

What's In Your DNA?

The more that we understand what motivates our students and what each student uniquely brings to the community, the more we can tailor instruction to their needs.

Try Engaging Students by asking: What's in your DNA?

D DREAMS: What do you think deeply about? Where do you want to go in the future?

N NEEDS: How can I help you? How can I be a better teacher for you?

A ASSETS: What are you good at? What could you teach others?
