

NORTH MERRICK
UNION FREE SCHOOL DISTRICT
— Nurturing Young Minds —

Cynthia Seniuk, Ed.D.
Superintendent of Schools

April 28, 2025

Dear North Merrick Families,

The North Merrick UFSD is committed to protecting the health and well-being of our students, teachers, and staff. In compliance with the New York State Department of Health Lead Testing in School Drinking Water (10 NYCRR Subpart 67-4) regulation, we recently performed an updated inventory of all district-wide water fixtures. Testing was performed by J.C. Broderick & Associates, Inc., a certified environmental consulting and testing company.

As you may be aware, water fixtures were previously tested in 2016 and 2020. The latest tests indicated that only one (1) location exceeded the recently reduced action level of 5 parts per billion. In accordance with this regulation and our remediation plan, this one (1) fixture was immediately replaced, and retested over the April break. Today, I am happy to report that no elevated lead levels exist within the North Merrick UFSD at fixtures used for cooking or drinking.

For more details, please visit our website to read the entire sampling report. If you have any questions, please contact the Director of School Facilities & Operations, Samuel Carder, at (516) 292-3095.

Sincerely,

Cynthia Seniuk, Ed.D.
Superintendent of Schools
North Merrick UFSD.
