Solicitation has been amended as follows:

In order to provide the most reliable and high-quality livestream possible, it would be ideal to have access to a hardwired internet connection (Ethernet) at each venue. A wired connection significantly enhances stream stability and reduces bandwidth fluctuations compared to cellular-based options.

Could you please confirm whether such a connection will be available at each graduation site?

The locations do not have access to a hard-wired internet connection or wifi access. Instead, we have requested in the proposal that they provide their own mobile streaming service, such as LiveU.

Production and streaming of the ceremony to our website and social media channels as they happen so we can broadcast them live to our families. We prefer YouTube. You must provide power/batteries for your equipment and a stable internet/mobile service needed to carry the livestream.
