## EXECUTIVE SUMMARY

- Education Code Section 17620 authorizes school districts to levy a fee, charge, dedication or other form of requirement against any development project for the construction or reconstruction of school facilities provided that the district can show justification for levying of fees.
- Government Code 65995 limits the fee to be collected to the statutory fee unless a school district conducts a School Facility Needs Analysis (Government Code 65995.6) and meets certain conditions.
- The adjusted baseline capacity in the Folsom Cordova Unified School District based on Education Code 17071, is 23,388 TK-12 students.
- Each new single-family residential unit to be constructed in the Folsom Cordova Unified School District will average 2,425 square feet and will generate an average of 0.68 TK-12 grade students to house. Each new single-family attached home will average 1,500 square feet and will generate 0.37 TK-12 grade students to house. Each new multi-family home will average 1,052 square feet and will generate 0.34 TK-12 grade students to house.
- Over the next five years, it is estimated that 4,360 single-family residential units; 979 single-family attached residential units; and 3,300 multi-family units will be constructed. This totals 8,639 new residential units.
- The proposed developer fee rates are calculated on a School Facilities Improvement District (SFID) basis. SFID 1 represents the City of Rancho Cordova, Mather, and the unincorporated area of Sacramento County south of Highway 50 and generally west of Prairie City Road. SFID 2 represents the City of Folsom and the area south of Highway 50 and generally east of Prairie City Road.
- The use of the two SFIDs for fee calculation allows for a more accurate representation of the unique issues associated with the geographic features (such as naturally occurring asbestos) and the realty markets within the district boundaries.
- Based on calculations outlined in Government Code 65995.5, the Folsom Cordova Unified School District is justified in collecting Level II developer fees in the amount of \$8.16 per square foot of new residential single-family construction in SFID 1 and \$9.96 per square foot of new residential construction in the SFID 2.
- Based on calculations outlined in Government Code 65995.7, the Folsom Cordova Unified School District is justified in collecting Level III developer fees in the amount of \$16.32 per square foot of new residential single-family construction in SFID 1 and \$19.92 per square foot of new residential single-family construction in SFID 2.

## I. INTRODUCTION

California school districts have the ability to assess development impact fees on new residential and commercial/industrial development, as long as certain requirements are met. There are three levels of residential development impact fees and one level of commercial/industrial impact fees. The following is an overview of development impact fee levels:

- *Level I* fees are the current statutory fees allowed under Education Code 17620. This code section provides the basic authority for school districts to levy a fee against residential and commercial construction for the purpose of funding school construction or reconstruction of facilities. The Board of Education approved Level 1 fees for SFID 1 and SFID 2 at the April 18, 2024 Board of Education meeting. The Level I fee is adjusted every two years.
- *Level II* fees are outlined in Government Code section 65995.5. This code section allows a school district to impose a higher fee on residential construction if certain conditions are met. Level II fees were approved by the Board of Education at the April 18, 2024, Board of Education meeting, and must be justified on a yearly basis.
- *Level III* fees are outlined in Government Code section 65995.7. If State funding becomes unavailable, this code section authorizes a school district that has been approved to collect Level II fees to collect a higher fee equal to twice the amount of Level II fees. However, if a district eventually receives State funding, this excess fee may be reimbursed to the developers or subtracted from the amount of state funding.

This School Facility Needs Analysis (SFNA) updates enrollment and estimated build-out totals from last year's SFNA. The January 2025 State Allocation Board (SAB) construction grant increases were also used in the justification of the Level II fees. Each year the SAB adjusts the School Facility Program grants based on the statewide cost index for Class B construction using the RS Means index. The SAB construction cost index January 2025 increase was 0.49%.

The SFNA will establish the continued need for new school facilities for unhoused students which are attributable to new residential development within the Folsom Cordova Unified School District. In doing so, the Study will show that the Level I statutory fees are inadequate to meet the needs of the District for school facilities; that the District is eligible to collect a fee in excess of the statutory fee; and that the District meets the requirements to collect Level II fees.

