

Accelerated Reader: How to Interpret Scores/Reading Levels

At Harbour View, students in grades 2-5 will take the STAR test online each trimester. The results will identify their independent reading level and comprehension. (First grade begins learning the program in the Spring.) The reading level is a decimal number. The first number represents the grade and the number after the decimal represents the month. For example 2.3 means that the child is reading at beginning of second grade level (or 3 months into 2nd grade).

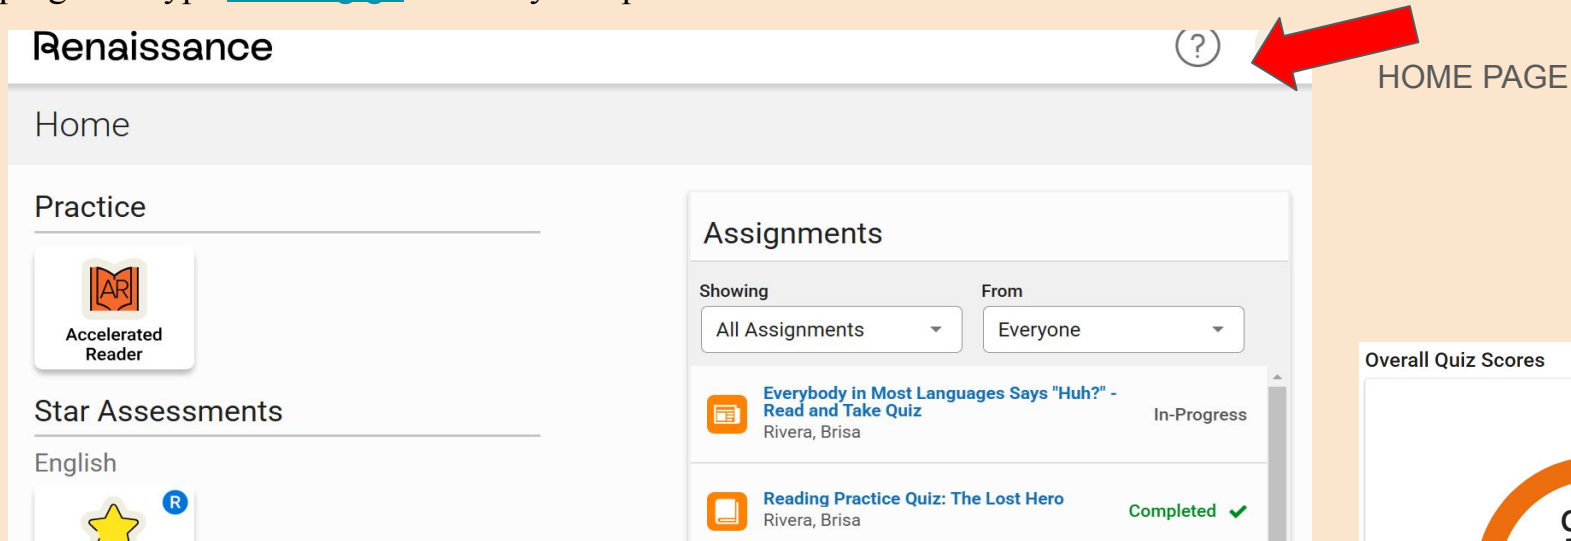

The online assessment also generates a points goal. Ideally, this will motivate your child to read books at the appropriate level. Each book has a set point level. Most titles that you find at the library or book store are in the AR system. Here at school, we strive for 80% comprehension in order to get credit for points earned. The AR quizzes are available to students until 3:00, so we do them at school. However, your child can take the quiz on any book read anywhere. The only information needed is the title. At the end of each trimester, Harbour View students will receive an award if they've met their points/comprehension goal.

Think of AR as an online book report – your child reads a book independently, takes a quiz to show comprehension and receives the points for reading.

Understanding Accelerated Reader

As a parent, you have access through the CLEVER page to see your child's quiz scores, reading levels, and points progress. Type ovsd.org/go from any computer to access CLEVER.

On the Home page you can click on the quizzes taken (right) to see your child's scores for each. If you click on the AR app on the left you will see an icon on the top left of the next page that will show the progress toward the trimester goal. The Star app is the diagnostic.
