Project: Agricultural Barn #10

Katy ISD provides an agricultural barn to support the high school FFA programs. High School 10 will expand the opportunity for students and an additional barn will be necessary to support this growing program. Due to the growth of FFA student agricultural projects, the existing barns house animals from multiple campuses to fully utilize the space.

Each barn has 44 animal pens. 38 pens are dedicated to pigs, lambs, and goats and 6 pens are dedicated for steer. The steer pens can be subdivided for pigs, lambs, and goats as necessary.
