Award of Contract	May 16, 2025
Contract Starting Date	Tuesday, June 3, 2025

ADDENDUM 04225
FOR RFP #CCSD-ECS041825
EMERGENCY COMMUNICATIONS SOFTWARE

Issued April 2, 2025

In reference to page 4, Detailed Scope of Work, Required Items, VIII, third bullet point reads.

Changing the requirement from Capable of integration with panic button wearable devices. (Required in schools by HB84, Utah 2024 legislative session, as amended by HB40, 2025 legislative session, and administrative rules. Panic buttons must be on the approved list given by the Department of Public Safety, and the Office of Chief State Security Officer.)

Revise paragraph and required items will now read:

The system should support an open API integration with a wearable panic button device solution, as required by Utah HB84 (2024 legislative session) and amended by HB40 (2025 legislative session), along with administrative rules. Please note: Panic buttons will be selected and approved by the Department of Public Safety and the Office of the Chief State Security Officer. Currently, approved options are unknown, thus we are requesting the ability for an API to integrate the panic button solution with the emergency communication system.
