

Annual School Health Services Notification

As part of the Colorado School Health Services (SHS) program, Eagle County School District is entitled to receive reimbursement for health related services. The program is an extension of state and federal healthcare programs, but specific to schools. Revenue generated through this program allows ECSD to deliver expanded health and other services in the schools. Your consent allows us to potentially receive funding for services provided to your child. This program does not impact the right to individual health care. Information collected is not shared with other government agencies.

Signed consent is only required one time. If consent is required for your student, you will be notified by your school. The district will provide [annual notification](#) to families, notifying you of your rights and providing instruction on who to contact with questions.
