HYNERPETON

Happy Birthday
AMERICA

Help us change our state fossil to celebrate America's 250th Birthday

Help us make this EPIC

E - EDUCATE

Help us educate individuals
to change PA history

P - PRESERVE

Help us raise awareness and foster a
deeper understanding of PA's rich
geological and paleontological heritage

I - INNOVATE

Help us achieve this and alter
PA's history **FOREVER**

C - CELEBRATE

Help us celebrate rare fossil that was
found in our very own town of Hyner, PA

HYNERPETON

- The first and only Hynerpeton was discovered in Hyner, PA
- Lived in the rivers and wetlands of PA and is evidence of one of the first organisms to develop lungs.
- Thought to be from 2 – 5 feet long and was likely very strong based on its bone structure
- The name means “creeping monster from Hyner”