## II. BACKGROUND OF DEVELOPER FEE LEGISLATION

SB 50 (Chapter 407/Statutes 1998) was an urgency measure and became effective on August 27, 1998. This bill instituted a new school facility program by which school districts can apply for state construction and modernization funds. It imposed limitations on the power of cities and counties to require mitigation of school facilities impacts as a condition of approving new development and provided the authority for school districts to levy fees at three different levels.

## III. LEVEL II DEVELOPER FEE JUSTIFICATION

This section of the study will demonstrate that the Folsom Cordova Unified School District meets the necessary requirements outlined below and is eligible to collect development impact fees in excess of the statutory fee for the construction and reconstruction of school facilities.

### ***Requirement I: School Facilities Program Application***

To be eligible to collect Level II developer fees the Folsom Cordova Unified School District must have made a “timely application to the State School Facilities Program for new construction funding for which it is eligible....” The Folsom Cordova Unified School District has over \$25 million in applications for new construction and modernization funding with the Office of Public-School Construction. Proposition 2, the Public Education Facilities Bond was passed by the voters of California on November 5, 2024. The district has over \$25 million in applications on file with the State. Applications on file will be funded in Priority Funding Rounds, twice a year.

### ***Requirement II: Year Round Schools, General Obligation Bonds, Debt Incurred and Relocatable Classrooms***

After January 1, 2023, a district must satisfy two of the four requirements listed below:

- Have a substantial percentage of students on multi-track year-round scheduling.
- Have assumed debt equal to 30% of the district’s bonding capacity (percentage is based on revenue sources for repayment).
- Have at least 20% of the district’s teaching stations housed in relocatable classrooms.
- Have placed a local bond on the ballot in the past four years which received at least 50% plus one of the votes cast.

The District has assumed debt greater than 30% of the district’s bonding capacity and Folsom Cordova Unified School District has held a bond election in the last four years and received at least 50% plus one vote yes. These items fulfill the requirements as stated by Government Code Section 65995.6(b).

### ***Requirement III: Needs Analysis***

Government Code Section 65995.6 requires that before fees in excess of the statutory fee can be levied a district must conduct a facility needs analysis. This analysis must demonstrate that the need

for new school facilities for unhoused pupils is attributable to projected enrollment growth from the construction of new residential units over the next five years.

“The needs analysis shall project the number of unhoused elementary, middle, and high school pupils generated by new residential units, in each category of pupils enrolled in the district. The projection of unhoused pupils shall be based on the historical student generation rates of new residential units constructed during the previous five years that are of a similar type of units to those anticipated to be constructed....”

Clarifications of issues that factor into the calculation of the fee are listed below:

- Site acquisition costs are limited to 50% of the cost of the site.
- Local funds are all funds dedicated by the local Board of Education to provide facilities necessitated by new construction, including commercial/industrial fees. Currently the District has no actual “dedicated” local funds for new facilities. The developer fee revenue stream in the District is being used to provide gap funding for current projects. Commercial/industrial developer fees are earmarked for interim housing costs.
- Projected square footage is determined based upon information provided by city/county and developers where the residential units are expected to be constructed.
- The regular grant amount is a per unhoused pupil grant that excludes the cost of interim housing, central district administration, and other site-specific facilities. Therefore, state funding will be less than the amount required to provide adequate facilities. The term “50% fee” is a misnomer since the formula used to calculate the Level II fees does not accurately reflect actual facilities costs. The fee does not reflect interim housing costs, nor does it address the actual costs of construction during times when labor and material costs are driven higher.
- Level II fees may be used to fund facilities to accommodate students generated by new construction.

The Facility Needs Analysis also requires the District to evaluate the following:

- Identify and consider any surplus property owned by the District that can be used as a school site or that is available for sale to finance school facilities.

The District has no surplus property.

- Identify and consider the extent to which projected enrollment growth may be accommodated by the excess capacity in the existing facilities.

The SB 50 baseline capacity of the District was established and approved by the State Allocation Board in 1998. Adjustments have been made to the baseline capacity for the special day class regulation change and the addition of new classrooms built and funded with state school building funds since 1998. The District was allowed to discount relocatable/portable classrooms exceeding a set calculation in SB 50. The baseline capacity includes one closed site, Cordova Lane Elementary. The approved SAB 50-02 Capacity Analyses for both high school attendance areas are attached as Appendix B and summarized in the following table.

