Golden View Elementary

An environmental science school where children learn through hands-on, minds-on, real-world experiences.

At Golden View, our vision is to nurture the growth of well-educated, environmentally aware, and socially responsible young adults, empowering them to become responsible leaders.

Golden View provides unique learning experiences for students:

- ✦ Integration of California's Environmental Principles and Concepts through all subject areas.
- ✦ Our 2.5 acre farm allows us to provide outdoor, hands-on science lessons.
- ✦ Caring For Living Things: Farm animals help children understand life cycles, the reciprocity between animals and humans, and the importance of making responsible choices.
- ✦ Farm To Table: Through a garden, children learn to plant, tend, harvest, and cook nutritious food.
- ✦ Recycle, Reuse And Repurpose: Composting, recycling, and repurposing are key to going green at Golden View.
- ✦ Ropes course fosters teamwork through engaging and collaborative challenges.
- ✦ Gifted and Talented Education program
- ✦ 1:1 technology for all grade levels
- ✦ Music for all grades; Art Explorers for 4th & 5th grade

Golden View offers field trips customized for Ocean View School District schools and local education organizations for immersive hands-on learning experiences. Participants have the opportunity to explore topics such as decomposition, composting, harvesting, and interacting with our farm animals, among other engaging experiences.
