

The Windermere Foundation Scholarship is designed to encourage and recognize eligible students who show determination in seeking to continue their education, in conjunction with contributing to society through various forms of community service, especially in regard to the homeless or those at risk of becoming homeless. Priority is given to those students who themselves are at risk financially and without help of the Foundation might not continue their education. Students need not attend a four year college or university to receive this scholarship; any form of continuing education will be considered for the scholarship. It is the Foundation's belief that continued education is but one of many ways we at the Foundation can contribute to the eradication of homelessness in our community.

Applicant Name: _____ Counselor Name: _____

Current School: _____ Current GPA: _____ Cumulative GPA: _____