**Table 1  
Existing Capacity**

<b>Grade Level</b>	<b>1998 Baseline Capacity</b>	<b>Adjustment for SDC Regulation Change</b>	<b>Pupils Apportioned by SAB to Date*</b>	<b>Adjusted Capacity</b>
<i>SFID 1 : Pupils apportioned are for the following project: Navigator Elementary School</i>

<b>Folsom Total</b>	<b>6,334</b>	<b>( 61)</b>	<b>7,143</b>	<b>13,416</b>
<b>District Total</b>	<b>15,985</b>	<b>( 353)</b>	<b>7,756</b>	<b>23,388</b>

\* State Classroom Loading Summary is based on SAB 50-02 Classroom Analysis.

Senate Bill 50 requires enrollment projections be calculated on the Enrollment Certification/Projection Form SAB 50-01. Projections shall be calculated pursuant to the cohort survival enrollment projection system described in Section 1859.40-1859.53 of Article 5 of the regulations. Based on the SAB 50-01 five-year enrollment projection, the enrollment of the Folsom Cordova Unified School District will reach 35,033 TK-12 students by the start of the 2028/29 school year. The enrollment projection, Form SAB 50-01, is included in Appendix C.

The current School Facility Program capacity is 23,388 TK-12 students and the SAB 50-01(attached) projects 35,033 students by the 2029/30 school year, leaving 10,679 pupils unhoused.

Cordova Lane Elementary School closed at the end of the 2009/10 school year and is being used by the District for district support services and preschool services. The District has considered the use of the Cordova Lane Center, but the site is unsuitable because it is not located in close proximity to any proposed residential development.

- Identify and consider local sources other than fees, charges, dedications, or other requirements imposed on residential construction available to finance the construction or reconstruction of school facilities needed to accommodate any growth in enrollment attributable to the construction of new residential units.

Measure G was passed by the voters of SFID 5 in November 2014 for \$195 million for repairs of existing school sites located in SFID 5 (City of Folsom north of Highway 50).

Measure N was passed by the voters of SFID 4 in November 2006 for \$125 million for existing Rancho Cordova school repairs. The District passed a \$68 million bond (Measure P) in November 2012 for SFID 4 to access funds that were not available under Measure N due to the plummet in assessed property values.

Voters in SFID 3 passed a \$750 million bond (Measure M) in March 2007 for future growth in the area south of Highway 50 and east of Sunrise Boulevard.

Measure R was passed by the voters of SFID 4 in November 2024 for \$144 million for existing Rancho Cordova elementary school repairs.

Measure S was passed by the voters of SFID 4 in November 2024 for \$144 million for existing Rancho Cordova secondary school repairs.

The monies from these bonds are being used to provide an alternate source of funds to mitigate the late arrival of state funds, offset state funding shortfalls, and finance facilities needs that are not funded by state funds or developer fees, and to provide funding for modernization, additions, technology, and student support services. Therefore, local bond funds are not considered by the District to be available to supplement the developer fee.

## IV. LEVEL II DEVELOPER FEE CALCULATION

Senate Bill 50 outlines the methodology for the calculation of Level II fees in Section 65995.5(c) as follows:

- The number of unhoused pupils identified in the school facilities needs analysis shall be multiplied by the appropriate grant amounts provided in subdivision (a) of Education Code Section 17072. This sum shall be added to the site acquisition and development cost determined pursuant to subdivision (h).
- The full amount of local funds the governing board has dedicated to facilities necessitated by new construction shall be subtracted from the amount determined pursuant to paragraph (1).
- The resulting amount "...shall be divided by the projected total square footage of assessable space of residential units anticipated to be constructed during the next five-year period in the school district..."
- "Site acquisition costs shall not exceed half the amount determined by multiplying the land acreage determined to be necessary under the guidelines of the State Department of Education..."

To determine the District's Level II fees staff prepared the following calculations. These calculations are outlined below and are attached as Appendix E.

