

Infinite Campus

As the **most trusted name in student information**, Infinite Campus manages 10 million students in 46 states through school districts, schools, regional consortia, state departments of education and the federal government. Since our founding in 1993, our mission has been to Transform K12 Education®. We provide solutions that help schools run more efficiently, allow teachers to spend more time with students, and encourage students to rediscover the joy of learning.

Our agile development structure allows 250+ in-house developers to launch the most advanced products and tools for K12 schools. Free monthly enhancements are available every month to ensure your SIS never becomes outdated and is always on the cutting edge of educational technology needs. New enhancements and tools are based on forecasted trends, needs, and customer requests.

Infinite Campus offers a holistic solution with a core product offering more than two thousand powerful tools to support your district's operations. In addition, we offer optional **fully integrated products** to give districts one single database for all their needs.

Explore the possibilities:

Video: [15-minute SIS Overview](#)

Infinite Campus' core methodology, OHIO (Only Handle Information Once) ensures districts have a streamlined approach to data, once a change is saved in the database, it is available in real time to all stakeholders. All data is date stamped and allows easy access to active and historical records.

Campus exceeds competitors with our standard reports (200+, each can be customized when run), and series of Ad-Hoc report writer tools, including Data Viewer, Filter Designer, Data Export, and Data Analysis.

Campus uses a unique Census structure, where all “people” have a single record in the system, with one or more relationship(s) defined to other people (children in their family, students in a teacher’s class, students who are case managed by a special educator, etc.). The goal is that if anything changes for that person (they get married, divorced, assigned to a new class, have a new email or phone number) the data is saved once. No need for duplicated data entry when changes arise.

Infinite Campus

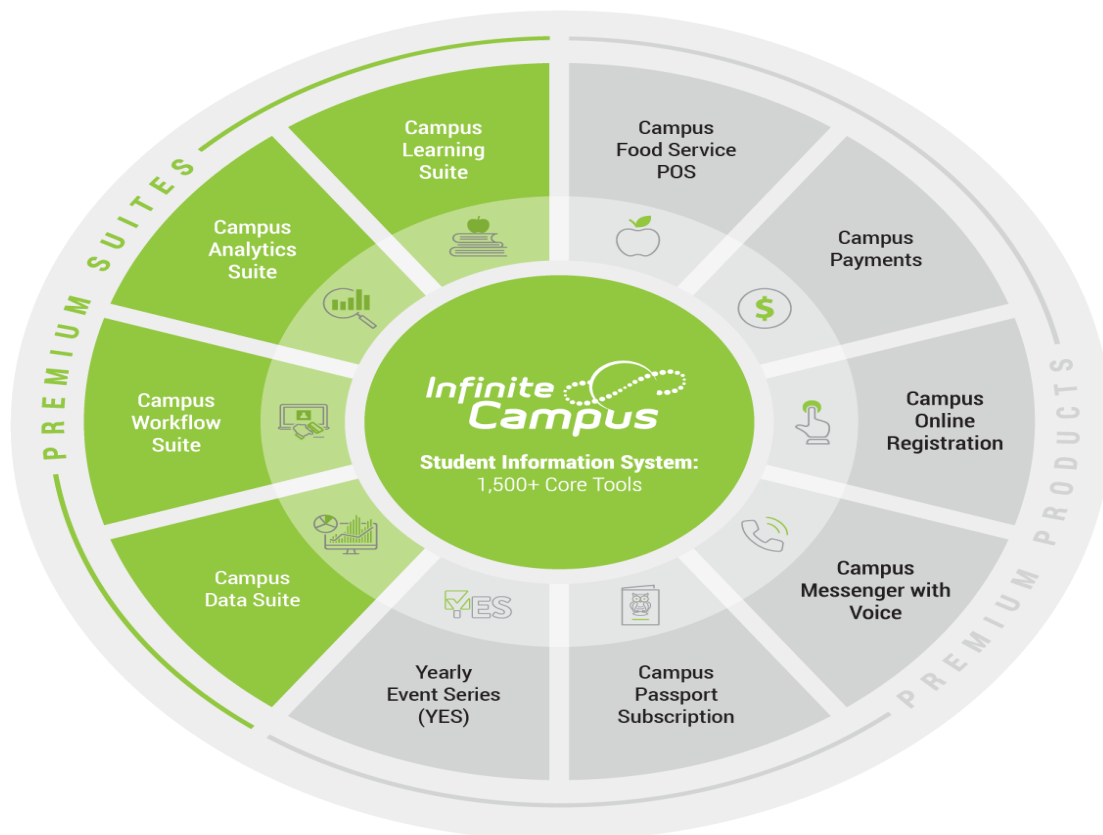

Infinite Campus offers more core functionality than any other system. We help the K12 community efficiently serve students and communicate instantly with their stakeholders. Because all the features are built-in, data is entered once and immediately available across the district.

HIGHLIGHTS INCLUDE:

- Mobile Apps: Campus Parent & Campus Student
- Parent & Student Portal
- Ad Hoc Reporting
- Schedule Board
- LMS Tools
- Grade Book
- Multi-year Academic Planner
- Special Education
- Student Records Exchange
