River Bluff Campus

Installation of the gym floor is complete in the River Bluff addition! Since the paint and final layer of sealant was applied earlier this week, the floor has begun to cure. This process will require a couple weeks before the first shots can take place on the new hoops. After the floor is cured, installation of the bleachers will begin.

At the District Office, installation of the elevator is underway in the elevator lobby addition. Exterior glazing and metal soffit panels are complete. Drywall tape and paint are underway at the interior with flooring set to begin next week.

Site work is underway across the River Bluff Campus! Demolition of the existing maintenance facility is nearly complete and rough grading is underway. In the coming weeks remaining site utilities will be completed making way for site concrete activities to begin.

Above: a first look at the River Bluff addition gym floor following striping and sealant!

High School

This week at the high school, we completed the flooring installation in both the Field House concession stand space and the pool entrance vestibule. Additionally, substantial progress was made on the flooring installation in the common spaces outside of the Performing Arts Center (PAC). Looking ahead, upcoming work will include the commissioning of the new chillers and the start of the first phase of demolition in the Pool area.

DID YOU KNOW?

The new elevator lobby addition to the District Office building will feature a three-stop elevator. This elevator will provide access to all three floors of the building. Previously, the existing elevator only ran from first to second floor.
