

HEALTHY ROSTER

Beginning with the 2025-2026 school year, the Manheim Central Athletics Department will be requiring all PIAA CIPPE forms (physical packets) be submitted electronically via Healthy Roster. Healthy Roster is a HIPAA compliant Electronic Medical Record (EMR) system designed specifically to be used by athletic trainers for medical documentation. This system will be used to store all physical paperwork, document injuries, record treatments, and store doctor's notes. Healthy Roster will help streamline the process of ensuring all athletes are "Cleared" for the first day of practices each sport season. **No paper or emailed copies will be accepted, and all parents/guardians are responsible for uploading their own information.**
