

## General Project Information Bond 2023

### **Project: Katy High School (KHS) Music Hall Addition**

#### **Project Description:**

- Construction of new band and orchestra hall
- Reconfigure the old vocational hall, east end of the campus, for classroom space. Majority of programs that were in the vocational hall have been relocated to the new Career & Technology Education building on the west end of the campus.
- Design for renovation of A and B halls. Majority of work is MEP related to electrical and fire water loop. Goal is to have design complete for the next bond.

#### **Background and Justification:**

- The current Katy High School band hall is original to the campus, opening in 1952. This facility configuration and layout no longer serves the need for band and orchestra in terms of meeting student needs for practice and storage. The new facility will meet our current standards for these spaces, in line with Jordan High School and High School #10.
- Reconfiguration of the old vocational hall (V Hall) to support growth.
- Due to the age of the facility, we are recommending a renovation to A and B halls to address aging building components and student learning spaces.
