

HRE ROCKETS

2nd Grade

NOVEMBER NEWS

What's Happening in...

ELA:

This month in ELA we will be studying how to describe the connections between series of historical events, scientific ideas, or steps in a process in text. During our study, our focus will be on the following skills: describe connections between historical events, scientific ideas or concepts, and technical process in a text.

Math:

This month in Math we will be adding within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction to explain the reasoning used.

Science:

This month in Science we will be observing and creating models of Earth's land surfaces on maps. During our study students will be categorizing different landform types from patterns of rock, soil, sand, river, stream, lake, and pond. Students will also be able to obtain information about locations of water on Earth's surface in order to identify how geographic locations of water on Earth contribute to water's state as a solid or liquid.

Social Studies:

This month in Social Studies we will be analyzing physical and political maps in order to recognize the difference between physical and political maps.

Birthdays

Happy Birthday to all students celebrating a birthday this month!