### Student Generation Rate Study

As part of the preparation for this SFNA, a student generation rate study was conducted. The student generation study included a survey of single-family, single-family attached and multi-family residential units built in the last five years. The generation rate calculations for residences built in the last five years are summarized below:

**Table 2**  
**Student Yield Generation Rates**

<b>Grade Level</b>	<b>Single-family (SF)</b>	<b>Single-family Attached (SFA)</b>	<b>Multi-family (MF)</b>
TK-5	0.35	0.23	0.16
6-8	0.15	0.05	0.07
9-12	0.16	0.07	0.10
SDC	0.02	0.02	0.01
<b>Total</b>	<b>0.68</b>	<b>0.37</b>	<b>0.34</b>

### New Residential Units

The County of Sacramento Community Development Department, City of Rancho Cordova Planning Department and City of Folsom Community Development Department were contacted to provide information regarding current and future development projects. Table 3 is a summary of the development projects listed in Appendix A.

**Table 3  
Projected Residential Development**

<b>Development Type</b>	<b>2025</b>	<b>2026</b>	<b>2027</b>	<b>2028</b>	<b>2029</b>	<b>Total</b>
Single-family	672	987	936	898	867	4,360
Single-family Attached	75	207	258	219	220	979
Multi-family	277	657	1,020	761	585	3,300
<b>Total Units</b>	<b>1,024</b>	<b>1,851</b>	<b>2,214</b>	<b>1,878</b>	<b>1,672</b>	<b>8,639</b>

Students Generated from Projected New Development

The number of students generated from new development in the next five years is determined by multiplying the five-year projected number of residential units by the yield generation factor at the appropriate grade levels. The future unhoused pupil calculation is provided for each type of housing in Tables 4, 5 and 6. Table 7 lists the total number of proposed students generated from future residential development in the next five years.

**Table 4  
Future Unhoused Students from Single-family Units**

<b>Grade Level</b>	<b>Yield Factor Single-family</b>	<b>Proposed Units</b>	<b>Students Generated</b>
TK-5	0.35		1,526
6-8	0.15	4,360	654
9-12	0.16		698
SDC	0.02		87
<b>Total</b>	<b>0.68</b>	<b>--</b>	<b>2,965</b>

**Table 5  
Future Unhoused Students from Single-family Attached Units**

<b>Grade Level</b>	<b>Yield Factor Single-family Attached</b>	<b>Proposed Units</b>	<b>Students Generated</b>
TK-5	0.23		225
6-8	0.05	979	49
9-12	0.07		69
SDC	0.02		20
<b>Total</b>	<b>0.37</b>	<b>--</b>	<b>363</b>

**Table 6  
Future Unhoused Students from Multi-Family Units**

<b>Grade Level</b>	<b>Yield Factor Multi-family</b>	<b>Proposed Units</b>	<b>Students Generated</b>
TK-5	0.16		528
6-8	0.07	3,300	231
9-12	0.10		330
SDC	0.01		33
<b>Total</b>	<b>0.34</b>		<b>1,122</b>

**Table 7  
Total Number of Students Generated from New Development**

<b>Grade Level</b>	<b>Students From SF Units</b>	<b>Students From SFA Units</b>	<b>Students From MF Units</b>	<b>Total Students Generated</b>
TK-5	1,526	225	528	2,279
6-8	654	49	231	934
9-12	698	69	330	1,097
SDC	87	20	33	140
<b>Total</b>	<b>2,965</b>	<b>363</b>	<b>1,122</b>	<b>4,450</b>

State School Facility Program Grant Calculations

Under the State School Facilities Program, the state will provide “grants” to a school district for 50% of the cost to house a student who is unhoused due to enrollment increases. The grant amounts are the State’s estimated 50% share of the cost of housing one student. The District is responsible for matching these state funds with district or local money. For example, a state K-6 grant of \$11,775 would pay for 50% of the cost to house one student; the district is required match the grant for a total of \$23,550. For the Level II fee calculations, the grant amounts are multiplied by the total number of pupils generated from new development over the next five years. Table 8 illustrates this calculation.

