMAIN ARE PROTECTED FROM DAMAGE DURING DEMOLITION. ANY DAMAGE TO EXISTING UTILITIES TO REMAIN IS REQUIRED TO BE REPAIRED BY THE CONTRACTOR.
3. EXCEPT WHERE OTHERWISE NOTED, EXISTING STORM DRAINS AND SANITARY PIPING TO BE ABANDONED ARE TO BE COMPLETELY REMOVED. EXISTING UTILITY CONDUITS 6" AND SMALLER MAY BE ABANDONED IN PLACE. ALL EXCAVATIONS SHALL BE PROPERLY BACKFILLED AND COMPACTED IN ACCORDANCE WITH THE EARTHWORK SPECIFICATIONS.
4. THE CONTRACTOR SHALL NOTIFY AND OBTAIN ALL SHUTOFFS FOR ALL APPLICABLE UTILITIES PRIOR TO THE COMMENCEMENT OF DEMOLITION.
5. THE CONTRACTOR SHALL LOCATE/CONFIRM ALL DRAINAGE INFRASTRUCTURE AND MAINTAIN ADEQUATE STORM DRAINAGE THROUGHOUT CONSTRUCTION.
6. THE CONTRACTOR SHALL FIELD LOCATE AND PROPERLY DISCONNECT APPROPRIATE LATERALS TO LIVE MAINS PRIOR TO DEMOLITION AND IN ACCORDANCE WITH UTILITY COMPANY STANDARDS.
7. THE CONTRACTOR SHALL MAINTAIN THE SAFETY AND PROTECTION OF BOTH PEDESTRIANS AND MOTORISTS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO TAKE ALL NECESSARY PRECAUTIONARY AND PROTECTIVE MEASURES, INCLUDING SIGNS, LIGHTS, BARRIERS, FENCING AND TRAFFIC FLAGMEN.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL NECESSARY DEMOLITION ASSOCIATED PERMITS.
9. THE CONTRACTOR SHALL REMOVE AND LEGALLY DISPOSE OF ALL MATERIALS WITHIN THE PROJECT LIMITS UNLESS INDICATED TO REMAIN.
10. THE CONTRACTOR SHALL INCLUDE ALL TEMPORARY FACILITIES AND SERVICES NECESSARY TO SATISFY FEDERAL, STATE & LOCAL REQUIREMENTS INCLUDING BUT NOT LIMITED TO BRACING, SHORING, PAVEMENT REPAIR, FENCING, PEDESTRIAN AND VEHICLE ACCESS, CONCRETE PADS, ETC.
11. THE CONTRACTOR SHALL PROVIDE PERIMETER FENCING AND OTHER SECURITY MEASURES AS REQUIRED BY THE OWNER.
12. THE CONTRACTOR SHALL PROVIDE TEMPORARY PEDESTRIAN ACCESS AS REQUIRED BY THE OWNER.
13. COORDINATE LIMIT OF DEMOLITION WITH ALL PROPOSED WORK.
14. EXISTING BITUMINOUS PAVEMENT TO BE SAWCUT AT ALL LOCATIONS WHERE EXISTING BITUMINOUS PAVEMENT WILL MATCH NEW BITUMINOUS PAVEMENT.
15. EXISTING SIDEWALKS (BITUMINOUS AND CONCRETE) TO BE SAWCUT AT ALL LOCATIONS WHERE EXISTING SIDEWALKS MATCH NEW SIDEWALKS. CONCRETE SIDEWALKS TO BE SAWCUT AT JOINTS.
16. ALL REQUIRED UTILITY DISCONNECTS AND/OR ABANDONMENT TO BE COORDINATED WITH RESPECTIVE UTILITY COMPANIES AND OWNER PRIOR TO CONSTRUCTION PHASING.
17. CONTRACTOR IS TO PROTECT AND MAINTAIN ALL EXISTING UTILITIES TO REMAIN.
18. CONTRACTOR TO INSTALL ALL SOIL EROSION AND SEDIMENT CONTROL MEASURES AND TREE PROTECTION FENCING PRIOR TO START OF DEMOLITION OR CONSTRUCTION.

Drawing Title: DEMOLITION PLAN
Project Phase: ISSUED FOR BID 03/19/2025
Project Phase: STATE PROJECT #057-0115 EA/RR/CV

Date: 11/22/2024
Scale:
Drawn By: BTW
Project Number: 22-382

Drawing Number: CD101

1/29/2025 10:15:33 AM

GENERAL NOTES

1. BOUNDARY AND TOPOGRAPHIC INFORMATION OBTAINED FROM A PLAN TITLED "BOUNDARY & TOPOGRAPHIC SURVEY" PREPARED BY LANGAN, DATED 1 MAY 2023.
2. THE SITE IS LOCATED IN ZONE AE, A REGULATORY FLOODWAY AREA PER FIRM MAP 09001C0514G, EFFECTIVE JULY 8, 2013.
3. PROPOSED BUILDING FOOTPRINT RECEIVED ELECTRONICALLY FROM SILVER PETRUCELLI + ASSOCIATES IN NOVEMBER 2024.

CONTRACTOR NOTES

1. THE WORK TO BE PERFORMED IS AS SHOWN ON THE DRAWINGS. THE CONTRACTOR IS RESPONSIBLE FOR MEANS AND METHODS OF CONSTRUCTION; AS SUCH, THESE PLANS MAY NOT COMPLETELY REPRESENT ALL SPECIFIC DETAILS OF INSTALLATION REQUIRED FOR CONSTRUCTION. CONTRACTOR IS RESPONSIBLE TO PROVIDE ALL IMPROVEMENTS REQUIRED TO ACHIEVE CONSTRUCTION DEPICTED ON THESE PLANS.
2. THE CONTRACTOR SHALL PROVIDE WRITTEN REQUESTS FOR INFORMATION TO THE OWNER AND OWNER'S ENGINEER PRIOR TO THE CONSTRUCTION OF ANY SPECIFIC SITEWORK ITEM IF ANY SITEWORK ITEM DEPICTED ON THE PLANS WARRANTS ADDITIONAL ENGINEERING INFORMATION REQUIRED FOR CONSTRUCTION AND IS NOT RELATED TO MEANS AND METHODS OF CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SITEWORK ITEMS INSTALLED DIFFERENTLY THAN INTENDED AS DEPICTED ON THE PLANS IN THE ABSENCE OF SUBMITTING AND RECEIVING REVIEWS AND/OR DIRECTION ON WRITTEN REQUESTS FOR INFORMATION.
3. THE CONTRACTOR SHALL ACCEPT THE SITE AS IS. THE CONTRACTOR SHALL MAKE AND SHALL BE DEEMED TO HAVE MADE A THOROUGH SITE INSPECTION IN ORDER TO FIELD CHECK EXISTING SITE CONDITIONS, CORRELATE CONDITIONS WITH THE DRAWINGS AND RESOLVE ANY POSSIBLE CONSTRUCTION CONFLICTS WITH THE OWNER AND OWNER'S ENGINEER PRIOR TO COMMENCEMENT OF WORK. THIS INCLUDES A TOPOGRAPHIC SURVEY OF ANY AREAS THE CONTRACTOR REQUIRES ADDITIONAL TOPOGRAPHIC INFORMATION. ANY CONDITIONS THAT DIFFER FROM THE EXISTING CONDITIONS SHOWN ON THE DRAWINGS THAT ARE NOT BROUGHT TO THE ATTENTION OF THE OWNER AND OWNER'S ENGINEER PRIOR TO THE START OF WORK SHALL NOT BE CONSIDERED GROUNDS FOR A CHANGE ORDER.
4. IT IS SPECIFICALLY NOTED THAT INFORMATION RELATED TO ELEVATIONS AND PROPOSED UTILITIES (SUCH AS ROADWAY GRADES, INVERT ELEVATIONS, RIM ELEVATIONS, GRATE ELEVATIONS, BUILDING FINISHED FLOOR ELEVATIONS, ETC.) MAY BE FOUND IN MORE THAN ONE LOCATION ON THE DRAWINGS. CONTRACTOR SHALL REVIEW ALL PLANS, PROFILES AND ANY INFORMATION/DATA TABLES FOR CONSISTENCY PRIOR TO CONSTRUCTION. ANY INCONSISTENCIES OR DISCREPANCIES THAT ARE FOUND SHALL IMMEDIATELY BE BROUGHT TO THE ATTENTION OF THE OWNER'S ENGINEER IN WRITING REQUESTING CLARIFICATION PRIOR TO CONSTRUCTION.
5. CONTRACTOR SHALL NOTE THAT THERE ARE ADDITIONAL NOTES, SPECIFICATIONS AND REQUIREMENTS CONTAINED ON SHEETS THROUGHOUT THE PLAN SET AND AVAILABLE REFERENCES TO SPECIFICATIONS FROM APPLICABLE GOVERNING AUTHORITIES AND INDUSTRY STANDARDS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN, REVIEW AND ADHERE TO ALL APPLICABLE REQUIREMENTS.

