

EDUCATIONAL SITE STUDENT AGREEMENT

To provide effective web-based tools and learning applications for students, the School District of Lodi must comply with federal regulations, including the Children's Online Privacy Protection Act (COPPA). COPPA requires parental notification and consent before websites collect personal information from children under 13.

Under this law, schools are allowed to consent on behalf of parents, which removes the need for individual consent to each website operator. This form grants the School District of Lodi permission to share specific personal information about your child, including first name, last name, email address, date of birth, and username. This information will only be shared with web-based educational programs and services approved by district staff for instructional purposes. This consent will remain on file to streamline future use of educational tools.

Student and Staff Responsibilities

Students must adhere to the Lodi Technology Handbook and the following guidelines when using online tools:

Acceptable Use Guidelines:

- Keep login credentials and passwords private.
- Use approved online tools only for educational purposes.
- Share only information deemed safe and appropriate by district staff.
- Follow online citizenship and proper etiquette standards.

Unacceptable Use Includes:

- Using another student's account or misrepresenting identity.
- Using accounts for illegal purposes.
- Violating the Student Technology Handbook or Board Policies.

Parent/Guardian Permission

Parents agree that:

- My child will use approved web-based tools for educational purposes.
- My child will follow all policies regarding internet and computer use.
- My child's accounts are subject to monitoring and are not private.