**Table 8  
State School Facility Program Grant Calculations**

<b>Grade Level</b>	<b>State Per Pupil Grant Amount</b>	<b>Pupils Generated from SF, SFA &amp; MF Units</b>	<b>Total State Grant</b>
TK-5	\$ 16,131	2,279	\$36,762,549
6-8	17,103	934	15,974,202
9-12	21,698	1,097	23,802,706
SDC	37,924	140	5,309,360
<b>Total</b>		<b>4,450</b>	<b>\$81,848,817</b>

Site Acreage Required

The next step in the fee calculation is to estimate the total number of acres required to house the projected pupils. The District has established guidelines for school facility sizes for the purposes of housing new students. The school master planned capacity differs at the middle and high school level in each SFID. These differences are based on the differing existing facilities and future needs in each SFID. New school facilities will be constructed to accommodate enrollments by grade level groups as follows:

**Table 9  
School Facility Sizes and CDE Recommended Site Sizes  
SFID 1 (Rancho Cordova)**

<b>Grade Level</b>	<b>School Facility Master Planned Pupil Capacity</b>	<b>CDE Recommended Site Size (acres)</b>
TK-5+SDC	673	10.0
6-8	900	22.2
9-12	2,100	54.8

**School Facility Sizes and CDE Recommended Site Sizes  
SFID 2 (Folsom)**

Grade Level	School Facility Master Planned Pupil Capacity	CDE Recommended Site Size (acres)
TK-5	673	10.0
6-8	1,200	23.5
9-12	1,800	51.7

Estimated site acreage needed to house projected pupils is determined by dividing the number of unhoused pupils at each grade level group by the master planned capacity for each type of school to arrive at the number of schools needed per grade level configuration. The number of schools needed is then multiplied by the California Department of Education recommended acreage for the master planned school sizes to arrive at the number of acres needed to adequately house the projected pupils.

**Table 10  
Acreage Required to House Pupils – SFID 1 (Rancho Cordova)**

Grade Level	Unhoused Students	Students Per School Site	Schools Based on Pupils	CDE Recommended Acreage	Acres Needed
		÷	=	x	=
TK5 + SDC	2,419	673	3.594	10	35.94
6-8	934	900	1.038	22.5	23.04
9-12	1,097	2,100	.522	54.8	28.61

**Acreage Required to House Pupils – SFID 2 (Folsom)**

Grade Level	Unhoused Students	Students Per School Site	Schools Based on Pupils	CDE Recommended Acreage	Acres Needed
		÷	=	x	=
TK5 + SDC	2,419	673	3.594	10	35.94
6-8	934	1,200	.778	23.5	18.28
9-12	1,097	1,800	.609	51.7	31.49

Site Acquisition Costs

The next step in the fee calculation is to estimate the site acquisition cost. The separation of SFID 1 and SFID 2 data for the developer fee calculation allows for a more accurate representation of the unique issues associated with the realty markets within the district boundaries.

Total acreage needed is multiplied by the cost per acre at 50% as the State funds 50% of the cost of the site. The *total* acreage needed is used in each of the SFID calculations below to arrive at an overall cost for each SFID. In a later step, the grand total will be divided by the overall estimated new residential square footage to arrive at a fee per square foot rate for each SFID.

**Table 11  
Site Acquisition Costs - SFID 1 (Rancho Cordova)**

Grade Level	Acres Needed	50% Acreage Cost	Site Acquisition Cost
TK-5 + SDC	35.94	\$300,000	\$ 10,782,000
6-8	23.04	300,000	6,912,000
9-12	28.61	300,000	8,583,000
<b>Total</b>			<b>\$ 26,277,000</b>

**Table 12  
Site Acquisition Costs - SFID 2 (Folsom)**

Grade Level	Acres Needed	50% Acreage Cost	Site Acquisition Cost
TK-5 + SDC	35.94	\$435,000	\$ 15,633,900
6-8	18.28	435,000	7,951,800
9-12	31.49	435,000	13,698,150
			<b>\$ 37,283,850</b>

Site Development Costs

SB 50 allows the inclusion of site development costs in the fee calculation. Site development costs shall not exceed the estimated amount that would be funded by the State Allocation Board pursuant to its regulations governing grants for site development costs. These improvements can include applicable drainage, utility and road improvements.

Some areas within SFID 2 historically have had higher site development costs due to naturally occurring asbestos in the foothills area. At this point the existing Rancho Cordova residential areas have not experienced similar site development issues. The site development costs have been separated to represent the environmental and geological differences within the two SFID areas.