TOWN OF GREENWICH STANDARD CONSTRUCTION NOTES

1. A HIGHWAY PERMIT IS REQUIRED FOR ALL WORK WITHIN THE TOWN OF GREENWICH – RIGHT OF WAY.
2. ALL WORK WITHIN THE TOWN OF GREENWICH –RIGHT OF WAY SHALL BE CONSTRUCTED TO TOWN OF GREENWICH STANDARDS.
3. CATCH BASINS FOR PRIVATE DRIVEWAYS SHALL HAVE A MINIMUM GRATE OF TWO FEET BY TWO FEET. IF THE DRIVEWAY IS CURBED THE CATCH BASIN SHALL HAVE A MINIMUM CURB INLET OF SIX INCHES. EACH DRIVEWAY CATCH BASIN SHALL ALSO HAVE A MINIMUM TWO-FOOT SUMP AND BELL TRAP.
4. ALL DRAINAGE CONNECTIONS TO THE TOWN DRAINAGE SYSTEM SHALL BE GRAVITY LINES. IF A DISCHARGE FROM A SUMP PUMP IS CONNECTED TO THE TOWN DRAINAGE SYSTEM IT MUST DISCHARGE TO A DRAINAGE STRUCTURE ON PRIVATE PROPERTY AND THEN BE CONNECTED TO THE TOWN DRAINAGE SYSTEM. ALL SUMP PUMPS REQUIRE A BACKFLOW PREVENTER (CHECK VALVE) BETWEEN THE PUMP AND THE DRAINAGE STRUCTURE. A DRAIN CONNECTION PERMIT FROM THE HIGHWAY DIVISION IS REQUIRED FOR ALL CONNECTIONS TO THE TOWN DRAINAGE SYSTEM.
5. IN ROADWAY CUTS, SUBDRAINS SHALL BE REQUIRED IF SEEPAGE OCCURS DURING CONSTRUCTION OR WITHIN ONE YEAR AFTER ROAD CONSTRUCTION IS COMPLETED AND ACCEPTED, EVEN THOUGH PLANS MAY HAVE BEEN APPROVED WITHOUT SUBDRAINS AND/OR ROADWAY CONSTRUCTION HAS BEEN COMPLETED.
6. ALL RETAINING WALLS GREATER THAN THREE FEET ARE REQUIRED TO BE DESIGNED, AND INSPECTED DURING CONSTRUCTION BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF CONNECTICUT.
7. ALL DETENTION/RETENTION SYSTEMS SHALL BE INSTALLED PER MANUFACTURER'S SPECIFICATIONS. ALL SYSTEMS SHALL USE A MANIFOLD SYSTEM TO DISTRIBUTE RUNOFF EVENLY INTO EACH ROW OF INFILTRATORS. DETENTION SYSTEMS WILL HAVE A MANIFOLD SYSTEM THAT CREATES THE LONGEST TRAVEL TIME TO THE CONTROL STRUCTURE. ALL DETENTION/RETENTION SYSTEMS MUST USE A STRUCTURE SUCH AS A MANHOLE FOR THE CONTROL STRUCTURE SO ALL FLOW CONTROL DEVICES CAN BE ACCESSED FOR MAINTENANCE.
8. ALL INFILTRATION SYSTEMS MUST MEET THE STORMWATER INFILTRATION/RECHARGE DESIGN REQUIREMENTS IN APPENDIX B OF THE TOWN OF GREENWICH DRAINAGE MANUAL. THERE MUST BE AT LEAST A 2–FOOT SEPARATION DISTANCE FROM THE BOTTOM OF STONE BELOW THE INFILTRATION STRUCTURE TO THE SEASONAL HIGH GROUNDWATER OR BEDROCK/LEDGE (THIS SEPARATION REQUIREMENT MAY BE WAIVED OR REDUCED BY THE APPROVING AUTHORITY ON A CASE–BY–CASE BASIS). A 3–FOOT SEPARATION DISTANCE IS REQUIRED FROM THE BOTTOM OF STONE BELOW THE INFILTRATION STRUCTURE TO SEASONAL HIGH GROUNDWATER FOR LAND USES WITH HIGHER POTENTIAL POLLUTANT LOADS (HIGH LOAD AREAS). PRIOR TO THE INSTALLATION OF THE INFILTRATORS THE ENGINEER SHALL VERIFY THE INFILTRATION STRUCTURE IS BEING INSTALLED IN THE APPROVED LOCATION AND IF THE LOCATION HAS BEEN CHANGED ADDITIONAL SOIL TESTING SHALL BE PERFORMED AND THE ENGINEER SHALL APPROVE THE REVISED LOCATION. A REVIEW BY THE APPROVING AUTHORITY WILL BE REQUIRED.
9. EACH BMP TO BE INSTALLED SHALL HAVE THE SOILS BENEATH THE BMP SCARIFIED OR TILLED TO IMPROVE INFILTRATION.
10. THE CONTRACTOR MUST CONSTRUCT THE BIORETENTION AREA FOLLOWING THE SPECIFICATIONS IN APPENDIX G OF THE TOWN OF GREENWICH DRAINAGE MANUAL FEBRUARY 2012 AS AMENDED.
11. ALL AREAS THAT ARE USED BY CONSTRUCTION EQUIPMENT AND USED FOR CONTRACTOR PARKING MUST HAVE THE SOIL TILLED 12 TO 16 INCHES AND AMENDED WITH SMALL AMOUNTS OF ORGANIC MATERIAL IF NEEDED. THE AREA TO BE RESTORED SHALL BE DETERMINED BY THE SITE ENGINEER.
12. COMPOST–AMENDED SOILS MUST FOLLOW THE REQUIREMENTS AS STATED IN THE TOWN OF GREENWICH DRAINAGE MANUAL FEBRUARY 2012 AS AMENDED.
13. TO OBTAIN A CERTIFICATE OF OCCUPANCY THE SUBMITTAL MUST INCLUDE THE FOLLOWING:
    - ITEMS ON CHECKLIST FOR CERTIFICATE OF OCCUPANCY – FORM CL–105
    - IMPROVEMENT LOCATION SURVEY (ITEMS ON CHECKLIST FOR IMPROVEMENT LOCATION SURVEY DEPICTING "ASBUILT" CONDITIONS – FORM CL–106)

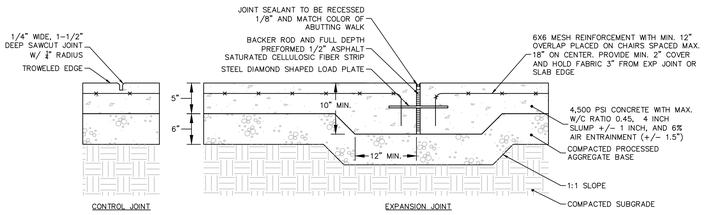
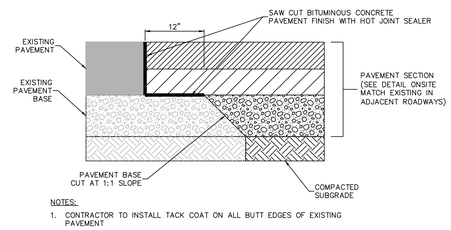
Project Phase: STATE PROJECT #057-0115 EA/RR/CV

Date: 11/22/2024
Scale:
Drawn By: APF
Project Number: 22-382



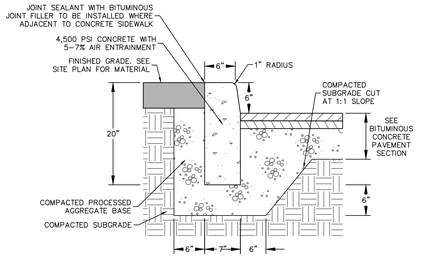
Drawing Number: CS101

1/28/2025 10:16:33 AM



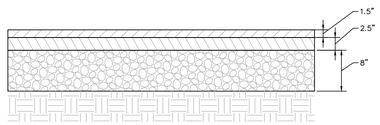
NOTES:
1. PROVIDE BITUMINOUS CONCRETE PAVEMENT AS INDICATED ON THE SITE PLAN.
2. BITUMINOUS CONCRETE SHALL CONFORM TO CT D.O.T. SPECIFICATIONS, FORM 818 SECTION 4.06, LATEST REVISION
3. PROCESSED AGGREGATE SHALL CONFORM TO CT D.O.T. SPECIFICATIONS, FORM 818 SECTION 3.04, LATEST REVISION
4. EXISTING PROCESSED AGGREGATE BASE WITHIN THE PARKING AREAS MAY BE REUSED IN-PLACE SO LONG AS THE CONTRACTOR CONFIRMS THAT THE EXISTING DEPTH, GRADATION, AND COMPACTION OF THE MATERIAL MEETS THE REQUIREMENTS OF THIS PROPOSED PAVEMENT SECTION AND SPECIFICATIONS. CONTRACTOR TO CONFIRM EXISTING THICKNESS A MINIMUM OF ONCE EVERY 2,500 SF

