

LET'S HELP THE PLANET & SET UP A FOOD RECYCLING STATION

Did you know recycling food helps the Earth? When we toss food scraps into special bins, they can turn into healthy soil instead of going to a landfill.

LET'S SET UP A FOOD RECYCLING STATION!

Make sorting food waste easy, fun, and neat so everyone can help!

WHAT YOU'LL NEED:

Rubber Gloves

Food Waste Bins

Clean-up supplies (soap, spray, broom, mop)

1 Pick your spot!

- Walk around your cafeteria and spots where people eat snacks.
- Place food bins next to trash cans so it's easy to choose the right one.
- Don't forget places like the teacher's lounge or snack areas!

2 Label bins with pictures and colors.

- Use big, colorful signs with pictures of what goes inside (like apple cores or banana peels).
- Keep it simple! Try labels like: "Food Only – No Wrappers!"
- If you can, use different-colored bins to make sorting super easy!

3 Keep it Clean.

- Ask custodians or helpers to empty bins often.
- Peek inside every day to make sure bins aren't too full.
- If one bin gets really full, have a Plan B (like an extra bin nearby).
- A clean station = more kids will want to join in!

Now you're helping your school recycle food and protect the planet!

☀️ LET'S GO, GREEN TEAM! ☀️