The *total* acreage needed is used in each of the SFID calculations below to arrive at an overall cost for each SFID. In a later step, the grand total will be divided by the overall estimated new residential square footage to arrive at a fee per square foot rate for each SFID. The costs for site development in the SFID 1 are shown in Table 13 and the costs for site development in the SFID 2 are shown in Table 14.

**Table 13  
Site Development Costs - SFID 1 (Rancho Cordova)**

Grade Level	Acres Needed	Site Development Cost @ 50% per site	Total Site Development Costs @ 50%
TK-5 + SDC	35.94	\$ 200,000	\$ 7,188,000
6-8	23.04	200,000	4,608,000
9-12	28.61	200,000	5,722,000
<b>Total</b>			<b>\$17,518,000</b>

**Table 14  
Site Development Costs - SFID 2 (Folsom)**

Grade Level	Acres Needed	Site Development Cost @ 50% per site	Total Site Development Costs @ 50%
TK-5 + SDC	35.94	\$ 435,000	\$ 15,274,500
6-8	18.28	435,000	7,769,000
9-12	31.49	435,000	13,383,250
<b>Total</b>			<b>\$ 36,426,750</b>

Fee Calculations

The square footage of residential units to be constructed and attributable to the unhoused students in Tables 4, 5 and 6 is estimated to be 15,622,100 square feet in Folsom and 15,404,100 in Rancho Cordova. The calculation is based on the average single-family home in the Folsom Cordova Unified School District being 2,425 square feet (2400 in Rancho Cordova and 2450 in Folsom), the average single-family attached home being 1,500 square feet and the average multi-family unit being 1,052 square feet. Table 15 illustrates the square footage calculation.

**Table 15**  
**Proposed Residential Square Footage in the Next Five Years- SFID 1 (Rancho Cordova)**

Type of Construction	Number of Proposed Units	Average Square Feet	Total Square Footage
Single-family	4,360	2,400	10,464,000
Single-family Attached	979	1,500	1,468,500
Multi-family	3,300	1,052	3,471,600
<b>Total</b>	<b>8,639</b>		<b>15,404,100</b>

**Proposed Residential Square Footage in the Next Five Years- SFID 2 (Folsom)**

Type of Construction	Number of Proposed Units	Average Square Feet	Total Square Footage
Single-family	4,360	2,450	10,682,000
Single-family Attached	979	1,500	1,468,500
Multi-family	3,300	1,052	3,471,600
<b>Total</b>	<b>8,639</b>		<b>15,622,100</b>

The total cost to house these students is the sum of the state grant amount, the site acquisition costs, and the site development costs less any local revenues available from the District. To arrive at a per square foot fee, the total cost is then divided by the total residential square footage to be constructed. This calculation is done for each SFID to arrive at a cost per square foot attributable to the corresponding SFIDs unique site acquisition and development costs. The developer fee calculations for SFID 1 are shown in Table 16 and for SFID 2 in Table 17.

**Table 16  
Level II Fee Calculations - SFID 1**

<b>Type of Cost</b>	<b>Total Cost</b>	<b>Estimated Square Footage</b>	<b>Level II Fee</b>
State Grant	81,848,817		
Site Acquisition	26,277,000		
Site Development	17,518,000		
<b>Total</b>	<b>125,643,817</b>	<b>15,404,100</b>	<b>\$ 8.16</b>

Education Code Section 65995.7 (currently suspended) will allow the District to charge the Level III rate of \$16.32 per square foot of new residential construction if the State Allocation Board ran out of new construction funds to apportion to school districts.

**Table 17  
Level II Fee Calculations - SFID 2**

<b>Type of Cost</b>	<b>Total Cost</b>	<b>Estimated Square Footage</b>	<b>Level II Fee</b>
State Grant	81,848,817		
Site Acquisition	37,283,850		
Site Development	36,426,750		
<b>Total</b>	<b>155,559,417</b>	<b>15,622,100</b>	<b>\$9.96</b>

Education Code Section 65995.7 (currently suspended) will allow the District to charge the Level III rate of \$19.92 per square foot of new residential construction if the State Allocation Board ran out of new construction funds to apportion to school districts.