1 BITUMINOUS CONCRETE PAVEMENT SECTION - STANDARD DUTY
N.T.S



NOTES:
1. SIDEWALK TO BE PLACED BETWEEN APRIL 15-OCTOBER 15 UNLESS PRIOR APPROVAL FROM SCHOOL IS GRANTED.
2. HAUNCH TO BE INSTALLED AT ALL EXPANSION JOINTS AND IN ALL LOCATIONS WHERE WALKWAY ABUTS ADJACENT FIXED OBJECT.
3. LOAD PLATES SHALL BE USED IN LIEU OF ROUND DOWELS EXCEPT AT AREAS WHERE PROPOSED WALK TIES INTO EXISTING, IN AREAS WHERE USED, DOWELS TO BE 12" LONG, 1/2" DIAMETER EPOXY COATED STEEL LOCATED 18" ON CENTER, GREASE ONE END
4. LOAD PLATES, DOWELS, AND EXPANSION JOINTS SHALL BE UTILIZED AT ALL LOCATIONS WHERE CONCRETE IS POURED ABUTTING STATIONARY OBJECTS.
5. EXPANSION AND CONTROL JOINTS SHALL BE INSTALLED WITH MAXIMUM SPACING OF JOINTS AS FOLLOWS:
   EXPANSION – 20 FT.
   CONTROL – 5 FT.
6. FINISH: EXPOSED AGGREGATE FINISH.
7. CONTRACTOR TO SUBMIT JOINT LAYOUT FOR REVIEW BY PROJECT LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.
8. CONTRACTOR TO PROVIDE 10'x10' MOCK UP FOR REVIEW BY PROJECT LANDSCAPE ARCHITECT PRIOR TO INSTALLATION. MOCK UP TO INCLUDE A CONTROL JOINT AND EXPANSION JOINT.

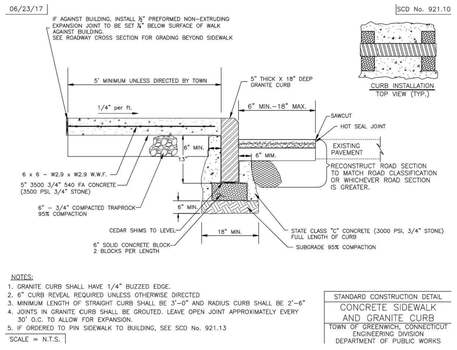
2 ON-SITE CONCRETE SIDEWALK
N.T.S



NOTES:
1. CONTRACTOR TO INSTALL TACK COAT ON ALL BUTT EDGES OF EXISTING PAVEMENT

3 SAWCUT PAVEMENT SECTION
N.T.S

NOTES:
1. STRAIGHT SEGMENTS SHOULD NOT BE INSTALLED ALONG CURVES UNLESS RADIUS IS GREATER THAN 50'.
2. INDIVIDUAL SEGMENTS TO BE GREATEST LENGTH POSSIBLE IN ORDER TO MINIMIZE NUMBER OF JOINTS. CORNERS TO BE SINGLE PIECE.
3. JOINT SEALANT TO BE INSTALLED AT ALL JOINTS BETWEEN CURB SEGMENTS.
4. PROCESSED AGGREGATE SHALL CONFORM TO CT D.O.T. SPECIFICATIONS, FORM 817 SECTION 3.04, LATEST REVISION.
5. CONTRACTOR TO PROVIDE PRODUCT DATA FOR REVIEW PRIOR TO INSTALLATION.



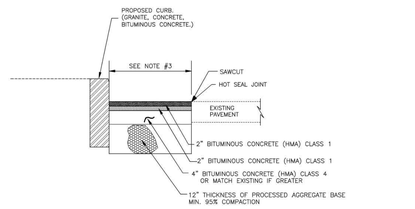
4 CONCRETE CURB
N.T.S

NOTES:
1. PROVIDE BITUMINOUS CONCRETE PAVEMENT AS INDICATED ON THE SITE PLAN.
2. BITUMINOUS CONCRETE SHALL CONFORM TO CT D.O.T. SPECIFICATIONS, FORM 818 SECTION 4.06, LATEST REVISION
3. PROCESSED AGGREGATE SHALL CONFORM TO CT D.O.T. SPECIFICATIONS, FORM 818 SECTION 3.04, LATEST REVISION
4. EXISTING PROCESSED AGGREGATE BASE WITHIN THE PARKING AREAS MAY BE REUSED IN-PLACE SO LONG AS THE CONTRACTOR CONFIRMS THAT THE EXISTING DEPTH, GRADATION, AND COMPACTION OF THE MATERIAL MEETS THE REQUIREMENTS OF THIS PROPOSED PAVEMENT SECTION AND SPECIFICATIONS. CONTRACTOR TO CONFIRM EXISTING THICKNESS A MINIMUM OF ONCE EVERY 2,500 SF

5 BITUMINOUS CONCRETE PAVEMENT SECTION - HEAVY DUTY
N.T.S

06/23/17 — SCD No. 921.10

NOTES:
1. GRANITE CURB SHALL HAVE 1/4" BUZZED EDGE.
2. 6" CURB REVEAL REQUIRED UNLESS OTHERWISE DIRECTED
3. MINIMUM LENGTH OF STRAIGHT CURB SHALL BE 3'-0" AND RADIUS CURB SHALL BE 2'-6"
4. JOINTS IN GRANITE CURB SHALL BE GROUTED. LEAVE OPEN JOINT APPROXIMATELY EVERY 30' O.C. TO ALLOW FOR EXPANSION.
5. IF ORDERED TO PIN SIDEWALK TO BUILDING, SEE SCD No. 921.13



SCALE = N.T.S.

The Original Ribbon' Rack—IDSA National Design Award Winner

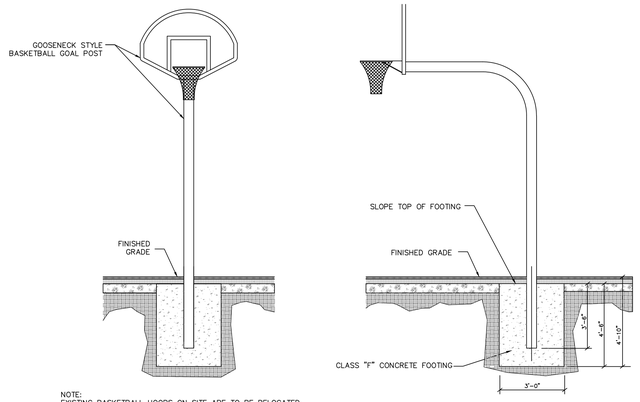
PERMANENT DESIGN COLLECTION—MUSEUM OF MODERN ART

Model #	# of Bicycles	Rack Length	
RB 05	5	38.375"	97.5 cm
RB 07	7	62.375"	158.4 cm
RB 09	9	86.375"	219.4 cm
RB 11	11	110.375"	280.4 cm

Specifications
All standard units made from ASTM A53/A500 SCHD 40 steel pipe (2.375" OD X .154 wall), hydraulically bent with a mandril, hot-dipped galvanized after fabrication.
The RIBBON® RACK is available in ASTM A312 SCHEDULE 40 TP 304 stainless steel, satin #4 finish—optional and extra.

Installation Methods
Inground Anchor Mount—standard
Surface Flange Mount—optional and extra

General Information
RIBBON and the Brandir International Inc. logo are trademarks of Brandir International Inc., used exclusively by AAA RIBBON RACK CO.
Delivery time: Six weeks or sooner from receipt of order.



