Principal
Shakeria Chaney, Ed.D.

Assistant Principals
Eclan David, Jr. Ph.D. & Morgane Rainwater

Great Things Happening at North Clayton Middle Magnet School

With a deep commitment to academic excellence, innovation, and equity, NCMS continues to pave the way for what 21st-century learning should look like. Established in 1986, North Clayton Middle School has served a diverse student population and is always a game changer in the community. In 2023, NCMS transitioned into a whole-school Magnet STEM School through the Department of Education and Federal programming which reflects upon our vision to provide all scholars with a 21st century education that fosters curiosity and ingenuity to prepare them for post-secondary success. This initiative has allowed us to partner with organizations such as Georgia Tech, LocoRobo, PLTW and many others to help integrate STEM education into the classroom.

Our Magnet program offers a full range of CTAE pathways where students explore automation and robotics, artificial intelligence, and drone technology through hands-on, real-world projects. With over 25 student organizations, including the award-winning RoboTigers G3 Drone Team and TSA, our scholars are immersed in enriching extracurriculars that elevate their learning beyond the classroom.

Along with our recent and official Cognia STEM certification in 2024, NCMS has built a strong foundation of student achievement. We believe in cultivating leadership, creativity, and innovation in every student. Through project-based learning and early access to high school credit courses in 8th grade, we prepare scholars to soar academically and socially. Our scholars have consistently brought home victories in district and state competitions. North Clayton Middle School will continue to be a gamechanger. We are proud to be "The 30349".
