

FIREFLY ART CAMP

Ages 5-12

Enter a world of magic at **Enchanted Forest Art Camp**! Soak up the sun at Mermaid's cove, make your own hat at the fireside by Goblins' caves, sculpt forest guardians, and so much more and bring enchanting tales to life through art.

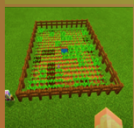

Craft your very own whimsical troll hat, complete with bright, curly hair, oversized pointy ears, googly eyes, and a cheerful smile. With hands-on crafts, imaginative storytelling, and endless fun, this camp sparks your creativity and brings the magic of the forest to life.

MINECRAFT CAMP

Ages 7-12

Harness your kid's love for Minecraft into fun-filled learning this summer. Kids become the ruler of their own worlds, control their mobs and creatures, and learn to change, customize and edit their tools and weapons using coding.

Automate processes inside Minecraft, such as farming and mining using code. Campers can create circuits, switches to control objects, create fun explosions with TNT, and so much more!

Minecraft Redstone

Ages 8-12

Embark on an electrifying Minecraft Redstone adventure where students build a mysterious Redstone-based castle with moving contraptions like automated doors, hidden staircases, secret libraries, draw-bridges, getaway carts, and so many more.

Design your epic castle using Minecraft Redstone and make it truly shine. From switch-activated ceilings to secret libraries to majestic throne rooms, you'll master the art of building and lighting like a Minecraft pro. Let's spark your creativity and light up your summer.

BUILDING CAMP

Ages 5-12

Blast off into an out-of-this-world adventure at **Space Adventures Building Camp** where young explorers will dive into exciting fields like aerospace, and rovers, and build amazing creations like hydraulic turbines and LEGO satellites

Houston, we're ready for take off! Time to build your own LEGO Shuttle. How would gravity and orbits affect our space shuttle launch? You'll learn this, and more, at Early Engineers camp this summer!

STOP-MOTION CAMP

Ages 7-12

Use LEGOs and special video-capture software to bring your LEGO dreams to life. Get creative by developing stories, versatile backgrounds, and sounds! Make characters move, add breathtaking backgrounds, sounds, and overlay explosions.

Write and produce your own stop-motion animation LEGO movie using minifigures, bricks, and changeable backgrounds. Use ideas and techniques related to green screening to open up our LEGO movie up to even bigger and better effects!

ROBOTICS CAMP

Ages 7-12

Build and program LEGO robots to *think, move, and react* through a series of automation challenges. Campers use dedicated laptops and LEGO WEDO kits to learn several aspects of engineering: automation, problem-solving, and programming.

Kids bring their creations to life while sharpening their pattern-recognition and modeling skills. The Wedo software also features a colorful drag-and-drop interface that is easy for students to use and understand.

This is our 3rd summer using Dream Enrichment Camps, and I am always so blown away!! My kids have done the Engineering, Firefly Art and Honeycoding camps in the past. This summer, my son will also try out the Stop Motion Animation camp. This is the first website I look at when planning our summer activities. They are professional, the teachers are exceptional, their customer service is outstanding... but more than that, the content they cover at each camp is truly amazing! They connect with each child, and they understand the power of making learning FUN. I recommend these camps to other parents all the time. They are worth every penny!! **Heather G, El Dorado Hills**

“My daughter just attended a five day art camp, and It. Was. AWESOME! The instructors were friendly and fun, and the curriculum was outstanding. Quite honestly, I didn't think they would be able to keep my daughter's attention for 5 hours a day for five straight days doing art, but they did. The projects were varied, interesting, and very entertaining to make, and the final pieces- showcased at an "art gallery" the last day- were adorable. One of the best things was that they got to do a bunch of messy art (like paper mache), and the mess was theirs to clean up. There are daily emails informing parents of the day's happenings and other tidbits, such as which artist they studied, etc. | Kelly H • Sacramento