Important Considerations
Colors: (Painting/Coating)—Painting or coating the rack will result in a maintenance problem, as no coating will withstand the abuse of the bicycles. Powder coating cannot be maintenanced; an enamel finish will chip. AAA RIBBON RACK CO. has the best solution where color is essential. Please contact us to find out how to achieve an appropriate color with a minimum of maintenance.
Materials: Steel tubing or aluminum are not suitable materials for a bicycle rack. Pre-galvanized material will flake and crack during manufacture. AAA RIBBON RACK CO. uses heavy-duty steel pipe, hot-dipped galvanized after fabrication to provide security and durability.
Manufacture: Hydraulic bending with a mandril, as used by AAA RIBBON RACK CO., insures smooth and aesthetic curves on the Ribbon® Rack. Press bending leaves an indentation; other methods flatten outer curves and crimp inner curves.

Specifying / Estimating / Ordering
Please use the following notations:
Quantity
RIBBON® 05 07 09 11 — Model Number (# of bicycles)
I — Inground Anchor Mount
S — Surface Flange Mount

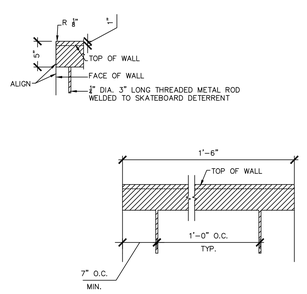
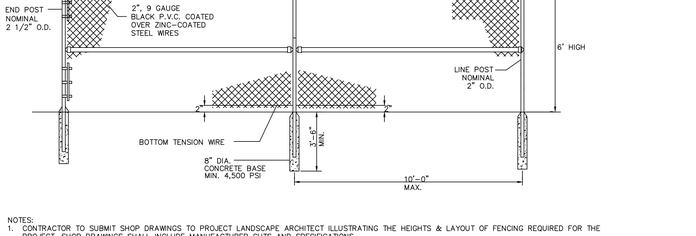
NOTE:
1. MODEL #RB 07, INGROUND ANCHOR MOUNT.
2. COLOR TO MATCH EXISTING EXISTING BLUE COLOR RACKS, CONTRACTOR TO SUBMIT PHYSICAL COLOR SAMPLES AND PRODUCT DATA FOR REVIEW BY PROJECT LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.
3. REFER TO SITE PLAN FOR LOCATIONS AND QUANTITIES.

1 BIKE RACK (OR APPROVED EQUAL)
N.T.S



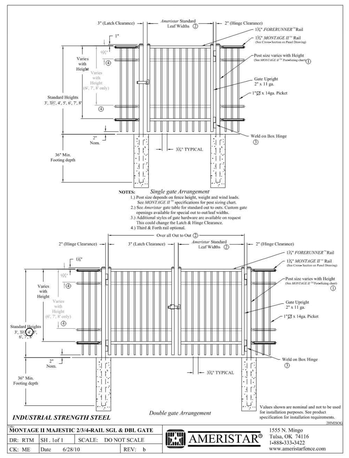
NOTE:
EXISTING BASKETBALL HOOPS ON SITE ARE TO BE RELOCATED.

2 BASKETBALL HOOP AND FOOTING
N.T.S



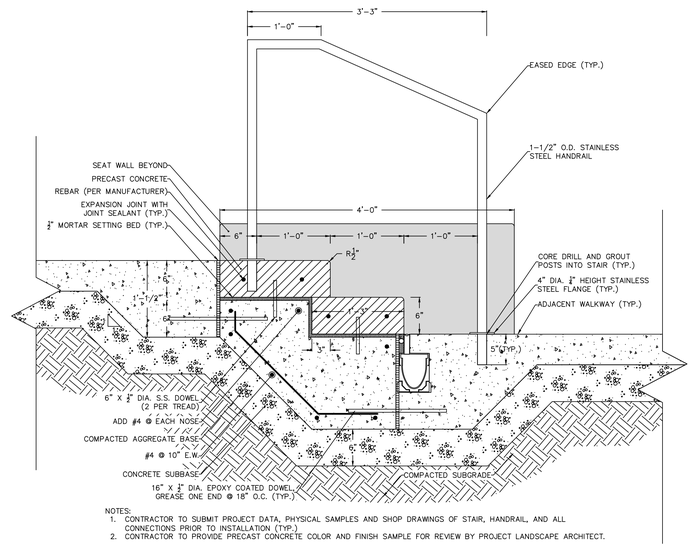
NOTES:
1. BRICK VENEER TO MATCH EXISTING BUILDING FACADE.
2. PRECAST CONCRETE CAP COLOR AND FINISH TO MATCH EXISTING BUILDING FACADE.
3. COPING JOINT TO BE 3/8" THICK, SPACED 4'-6" MAX O.C. JOINTS TO BE MORTARED. MORTAR COLOR TO MATCH COPING COLOR.
4. CONTRACTOR TO PROVIDE 10' LENGTH MOCKUP FOR REVIEW BY PROJECT LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.

3 SEAT WALL
N.T.S



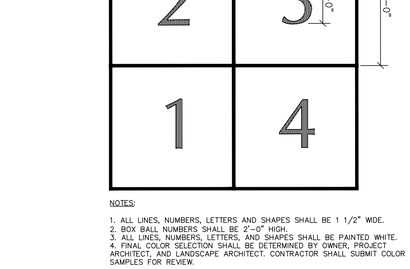
NOTES:
1. 1/2" THICK 316 STAINLESS STEEL BAR WITH EASED EDGES; CENTERED AT ALL BENCH JOINTS.

4 SKATEBOARD DETERRENT
N.T.S



NOTES:
1. CONTRACTOR TO SUBMIT SHOP DRAWINGS TO PROJECT LANDSCAPE ARCHITECT ILLUSTRATING THE HEIGHTS & LAYOUT OF FENCING REQUIRED FOR THE PROJECT. SHOP DRAWINGS SHALL INCLUDE MANUFACTURER CUTS AND SPECIFICATIONS.
2. ALL FENCE COMPONENTS TO BE BLACK VINYL COATED.
3. ALL CHAIN LINK FENCE 6 FOOT HEIGHT OR GREATER TO HAVE MID-RAIL.

5 CHAIN LINK FENCE
N.T.S

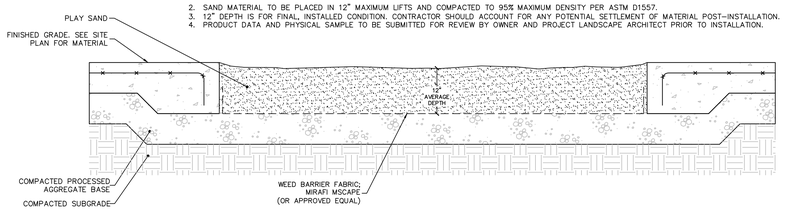


NOTES:
1. CONTRACTOR TO SUBMIT SHOP DRAWINGS TO PROJECT LANDSCAPE ARCHITECT ILLUSTRATING THE HEIGHTS & LAYOUT OF FENCING REQUIRED FOR THE PROJECT. SHOP DRAWINGS SHALL INCLUDE MANUFACTURER CUTS AND SPECIFICATIONS.
2. ALL FENCE COMPONENTS TO BE BLACK POWDERCOATED.

6 STEEL PICKET FENCE (OR APPROVED EQUAL)
N.T.S

NOTES:
1. CONTRACTOR TO SUBMIT PROJECT DATA, PHYSICAL SAMPLES AND SHOP DRAWINGS OF STAIR, HANDRAIL, AND ALL CONNECTIONS PRIOR TO INSTALLATION (TYP.)
2. CONTRACTOR TO PROVIDE PRECAST CONCRETE COLOR AND FINISH SAMPLE FOR REVIEW BY PROJECT LANDSCAPE ARCHITECT.

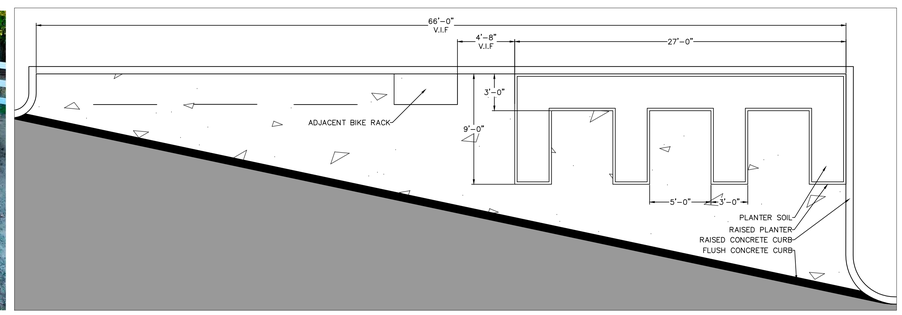
7 PRECAST CONCRETE STAIR WITH HANDRAIL
N.T.S



NOTES:
1. ALL LINES, NUMBERS, LETTERS AND SHAPES SHALL BE 1 1/2" WIDE.
2. BOX BALL NUMBERS SHALL BE 2'-0" HIGH.
3. ALL LINES, NUMBERS, LETTERS, AND SHAPES SHALL BE PAINTED WHITE.
4. FINAL COLOR SELECTION SHALL BE DETERMINED BY OWNER, PROJECT ARCHITECT, AND LANDSCAPE ARCHITECT. CONTRACTOR SHALL SUBMIT COLOR SAMPLES FOR REVIEW.

