Project: Campus Retrofit

Project Description: Refresh and upgrade campus technology.

Background & Justification: All campuses are on a 5-year technology refresh life cycle. A retrofit includes new technology campus wide. Classrooms will receive a desktop computer, teacher laptop, interactive panels, and student devices. Student devices are used on a daily basis and for online testing. Other areas of the campus such as the library, computer labs, offices, and the cafeteria will receive new desktop computers. In addition, campuses will receive document cameras, updated projectors for labs and other necessary peripheral devices including ID badge printers, Raptor printer/scanners, handheld scanners, and some replacement printers.
