METRO RESA MATHEMATICS PRESENTS: BRIDGING GRADES 3-6

In these professional learning sessions, participants will explore how the Concrete-Representational-Abstract (C-R-A) instructional approach can effectively bridge the gap in student understanding of key math concepts from grades 3 to 6. Through two focused sessions — one on **Fractions and Decimals**, and the other on **Multiplication and Division** — we'll examine how vertical alignment using C-R-A can provide a deeper, more connected learning experience for students. By utilizing hands-on strategies, visual representations, and abstract problem-solving techniques, teachers will gain the tools to strengthen their students' mathematical fluency and understanding across grade levels.

EXPLORING THE VERTICAL LEARNING PROGRESSION OF MULTIPLICATION & DIVISION

**AUGUST 28, 2025
8:30 AM - 3:30 PM**

**SEPTEMBER 9, 2025
8:30 AM - 3:30 PM**
