Problem of the Week # 13
Postage Possibilities

A U.S. First-Class stamp costs 73 cents. Corey needs to mail some letters, but they don't have any 73-cent stamps. What combinations of these stamps could they use to make exactly 73 cents? *(Note: Corey has multiple stamps at these denominations.)*

Corey has:
52-cent stamps
32-cent stamps
20-cent stamps
15-cent stamps
3-cent stamps

Share <u>all</u> the combinations you can find.
