Introduction

Educational Effectiveness Survey, Student SEL Edition

While there is no single solution for all schools, research on effective schools identified common characteristics of high-performing schools known as the 9 Characteristics. Successful schools engaged in improvement activities focus on these characteristics of “organizational and educator capacity” to create and improve the system(s) that ultimately drive performance outcomes. Understanding the perceptions of your student population is essential to inform changes for improvement.

Student voice is an integral part of compiling an accurate view of these school improvement constructs. In both stand-alone reporting and through common questions between staff, students, and families, the EES Student survey brings this voice to the table. Beyond the value for school staff to learn from student perspectives, CEE can make the EES Student data available to student leadership through the interactive tools. This allows students to take ownership of the school culture, efforts to improve this culture, and the ability to monitor growth over time.

Effective Leadership

South Whidbey Middle School

The principal of this school believes student learning is the #1 priority

I often see the principal or administrators around the school talking to students

If I want to talk with my teacher(s), they are available to me

My teacher(s) listen to my ideas and/or concerns

In class we often work with other students to solve a problem/do a task

Our school engages in difficult conversations about race, gender, oppression and discrimination

My teacher(s) help me learn in more ways than the teacher just talking in front of class