8 PAINTED GAMES
N.T.S

PLAY SAND NOTES:
1. PLAY SAND SHALL MEET FOLLOWING GRADATION CRITERIA:



PASSING SIEVE (DRY ANALYSIS)	PERCENT BY WEIGHT
NO. 16	95–100%
NO. 30	85–100%
NO. 50	65–85%
NO. 100	10–30%
NO. 200	0–10%

2. SAND MATERIAL TO BE PLACED IN 12" MAXIMUM LIFTS AND COMPACTED TO 95% MAXIMUM DENSITY PER ASTM D1557.
3. 12" DEPTH IS FOR FINAL INSTALLED CONDITION. CONTRACTOR SHOULD ACCOUNT FOR ANY POTENTIAL SETTLEMENT OF MATERIAL POST-INSTALLATION.
4. PRODUCT DATA AND PHYSICAL SAMPLE TO BE SUBMITTED FOR REVIEW BY OWNER AND PROJECT LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.

9 SAND PLAY AREA
N.T.S

NOTES:
1. PLANTER HEIGHT TO BE 2'-0".
2. CEDAR WOOD CLADDING WITH LINING AND PLANTING SOIL. PLANTING SOILS TO BE GARDEN SOIL BY READ CUSTOM SOILS OR APPROVED EQUAL. PLANTINGS TO BE IMPLEMENTED BY STUDENTS, NOT INCLUDED IN SCHOOL CONSTRUCTION PROJECT.
3. CONTRACTOR TO SUBMIT SHOP DRAWINGS TO PROJECT LANDSCAPE ARCHITECT ILLUSTRATING THE HEIGHTS AND LAYOUT.

10 ADD ALTERNATE #1: RAISED GARDEN PLANTER

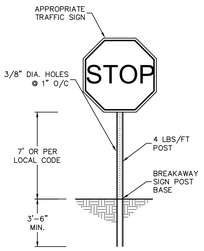
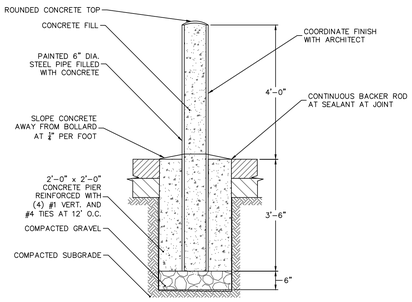
1 FIRE LANE STRIPING
N.T.S.



NOTES:
1. PAVEMENT MARKING TO BE INSTALLED AT EACH STOP BAR LOCATION SHOWN ON THE PLANS, EXCLUDING ROADWAYS.

2 STOP BAR
N.T.S.



GENERAL NOTES:
1. INSTALL THE EDGE OF THE DETECTABLE WARNING STRIP 6" FROM THE EDGE OF ROAD.
2. TO PERMIT WHEELCHAIR WHEELS TO ROLL BETWEEN DOMES, ALIGN DOMES ON A SQUARE GRID IN THE DIRECTION OF PEDESTRIAN TRAVEL.
3. CAST IRON DETECTABLE WARNING PLATES WITH TRUNCATED DOMES MANUFACTURED BY EAST JORDAN IRONWORKS OR APPROVED EQUAL IN A BLACK ASPHALT DIP FINISH SHOULD BE INSTALLED IN LOCATIONS SHOWN ON C-100-00.

3 DETECTABLE WARNING
N.T.S.

NOTES:
1. ALL POSTS SHALL BE OF ADEQUATE LENGTH TO MEET THE REQUIREMENTS FOR ERECTION AS STATED IN THE CURRENT "MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREETS AND HIGHWAYS".
2. STEEL FOR DELINEATOR POSTS SHALL BE A.S.T.M. A36 STEEL. STEEL FOR ALL OTHER POSTS SHALL CONFORM TO THE MECHANICAL REQUIREMENTS OF ASTM A 499 GRADE 80 AND TO THE CHEMICAL REQUIREMENTS OF A.S.T.M. A1 CARBON STEEL TEE RAIL HAVING NOMINAL WEIGHT (MASS) OF 91 LBS OR GREATER PER LINEAR YARD.
3. ALL STEEL POSTS AND BRACKETS SHALL BE CUT, BENT, AND HOLES PUNCHED AND DRILLED BEFORE GALVANIZING. GALVANIZING SHALL BE IN CONFORMANCE WITH CURRENT A.S.T.M. SPECIFICATION A123-78 (OR LATEST REVISED).
4. ALL POST SHALL BE EMBEDDED MINIMUM 3'-6" BELOW GRADE.
5. THE BOTTOM BASE POST SHALL HAVE A MAXIMUM REVEAL OF 4".
6. ALL SIGN POSTS SHALL HAVE BREAKAWAY FEATURES THAT MEET AASHTO REQUIREMENTS CONTAINED IN THE CURRENT "STANDARD SPECIFICATIONS FOR STRUCTURAL SUPPORTS FOR HIGHWAY SIGNS, LUMINAIRES AND TRAFFIC SIGNALS."
7. SIGN PANEL SIZES SHALL DETERMINE POST TYPE AND NUMBERS AS SHOWN ON THIS DETAIL AND DIRECTIONAL SIGN SHEET.
8. BOLTS SHALL NOT PROTRUDE MORE THAN 3/4" BEYOND THE NUT WHEN TIGHT BUT SHALL ENGAGE ALL THREADS IN THE NUT.
9. ALL TRAFFIC AND PEDESTRIAN SIGNAGE AND LOCATION SHALL BE IN ACCORDANCE WITH THE "MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREETS AND HIGHWAYS" AND ALL CURRENT AMENDMENTS.

4 TRAFFIC SIGN POST
N.T.S.

NOTES:
1. PAINT PRIME AND FINISH COATS TO BE COMPATIBLE WITH EXTERIOR METAL SURFACES. COLOR SHALL BE COORDINATED WITH OWNER/ARCHITECT.

5 BOLLARD
N.T.S.

CONTRACTOR NOTES

1. THE WORK TO BE PERFORMED IS AS SHOWN ON THE DRAWINGS. THE CONTRACTOR IS RESPONSIBLE FOR MEANS AND METHODS OF CONSTRUCTION; AS SUCH, THESE PLANS MAY NOT COMPLETELY REPRESENT ALL SPECIFIC DETAILS OF INSTALLATION REQUIRED FOR CONSTRUCTION. CONTRACTOR IS RESPONSIBLE TO PROVIDE ALL IMPROVEMENTS REQUIRED TO ACHIEVE CONSTRUCTION DEPICTED ON THESE PLANS.
2. THE CONTRACTOR SHALL PROVIDE WRITTEN REQUESTS FOR INFORMATION TO THE OWNER AND OWNER'S ENGINEER PRIOR TO THE CONSTRUCTION OF ANY SPECIFIC SITEWORK ITEM IF ANY SITEWORK ITEM DEPICTED ON THE PLANS WARRANTS ADDITIONAL ENGINEERING INFORMATION REQUIRED FOR CONSTRUCTION AND IS NOT RELATED TO MEANS AND METHODS OF CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SITEWORK ITEMS INSTALLED DIFFERENTLY THAN INTENDED AS DEPICTED ON THE PLANS IN THE ABSENCE OF SUBMITTING AND RECEIVING REVIEWS AND/OR DIRECTION ON WRITTEN REQUESTS FOR INFORMATION.
3. THE CONTRACTOR SHALL ACCEPT THE SITE AS IS. THE CONTRACTOR SHALL MAKE AND SHALL BE DEEMED TO HAVE MADE A THOROUGH SITE INSPECTION IN ORDER TO FIELD CHECK EXISTING SITE CONDITIONS, CORRELATE CONDITIONS WITH THE DRAWINGS AND RESOLVE ANY POSSIBLE CONSTRUCTION CONFLICTS WITH THE OWNER AND OWNER'S ENGINEER PRIOR TO COMMENCEMENT OF WORK. THIS INCLUDES A TOPOGRAPHIC SURVEY OF ANY AREAS THE CONTRACTOR REQUIRES ADDITIONAL TOPOGRAPHIC INFORMATION. ANY CONDITIONS THAT DIFFER FROM THE EXISTING CONDITIONS SHOWN ON THE DRAWINGS THAT ARE NOT BROUGHT TO THE ATTENTION OF THE OWNER AND OWNER'S ENGINEER PRIOR TO THE START OF WORK SHALL NOT BE CONSIDERED GROUNDS FOR A CHANGE ORDER.
4. IT IS SPECIFICALLY NOTED THAT INFORMATION RELATED TO ELEVATIONS AND PROPOSED UTILITIES (SUCH AS ROADWAY GRADES, INVERT ELEVATIONS, RIM ELEVATIONS, GRATE ELEVATIONS, BUILDING FINISHED FLOOR ELEVATIONS, ETC.) MAY BE FOUND IN MORE THAN ONE LOCATION ON THE DRAWINGS. CONTRACTOR SHALL REVIEW ALL PLANS, PROFILES AND ANY INFORMATION/DATA TABLES FOR CONSISTENCY PRIOR TO CONSTRUCTION. ANY INCONSISTENCIES OR DISCREPANCIES THAT ARE FOUND SHALL IMMEDIATELY BE BROUGHT TO THE ATTENTION OF THE OWNER'S ENGINEER IN WRITING REQUESTING CLARIFICATION PRIOR TO CONSTRUCTION.
5. CONTRACTOR SHALL NOTE THAT THERE ARE ADDITIONAL NOTES, SPECIFICATIONS AND REQUIREMENTS CONTAINED ON SHEETS THROUGHOUT THE PLAN SET AND AVAILABLE REFERENCES TO SPECIFICATIONS FROM APPLICABLE GOVERNING AUTHORITIES AND INDUSTRY STANDARDS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN, REVIEW AND ADHERE TO ALL APPLICABLE REQUIREMENTS.

