<b>Recommended Activities, Investigations, Interdisciplinary Connections, and/or Student Experiences to Explore NJSLS-CLKS within Unit</b>		
<p><b>Essential Questions:</b></p> <p>Lesson 7.1: How can we use models to represent multiplication of decimals?</p> <p>Lesson 7.2: How can we use place-value strategies to place a decimal point when multiplying?</p>		

Lesson 7.3: How can we understand the concept of having the correct number of decimal places in a product?  
Lesson 7.4: How can we use properties of multiplication to solve problems?

**Essential Understandings:**

Lesson 7.1: Using models to represent the multiplication of decimals helps us visualize the process.  
Lesson 7.2: Using place-value strategies to place a decimal point when multiplying ensures that we maintain the correct value of the product.  
Lesson 7.3: Understanding the concept of having the correct number of decimal places in a product helps us maintain numerical accuracy and reinforces our comprehension of place value and the properties of decimal numbers.  
Lesson 7.4: Using properties of multiplication, such as the commutative, associative, and distributive properties, allows us to simplify complex problems.
