

# How to Clear Your Browsing Data on your Chromebook

---

You **should clear** the **cache** on your **Google Chrome** browser periodically to ensure that it's functioning efficiently, as an overloaded **cache could** be slowing down your browsing experience.

On your Chromebook, open Chrome.

2. At the top-right, click More (the three dots) ⋮

3. Click **Delete browsing data**.

4. At the top of the box that opens, select **All time**.

5. Next to 'Cookies and other site data' and 'Cached images and files', tick the boxes.

6. Click **Delete data**.
