Elementary Education

Technical Certificate = 30 credit hours

"The education program helps future teachers prepare for a career on day one. In the first education course, students go into school settings for authentic field experience and observation time. From creating lesson plans to working on community engagement projects, students participate in a variety of real teaching experiences and scenarios.

The education program offers a diverse range of classes such as a cultural education class demonstrating how race, ethnicity, gender, and socioeconomic status can impact a child's performance in the classroom. Students also take a course on exceptional children, allowing students to work in a dynamic array of classroom and school settings from elementary school to high school."

$49,578
Median Elementary Education Salary in Indiana

1,990
Annual Job Openings projected through 2029

What are the benefits to a Certificate or Technical Certificate in Elementary Education:

- A technical certificate in elementary education can be earned completely free through Hobart University at Hobart High School. If you are interested in education in your postsecondary studies, this would be a great first step to explore the different facets of this career.
- The technical certificate is half of the Associate of Science: Elementary Education. By working your way to this degree, you can be part of the TSAP program which allows you to transfer to a four-year institution and enter as a junior in the program.
