

Safety Issues

December 19, 2024

- Discussed the death of one of our high school students that was murdered the prior day after school. We decided that the protocols that are in place for safety are above and beyond and there is no threat to the school.
- Can maintenance check 17th street hill for ice throughout the day. Snow melts from sun and salt but ices over quickly.
- Central would like new carpets for the lobby area that are easier to move and clean from the morning foot traffic.
- I will be letting staff know that during in climate weather, they are not to be on campus before 6:30 to give crews enough time to plow and salt.
