

General Project Information Bond 2023

Project: Campus Flooring Replacement

Project Description: Elementary campuses to receive replacement of all main entry and main corridor flooring, as well as replacement of all hallway, classroom and common area flooring including the replacement of gymnasium and cafeteria flooring:

- Stanley Elementary (SSE)
 - Flooring will be 16-17 years old at time of replacement.

Project Description: Junior high campuses to receive replacement of all main entry and main corridor flooring, as well as replacement of all hallway, classroom and common area flooring:

- Cardiff Junior High (CJH)
 - Flooring will be 17 years old at time of replacement.
 - CTE labs will be renovated, and flooring will need to be replaced on the classroom side of the instructional space.
- WoodCreek Junior High (WCJH)
 - Flooring will be 17 years old at time of replacement.
 - CTE labs will be renovated, and flooring will need to be replaced on the classroom side of the instructional space.
- Seven Lakes Junior High (SLJH)
 - Flooring will be 14 years old at time of replacement.
 - CTE labs will be renovated, and flooring will need to be replaced on the classroom side of the instructional space.
- Beckendorff Junior High (BDJH)
 - CTE labs will be renovated, and flooring will need to be replaced on the classroom side of the instructional space.

Background & Justification: The flooring in the main gathering and most traveled areas is a critical component of the building. The flooring in these areas covers the pathway for the students, faculty, and support personnel on a daily basis. The flooring in the buildings have exceeded their life expectancies and need replacement. Katy ISD implements replacement of flooring based on a 15-year cycle. When this has been extended, repairs have been made to further the life span of materials, but these repairs take a toll on the flooring and the adjacent finishes.
