<p><b>NJSLS CAREER READINESS, LIFE LITERACIES &amp; KEY SKILLS</b></p>	<p><b><i>Disciplinary Concept:</i></b>                  Creativity and Innovation</p>	
	<p><i>Core Ideas:</i></p>	<p>Creativity includes the use of a wide range of idea-creation techniques (such as brainstorming) to generate new and worthwhile ideas (both incremental and radical concepts). Additionally, within creativity, flexibility is evident through the elaboration, refinement, analysis and evaluation of ideas in order to maximize creative efforts. Originality and inventiveness in work may also be evident while understanding the real-world limits to adopting new ideas. Failure is viewed as an opportunity to learn and adapt as well as understand that creativity and innovation is a long-term, cyclical process of small successes and frequent mistakes.</p>
	<p><i>Performance Expectation/s:</i></p>	<p>With a growth mindset, failure is an important part of success.</p> <p>Innovative ideas or innovation can lead to career opportunities.</p>

	<b>Career Readiness, Life Literacies, &amp; Key Skills Practices</b>
	Demonstrate creativity and innovation: Students regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.