## V. CONCLUSION AND RECOMMENDATION

Based on this School Facility Needs Analysis, the Folsom Cordova Unified School District meets all applicable requirements to justify the adoption of the Level II developer fees in accordance with Government Code Section 65995.5.

Based on this School Facility Needs Analysis provided, it is recommended that the Folsom Cordova Unified School District, subject to meeting legal requirements:

- approve this School Facility Needs Analysis, and
- adopt the Level II fee of \$8.16 per square foot of new residential single-family construction in SFID 1,
- adopt the Level II fee of \$9.96 per square foot of new residential construction in SFID 2,
- adopt the Level III fee of \$16.32 per square foot of new residential construction in SFID 1, and
- adopt the Level III fee of \$19.92 per square foot of new residential construction in SFID 2.

Student Generation Calculation:										
Type of Housing	Proposed Housing Units		Average Square Feet		Total Square Feet	Grade Level Grouping		Student Yield Per Household		Students Generated (Prop. Units x Yield)
Single Family	4,360	x	2,400	=	10,464,000	TK-5	x	0.35	=	1526
						6-8	x	0.15	=	654
						9-12	x	0.16	=	698
						SDC	x	0.02	=	87
						<b>0.68</b>				
Single Family Attached	979	x	1,500	=	1,468,500	TK-5	x	0.23	=	225
						6-8	x	0.05	=	49
						9-12	x	0.07	=	69
						SDC	x	0.02	=	20
						<b>0.37</b>				
Multi Family	3,300	x	1,052	=	3,471,600	TK-5	x	0.16	=	528
						6-8	x	0.07	=	231
						9-12	x	0.10	=	330
						SDC	x	0.01	=	33
						<b>0.34</b>				
<b>Total Housing Units</b>		<b>8,639</b>		<b>Total Square Feet</b>		<b>15,404,100</b>		<b>Total Students Generated</b>		<b>4,450</b>
Schools and Acreage Required Calculation:										
Students Generated	Students Generated		Master Planned Capacity		Number of Schools Required		CDE Recommended Acreage		Number of Acres Required	
K-5 + SDC	2419	÷	673	=	3.594	x	10.0	=	35.94	
6-8	934	÷	900	=	1.038	x	22.2	=	23.04	
9-12	1097	÷	2100	=	0.522	x	54.8	=	28.61	

**State Funding and Level II Fee Calculation**

State Base Grant Calculation:									
Grade Level Grouping	Students Generated		State per Pupil Grant		Total State Base Grant				
TK-5	2279	x	\$16,131	=	\$36,762,549				
6-8	934	x	\$17,103	=	\$15,974,202				
9-12	1097	x	\$21,698	=	\$23,802,706				
SDC	140	x	\$37,924	=	\$5,309,360				
<b>Total State Base Grant</b>					<b>\$81,848,817</b>				
State Site Acquisition Cost Calculation:									
Grade Level Grouping	Site Acq. per Acre @ 100%		Site Acq. per Acre @ 50%		Acres Required		Total State - Funded Site Acquisition		
TK-5 + SDC	\$600,000	÷ 2	\$300,000	x	35.94	=	\$10,782,000		
6-8	\$600,000	÷ 2	\$300,000	x	23.04	=	\$6,912,000		
9-12	\$600,000	÷ 2	\$300,000	x	28.61	=	\$8,583,000		
<b>Total Site Acquisition Costs</b>							<b>\$26,277,000</b>		
State Site Development Costs (Service Site, General Site, Offsite, Utilities, NOA):									
Grade Level Grouping	Site Dev. per Acre @ 100%		Site Dev. per Acre @ 50%		Acres Required		Total State-Funded Site Development		
TK-5 + SDC	\$400,000	÷ 2	\$200,000	x	35.94	=	\$7,188,000		
6-8	\$400,000	÷ 2	\$200,000	x	23.04	=	\$4,608,000		
9-12	\$400,000	÷ 2	\$200,000	x	28.61	=	\$5,722,000		
<b>Total Site Development Costs</b>							<b>\$17,518,000</b>		
Total State Matching Fund Requirement							\$125,643,817		
Divided by Proposed Residential Square Footage							15,404,100		
<b>Level II Fee for SFID 1 (Rancho Cordova)</b>							<b>\$8.16</b>