DRAINAGE NOTES

1. ALL PROPOSED STORM DRAINAGE PIPING TO UTILIZE SOIL-TIGHT JOINTS.
2. LOCATIONS AND ELEVATIONS OF ROOF LEADERS SHOULD BE COORDINATED WITH ARCHITECTURAL & MEP DRAWINGS PRIOR TO CONSTRUCTION.
3. CLEANOUTS SHALL BE PROVIDED FLUSH TO GRADE AT ALL LOCATIONS OF ROOF DRAIN INTERSECTIONS, BENDS AND UPSTREAM ENDS.
4. ALL REQUIRED STORM LATERALS SERVICING THE BUILDINGS SHALL BE COORDINATED AND CONSTRUCTED TO WITHIN FIVE FEET OF EACH BUILDING LATERAL ENTRANCE LOCATION AT THE INVERTS NOTED. ANY NECESSARY EXTENSIONS, RELOCATIONS, OR CORRECTIONS WITHIN FIVE FEET OF THE BUILDING NECESSARY TO COMPLETE CONNECTION OF LATERALS TO THE BUILDINGS SHALL BE MADE BY THE BUILDING CONTRACTOR.
5. THE SIZES OF ALL DRAINAGE STRUCTURES HAVE BEEN DESIGNED TO ACCOMMODATE PIPE SIZES AND CONFIGURATIONS AS SHOWN. IN THE EVENT THAT PIPE SIZES OR CONFIGURATIONS ARE PROPOSED TO BE MODIFIED BY THE CONTRACTOR, THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING APPROPRIATE SIZED STRUCTURES INCLUDING SHOP DRAWINGS AND SUBMITTALS.
6. STORM DRAINAGE PIPING INSTALLATION SHALL COMMENCE AT THE FURTHEST DOWNSTREAM POINT AND PROCEED UPSTREAM "IN THE DRY".
7. EXISTING STORMWATER DRAINAGE STRUCTURES AND PIPES ARE TO REMAIN UNTIL THE PROPOSED SYSTEM IS INSTALLED AND OPERATIONAL IN ACCORDANCE WITH NOTE 6.
8. ALL SIDEWALKS TO BE CONSTRUCTED WITH 1% MINIMUM (2% MAXIMUM) CROSS SLOPE. SIDEWALKS ADJACENT TO THE BUILDING SHALL BE PITCHED TO THE CURBLINE.

GENERAL NOTES

1. BOUNDARY AND TOPOGRAPHIC INFORMATION OBTAINED FROM A PLAN TITLED "BOUNDARY & TOPOGRAPHIC SURVEY" PREPARED BY LANGAN, DATED 1 MAY 2023.
2. THE SITE IS LOCATED IN ZONE AE, A REGULATORY FLOODWAY AREA PER FIRM MAP 09001C0514G, EFFECTIVE JULY 8, 2013.
3. PROPOSED BUILDING FOOTPRINT RECEIVED ELECTRONICALLY FROM SILVER PETRUCELLI + ASSOCIATES IN NOVEMBER 2024.

JELLYFISH DESIGN NOTES

JELLYFISH TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE LENGTH AND THE NUMBER OF CARTRIDGES. THE STANDARD SURFACE INLET STYLE WITH TRENCH GRATE AND COVER IS SHOWN. ALTERNATE CURB INLET OR PIPE INLET OPTIONS ARE AVAILABLE. PEAK CONVEYANCE CAPACITY TO BE DETERMINED BY ENGINEER OF RECORD.

CARTRIDGE SELECTION

CARTRIDGE LENGTH	54"	40"	27"	15"
OUTLET INVERT TO STRUCTURE INVERT (A)	6'-6"	5'-4"	4'-3"	3'-3"
FLOW RATE HIGH-FLO / DRAINDOWN (CFS) (PER CART)	0.178 / 0.089	0.133 / 0.067	0.089 / 0.045	0.049 / 0.025
MAX. TREATMENT (CFS)	0.89	0.67	0.45	0.25
OUTLET INVERT TO RIM (MIN) (B)	3'-4"	2'-4"	1'-4"	0'-4"

24" TRENCH COVER

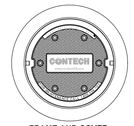
RIM ELEVATION					*
ANTI-FLOTATION BALLAST		WIDTH		HEIGHT	
		*		*	
NOTES/SPECIAL REQUIREMENTS:					
* PER ENGINEER OF RECORD					

GENERAL NOTES:
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STRUCTURE DIMENSIONS AND WEIGHT, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS REPRESENTATIVE, www.ContechES.com
3. JELLYFISH WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING. CONTRACTOR TO CONFIRM STRUCTURE MEETS REQUIREMENTS OF PROJECT.
4. STRUCTURE SHALL MEET AASHTO HS-20 OR PER APPROVING JURISDICTION REQUIREMENTS, WHICHEVER IS MORE STRINGENT, ASSUMING EARTH COVER OF 0'. AND GROUNDWATER ELEVATION AT, OR BELOW, THE OUTLET PIPE INVERT ELEVATION. ENGINEER OF RECORD TO CONFIRM ACTUAL GROUNDWATER ELEVATION. CASTINGS SHALL MEET AASHTO M306 LOAD RATING AND BE CAST WITH THE CONTECH LOGO.
5. STRUCTURE SHALL BE PRECAST CONCRETE CONFORMING TO ASTM C-857, ASTM C-918, AND AASHTO LOAD FACTOR DESIGN METHOD.
6. OUTLET PIPE INVERT IS EQUAL TO THE CARTRIDGE DECK ELEVATION.
7. THE OUTLET PIPE DIAMETER FOR NEW INSTALLATIONS IS RECOMMENDEDTO BE ONE PIPE SIZE LARGER THAN THE INLET PIPE (WHERE APPLICABLE) AT EQUAL OR GREATER SLOPE.
8. NO PRODUCT SUBSTITUTIONS SHALL BE ACCEPTED UNLESS SUBMITTED 10 DAYS PRIOR TO PROJECT BID DATE, OR AS DIRECTED BY THE ENGINEER OF RECORD.



INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CDS MANHOLE STRUCTURE. LIFTING CLUTCHES PROVIDED.
C. CONTRACTOR TO ADD JOINT SEALANT BETWEEN ALL STRUCTURE SECTIONS, AND ASSEMBLE STRUCTURE.
D. CONTRACTOR TO PROVIDE, INSTALL, AND GROUT PIPES. MATCH PIPE INVERTS WITH ELEVATIONS SHOWN.
E. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO ASSURE UNIT IS WATER TIGHT. HOLDING WATER TO FLOWLINE INVERT MINIMUM. IT IS SUGGESTED THAT ALL JOINTS BELOW PIPE INVERTS ARE GROUTED.

