Making connections between your oral health and overall health

Importance of good oral health

DELTA DENTAL

Oral health is connected to overall health

The mouth can serve as an important early-warning detection system.

One out of every two American adults age 30 or older has periodontal disease.

The mouth can be provide important early-warning detection for more than **120 diseases**.

Tooth decay is the **single most common** chronic childhood disease.

More than half of U.S. children ages 5 to 9 have at least one cavity or filling.

Pre-Determination Estimates

Important step before receiving major treatment

Estimating your dental care costs is simple. Asking your dentist for a pre-determination estimate* from Delta Dental before you agree to receive any recommended major treatment, lets you know up front what the plan will pay, and the difference you will be responsible for.

A pre-determination estimate is useful for costlier procedures such as:

- Crowns
- Wisdom-tooth extractions
- Implants
- Bridges
- Dentures
- Periodontal surgery

When your dentist submits a pre-determination estimate to Delta Dental, Delta Dental sends them an estimate of your share of the cost and how much Delta Dental will pay.
