JANUARY EVENTS & HIGHLIGHTS

FEBRUARY 2025

CELEBRATING 100 DAYS OF SCHOOL

It was a special month for both Magnet Academy campuses. Not only did they celebrate special 100 DAYS OF SCHOOL activities, but it was also a historic snow date for Louisiana! With over 8 inches of snow, students from all over will remember this month for the rest of their lives, as the rare snowfall turned the school year into an unforgettable experience for everyone involved.

SMESA - ARTISTIC EXPRESSION!

This month combined creativity with learning! PreK created their own instruments and programmed Indi Cars by coding. Kindergarten practiced shapes with body movement in dance. First grade designed puppets to practice their magic 'e'. Bird nests were engineered too!

SMSA - SCIENTIFIC DISCOVERY!

Scientific discovery was strong this month! From designing cacti models to investigating magnetic force, students were busy programming and engineering! Mrs. Bruno's class danced to learn plant growth. Mrs. Skipper's engineered circuit pianos. And Mrs. Lafleur's class learned about biomes!