CDS DESIGN NOTES

THE STANDARD CDS CONFIGURATION IS SHOWN. ALTERNATE CONFIGURATIONS ARE AVAILABLE AND ARE LISTED BELOW. SOME CONFIGURATIONS MAY BE COMBINED TO SUIT SITE REQUIREMENTS.

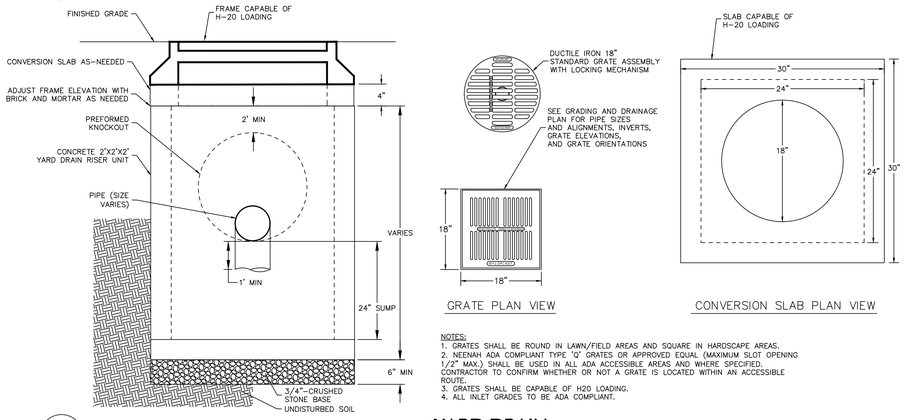
CONFIGURATION DESCRIPTION

GRATED INLET ONLY (NO INLET PIPE)
GRATED INLET WITH INLET PIPE OR PIPE'S
CURB INLET ONLY (NO INLET PIPE)
CURB INLET WITH INLET PIPE OR PIPES
SEPARATE OIL BAFFLE (SINGLE INLET PIPE REQUIRED FOR THIS CONFIGURATION)
SEDIMENT WEIR FOR NJDEP / NJCAT CONFORMING UNITS

SITE SPECIFIC DATA REQUIRMENTS

STRUCTURE ID	TO BE SUPPLIED BY ENGINEER OF RECORD
WATER QUALITY FLOW RATE (CFS)	
PEAK FLOW RATE (CFS)	
PEAK FLOW RETURN PERIOD (YRS)	TO BE SUPPLIED BY ENGINEER OF RECORD
SCREEN APERTURE (2400 OR 4700)	2400

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. DIMENSIONS MARKED WITH ( ) ARE REFERENCE DIMENSIONS. ACTUAL DIMENSIONS MAY VARY.
3. FOR FABRICATION DRAWINGS WITH DETAILED STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE, www.contechES.com.
4. CDS WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
5. CDS STRUCTURE SHALL MEET AASHTO HS-20 OR PER APPROVING JURISDICTION REQUIREMENTS, WHICHEVER IS MORE STRINGENT, ASSUMING EARTH COVER OF 0'. AND GROUNDWATER ELEVATION AT, OR BELOW, THE OUTLET PIPE INVERT ELEVATION. ENGINEER OF RECORD TO CONFIRM ACTUAL GROUNDWATER ELEVATION.
6. PVC HYDRAULIC SHEAR PLATE IS PLACED ON SHELF AT BOTTOM OF SCREEN CYLINDER. REMOVE AND REPLACE AS NECESSARY DURING MAINTENANCE CLEANINGS.



INSTALLATION NOTES
A. ANY SUBBASE, BACKFILL DEPTH, AND/OR ANTIFLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CDS MANHOLE STRUCTURE. LIFTING CLUTCHES PROVIDED.
C. CONTRACTOR TO ADD JOINT SEALANT BETWEEN ALL STRUCTURE SECTIONS, AND ASSEMBLE STRUCTURE.
D. CONTRACTOR TO PROVIDE, INSTALL, AND GROUT PIPES. MATCH PIPE INVERTS WITH ELEVATIONS SHOWN.
E. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO ASSURE UNIT IS WATER TIGHT. HOLDING WATER TO FLOWLINE INVERT MINIMUM. IT IS SUGGESTED THAT ALL JOINTS BELOW PIPE INVERTS ARE GROUTED.

UTILITY NOTES

GENERAL:

1. THE CONTRACTOR IS SPECIFICALLY CAUTIONED THAT THE LOCATION AND/OR ELEVATION OF EXISTING UTILITIES AS SHOWN ON THESE PLANS IS BASED ON RECORDS OF THE VARIOUS UTILITY COMPANIES AND, WHERE POSSIBLE, MEASUREMENTS TAKEN IN THE FIELD. THE INFORMATION IS NOT TO BE RELIED ON AS BEING EXACT OR COMPLETE. THE CONTRACTOR MUST CALL THE APPROPRIATE UTILITY COMPANY AT LEAST 48 HOURS BEFORE ANY EXCAVATION TO REQUEST EXACT FIELD LOCATION OF UTILITIES. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO RELOCATE ALL EXISTING UTILITIES WHICH CONFLICT WITH THE PROPOSED IMPROVEMENTS SHOWN ON THE PLANS IN A MANNER WHICH WILL NOT NEGATIVELY AFFECT ANY EXISTING USERS OF THESE UTILITIES.
2. THE CONTRACTOR SHALL FIELD VERIFY ALL EXISTING UTILITY LOCATIONS (WATER, SEWER, GAS, ELECTRIC, TELEPHONE AND CABLE), INVERTS AND CONDITIONS PRIOR TO CONSTRUCTION. ANY CONDITIONS FOUND TO SUBSTANTIALLY DIFFER FROM THOSE SHOWN ON THE DRAWINGS AND REQUIRING MODIFICATIONS TO THE SITE DESIGN SHALL BE IMMEDIATELY BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE CONSTRUCTION. SUBSTANTIALLY DIFFERING UTILITY CONDITIONS THAT ARE ENCOUNTERED BY THE CONTRACTOR, THAT REQUIRE MODIFICATION OF SITE DESIGN AND THAT ARE NOT BROUGHT TO THE ATTENTION OF THE ENGINEER PRIOR TO CONSTRUCTION SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO.
3. THE CONTRACTOR SHALL ARRANGE FOR AND COORDINATE WITH THE RESPECTIVE UTILITY PROVIDERS FOR SERVICE INSTALLATIONS AND CONNECTIONS. THE CONTRACTOR SHALL COORDINATE WORK TO BE PERFORMED BY THE VARIOUS UTILITY PROVIDERS AND SHALL PAY ALL FEES FOR CONNECTIONS, DISCONNECTIONS RELOCATIONS, INSPECTIONS, AND DEMOLITION UNLESS OTHERWISE STATED IN THE PROJECT SPECIFICATIONS MANUAL AND/OR GENERAL CONDITIONS OF THE CONTRACT.
4. ALL UNDERGROUND UTILITIES MUST BE CLEARLY & PERMANENTLY MARKED WITH UNDERGROUND MARKING TAPE AND AS REQUIRED BY THE APPROPRIATE UTILITY COMPANY.
5. BUILDING UTILITY PENETRATIONS AND LOCATIONS ARE SHOWN FOR THE CONTRACTOR'S INFORMATION. CONTRACTOR SHALL REFER TO ARCHITECTURAL AND MEP PLANS AND SPECIFICATIONS FOR ACTUAL LOCATIONS OF ALL UTILITY ENTRANCES TO INCLUDE SANITARY SEWER LATERALS, DOMESTIC AND FIRE PROTECTION WATER SERVICE, ELECTRICAL, TELEPHONE AND GAS SERVICE, ROOF DRAINS, AND ALL OTHER UTILITIES.
6. CONTRACTOR SHALL COORDINATE INSTALLATION OF UTILITIES IN SUCH A MANNER AS TO AVOID CONFLICTS AND TO ENSURE PROPER DEPTHS ARE ACHIEVED AS WELL AS COORDINATING WITH THE REGULATORY AGENCY AS TO LOCATION OF AND SCHEDULING OF CONNECTIONS TO THEIR FACILITIES.
7. ALL MANHOLE COVERS, GRATES, RIMS, AND UTILITY STRUCTURES TO REMAIN SHALL BE ADJUSTED TO PROPOSED ELEVATION.
8. CONTRACTOR TO PROVIDE ALL FITTINGS AND BENDS NECESSARY TO ACCOMPLISH WORK.
9. A MINIMUM EIGHTEEN (18) INCHES VERTICAL CLEARANCE BETWEEN WATER, GAS, ELECTRICAL, AND TELEPHONE LINES AND STORM PIPING SHALL BE PROVIDED.
10. UTILITY CONNECTION DESIGN AS REFLECTED ON THE PLAN MAY CHANGE SUBJECT TO UTILITY PROVIDER AND GOVERNING AUTHORITY STAFF REVIEW.
11. ALL EXISTING PAVEMENT WHERE UTILITY PIPING IS TO BE INSTALLED SHALL BE SAW CUT. AFTER UTILITY INSTALLATION IS COMPLETED, THE CONTRACTOR SHALL INSTALL PERMANENT PAVEMENT REPAIR AS DETAILED ON THE DRAWINGS OR AS REQUIRED BY THE OWNER HAVING JURISDICTION. IN THE EVENT THAT PAVEMENT REPAIR CANNOT BE PROVIDED DUE TO WEATHER CONDITIONS, PROVIDE TEMPORARY PAVEMENT REPAIR UNTIL PERMANENT REPAIR CAN BE PROVIDED.
12. ALL UTILITY LINES SHALL BE INSPECTED AND APPROVED PRIOR TO PLACEMENT OF BACKFILL. INSPECTION SHALL OCCUR ONLY WHEN THE LINES ARE FULLY BEDDED IN THE SPECIFIED MATERIAL AND AFTER ANY APPLICABLE TESTS ARE SUCCESSFULLY COMPLETED. INSPECTIONS SHALL BE PERFORMED BY THE APPLICABLE UTILITY PROVIDER, THE AHJ, AND/OR THE OWNER'S SPECIAL INSPECTOR. IF APPLICABLE, BACKFILLING SHALL BE MONITORED AND TESTED BY THE OWNER'S SPECIAL INSPECTOR.
13. SITE CONTRACTOR SHALL COORDINATE INSTALLATION OF CONDUIT AND CABLES FOR SITE LIGHTING WITH THE BUILDING ELECTRICAL CONTRACTOR.
14. THE CONTRACTOR SHALL ARRANGE AND COORDINATE WITH UTILITY PROVIDERS FOR WORK TO BE PERFORMED BY UTILITY PROVIDERS. THE CONTRACTOR SHALL PAY ALL UTILITY FEES UNLESS OTHERWISE STATED IN THE PROJECT SPECIFICATION MANUAL AND GENERAL CONDITIONS, AND REPAIR PAVEMENTS AS NECESSARY.
15. ALTERNATIVE METHODS AND PRODUCTS OTHER THAN THOSE SPECIFIED MAY BE USED IF REVIEWED AND APPROVED BY THE OWNER, ENGINEER, AND APPROPRIATE REGULATORY AGENCIES PRIOR TO INSTALLATION.
16. THE CONTRACTOR SHALL MAINTAIN ALL FLOWS AND UTILITY CONNECTIONS TO EXISTING BUILDINGS WITHOUT INTERRUPTION UNLESS/UNTIL AUTHORIZED TO DISCONNECT BY THE OWNERS, THE CIVIL ENGINEER, UTILITY PROVIDERS AND GOVERNING AUTHORITIES.
17. ALL REQUIRED UTILITIES SERVING THE BUILDINGS SHALL BE COORDINATED AND CONSTRUCTED TO WITHIN FIVE FEET OF BUILDING UTILITY ENTRANCE LOCATION AT THE INVERTS NOTED. ALL REQUIRED CONNECTION FEES SHALL BE PAID BY THE BUILDING CONTRACTOR. ANY NECESSARY EXTENSIONS, RELOCATIONS, OR CORRECTIONS WITHIN FIVE FEET OF THE BUILDING NECESSARY TO COMPLETE CONNECTION OF UTILITIES TO THE BUILDINGS SHALL BE MADE BY THE BUILDING CONTRACTOR.
18. ALL ON-SITE UTILITIES SHALL BE UNDERGROUND, WHERE APPLICABLE.
19. CONTRACTOR IS REQUIRED TO DIGITALLY PHOTOGRAPH 75% OF THE UTILITIES INSTALLED.

