FEBRUARY EVENTS & HIGHLIGHTS

MARCH 2025

MAGNET PROGRAM SHOWCASE - FEB. 22ND

The first annual Magnet Program Showcase featured students from Pre-K to fifth grade, who proudly demonstrated the skills they developed through their participation in the magnet programs. The event offered a diverse range of performances, including STEAM activities, as well as visual arts, dance, and music.

SMESA - OBSERVATION POWER!

Pre-K explored animal and tree movement through creative dances that emphasized awareness. Kindergarten integrated art and technology, learning to code rocket ships to move. First grade designed their own color-changing Smart Lamp.

SMSA - LEARNING ADVENTURES!

Students had an action-packed time exploring a variety of exciting learning experiences, from zoo field trips and a musical, The Battle of the Bands, to presentations by LDW and the Dept. of Energy. They also participated in the eSports first Rocket League Tournament and the student-led Black History Month Program!
