BEAVERTON SCHOOL DISTRICT

4/3/25

IPM POSTING CHANGES

The Beaverton School District will be implementing a change to the notification process of a pesticide application. In the past, the Principal's Secretary or the Head Custodian would post the notification to the front door 24 hours in advance, this is no longer required. The Oregon Department of Agriculture does require that Warning Signs be posted at the application site (ie: baseball field, classroom door, etc.) 24 hours in advance, and to leave the signs up until 72 hours after a pesticide application is applied. See examples below of the New Posting and the Old Posting.

Pesticide Notifications can be viewed on the Intranet. https://www.beaverton.k12.or.us Under the Departments tab, select Maintenance Services and then select Integrated Pest Management. A list of schools and application dates will be displayed here.

Please contact IPM Coordinators, Scott Loggins & Justin Freeman if you have any questions.

NEW POSTING

WARNING

PESTICIDE-TREATED AREA

A pesticide application is scheduled for/was performed on:

DATE_____ **TIME**_____

Expected / Actual reentry time When application is complete