WATER & SANITARY:

1. SEWER AND WATER SERVICES TO THE EXISTING BUILDINGS SHALL REMAIN CONTINUOUS THROUGHOUT CONSTRUCTION. THESE BUILDINGS WILL BE OCCUPIED THROUGHOUT CONSTRUCTION.
2. THE CONTRACTOR MUST VERIFY THE LOCATION, SIZE, AND SERVICEABILITY OF THE EXISTING WATER AND SANITARY SEWER MAINS PRIOR TO BEGINNING ANY SITE OR BUILDING CONSTRUCTION.
3. ALL WATER MAIN PIPING SHALL BE CLASS 54 DUCTILE IRON PIPE.
4. CONTRACTOR SHALL MAINTAIN A MINIMUM OF 4 FEET OF COVER FOR ALL WATER DISTRIBUTION PIPING.
5. THRUST BLOCKS SHALL BE PROVIDED ALONG WATER AND FORCE MAIN LINES 6" IN DIAMETER OR LARGER AT ALL TEES, ELBOWS AND PLUGS.
6. ALL NEW WATER LINES SHALL BE PRESSURE TESTED AND LEAKAGE TESTED IN ACCORDANCE WITH THE LATEST EDITION OF AWWA STANDARD C600, OR THE REGIONAL WATER AUTHORITY REQUIREMENTS, WHICHEVER IS MORE RESTRICTIVE.
7. ALL NEW WATER MAINS SHALL BE DISINFECTED AND TESTED IN ACCORDANCE WITH AWWA STANDARD C651 AND LOCAL PROVIDER REQUIREMENTS.
8. ALL SANITARY SEWER PIPE TO BE SDR 35 PVC PIPE UNLESS OTHERWISE NOTED.
9. CONTRACTOR SHALL MAINTAIN 4.5 FEET OF COVER ON ALL SEWER PIPES.
10. WATER MAINS CROSSING SEWERS SHALL BE LAID TO PROVIDE A MINIMUM HORIZONTAL DISTANCE OF 10 FEET AND MINIMUM VERTICAL DISTANCE OF 18-INCHES BETWEEN THE OUTSIDE OF WATER MAIN AND THE OUTSIDE OF SEWER OR IN CASES WHERE THE VERTICAL SEPARATION IS LESS THAN 18-INCHES OR AS OTHERWISE SPECIFIED ON THIS DRAWING OR THE PROFILE SHEETS, STORM OR SANITARY SEWER PIPE SHALL BE ENCASED WITH K-KRETE 5-FT MINIMUM IN EACH DIRECTION OF PIPE RUN AND 6-INCHES MINIMUM AROUND THE PIPE DIAMETER. AT ALL CROSSING ONE FULL LENGTH OF WATER PIPE SHALL BE LOCATED SO BOTH JOINTS ARE MAXIMUM DISTANCE FROM SEWER.
11. CONTRACTOR TO PROVIDE NECESSARY MATERIALS TO ENSURE CONTINUOUS SERVICE OF THE FORCE MAIN THROUGHOUT CONSTRUCTION. ITEMS NEEDED INCLUDE BUT ARE NOT LIMITED TO TEMPORARY PUMPS, STORAGE TANKS, AND POWER. IF A SHUTDOWN IS NEEDED, PRIOR COORDINATION AND AUTHORIZATION FROM THE AFFECTED PROPERTIES MUST BE OBTAINED BY THE CONTRACTOR.

CONTRACTOR NOTES

1. THE WORK TO BE PERFORMED IS AS SHOWN ON THE DRAWINGS. THE CONTRACTOR IS RESPONSIBLE FOR MEANS AND METHODS OF CONSTRUCTION; AS SUCH, THESE PLANS MAY NOT COMPLETELY REPRESENT ALL SPECIFIC DETAILS OF INSTALLATION REQUIRED FOR CONSTRUCTION. CONTRACTOR IS RESPONSIBLE TO PROVIDE ALL IMPROVEMENTS REQUIRED TO ACHIEVE CONSTRUCTION DEPICTED ON THESE PLANS.
2. THE CONTRACTOR SHALL PROVIDE WRITTEN REQUESTS FOR INFORMATION TO THE OWNER AND OWNER'S ENGINEER PRIOR TO THE CONSTRUCTION OF ANY SPECIFIC SITEWORK ITEM IF ANY SITEWORK ITEM DEPICTED ON THE PLANS WARRANTS ADDITIONAL ENGINEERING INFORMATION REQUIRED FOR CONSTRUCTION AND IS NOT RELATED TO MEANS AND METHODS OF CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SITEWORK ITEMS INSTALLED DIFFERENTLY THAN INTENDED AS DEPICTED ON THE PLANS IN THE ABSENCE OF SUBMITTING AND RECEIVING REVIEWS AND/OR DIRECTION ON WRITTEN REQUESTS FOR INFORMATION.
